Spitballs are the amazing water-balls that grow up to 200 times their original size when immersed in water.

Please subscribe to our channel: [vat19com](https://www.youtube.com/vat19com)

Designed for bouncing, throwing, and smashing, Spitballs resemble kernels of salt prior to activation. When dropped into a bowl of hot water, the water pearls begin their metamorphosis. The longer they soak, the more the water beads expand. The size of a pea within five minutes, most Spitballs will eclipse the size of an acorn within a few hours.

If left out to dry, non-toxic Spitballs will slowly return to their original size, so you can reuse them again and again. Each 50-gram bag includes approximately 1,250 slippery, squishy, and explosive Spitballs. Available in three styles: Regular Spitballs, Water Marbles, and Glow in the Dark
