

‘395 Issued Patent Claims:	’300 Application, Redmon ‘395 Provisional Application Support or lack thereof
1. A mobile lawyer system for use during a traffic stop comprising:	[0006] This concept uses technology to insert the presence of a third party, a licensed attorney, into a police encounter. [0013] It is hope that the Mobile Attorney technology described herein can provide a desperately needed calming and tempering presence that can be called upon whenever a police encounter occurs. [WHAT IS CLAIMED IS:] 1. A mobile attorney system comprising:
(a) a mobile device having at least one video camera configured for mounting inside the passenger compartment of a vehicle and capture video images of a driver of the vehicle;	[0007] A user may download and install the Mobile Attorney app onto his mobile phone. [0008] The Mobile Attorney app is preferably used with a 360 degree camera that can live stream 360 degrees of video data over the Internet and/or cellular network. The 360 degree camera is preferably high definition and designed for mounting on the dash of a vehicle. [0009] The 360 degree camera is mounted and positioned so that it may optimally capture the actions of the user/driver . . . Because of the 360 degree nature of the video camera, the actions of any passenger in the car . . . can be clearly captured. [WHAT IS CLAIMED IS:] a 360 degree HD video camera configured for mounting inside the passenger compartment of a vehicle; . . . a mobile attorney app downloaded and installed on a mobile telephone in communication with the video camera . . .
(b) the mobile device further incorporating a display screen viewable by the driver of the vehicle;	[0008] In a preferred embodiment, the Mobile Attorney app is also used with a dash-mounted display monitor such as the seven inch LCD display, Chinavision product code CVABR-LT298.

	[0009] The display screen is also preferably dash-mounted or mounted somewhere so that the police officer standing outside of the car can see the screen clearly without obstruction. . . . Alternatively, the same can be displayed on the screen of the mobile phone. [WHAT IS CLAIMED:] a display screen configured for mounting inside the passenger compartment of a vehicle . . .
(c) a remote server and a database configured to store information about a plurality of lawyers licensed in at least one jurisdiction;	The '300 provisional does not disclose this limitation of a "remote server" and "a database configured to store information about a plurality of lawyers"
(d) the mobile device executing a mobile application configured, upon command from the driver of the vehicle, to communicate with the remote server, wherein the remote server is configured to automatically determine a location of the vehicle, automatically identify a jurisdiction associated with the vehicle location, automatically identify at least one lawyer licensed in the identified jurisdiction, and immediately automatically directly notify the at least one identified lawyer for assistance; and	The '300 provisional does not disclose this limitation of a "remote server." [0008] The Mobile Attorney app will have GPS and GOOGLE MAPS capabilities, or alternatively have access to these functions of the mobile phone, so that it may be able to pinpoint the location of the user and relay this information. [0009] Once the user clicks on the icon and initiates a session, a licensed attorney in the same jurisdiction of that user, is notified (the user's GPS location may be used to determine the jurisdiction). The notification may be done via the attorney's own mobile phone or computer, in the form of a text message, a phone call, or another form of alert. [WHAT IS CLAIMED:] a mobile attorney app downloaded and installed on a mobile telephone . . . to notify an attorney located remotely via a cellular network . . .
(e) the display screen of the mobile device configured to live-	[0008] The Mobile Attorney app is preferably used with a 360 degree camera

stream a video image of the at least one identified lawyer for presentation to the driver of the vehicle, and the at least one video camera is configured to automatically live-stream video captured by the at least one video camera for viewing by the at least one identified lawyer and for storage in the remote database, where the at least one mobile device being configured to automatically enable bi-directional audio and video communication between the at least one identified lawyer and the at least one passenger.	that can live stream 360 degrees of video data over the Internet and/or cellular network. [0009] The user connects the phone to the 360 degree camera and optionally to the display screen. The 360 degree camera is mounted and positioned so that it may optimally capture the actions of the user/driver as well as the police officer that steps up to the car and standing by the driver's door. . . . The display screen is also preferably dash-mounted or mounted somewhere so that the police officer standing outside the car can see the screen clearly without obstruction. . . . The licensed attorney immediately begins a video session so that his/her face and name/identification appear on the dash-mounted display screen inside the vehicle but in clear view of the police officer. Alternatively, the same can be displayed on the screen of the mobile phone. The attorney's speech can be relayed by a display screen that has audio speaker capability or through the speakers on the user's mobile phone. . . . The licensed attorney can have a 360 degree view of the scene by accessing the live streamed video from the video camera. [0010] By the time the police officer steps up to the driver's side window, the display screen shows the attorney's face and identification, and the video camera is capturing and live streaming video data. When the police officer first comes into view, the attorney may choose to introduce him/herself . . . the attorney may interject if and when the situation demands it . . . The attorney may also provide guidance to the
---	---

