

Paul Anthony Dalby, FRSC, AMIChemE

Dept. Biochemical Engineering, University College London, Gower Street, London WC1E 6BT

EDUCATION AND CAREER

- 2016 - present **Deputy Head, Department of Biochemical Engineering (Research), UCL.**
- 2016 - present **Co-Director** of EPSRC Future Targeted Healthcare Manufacturing Hub, UCL.
- 2013 - present **Professor at University College London, Dept. Biochemical Engineering**
- 2012 - 2022 **Director** of EPSRC Centre for Doctoral Training in Innovative Manufacturing, UCL.
- 2011 - 2016 **Co-Director** of EPSRC Centre for Innovative Manufacturing, UCL.
- 2009 - 2013 **Reader at University College London, Dept. Biochemical Engineering**
- 2007 - 2009 **Senior Lecturer at University College London, Dept. Biochemical Engineering**
- 2000 - 2007 **Lecturer at University College London, Dept. Biochemical Engineering**
- 1998 - 2000 **Postdoctoral fellowship at University of Pennsylvania, School of Medicine**
Protein design and evolution with Prof. W. F. DeGrado (member of the National Academy)
Projects: *Development of novel binding proteins*
In vitro evolution of new catalytic function
Collaboration with Ronald H. Hoess (Dupont)
Carried out phage display, protein engineering, purification, formulation and characterisation by CD, fluorescence, enzymology, computer modeling and bioinformatics
- 1994 - 1998 **Ph.D. Cambridge University, MRC Centre for Protein Engineering**
Protein folding and engineering with Prof. Sir A. R. Fersht, FRS
Projects: *Folding pathway of Barnase*
My work involved molecular biology, PCR, mutagenesis, expression and purification, organic synthesis, circular-dichroism, fluorescence and UV-Visible spectroscopy, calorimetry, stopped-flow kinetics, temperature-jump, pulsed quench-flow and NMR.
- 1991 - 1994 **B.A. (Hons)/ M.A. Natural Sciences (First class)**
Gonville & Caius College, Cambridge University
Studied Chemistry, Biochemistry, Physics, and Mathematics
Project: *Synthesis of short antimicrobial peptides* (organic chemistry)

AWARDS

- 2010 **IChemE Innovation and Excellence Award in Bioprocessing** (for the BiCE team)
- 2010 **Royal Society of Chemistry Rita and John Cornforth Award** (for the BiCE team)
- 2008-2010 **Evonik European Science-to-Business Award for Industrial Biotechnology**
- 2001 **Second prize for young researcher at SCI: London's Chemistry meeting**
- 1994-1997 **Gonville & Caius College Dunlop Scholarship**
- 1993-1994 **Gonville & Caius College Senior Scholarship**
- 1993 **James Arthur Ramsay Prize in Chemistry & Biology**

PROFESSIONAL AFFILIATIONS

- 2022- **Scientific Advisory Board for UMabs, USA/China.**
- 2020- **EPSRC Strategic Advisory Team for Manufacturing the Future.**
- 2020- **EPSRC Healthcare Council-SAN-SAT Working Group.**
- 2020- **Scientific Advisory Board for Leukocare, Germany.**
- 2020- **Co-Founder of Roxijen Ltd.**
- 2018 **UKRI FLF Peer Review College Member**
- 2017- 2020 **External examiner MSc Biological Engineering, University of Sheffield**
- 2016- **EPSRC College member**
- 2015- **Elected Management Board Member of BBSRC BioProNet**
- 2015- **Editorial Board Member of Scientific Reports (a Nature Journal)**
- 2014-2016 **Committee Member of the RSC Chemistry Biology Interface Division**

- 2014-2016 **Panel Member** of the Innovate UK IB Catalyst.
- 2013- **Fellow of the Royal Society of Chemistry** (Member since 2005)
- 2013- 2016 Steering Group Member of the BBSRC Bioprocess Research Industry Club (BRIC)
- 2011- 2014 **Editor-in-Chief** of 'Current Biotechnology', since its launch (issue 1: Feb 2012)
- 2010- 2014 **Editor-in-Chief** of the 'Open Biotechnology Journal' (Editorial board member since 2007)
- 2011- 2014 BBSRC Research Grant Panel Committee D as core member
- 2010- 2011 BBSRC Research Grant Panel Committee C as pool member
- 2008- **Chair** Royal Society of Chemistry - Biotechnology Group (Member since 2003)
- 2011- 2013 Editorial Board Member of 'Enzyme Engineering'
- 2006- 2008 Editorial Advisory Board for 'Recent Patents in Biotechnology'
- 2006- 2013 Member of the Protein Society
- 2003- Associate Member of the Institute of Chemical Engineers
- 2001- 2005 Member of the American Chemical Society

