### APPLE'S PRELIMINARY INFRINGEMENT CONTENTIONS

*Apple Inc. v. AliveCor, Inc.*, Case No. 4:22-cv-07608 (N.D. Cal.)

#### **U.S. Patent No. 10,270,898 on the AliveCor KardiaPro Service in Conjunction with the KardiaMobile Devices**<sup>1</sup>

Defendant AliveCor, Inc. ("AliveCor") infringes claims 1, 9, 23 and 32 of the '898 Patent (the "Asserted Claims") under 35 U.S.C. § 271(a), (b), and (c). As set forth below, AliveCor's infringement is both direct and indirect.

AliveCor has directly infringed the '898 Patent at least by making, using, offering to sell, selling, and/or importing into the United States the KardiaPro Service and the KardiaMobile, KardiaMobile 6L, KardiaMobile Card, and/or the Kardia App (collectively, the "KardiaMobile devices") on or after the issuance date of the patent.

AliveCor induces infringement under 35 U.S.C. § 271(b) by providing the KardiaPro Service in conjunction with the KardiaMobile devices, which are sold and specifically configured to infringe the Asserted Claims, to AliveCor customers in the United States. AliveCor actively instructs and encourages its customers on how to use the KardiaPro Service in conjunction with the KardiaMobile devices, including through product manuals, advertising, and instructional videos. When used as instructed, AliveCor's customers use these products to practice the systems of the '898 Patent and directly infringe the Asserted Claims. AliveCor induces such infringement by providing the KardiaPro Service and the KardiaMobile devices and instructions, knowing of, or being willfully blind to the existence of the '898 Patent. AliveCor specifically intends that its actions will result in infringement of the asserted claims of the '898 Patent or subjectively believes that its actions will result in infringement of the Asserted Claims, but took deliberate actions to avoid learning of the facts.

As shown below, AliveCor also contributes to infringement under 35 U.S.C. § 271(c) by providing the KardiaPro Service and the KardiaMobile devices which embody a material part of the claimed invention of the '898 Patent, are known by AliveCor to be specially made or adapted for use in an infringing manner, and are not staple articles with substantial non-infringing uses. The KardiaPro Service in conjunction with the KardiaMobile devices, is specially designed to infringe the '898 Patent and the accused components have no substantial non-infringing uses. AliveCor has had knowledge of both the existence of the '898 Patent and that its actions described above would contribute to the direct infringement of the patent at least since the filing of the Complaint in this matter.

---

<sup>1</sup> Public information is limited regarding the KardiaPro Service and KardiaMobile devices, and accordingly, Apple reserves the right to amend its infringement contentions based on productions and source code made available during discovery.

## EXHIBIT C

In addition, AliveCor's customers provide one or more elements of the Asserted Claims. AliveCor's customers' infringement is attributable to AliveCor because AliveCor benefits from the use of each claimed component of the invention. For example, AliveCor receives a subscription fee for use of the KardiaCare membership and the KardiaPro Service with the KardiaMobile devices.

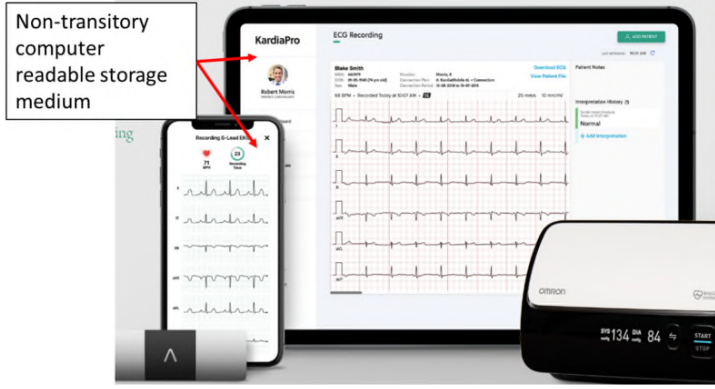

### 1. Independent Claim 1

| Claim 1                                                                                                                                                                                                                    | AliveCor KardiaPro Service in Conjunction with the KardiaMobile Devices                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## EXHIBIT C

**KardiaMobile 6L**

KardiaMobile 6L Store Front (APL-ALV00010904).

With KardiaMobile 6L, you can record unlimited six-lead EKGs, giving you and your doctor more detailed insight on your heart from home.