	user to cooperate with the police officer and serve as a calming influence in a scenario that may be tense for all parties involved. [0013] Not unlike having a legal adviser along at all times, the Mobile Attorney can be summoned and serve to observe and provide guidance to the user in tense situations. [0014] It should be noted that the word “video” herein is used to denote audio and video. [WHAT IS CLAIMED IS:] a mobile attorney app downloaded and installed on a mobile phone . . . to display a video image of the remote attorney on the display screen (or the screen of the mobile telephone), and to live stream a 360 video captured by the video camera to the Internet for viewing by the remote attorney and for cloud storage.
2. The mobile lawyer system of claim 1, wherein the at least one video camera comprises a 360-degree high definition video camera configured to capture video images in a plurality of directions.	[0008] The Mobile Attorney app is preferably used with a 360 degree camera that can live stream 360 degrees of video data over the Internet and/or cellular network. The 360 degree camera is preferably high definition and designed for mounting on the dash of a vehicle. An example of such a camera is a 1080- sports action camera, Chinavision product code CVLM-DV141. [0009] The 360 degree camera is mounted and positioned so that it may optimally capture the actions of the user/driver as well as the police officer that steps up to the car and standing by the driver’s side door. Because of the 360 degree nature of the video camera, the actions of any passenger in the car and activities that occur around the vehicle can be clearly captured. . . . The licensed attorney can have a 360 degree view

	of the scene by accessing the live streamed video from the video camera. [WHAT IS CLAIMED:] a 360 degree HD video camera configured for mounting inside the passenger compartment of a vehicle . . .
3. The mobile lawyer system of claim 1, wherein the at least one video camera comprises a video camera mounted on a drone	The '300 provisional does not disclose this limitation of a video camera mounted on a drone.
4. The mobile lawyer system of claim 1, wherein the at least video camera comprises a plurality of video cameras mounted on the vehicle configured to capture video images in a plurality of directions.	The '300 provisional does not disclose this limitation of "a plurality of video cameras mounted on the vehicle"
5. The mobile lawyer system of claim 1, wherein the database is configured to store information about a plurality of licensed lawyers, including in which jurisdiction where each lawyer is licensed, and contact information for each lawyer.	The '300 provisional does not disclose this limitation of "the database is configured to store information about a plurality of licensed lawyers, including in which jurisdiction where each lawyer is licensed, and contact information for each lawyer."
6. The mobile lawyer system of claim 1, wherein the database is configured to store encrypted data.	The '300 provisional does not disclose this limitation of a database is configured to store encrypted data.
7. The mobile lawyer system of claim 1, wherein the at least one identified lawyer is able to receive and view the live-streamed video data of the at least one passenger on a computing device, which is also configured to capture video images of the at least one identified lawyer and	The '300 provisional does not disclose this limitation of a remote server. [0009] The licensed attorney can have a 360 degree view of the scene by accessing the live streamed video from the video camera. The live streamed video is, at the same time, stored in a cloud data storage.

transmit them to the remote server.	[0012] The attorney function also includes capturing and storing of the video of the attorney in cloud storage. [WHAT IS CLAIMED:] . . . to live stream a 360 degree video captured by the video camera to the Internet . . . for cloud storage.
8. The mobile lawyer system of claim 1, further comprising at least one video camera configured for mounting outside the passenger compartment of the vehicle and capture video images of at least one passenger in the vehicle and surrounding environment.	The '300 provisional does not disclose this limitation of a video camera configured for mounting outside of the passenger compartment”
