THE LAGOON CRAWLER

AGITATION MADE EASY

NO PRIMING REQUIRED

The header pump is located on the bottom of the Crawler, and is submerged at all times. That means that there are no systems required to prime the pump.

FOUR-WHEEL DRIVE

The 4WD system makes the Crawler extremely flexible. If the unit gets caught up on solid build-up, it can drop its wheels to drive itself out. The Crawler can also drive out of the lagoon when the job is done.
