About Oh Crap! App

 English

Download if you enjoy socializing but insist that your legal rights be respected

Download this app if you enjoy socializing but insist that your legal rights be respected and protected. Oh Crap App is the go-to lifestyle resource designed to engage, educate and equip individuals with the tools necessary to have a good time while protecting their legal rights. Go out, have fun, be safe and get home – all with Oh Crap App.

This app now features “Crap Chat” which allows users to communicate alerts, special offers, and community events to one another for free. Receive notices about happy hour specials, speed traps, road blocks or community gatherings all with a click of a button. Be in the know and out of trouble. Filter events that you want to receive alerts for under the “settings” section of the app.

Oh Crap App also features the emergency “Oh Crap!” button designed to be used during interactions with law enforcement. Oh Crap App is THE original police interaction application. Click the “Oh Crap!” button and receive a few simple legal reminders, record the interaction and have a lawyer in your area a click away.

Under the Educate Me section the user will find helpful information including rights education, an informational Blood Alcohol Calculator, tips on how to avoid a DUI, and a searchable database by State. Oh Crap App is the ONLY resource that educates users on their legal rights across the entire nation, based upon their location at the time the app is used. The legal rights, lawyer, taxis and bondsmen listings provided by the app will differ based upon your geographic location at the time the app is activated as shown by your GPS coordinates. Every State has different laws so the goal of Oh Crap App is to provide you with the State-specific rights and best lawyer to contact in that region in your time of need.

WARNING: Every time the recording button is activated, recording and uploading will begin, this may incur data charges from your wireless provided that YOU will be solely responsible for.

What's New in the Latest Version 4.2.1

the touch of a button. Event notifications may be filtered by distance from user under the settings section.
Minor bug fixes.