FACULTY, UCL, MULTI-INSTITUTIONAL ROLES

- 2017 - 2021 Faculty REF Impact lead
- 2017 - 2021 Dept Biochemical Engineering REF lead
- 2016 - Chair of the UCL SLMS Technology Innovation Network for Biologics
- 2016 - Member of Faculty of Engineering Sciences Research Directors Committee
- 2015 - 2022 Member of UCL CDT Directors Committee
- 2012 - 2022 Director of EPSRC Multi-Institutional Centre for Doctoral Training
- 2008 - Genetic Modification Safety Committee
- 2016 - 2017 Member of Faculty of Engineering Sciences Research Degrees Committee
- 2012 - 2014 Chair of BBSRC Multi-Institutional Doctoral Training Programme Recruitment Panel
- 2012 - 2014 BBSRC Multi-Institutional Doctoral Training Programme Management Board
- 2005 - 2008 Engineering Faculty Undergraduate Degree Committee

TEACHING ROLES

- 2017 - **Course coordinator** MBI® in Antibody Targeted Therapy
- 2016 - **Course coordinator** (Yr3), BENG0031. Chemistry for Biochemical Engineers
- 2014 - BENG101P. Lectures (formulation, vaccines) Introduction to Biochemical Engineering
- 2013 - **Course coordinator** (Yr2), BENG0013. Biochemistry for Biochemical Engineers
- 2007 - MBI® in Design of Experiments for Bioprocess Optimisation. Case study lecture.
- 2000 - G004/M002 Advanced Bioreactor Engineering - Lectures (MSc & Yr4)
- 2000 - Research project supervision (Yr4, MSc, MRes & Biotechnology BSc)
- 2012 - 2018 BBSRC LIDO Doctoral Training Programme. Lecture- Biological design and engineering.
- 2003 - 2017 **Course coordinator** (Yr 4), BENG005/6, 3010 Undergraduate research projects
- 2005 - 2017 **Course coordinator** and lecturer, MBI® in biocatalysis
- 2001 - 2014 BENG2006 Biocatalyst design lectures (Yr3 Biotechnology)
- 2005 - 2014 **Course coordinator** (Yr1), BENG1001 Introduction to Biochemical Engineering
- 2000 - 2013 G17 & BIOC2007 Biochemistry for Biochemical Engineers - Workshops (MSc & Yr2)
- 2006 - 2009 BIOC2008 Biochemistry for Biochemical Engineers - Workshops (Yr3)
- 2003 - 2008 BIOC1001 Biochemistry for Engineers - Industrial biocatalysis lectures (Yr1)
- 2000 - 2008 PhD/EngD training day coordinator
- 2002 - 2004 E129/E105/G23 - Affinity Chromatography for undergraduate and MSc
- 2001 - 2005 Biochemical Engineering in the 21st Century - **Coordinator** (Yr1)
- 2000 - 2005 MBI® in biocatalysis - Enzyme design lecture

TUTORING ROLES AT DEPT BIOCHEMICAL ENGINEERING, UCL

- 2016 - **Chair of Departmental Research Committee**
- 2016 - **Member of Departmental Finance Committee**
- 2008 - 2016 **Departmental Tutor for Admissions to Doctoral Research**

- 2010 - 2012 **Mentor to Darren Nesbeth, a new probationary lecturer in the Department**
- 2007 - 2009 **Mentor to Martina Micheletti, a new probationary lecturer in the Department**
- 2005 - 2014 **Chair of undergraduate departmental staff student consultative committee**
- 2005 - 2008 **Crook (UG) and Beaker (PG) Society Liaison**
- 2005 - 2008 **Departmental Tutor to Undergraduates**
- 2000 - 2007 **Tutor to 1st year undergraduates**
Organised BE in 21st century seminars to help students see broader picture.
Incorporated BE in 21st century seminars into E100 course to make examinable.
- 2000 - 2005 **Undergraduate Admissions tutor**
Developed recruiting strategies, including Video/CD, mailshot via UCAS
Increased total number of applications from 80 to 160 per year
- 2003 - 2005 **Convenor of undergraduate departmental staff student consultative committee**
- 2002 - 2005 **Undergraduate recruitment coordinator**

PUBLICATIONS: H-index 30 (WoK), 35 (Google Scholar)

Published (114) including 4 book chapters, and one book

1. Zhang C, Berg A, Joe CCD, Dalby PA, Douglas AD (2023) Lyophilization to enable distribution of simian adenovirus-vectored vaccines without refrigeration. *Nature Vaccines*. in press.

44. SMI Quality by Design, London, 24-25 February 2014. "Early screening of manufacturing to improve biotherapeutic design and selection"

