IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

CIRRUS LOGIC, INC.;
OMNIVISION TECHNOLOGIES, INC.

Petitioner,

v.

GREENTHREAD, LLC,
Patent Owner.

Case No. IPR2024-00021
Patent No. 11,121,222

PETITIONER'S OBJECTIONS TO PATENT OWNERS' DEMONSTRATIVES

Pursuant to the Board's January 17, 2025, Order Setting Oral Argument (Paper 63), Petitioners Cirrus Logic, Inc., Omnivision Technologies, Inc., and Texas Instruments Inc. (collectively, "Petitioners") objects to the following portions of the demonstratives filed by Greenthread, LLC ("Patent Owner").

Slide(s)	**Objection(s)**
15-18	Slides contain improper new claim construction argument regarding the term "minority carriers" in the challenged claims of the -00017, -00018, and -00021 proceedings, not advanced in any of Greenthread's Patent Owner Responses or Sur-Reply Briefs.
41-43	Slides contain improper new argument regarding Petitioner's mapping of the Payne reference to the "*graded concentration*" limitations, including the *span* of the graded concentration and the allegation that the concentration is "*flat*" is certain regions. Such arguments were not advanced in any of Greenthread's Patent Owner Responses or Sur-Reply Briefs, which only challenged Petitioner's showing of the alleged "*movement*" limitation (based on concentration *magnitude* and *other forces*).
44-46	Slides contain improper new argument regarding Petitioner's mapping of the Payne reference to the "*electric field*" limitations, including the *span* of the electric fields, based on the allegation that the concentration is "*flat*" is certain regions. Such arguments were not advanced in any of Greenthread's Patent Owner Responses or Sur-Reply Briefs, which only challenged Petitioner's showing of the alleged "*movement*" limitation (based on concentration *magnitude* and *other forces*).
54-57	Slides contain improper new argument regarding Petitioner's mapping of the Payne reference to the "*minority carriers*" limitations, specifically Petitioner's identification of which carrier type would be the claimed "minority carrier" in the N-well region of Payne's PMOS transistor.

	Such arguments were not advanced in any of Greenthread's Patent Owner Responses or Sur-Reply Briefs, which only challenged Petitioner's showing of the alleged "*movement*" limitation (based on concentration *magnitude* and *other forces*).
61-62	Slides contain improper new argument regarding Petitioner's mapping of the Onoda reference to the "*graded concentration*" limitations, including the *span* of the graded concentration and the allegation that the concentration is "*flat*" is certain regions. Such arguments were not advanced in any of Greenthread's Patent Owner Responses or Sur-Reply Briefs, which only challenged Petitioner's showing of the alleged "*movement*" limitation (based on concentration *magnitude* and *other forces*).
63-66	Slides contain improper new argument regarding Petitioner's mapping of the Onoda reference to the "*electric field*" limitations, including the *span* of the electric fields, based on the allegation that the concentration is "*flat*" is certain regions. Such arguments were not advanced in any of Greenthread's Patent Owner Responses or Sur-Reply Briefs, which only challenged Petitioner's showing of the alleged "*movement*" limitation (based on concentration *magnitude* and *other forces*).
67-70	Slides contain improper new argument regarding Petitioner's mapping of the Onoda reference to the "*minority carriers*" limitations, specifically Petitioner's identification of which carrier type would be the claimed "minority carrier" in the P-well region of Onoda's NMOS transistor. Such arguments were not advanced in any of Greenthread's Patent Owner Responses or Sur-Reply Briefs, which only challenged Petitioner's showing of the alleged "*movement*" limitation (based on concentration *magnitude* and *other forces*).

Dated: January 30, 2025

Respectfully submitted,