- Records EKG leads I, II, III, aVL, aVR, and aVF
- More data and deeper insights on your heart rhythm
- FDA-cleared, clinically approved, medical-grade EKG recordings
- Detects up to six of the most common arrhythmias\*

KardiaMobile 6L is not tested or recommended for use with pacemakers and ICDs. KardiaMobile 6L does not check for heart attack.

\*All six detections available with a KardiaCare membership

| <p>[1.h] the plurality of approved sources for the sub-category of wellness data, wherein the sub-category of wellness data is approved to be received from the plurality of approved sources and stored in a wellness database; and</p> | <p>The KardiaPro Service in conjunction with the KardiaMobile devices displays “the plurality of approved sources for the sub-category of wellness data, wherein the sub-category of wellness data is approved to be received from the plurality of approved sources and stored in a wellness database.”</p> <p>For example, the KardiaPro Service receives data from approved sources (<i>e.g.</i>, patient devices), and this data is stored in the KardiaPro database for access by the KardiaPro user.</p> <p><i>See, e.g.</i>:</p>  <p>The diagram illustrates the workflow of the KardiaMobile 6L System. It is divided into three main sections: <b>SETUP</b>, <b>RECORDING an ECG</b>, and <b>ACCESSING ECG and QT RESULTS</b>. In the <b>SETUP</b> section, three KardiaMobile 6L devices are shown, each connected to a patient. A box labeled 'Plurality of approved sources of wellness data' is connected to the recording section. In the <b>RECORDING an ECG</b> section, a user is shown using a KardiaStation on a mobile phone or tablet. In the <b>ACCESSING ECG and QT RESULTS</b> section, the user is shown accessing the KardiaPro portal. The diagram also shows 'QT Analysis requests' being sent to a 'QT Analysis partner' cloud, which returns 'QT Analysis results' to the KardiaPro portal.</p> <p>KardiaMobile 6L System, Inpatient User Guide (APL-ALV00010459) at 0462.</p> |

| <i>Id.</i> |  <p>The screenshot displays the KardiaPro mobile application interface. On the left is a sidebar menu with icons for Dashboard, Patients, ECG Inbox, Reports, Settings, and Sign Out. The main area is titled 'ECG Recording' and shows a patient profile for Blake Smith (MRN: 640979, DOB: 01-05-1943, 75 yrs old, Male). It lists the provider as Morris, J. and shows a recorded ECG on 07-03-2019 at 10:07 AM. The ECG trace is shown on a grid with leads I, II, III, aVR, aVL, and aVF. Status indicators show 'QT Analysis Pending' and 'QT: Pending'. On the right, there's a 'Patient Notes' section and an 'Interpretation History' showing a 'Normal' result from 07-03-2019 at 10:07 AM. At the bottom right are buttons for 'REASON', 'CONTINUE', and 'Remove from Inbox'.</p> |

| <p>[23.h] the plurality of approved sources for the sub-category of wellness data, wherein the sub-category of wellness data is approved to be received from the plurality of approved sources and stored in a wellness database; and</p> | <p>The KardiaPro Service in conjunction with the KardiaMobile devices display “the plurality of approved sources for the sub-category of wellness data, wherein the sub-category of wellness data is approved to be received from the plurality of approved sources and stored in a wellness database.”</p> <p>For example, the KardiaPro Service receives data from approved sources (e.g., patient devices), and this data is stored in the KardiaPro database for access by the KardiaPro user.</p> <p>See, e.g.:</p>  <p>The diagram illustrates the KardiaMobile 6L System workflow. It is divided into three main sections: SETUP, RECORDING an ECG, and ACCESSING ECG and QT RESULTS. In the SETUP section, three KardiaMobile 6L devices are shown, each labeled 'One KardiaMobile 6L per patient'. Arrows from these devices point to the RECORDING an ECG section. In the RECORDING an ECG section, a user is shown using a KardiaStation on a mobile phone or tablet. Arrows from the KardiaStation point to the ACCESSING ECG and QT RESULTS section. In this section, 'QT Analysis requests' are sent to a 'QT Analysis partner' cloud, which returns 'QT Analysis results' to the KardiaPro portal. A box at the top of the diagram is labeled 'Plurality of approved sources of wellness data'.</p> <p>KardiaMobile 6L System, Inpatient User Guide (APL-ALV00010459) at 0462.</p> |
