On this page, we provide daily-updated data on hospitalizations and intensive care (ICU) admissions due to COVID-19. Our hospital & ICU data is collected from official sources and collated by Our World in Data. The complete list of country-by-country sources is available [on GitHub](#).

COVID-19 hospitalizations

IN THIS SECTION

- ↓ [How many people are in hospital due to COVID-19 at a given time?](#)
- ↓ [What is the **weekly** number of new hospitalizations due to COVID-19?](#)

How many people are in hospital due to COVID-19 at a given time?

Related chart:

Number of COVID-19 patients in hospital per million →

How do COVID-19 hospitalizations compare when we adjust for population?

This chart shows the total number of patients in hospital due to Coronavirus (COVID-19) on a given date.

Note that this is distinct from the weekly new number of people admitted to hospital due to COVID-19. You find this metric in the next section.

💡 Quick reminders on how to interact with this chart

- By clicking on  **Edit countries and regions** you can show and compare the data for other countries you are interested in.
- If you click on the title of the chart, the chart will open in a new tab. You can then copy-paste the URL and share it.

- You can switch the chart to a logarithmic axis, by clicking on 'LINEAR'.
- If you move both ends of the time-slider to a single point you will see a bar chart for this point in time.

What is the **weekly** number of new hospitalizations due to COVID-19?

Related chart:

Weekly new COVID-19 hospitalizations per million →

How do weekly new COVID-19 hospitalizations compare when we **adjust for population**?

This chart shows the weekly number of new hospitalizations due to COVID-19.

Note that this number is distinct from the total number of patients in hospital due to COVID-19 at any given time. You find this data in the previous section.

💡 Two tips on how to interact with these maps

- By clicking on any country on the map you see the change over time in this country.
- By moving the time slider (below the map) you can see how the situation has changed over time.

Intensive care (ICU) admissions due to COVID-19

IN THIS SECTION

- ↓ How many people are in intensive care (ICU) due to COVID-19 at a given time?
- ↓ What is the **weekly** number of new admissions to ICU due to COVID-19?

How many people are in intensive care (ICU) due to COVID-19 at a given time?

Number of COVID-19 patients in intensive care (ICU)

Our World
in Data

Data source: Official data collated by Our World in Data (2024)

OurWorldInData.org/coronavirus | CC BY

Note: For countries where the number of ICU patients is not reported, we display the closest metric (patients ventilated or in critical condition).

Related chart:

Number of COVID-19 patients in ICU per million →

How do the number of COVID-19 patients in ICU compare when we **adjust for population**?

This chart shows the total number of patients in intensive care units (ICU) due to Coronavirus (COVID-19) on a given date.

Note that this is distinct from the weekly new number of people admitted to ICU due to COVID-19. You find this metric in the next section.

What is the **weekly** number of new admissions to ICU due to COVID-19?

Weekly new ICU admissions for COVID-19

Our World
in Data

Number of COVID-19 patients newly admitted to ICU in a given week (reporting date and the preceding six days).

Data source: Official data collated by Our World in Data (2024)

OurWorldInData.org/coronavirus | CC BY

Note: For countries where the number of ICU patients is not reported, we display the closest metric (patients ventilated or in critical condition).

Related chart:

Weekly new COVID-19 ICU admissions per million →

How do weekly new ICU admissions for COVID-19 compare when we **adjust for population**?

This chart shows the *weekly* number of new admissions to intensive care units (ICU) due to COVID-19.

Note that this number is distinct from the total number of patients in ICU due to COVID-19 at any given time. You find this data in the previous section.