45. Royal Society of Chemistry Thermal Analysis Conference (TAC), 1 April 2014, GSK Ware, UK. "Use of IR-based heating technology for assessing protein stability"
46. IChemE ChemEngDayUK, Manchester 2014, 7-8 April 2014. "Towards the measurement and prediction of manufacturability for biopharmaceuticals"
47. 10th International Conference on Protein Stabilisation – ProStab2014, 7-9 May 2014, Stresa, Italy. "Rapid measurement of protein stability in nanolitre samples using optically induced thermal gradients"
48. BioprocessUK, Liverpool, 25-26 November 2014. "Evaluation of novel format biopharmaceuticals during manufacture"
49. Royal Society of Chemistry Biotechnology Group – Translational Biocatalysis, London, UK, 16 December, 2014. "Engineering transketolases with novel activities".
50. KTN Biopharmaceutical Analytical Symposium, Leeds, 4-5 March 2015 "Analytical challenges for protein aggregation and stability"
51. Oxford Global Formulation & Drug Delivery Congress, 18-19 May, 2015 "Measurement and prediction of formulation stability for biopharmaceuticals"
52. KTN Biopharmaceutical Analytical Symposium, CPI Darlington, 15 March 2016 "Analysis and modeling of Fab protein structure in aggregation-prone conditions"
53. BTC: Industry meets Academia - Unlocking the Potential for Innovation, 14 April 2016. UCL School of Pharmacy."Biochemical Engineering and the Manufacturing of Emerging Macromolecular Therapies"
54. European Federation of Biotechnology: 17th European Congress on Biotechnology. Krakow, Poland, 3-6 July 2016. Plenary Speaker: "Conformational protein structure shifts in aggregation prone conditions for MAb and Fab".
55. KTN Biopharmaceutical Formulation Group Meeting, UCL, London, 7 July, 2016. "Towards the prediction of formulations that minimise biopharmaceutical aggregation".
56. ESBES Dublin Sept 11, 2016 "Protein And Enzyme Stability Engineering, Guided By Molecular Dynamics Simulation"
57. IPSEN Chester 6 Oct 2016 "Higher-order analysis and modeling of proteins and their formulations"
58. CHI PEGS Lisbon 31Oct - 4Nov 2016 "Elucidation of aggregation mechanisms in a therapeutic protein, and prediction of formulation strategies"
59. BioprocessUK 23 November 2016. "Analytical challenges in Formulation" Workshop.
60. BioProNet 13 February 2017. Recent breakthroughs and new perspectives in protein aggregation. "Elucidation of Aggregation Mechanisms in Therapeutic Protein and Prediction of Formulation Strategies"
61. Biophysical Analysis of Biotherapeutics meeting at the 13th Annual PEGS conference. May 1-5, 2017 at the World Trade Center in Boston
62. Oxford Global. 10th Annual Proteins & Antibodies and Biotherapeutics Congress scheduled for 24 – 25 April 2017 in London, UK
63. 2nd International Advanced Biomanufacturing Conference, May 22-23, 2017. Sheffield, UK.
64. Proteins, Aggregates and Particles meeting at the Annual European PEGS conference. November 14-17, 2017, Lisbon, Portugal.
65. Session Chair: Proteins, Aggregates and Particles meeting at the Annual European PEGS conference. November 14-17, 2017, Lisbon, Portugal.
66. BioProNet 5th Annual Conference, October 10-11, 2018, London, UK. "Analysis and control of protein dynamics and stability: downstream to formulation"
67. Cancer Research UK – UCL Centre, 28 March, London 2019. "Engineering and formulating stable protein therapies"
68. Royal Society of Chemistry Future Formulations III, 4 April 2019, Leicester, UK. "Enabling rapid liquid and freeze-dried formulation design for the manufacture and delivery of novel biopharmaceuticals".
69. CASSS San Francisco, USA. 8-10 April 2019. "Analysis, control and engineering of protein dynamics, stability and aggregation".
70. KTN Formulation. Manchester, UK. 11 July 2019. "Coformulated therapies. Formulation and analytical challenges".
71. MIBio 2019 Stability of Biopharmaceuticals. Cambridge, UK. 13 November 2019. "Understanding formulations: looking beyond preferential exclusion".

72. ESACT-UK 30th Annual Conference. Ashford, Kent, UK. 8-9 January 2020. "Analysis, control and engineering of protein dynamics, stability and aggregation".
73. Royal Society of Chemistry Future Formulations IV, 23 June 2020, Online. "Enabling rapid liquid and freeze-dried formulation design for the manufacture and delivery of novel biopharmaceuticals".
74. CHI Bioprocessing Summit 16-17 March 2021, Online. "Combining Biophysics and Modelling Approaches to Better Understand and Predict Protein Stability in Formulations"
75. PharmaTechIntegrates 2021. 23 Sept 2021. Online. Panel member on "Revolution not evolution of Biologics production".
76. BioProNet. 8-9 November 2021. Co-organiser and Session Chair: "Novel Protein Formats".
77. VaxHub. 19 November 2021, Online. "Freeze-dried formulation optimisation for ChAdOx1 vaccines"
78. BiologicsUK. London UK. 23 March 2022. "Mass Spectrometry And Molecular Dynamics To Characterise Proteins And Their Formulations".
79. Bioprocessing Summit Europe, Barcelona, Spain. 24 March 2022. "Design of Freeze-dried ChAdOx1 Vaccine Formulations"
80. Manchester MIB, 11 May 2022. "Strategies for protein and enzyme stabilisation: Mechanistic insights"
81. Oxford Global: Pharmaceutical Lyophilisation Symposium, on 8th November 2022. Online.
82. Institute of Physics: Antibody adsorption and solution stability. University of Manchester. 15-16 Dec 2022.
83. Keynote Lecture: KTN and BioProNet2 (Formulation, Quality and Delivery of Tomorrow's Medicines), Manchester UK, 24 Jan 2023. "Aggregation mechanisms for single and co-formulated antibodies"

