VAPOR™: ATLAS™ 250

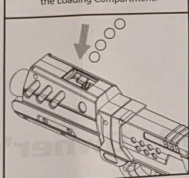

The Vapor Atlas 250 uses Vapor Gel Ammo that is "grown" using a special water-based technology. It is friendly to the environment and requires no clean up. The Vapor Gel Ammo will be fully grown when you purchase the product. The Vapor Gel Ammo will evaporate over time. Do not attempt to load or fire anything except Vapor Gel Ammo with your Vapor Atlas 250.

LOAD THE ATLAS 250

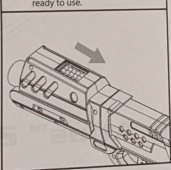

1 Open Loading Compartment Cover.

2 Load Vapor Gel Ammo into the Loading Compartment.

3 Close the Loading Compartment Cover and the Vapor Atlas 250 is ready to use.

- Load no more than 50 Vapor Gel Ammo at one time into the Loading Compartment.
- Only use Vapor Gel Ammo, which has been specifically designed for this product. Do not use any other pellets. Other pellets will not work well with the Vapor, and also may cause the Vapor to jam or break. To order more Vapor Gel Ammo go to www.vaporblaster.com or the retailer where you purchased your Vapor Atlas 250.
- Product will work best when Loading Compartment is at least 50% full.

USING THE ATLAS 250

1 Cock it by pulling the Slide back until it clicks, then push it forward until it clicks back in place.

Tip nose up for easiest loading

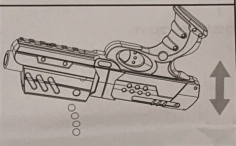

2 Fire by pulling the Trigger. For the next shot, cock it again and fire.

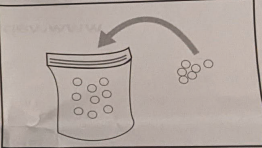

NOTE: Occasional misfiring or multi-firing is normal.

STORING THE ATLAS 250 AND GEL AMMO

1 Remove Vapor Gel Ammo from Loading Compartment.

2 Store unused ammo in a sealed container, away from direct light and heat, in a cool area.

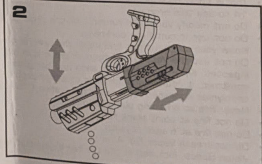

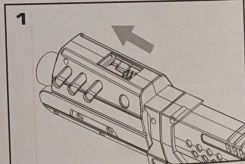

Store your Vapor unloaded and keep away from children under the age of 14. The Vapor Gel Ammo should be removed from the Vapor after use and stored. For best results, keep the ammo in a cool location, away from direct sunlight. Extended exposure to air, heat, or direct sunlight may cause ammo to shrink. Keep unused Vapor Gel Ammo sealed in its original packaging or in another sealed container. If your ammo shrinks while stored (unlikely if sealed and kept out of heat), place in distilled water for 1-3 hours and it will return to its original size.

Place Vapor Gel Ammo here to check if it is at full size. Do not allow to grow larger than size indicated.

HOW TO CLEAR A JAM

The Vapor should not jam with Vapor Gel Ammo. Using other ammo or pellets may cause it to jam or otherwise not function properly. If your Vapor should become jammed, open the Loading Compartment Cover, turn the product upside down, shake and move Slide back and forth to dislodge the stuck Vapor Gel Ammo.

WARNING

- Do not aim at eyes or face.
- Do not use product in such a way that it might be mistaken for an actual firearm by law enforcement officers and others.
- Altering any coloration or markings in order to make this product appear more realistic and/or brandishing or displaying the product in public is dangerous and may be a crime.
- This is sporting equipment and is intended for persons age 14 and up. Do not allow children under 14 to use this product.
- Do not modify Vapor Gel Ammo™ or the product itself.
- Do not use in complete darkness.
- Know your surroundings and clear the area of obstructions before use.
- Do not eat the Vapor Gel Ammo or place it in mouth. If numerous pellets are accidentally ingested, seek medical assistance and bring this manual with you. While the Vapor Gel Ammo is non-toxic, it could cause choking or other problems if ingested. (Vapor Gel Ammo contains inert copolymer acrylate resin, deionized water, DOWICIL 200 and denatonium benzoate.)
- Never fire at anything but a target.
- Do not fire at point blank range.
- Do not fire at fragile objects.
- Do not freeze Vapor Gel Ammo.
- Vision Specs, included in the Double Vision Battle Pack, do not provide protection against hardened objects.
