

AFFIDAVIT OF NATHANIEL E FRANK-WHITE

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.
2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.
3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.
4. The archived data made viewable and browsable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.
5. The Internet Archive assigns a URL on its site to the archived files in the format `http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]` aka an "extended URL". Thus, the extended URL `http://web.archive.org/web/19970126045828/http://www.archive.org/` would be the URL for the record of the Internet Archive home page HTML file (`http://www.archive.org/`) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.
6. Attached hereto as Exhibit A are true and accurate copies of screenshots of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each printout.

7. I declare under penalty of perjury that the foregoing is true and correct.

what is Shelter Library?

Shelter Library is a free service supporting and informing good practice by humanitarian organisations responding to the transitional settlement and shelter needs of populations affected by conflict and natural disasters.

how to use Shelter Library

The menu to the left offers six ways to find material in Shelter Library:

1. use the keyword search by entering a keyword into the 'search' box
2. develop a more detailed search using many criteria by selecting the 'search options' option
3. browse the authors of material by selecting the authors option
4. browse the publishers of material by selecting the publishers option
5. browse from the categories listed on the left, such as 'displacement' and 'guidelines' - you will find the same documents appearing in a number of these categories, in order to improve navigation.
6. for the online version of Shelter Library, it is also possible to use the deep search function, which is still being tested. This function looks for words inside the documents, using the Google search engine, which makes a cache of the website that is updated fortnightly.

copyright information

Shelter Centre has been granted permission by the following publishers to post documents on both the online (www.shelterlibrary.org) and CD resource versions of Shelter Library. The copyrights remain with the publishers of the documents:

The Sphere Project

The Overseas Development Institute (ODI) has requested that copyright information be included on the page relating to each

entry of its publications, and those of its affiliated organisations, the Humanitarian Policy Group (HPG) and the Humanitarian Practice Network (HPN).

Shelter Centre has made efforts to ensure that it meets the copyright requirements of the organisations producing the documents that are available in the Shelter Library. If, for any reason, organisations would like to prevent the use of their documents, they are requested to email secretariat@sheltercentre.org.

about Shelter Library

Shelter Library is maintained by **Shelter Centre** and its volunteer team, which will continually add material to the online version of Shelter Library (www.shelterlibrary.org). If you are aware of any material that can be shared freely that you consider ought to be added to this site, please make your proposal to library@sheltercentre.org.

The **Shelter Library** resource is available on-line as a website and off-line as a CD-ROM, distributed with the guidelines 'Transitional Settlement: Displaced Populations', published in 2005 by [Oxfam Publications](#). These guidelines were developed by the [University of Cambridge shelterproject](#) as part of a project funded by [DFID](#).