Grants

1. BBSRC studentship, 02/B1/E/08236. Engineering novel high-throughput routes and directed evolution of enzyme stability. 2002.
2. EPSRC First Grant Scheme, GR/S02532/01. Substrate walking: Increasing the synthetic repertoire of enzymes using a novel process £98k. 2002.
<https://gow.epsrc.ukri.org/NGBOVViewGrant.aspx?GrantRef=GR/S02532/01>
3. EPSRC, GR/S62505/01. Next generation pharmaceuticals: Linking novel engineering and chemistry to a revolution in biocatalysis. Prof. John Woodley, Dr. John Ward, Dr Helen Hailes, Dr Gary Lye, Dr Frank Baganz, Dr Paul Dalby, £1.7m. 2003.
4. Eli Lilly and Company, for EPSRC EngD studentship. Directed evolution of the substrate specificity of trypsin. £44,271. 2003.
5. Eli Lilly and Company, for EPSRC EngD studentship. Development of microwell techniques to study protein damage during purification. £44,271. 2004.
6. BBSRC studentship, BBS/S/A/2004/10920. A combined computational design and genetic engineering approach for novel enzymes. 2004.
7. BBSRC studentship, BBS/S/K/2005/12160. Directed evolution and formulation for improved protein stability. 2005.
8. Cambridge Antibody Technology, for EPSRC EngD studentship. High throughput stability screening. £34,472. 2005.
9. Lonza Biologics, for EPSRC EngD studentship. Optimising biopharmaceutical protein crystallisation. £21,560. 2005.
10. DTI, TP/4/BIO/6/I/22034. Development of enhanced bioprocessing for advanced biopharmaceutical proteins. Dr Keith Foster (Syntaxis Ltd), Dr Nigel Allison (Health Protection Agency), Dr Paul Dalby (UCL), Prof Gary Lye (UCL), £1.2m. 2006.
11. EPSRC, EP/E001599/1. IMRC for Bioprocessing. One of 13 co-investigators, led by Prof Nigel Titchener-Hooker, £6.7m. April 2007 – March 2012.
12. BBSRC, BRIC, BB/E005942/1. A new microfluidic tool for rapid analysis of protein stability and integrity in bioprocesses. Dr Paul Dalby (PI), Dr Daniel Bracewell, Prof. Gabriel Aeppli, Prof. Quentin Pankhurst, £0.5m (£424k recovered from BBSRC) Jan 2007 – Dec 2009. **Final report - Graded A.**
13. NIBSC, for EPSRC EngD studentship. Use of novel microwell and ultra scale-down methods for the accelerated prediction of operating conditions that preserve protein structure during freeze-drying of biopharmaceuticals. £37,489.55. Oct 2006 – Sept 2010.

14. BBSRC, BB/E013104/1. Structural analyses of multicomponent protein complexes by analytical ultracentrifugation. Awarded to Prof S J Perkins (PI) Dr I R Tsaneva, Dr F Werner, Dr P Dalby and Dr Xuemei Yuan (coinvestigators). £126,933.66. 2007.
15. Prometic Biosciences Ltd, for EPSRC EngD studentship. *In silico* design of novel protein affinity chromatography ligands. £43,953. 2007.
16. BBSRC CASE studentship, BB/F018207/1. Rapid microscale evaluation of the impact of fermentation conditions on inclusion body formation, solubilisation and protein refolding yields. With Dr Micheletti, M. (lead PI) and John Liddell at Avecia Biologics. 2007.
17. CIF “High Throughput Analytical Facilities for Biological Macromolecules and Cells – particularly for therapeutic use” Awarded to Dr P Dalby (lead PI), Prof S J Perkins, Dr J M Ward, Dr H C Hailes, Dr K. Chester £475,000. 2008.
18. EPSRC, EP/G034656/1, “Industrial Doctoral Training Centre for Bioprocessing Engineering Leadership” Awarded to Nigel Titchener-Hooker (PI) (Centre Director), **Dalby, P.A. (CoI)** Centre Manager, with two other Centre Managers. £5900k, 09/09 - 03/18.
19. CIF II – DPI and fluorescence equipment (Paul Dalby, Steve Perkins & John Ward)
20. BBSRC Targeted Priority Studentships DTG in Bioprocessing for UCL (BBSRC BB/G016593/1). Six studentships (£494,460) awarded February 2009.
21. BBSRC Follow-on-funds, BB/FOF/272. A robust microfluidic device for rapid and ultra-low volume protein:drug interaction screening. Awarded to Paul A. Dalby (lead PI), Prof. Gabriel Aeppli (CoI), £189,666. 2009
22. GSK Whole bioprocessing studies of Dab derived molecules. Centre of Excellence. Awarded to Mike Hoare (PI), Paul Dalby and Gary Lye. £1,052,814. (£800,814 excl EngDs).
23. GSK, for EPSRC EngD studentship. Pre-formulation screening: High throughput tools to formulate dAbs and predict stability profiles. £86,693. 2009.
24. BBSRC Targeted Priority Studentships DTG in Bioprocessing for UCL (BBSRC BB/H015795/1). Four studentships (£333,124) awarded February 2010.
25. EPSRC EP/I033270/1, £5.8M, 2011-2016. Centre for Innovative Manufacturing in Emerging Macromolecular Therapies. Prof NJ Titchener-Hooker (Director), Dr PA Dalby (Co-Director), Dr S Farid (Co-Director), Dr LG Papageorgiou, Prof S Morris, Prof S Brocchini (London School of Pharmacy), Prof N Thornhill (Imperial College London).
26. BBSRC, BRIC2, BB/I017119/1. Elucidating aggregation mechanisms in antibody fragment-based therapeutics to improve their manufacturability. £561877.51 (£452k awarded), 2011-2014. Prof PA Dalby (PI), Prof. S Perkins, Dr J Christodoulou.
27. BBSRC BRIC BB/J003824/1. Microscale freeze-dried and liquid formulations of therapeutics to investigate the relationship between forced degradation and long-term shelf life. PhD studentship with NIBSC. October 2011-Sept 2014. (£85k). Student – Mathew Robinson
28. EPSRC EP/K503332/1 £2.41M, 2011-2016. Centre for Doctoral Training (CDT) in Innovative Manufacturing in Emerging Macromolecular Therapies. Supports 15 PhD studentships.
29. BBSRC BB/J014567/1 Doctoral Training Grant £5.4M, 2012-2014. Supports 54 PhD studentships across UCL, Kings College London, Birkbeck, Royal Veterinary College, and the London School of Tropical Medicine and Hygiene.
30. EPSRC EP/K014897/1 £1.927m. Feb 2013-June 2017. Bio-derived Feedstocks for Sustainable, UK-Based Manufacture of Chemicals and Pharmaceutical Intermediates. Prof Gary Lye, Prof Paul Dalby, Prof John ward, Prof Helen Hailes, Dr Tom Sheppard (Imperial), Dr Cleo Kontoravdi (Imperial), Prof Nilay Shah (Imperial), Prof David Leak (Bath)
31. BBSRC BRIC BB/K011162/1. £430k. Jan 2013-Jan 2016. Multi-modal fluorescence spectroscopy for online analysis of proteins in bioprocesses. Prof PA Dalby (PI), Prof G Aeppli (CoI, LCN).
32. BBSRC BB/K021354/1. £43k. 2013. US partnering on the use of neutron scattering to study aggregation in therapeutic proteins during manufacture and storage. Prof PA Dalby (PI), Dr D.G. Bracewell (CoI).
33. EPSRC EP/L015218/1 £3.71M, 2015-2022. Centre for Doctoral Training (CDT) in Innovative Manufacturing in Emerging Macromolecular Therapies. Supports 28 EPSRC PhD studentships.

