[About mRNA](#)

Learn more about the science behind mRNA and how Moderna's scientists are researching and developing investigational mRNA medicines to potentially help prevent or treat disease.

Transforming medicine with mRNA

At Moderna, we believe the future of medicine is mRNA, the language of life inside every cell in our bodies.

With our technology, we are researching and developing investigational mRNA vaccines and therapeutic approaches for infectious diseases, cancers, rare diseases, cardiovascular diseases, and autoimmune diseases.

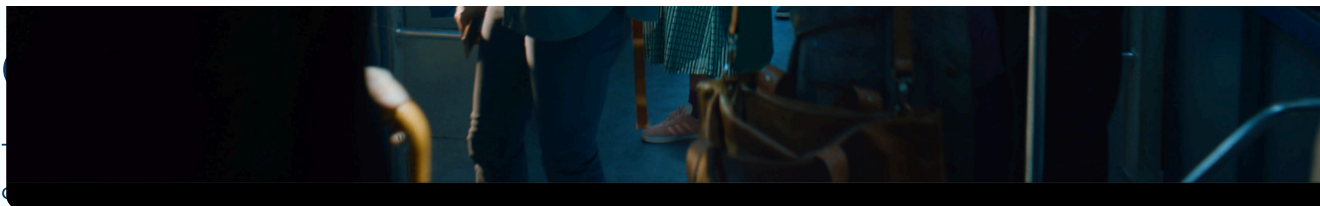

Learn more about the science of mRNA and how Moderna is developing investigational mRNA medicines.
