

Index of Challenged Claims for U.S. Patent No. 11,494,861

Claim #	Claim
1	<p>A mobile lawyer system for a user subscriber, the system comprising:</p> <p>a remote server and a remote database;</p> <p>at least one video camera;</p> <p>at least one display screen;</p> <p>a mobile device executing a mobile application in communication with the at least one video camera and the at least one display screen,</p> <p>and configured, upon command from the user subscriber, to automatically and immediately communicate a current location of the mobile device to the remote server,</p> <p>the remote server being configured to:</p> <p>automatically search a plurality of information records associated with a plurality of lawyers stored in the remote database;</p> <p>automatically identify at least one lawyer licensed in a jurisdiction that correspond to the current location of the mobile device;</p> <p>automatically transmit at least one notification to at least one computing device associated with the identified at least one lawyer;</p> <p>receive an acceptance of legal representation engagement from the computing device associated with the at least one lawyer; and</p> <p>automatically and immediately set up a video communication session between the computing device associated with the at least one lawyer and the mobile device, so that live video data of the user subscriber is automatically transmitted to the computing device associated with the at least one lawyer and live video data of the at least one lawyer is automatically transmitted to the display screen; and</p>

	<p>during the video communication session, the at least one display screen being configured to stream live video data of the at least one lawyer, and the at least one video camera being configured to capture and live-stream video of the user subscriber and surroundings to the computing device for viewing by the at least one lawyer and for storage in the remote database.</p>
6	<p>A mobile lawyer method for a user subscriber experiencing an encounter with a law enforcement office, comprising:</p> <p>receiving a live consultation request from a user's mobile device;</p> <p>automatically and immediately initiating capture of images of the user and surroundings, and live-streaming the captured images to a remote server for encrypted storage via a computer network in response to receiving the consultation request;</p> <p>automatically and immediately determining a current location of the mobile device;</p> <p>automatically and immediately transmitting the current location of the mobile device to the remote server;</p> <p>automatically receiving live-streaming video data of an identified at least one remote lawyer licensed to practice law in a jurisdiction associated with the current location of the mobile device in response to the determined current location of the mobile device;</p> <p>automatically live-streaming captured video images of the user to the at least one remote lawyer via the remote server;</p> <p>automatically displaying the live-streaming video data of the identified at least one remote lawyer on a display monitor viewable by the user; and automatically storing the captured video data of the user and the at least one remote lawyer in the remote server for encrypted storage.</p>
7	<p>The mobile lawyer method of claim 6, wherein initiating capture of images of the user and surroundings comprises initiating a capture of video images by at least one video camera selected from the group</p>

	consisting of: at least one video camera mounted on a drone, at least one camera native to the mobile device, front and back-facing cameras native to the mobile device, at least one camera integrated and mounted on a vehicle, at least one camera mounted at various points of a vehicle, at least one camera with infrared capabilities, and at least one 360-degree video camera.
10	The mobile lawyer method of claim 6, wherein automatically determining a location of the user comprises accessing a GPS location of the user, and determining a street address location from the GPS location.
11	The mobile lawyer method of claim 6, further comprising automatically searching, by the remote server, a database storing data associated with a plurality of lawyers, and automatically identifying at least one remote lawyer licensed in a jurisdiction that matches the current location of the user.
15	<p>A mobile lawyer system for a user subscriber experiencing an encounter with a law enforcement office, comprising:</p> <p>at least one video camera; a display device;</p> <p>a mobile device executing a mobile application configured to be in communication with the at least one video camera and the display device, and configured, upon command from a user subscriber, to automatically and immediately transmit a current location of the user subscriber and</p> <p>automatically stream live video of the user subscriber and surroundings captured by the at least one video camera to be stored in a remote database,</p> <p>and to automatically communicate with a lawyer [boated] remotely and selected at least in part in response to the current location of the user subscriber via a communication channel set up by a remote server;</p> <p>and the at least one display screen configured to automatically display a live video image of the remote lawyer, and the at least one</p>

	video camera being configured to automatically capture and live-stream video of the user subscriber and surroundings for viewing by the remote lawyer and for storage in the remote database.
16	The mobile lawyer system of claim 15, wherein the at least one video camera is selected from the group consisting of: at least one video camera mounted on a drone, at least one camera native to the mobile device, front and back-facing cameras native to the mobile device, at least one camera integrated and mounted on a vehicle, at least one camera mounted at various points of a vehicle, at least one camera with infrared capabilities, and at least one 360-degree video camera.
20	<p>The mobile lawyer method of claim 6, further comprising: automatically generating and sending an alert to the at least one remote lawyer;</p> <p>receiving at least one response from the at least one remote lawyer;</p> <p>automatically selecting one lawyer from the at least one remote lawyer who sent a response;</p> <p>and automatically engaging the selected lawyer.</p>