34. NOVARTIS £320k. Helen Hailes (PI), Paul Dalby (CoI), John Ward (CoI). Engineering novel multi-enzyme cascades for synthesis 2014-2015.
35. EPSRC EP/K005030/1 £240,691. Equipment for Emerging Macromolecular Therapies. 2014-2015.
36. BBSRC BB/M009602/1 £458k. 2015-2018. 'Optimisation of a semi-synthetic ligation strategy for single glycoform glycotherapeutics'. Derek Macmillan (PI), Paul Dalby (CoI). LINK with Dextra Ltd.
37. Alexion. £343k. Enzyme engineering for improved synthesis of mRNA therapeutics. 2015-2017.
38. EPSRC EP/M028100/1 £520,000. A capability for the rapid formulation and manufacturing process development of novel freeze-dried biological therapies. 2015-2016.
39. EPSRC EP/N025105/1 £2,961,745. Enabling rapid liquid and freeze-dried formulation design for the manufacture and delivery of novel biopharmaceuticals. 2015-2021. Paul Dalby (PI), Ajoy Velayudhan (CoI), Robin Curtis (CoI), Jim Warwicker (CoI).
40. EPSRC IAA - Knowledge Exchange and Innovation fund. £13k. John Hales, Paul Dalby. 2016.
41. EPSRC EP/P006485/1 £10M. 2017-2023. Future Targeted Healthcare Manufacturing Hub. Prof NJ Titchener-Hooker (Director), Prof PA Dalby (Co-Director), Prof S Farid (Co-Director).
42. Marie Curie Research Fellowship. EUR 195,454. 2018-2020. Prof PA Dalby (PI), Dr Arka Mukhopadhyay (Research Fellow).
43. UCL Equipment Fund. £279k. 2019-2020. Prof Perkins (PI), PA Dalby (CoI)
44. Medical Research Foundation Fellowship. MRF-057-0004-RG-MCDO-C0800. Supporting Thomas MacDonnell. £254,390. 2020-2022. The Structure and Function of Beta-2-Glycoprotein I in SLE and APS.
45. Innovate UK Innovation Scholars secondments (IUK75419): £180k. 2021-2024. Paul Dalby (PI), Cheng Zhang (secondee). Computational methods to predict stable biologics formulations
46. EU H2020 IMI. 101007939 RealHOPE. £3.1M. 2021-2024. Real World Handling of Protein Drugs - Exploration, Evaluation and Education. Prof PA Dalby (Co-I). UCL portion £325k

