ZyXEL ZyAIR G-4100 v2

802.11g Wireless Hot Spot 'In-a-Box' Gateway with Account Generating Thermal Printer
manufacturers part number 91-005-152002B

Share high speed bandwidth with complete firewall in a single box

Features

Integrated Hotspot service
Scalable user Authentication and Accounting
Rich Networking Functions
Customized Login Page, Advertisement URL link and Walled Garden

Benefits

All in One hotspot gateway

ZyXEL G-4100 v2 is a all in one hotspot gateway that provides secure Internet access by free or changed based policy as the business owner want. It provide authentication, accounting function for both wireless and wired clients, support up to 100 concurrent users. G-4100 v2 work with SP-200E, statement printer, the business click the button on the SP-200E, it automatically generate and print out the account, password, and pre-configured time for internet access hours. All functions required for hotspot service is all in G-4100 v2.

Scalable and easy to mange user-authentication and accounting

G-4100 v2 has embedded and very easy to configure authentication server, the hotspot business owner, such as coffee shops, book stores, hotels or resorts, does not need any other hardware or software for to provide the hotspot service, it's all in G-4100 v2. On the other hand, G-4100 v2 also support RADIUS server for large scale of hotspot service deployment for chain-stores, airport terminals to provide roaming capability from one store to another through centralized authentication and accounting.

Best hotspot user experience with security and privacy

To provide the best hotspot user experience, the G-4100 v2 featured with rich networking functions, including IP PnP function, DHCP server, NAT, MAC address filtering, IP address filtering, etc. The IP PnP technology enables the ultimate user experience of "No configuration needed at all". It transparently take care of the IP networking before user know it, dramatically improve user satisfaction and reduce technical support effort. User no longer need to change the IP address, subnet mask, default gateway, web proxy and even SMTP server etc. More than that, V-LAN security for wired and wireless client, NAT, layer 2 isolation and MAC, IP address filtering technology work behind the scene to ensure each users privacy are protected, preventing from personal sensitive data exposed in public.

Tailor made Hotspot gateway

With powerful marketing cooperation features of G-4100 v2, business can customize log-in page, and redirect user to advertisement URL link, or provide limited internet access to owner's home page. Additionally, Powerful management function, including SSL log-in page, secure remote function, LAN and WLAN device management, all these functions are designed for hotspot gateway. For easy deployment, G-4100 v2 support PoE, and the statement printer, SP-200E support PoE as well. Now you can deploy your hotspot solution regardless the concern of the location of power
