X.509 Public Key Digital Certificates

Download the Free [Unlimited Time Trial](#)
Easy Install, Simple GUI

Secure encrypted internet email has been available for more than 10 years. It's about time for securely encrypted mobile messages!

Currently, use of crypto for business and trade has overtaken the volume of crypto used by governments and military combined. Crypto is now used to encode satellite television signals, protect banking and ATM networks, and almost every purchase done over the internet.

Crypto is the trusted engine driving Internet e-commerce.

CryptoGraf v1.0 for smartphones... is a way to maintain trust, keep secrets and reduce the risk of trade.

Free Download to [Send Message Keep Secret](#)

Select [Publications](#) to read the CryptoGraf [Quick Start Guide](#), [Manual](#), [Product Description](#) and [Technology Description](#). There is also an [FAQ on Crypto](#) which explains cryptography, cryptographic algorithms, the secrecy of your secrets, the security and [privacy](#) offered by CryptoGraf, and how to protect your secret and private messages with CryptoGraf.