Poster Presentations at National or International Meetings

1. Dalby, P.A., Fersht, A.R. (1997) 22nd Lorne Protein Conference. Lorne, Australia. "Folding Intermediates of Wild-type and Mutant Barnase".
2. Hibbert, E.G., Paramesvaran, J., Vertes, A., Russell, A.J., Woodley, J.M., Dalby, P.A. (2000) 1st NELSIC Meeting. UCL, UK, September. "Optimising Industrial Processes: Directed Evolution and Rational Design of Trypsin".
3. Dalby, P.A., Hoess, R.H., DeGrado, W.F. (2001) Biochemical Engineering XII. Sonoma, CA, USA, 10-15 June. "Evolution of Stability and Binding for a WW Domain using Phage Display".
4. Miller, O.J., Dalby, P.A. (2001) SCI - London's Chemistry. House of Commons, London, October. "Focussed Error-prone PCR: A novel method for the directed evolution of enzymes".
5. Miller, O.J., Dalby, P.A. (2001) 3rd NELSIC Meeting. UCL, UK, December. "Focussed Error-prone PCR: A novel method for the directed evolution of enzymes".
6. Hibbert, E.G., Vertes, A., Woodley, J.M., Dalby, P.A. (2003) 5th European Symposium of the Protein Society. Florence, Italy, March. "Implications of Directed Evolution and Metabolic Engineering for Process Bioinformatics".
7. Ingram, C.U., Dalby, P.A. , Hailes, H.C., Lye, G.J., Ward, J.M. (2003) 11th European Congress on Biotechnology, Basel, Switzerland, 24 – 29 August. "Engineering and directed evolution of multi-step biocatalytic pathways in bacteria".
8. Aucamp, J.P., Cosme, A.M., Lye, G.J., Dalby, P.A. (2004) International Congress on Biocatalysis, Hamburg, Germany, 29Aug-1Sept. "Engineering novel high-throughput screening routes for biocatalyst development programmes".
9. Aucamp, J.P., Lye, G.J., Dalby, P.A. (2004) 5th European Symposium of Biochemical Engineering Science, Stuttgart, Germany, 8-11 September. Engineering novel high-throughput screening routes for biocatalyst development programmes.
10. Paramesvaran, J., Woodley, J.M., Russell A.J. and Dalby, P.A. (2005) Biochemical Engineering XIV Conference, Harrison Hot Springs, BC, Canada, 10-14 July. Engineering specificity-enhanced proteases by directed evolution of bovine trypsin.

11. Costelloe, S.J., Senussi, T., Hibbert, E.G., Smith, M.E.B., Hailes, H.C., Ward, J.M., Dalby, P.A. (2005) Biochemical Society - Biocatalysis: Enzymes, Mechanisms and Bioprocesses, Manchester, UK, 21-22 November. Evolution and engineering of transketolase substrate specificity.
12. Dimitriadou, E.K., Lye, G.J., Dalby, P.A. (2006) Paper accepted for poster presentation at *International Congress on Biocatalysis Biocat 2006*, Hamburg, Germany, 3-7 September. Light-emitting biosensor by redesign of photoprotein aequorin.
13. Hibbert, E.G., Senussi, T.O., Smith, M.E.B., Dalby, P.A. (2007) Biochemical Engineering Research Network (BERN), Birmingham, UK, 5 January. Complementary protein engineering approaches for altered transketolase substrate specificity.
14. Hibbert, E.G., Smith, M.E.B., Smithies, K., Kaulmann, U., Hailes, H.C., Ward, J.M., Dalby, P.A. (2007) European Symposium of the Protein Society, Stockholm, Sweden, 13-16 May. Comparison of the natural and directed evolution of transketolase.

Workshops, Short Courses, Policy Making & Review

1. Univ. Pennsylvania School of Medicine Summer Workshop. Delaware, USA, July 1999. "Evolution of Stability and Binding for a WW Domain using Phage Display".
2. Metabolic Engineering and Directed Evolution. BBSRC, U.Warwick, November 2000. "Forced evolution of a trypsin-based bioprocess"
3. EPSRC Life Sciences Interface Programme, Regional Seminar. Institute of Materials, London 13 June 2003
4. RSC/ICChemE workshop, Beyond the molecular frontier: the chemistry/chemical engineering interface in the UK, Redhill, Surrey 6-7 December 2004. By invite.
5. EPSRC Chemistry Programme's Regional Meeting. London, 9th February 2005.
6. Technology Strategy Board (TSB) Roadmapping Workshop on Biotechnology, 8th February 2008. By invite.
7. Royal Academy of Engineering. Engaging with Synthetic Biology. 18 June 2009.
8. BBSRC IBTI Club Scoping Workshop. London. 9-10 July 2009. By invite.
9. Quinquennial review of MRC Protein and Nucleic Acid Division, Cambridge UK, December 2009. By invite.
10. BBSRC Bioprocessing Research Industry Club (BRIC) Scoping Workshop. London. 7 December 2009. By invite.
11. BBSRC Research Grant Panel Committee C as pool member 14-15 September 2010.
12. BBSRC Research Grant Panel Committee D as core member January 2011-December 2014.
13. BBSRC/EPSRC and engineers meeting 27th February 2012 by invite.
14. Scientific review and evaluation of the Austrian Research Promotion Agency (FFG) K2- Centre ACIB, Graz, Austria, May 2012.
15. IBLF Industrial Biotechnology Skills Group, Leeds, biannual since 2012.
16. BBSRC Bioprocessing Research Industry Club (BRIC) Steering Group Member since July 2013.
17. KTN / CPI analytical development workshop for the CPI National Biologics Manufacturing Centre (NBMC) 26 November 2013.
18. TSB assessor for Technology Inspired Innovation 2011.
19. TSB assessor for Advanced Manufacturing Supply Chain Initiative Competition 2012.
20. TSB assessor for Biomedical Catalyst 2012.
21. TSB assessor for Technology Inspired Competition 2013.
22. TSB assessor for Advanced Manufacturing Supply Chain Initiative (AMSCI) competition 2013.
23. TSB/BBSRC assessor and panel member for IB Catalyst competition 2014 (Rounds 1 and 2).
24. Innovate UK assessor and panel member for IB Catalyst competition 2015 (Rounds 3 and 4).
25. Innovate UK assessor and panel member for Bioprocess analysis competition 2016.
25. Innovate UK assessor for iCURE competition 2016.
25. Innovate UK assessor for Materials and Manufacturing competition 2016.
26. External Reviewer of Research at the Department of Chemistry, DTU 2019.

