**About AWS** ▾[Overview](#)[Our Origins](#)[Our Values](#)[Our Communities](#)[Our People](#)[Our Customers and Partners](#)

Since launching in 2006, Amazon Web Services has been providing world-leading cloud technologies that help any organization and any individual build solutions to transform industries, communities, and lives for the better.

As part of [Amazon](#), we strive to be Earth's most customer-centric company. We work backwards from our customers' problems to provide them with cloud infrastructure that meets their needs, so they can reinvent continuously and push through barriers of what people thought was possible.

Whether they are entrepreneurs launching new businesses, established companies reinventing themselves, non-profits working to advance their missions, or governments and cities seeking to serve their citizens more effectively—our customers trust AWS with their livelihoods, their goals, their ideas, and their data.

Resources[What is AWS?](#)[What is cloud computing?](#)[Our geographic footprint?](#)**AWS is how**

Unlocking data in new ways ramps up innovation. It's how companies now use AWS to monitor wind turbines from virtually anywhere, serve up personalized food suggestions, and make vehicles even smarter.

Learn more about AWS

Our Origins

AWS launched with the aim of helping anyone—even a kid in a college dorm room—to access the same powerful technology as the world's most sophisticated companies.
