PETITIONERS' EXHIBIT 1035
Prime Time Toys et al. v. Spin Master, Inc.
IPR2023-01339

BE IT REMEMBERED that on THURSDAY, the 9TH DAY OF FEBRUARY, 2023, at the hour of 9:02 A.M., of said day, at 500 Arguello Street, Suite 500, Redwood City, California 94063, before me in-person, CHRISTA YAN, a Certified Shorthand Reporter, State of California, personally appeared GERALD FULLER, who was examined as a witness in said cause; that said transcript format was prepared in accordance with California Code of Regulations Section 2473.

[redacted]

[redacted]

Okay. Will the court reporter please administer the oath.

GERALD FULLER,

the Witness, called on behalf of the Respondents, being duly sworn to state the truth, the whole truth, and nothing but the truth, testified on oath as follows:

EXAMINATION

BY MR. GROSS:

Q Good morning, Dr. Fuller. Could you please state your full name for the record?

A Gerald Gendall Fuller.

Q And can you please state your home address for the record?

[redacted]

Q Thank you.

You understand that you are under oath today, Dr. Fuller?

A I do.

Q And you understand that means you're required to tell the truth to the best of your ability?

A I do.

Q Is there any reason you cannot give truthful and accurate testimony today?

A There's none.

Q You're not on any medication or drugs that might impair your ability to provide truthful and complete testimony?

A I'm not.

[redacted]

Q Do you agree that there was nothing related to the SAP limitation of the asserted claims that was not well-known at the time of the invention?

A I cannot think of any.

[redacted]

[redacted]

Q Okay. So that gets to the next sentence there, that we just read. So you do agree with Dr. Reitman that adjustments to size, strength, and durability of the gel were all routine and easily accomplished by well-known methods at the time of the invention of the asserted

patents?

A Of course, it always takes some work.

Q Mm-hmm.

A But the literature available at the time would provide such guidance.

Q So but going back to the first quoted sentence here, do you agree that a POSITA would have known how to produce soft projectile SAP ammunition configured for use with a projectile launcher as of the priority date of the asserted patents?

A Yes.

[redacted]