Other National or International Meetings attended

1. Royal Society Discussion Meeting on Protein Folding. London, UK, 1994.

2. BBSRC, EPSRC & MRC - Taking a small look at life. London, March 2001.
3. BBSRC, EPSRC & MRC - Tomorrows technology. London, May 2001.
4. Protein Science Forum, Novartis, Horsham, UK, 18-19 November 2002.
5. Royal Academy of Engineering - Nanotechnology. London, UK, October 2003.
6. Biochemical Engineering Research Network (BERN), Birmingham, UK, January 2005.
7. Royal Society - Bioinformatics - From molecules to systems. London, UK, April 2005.
8. BIA & Bioprocess UK - The Challenges of Improving the Formulation and Delivery of Biopharmaceuticals, Bradford, UK, 9 June 2005.

Conferences organized

1. Royal Society of Chemistry Biotechnology Group - Achievements and Challenges in Biotransformation, London, UK, March 2004.
2. MBI® - Challenges and Opportunities in Biocatalysis: Accelerating Development & Increasing Yield, Dept Biochemical Engineering, London, UK, April 2005.
3. Royal Society of Chemistry Biotechnology Group - Therapeutic Proteins: Chemical & Enzymatic Modification, London, UK, June 27th, 2006.
4. MBI® - Challenges and Opportunities in Biocatalysis: Accelerating Development & Increasing Yield, Dept Biochemical Engineering, London, UK, November 2006.
5. MBI® - Challenges and Opportunities in Biocatalysis, UCL, London, UK, October 2007.
6. MBI® - Challenges and Opportunities in Biocatalysis, UCL, London, UK, October 2008.
7. Royal Society of Chemistry Biotechnology Group – Advances in Biocatalysis, UCL, London, UK, April 21st, 2009.
8. Royal Society of Chemistry Biotechnology Group – High-Value Chemicals from Biomass, RSC, London, UK, Sept 17th, 2013.
9. Royal Society of Chemistry Biotechnology Group – Translational Biocatalysis, RSC, London, UK, Dec 16th, 2014.
10. BioProNet Analytical Workshop – UCL, London, UK, 14th January 2015.
11. KTN Biopharmaceutical Formulation Group Meeting, UCL, London, 7 July, 2016
12. ACS BIOT Session Chair April 2017. QbD.
13. Royal Society of Chemistry Biotechnology Group – Biotransformations: From Science to Industrial Application, RSC, London, UK, Dec 19th, 2017.
14. KTN Formulation. Manchester, 2018.
15. KTN Formulation. Manchester, 2019.
16. KTN Formulation. Virtual, 2020
17. BioProNet2. Virtual, 2021.

Theses completed

1. Edward G. Hibbert (2004) "Engineering & molecular biology approaches to improving trypsin-based bioprocesses"
2. Oliver J. Miller (2005) "The Directed Evolution of Transketolase, a Carbon-Carbon Bond-Forming Enzyme"
3. Jean P. Aucamp (2005) "Engineering a novel high-throughput screen for directed evolution of enzyme stability"
4. Sean J. Costelloe (2007) "Natural evolution and engineering of transketolase"
5. Gareth Mannall (2007) "Characterisation of the effect of process factors upon protein refolding yield"
6. Tarik Senussi (2007) "Directed evolution to modify the substrate specificity of transketolase, a carbon-carbon bond forming enzyme"
7. Janahan Paramesvaran (2008). "Directed evolution of the substrate specificity of trypsin".
8. Julio Martinez-Torres (2009). "Characterisation of the structural stability of transketolase under biocatalytically relevant conditions"
9. Brenda Parker (2009). "Directed evolution methods for the production of industrially useful biocatalysts"

