

LAGOON CRAWLER

Agitation Made Easy

NO PRIMING REQUIRED

The header pump is located on the bottom of the Crawler, and is submerged at all times. That means that there are no systems re- quired to prime the pump.

PROFITABLE AGITATION

The Lagoon Crawler is the best way to agitate lagoons. A better mix will give a higher con- centration of nutrients in the manure and will increase crop yield. The Crawler blasts away sand and solid buildup increasing storage and it eliminates the costly expense of additional cleaning out once the lagoon has been pumped out.

4' GROUND CLEARANCE

The wheels drop down giving the vehicle roughly 4' of ground clearance. Controlled by remote.

Technical Specifications

ENGINE

- CAT 7.1T4F
- 275HP Motor
- Hydraulic Activated & Self-Adjusting Clutch

DRIVE SYSTEM

- Four-Wheel Drive & Steering System
- 500/70 R24 Radial Tires
- Two Speed Hydraulic Wheel Drives

7 AGITATION JETS

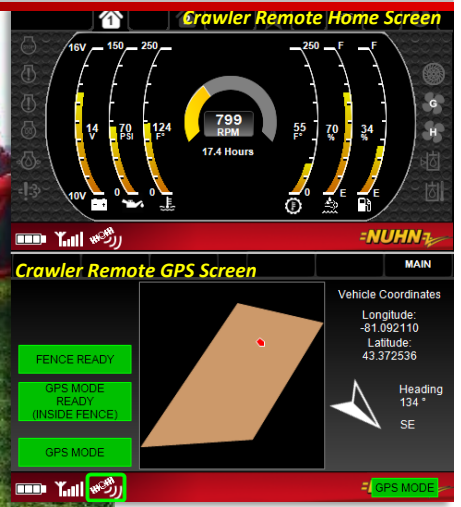

- 1-6" Nozzle on Front
- 2-4" Nozzles on Rear
- 4-4" Nozzles on Side for Steering

TRIPLE PORT PUMP

- 12" Quad Port Header Pump
- 12,000GPM Capacity
- 3 Outlets off of Pump Housing
- Tungsten Carbide Mechanical Seal
- Specifically designed for harsh Lagoon environment

USER INTERFACE

- Complete Wireless Control
- All of the Machine Operation Functions are Controlled
- 50-Hour Battery Life
- GPS Technology
- Easy to use Joysticks