10. Jaspreet Dosanjh (2010) "Protein damage during purification: understanding the effects of size exclusion chromatography on the structure of biosynthetic human insulin (BHI)"
11. Michael Rose (2010) "Investigation of excipient factors affecting protein stability in formulations, using high throughput techniques"
12. Yuki Abe (2010) "The molecular basis for antibody stability in the bioprocess environment"
13. Lydia Coward (2012). "Chemoenzymatic synthesis of novel, structurally diverse compounds"
14. Yitzchak Grant (2011) "Engineering the rational design and optimisation of lyophilization for biological materials"
15. Subhas Pradhan (2013) "Rational design of enterokinase for the development of enhanced biopharmaceutical proteins"
16. John Strafford (2011) "Docking and bioinformatics tools to guide enzyme engineering"
17. Eleftheria Polykarpou (2011) "Optimisation of Chromatography for Downstream Protein Processing"
18. Shahina Ahmad (2011) "Analysis of the precipitation and aggregation of engineered proteins"
19. Phattaraporn Morris (2011) "What causes an enzyme to degrade during biocatalysis?"
20. Gemma Ordidge (2012) "Rapid microscale evaluation of the impact of fermentation conditions on inclusion body formation, solubilisation and protein refolding yields". PhD collaboration with Avecia.
21. Raha Jahromi Fard (2013) "Evolutionary and mutagenesis studies of transketolase to guide further protein engineering"- submitted.
22. Hani El-Sabbahy (2013) "Development of preparative microfluidic techniques for rapid throughput quantitation of product quality attributes".
23. Evi Dimitriadou (2014) "Redesign of calcium-regulated photoprotein aequorin towards the development of a novel ion bioreporter"
24. Udofoyo Uye (2014) "Stability, structure and formulation of antibody fragments during bioprocessing". EngD Collaboration with GSK
25. Panwajee Payongsri (2014) "Synthetic Biology Approaches for the production of chiral aminoalcohols in engineered *E. coli* strains"
26. Lucy Rayner (2015) "Molecular mechanism of human antibody aggregation in solution"
27. Samir Aoudjane (2016) "All optical thermal control for microfluidic biological analysis systems - for assessment of Hepatitis B Virus mutational patterns in a clinical setting"
28. Mathew Robinson (2016) "Investigating the relationship between forced degradation and long-term shelf life for biotherapeutics". BBSRC BRIC-funded PhD collaboration with NIBSC.
29. David Hilton (2016) "Elucidating the aggregation mechanisms of antibody fragments through biophysical analysis"
30. Weiluo Lee (2016) "Directed evolution of bovine enterokinase for high functional expression in *E. coli*"
31. Cheng Zhang (2017) "Freeze-drying of engineered proteins using protein modelling tools and experimental validation"
32. Pierre Affaticati (2017) "Engineering transketolase for industrial biotechnology"
33. Haoran Yu (2019) "Protein Engineering of Transketolase for Industrial Applications"
34. Victoria Wood (2019) "Use of in silico and biophysical techniques to predict protein stability"
35. Nuria Codina (2019) "Stability and aggregation-prone conformations of an antibody fragment antigen-binding (Fab)"
36. Henry Wilkinson (2019) "Exploration and exploitation of non-canonical amino acid incorporation to detect or improve transketolase activity and stability"
37. Jay Joshi (2020) "The development of next-generation small volume biophysical screening for the early assessment of monoclonal antibody manufacturability"
38. Icken Roberto Hernandez Lopez (2020) "Development Of A High-Throughput Screening Method For Transketolase And Protein Engineering For Biotechnology Applications"
39. Valentina Spiteri (2021) "Unravelling the structure of glycosylated and deglycosylated immunoglobulin G antibodies"
40. Akash Pandya (2021) "Mapping the interaction between excipients with proteins in formulations by computational modelling and NMR"

41. Ji Ho Shin (2022) "Characterisation of the Interaction Between Recombinant Staphylococcal Protein-As and Human Heavy Chain Variable Domains"

PhD and Masters examinations

1. Luis Briseño-Roa (2005) "Enzyme and directed evolution technologies for nerve agent neutralisation", University of Cambridge.
2. Joseph Bennett (2008) "Structural characterization of two enzymes from the crotonase superfamily", University of York
3. Richard Davies (2008), UCL
4. Jamie Biddlecombe (2009), "Antibody stability in bioprocessing focusing on shear effects at solid-liquid interfaces", UCL
5. Benoît Villiers (2009), "Directed evolution of a non-ribosomal peptide synthase enzyme", University of Cambridge.
6. Abhishek Deshpande (2009), University of Cambridge
7. William Bryant (2010), "Functional Genomics, analysis of adaptation in and applications of models to the metabolism of engineered Escherichia coli" UCL
8. Wiktor Banachewicz (2010) "Biophysical characterization of the ultrafast folding homeodomain - Pit1", University of Cambridge
9. Evdoxia Gourbatsi (2010) "Development of high concentration therapeutic antibody formulations and monitoring procedures for improved delivery and protein product quality assurance", University of Kent.
10. Inass Hassan (2010) UCL
11. Rosanna Smith (2011) "Structure and function of the avian neuronal nucleus for sound localisation" UCL
12. Nicole Lim (MPhil) (2011) University of Cambridge.
13. Aaron Westlake (MRes) (2012) University of Exeter.
14. Marcel Reichen (2012) "Multiplexed microfabricated cell culture device for stem cell process development", UCL.
