Why IT engineers in every industry prefer Bright Data for Datacenter Proxies

Widest geographic coverage, built to scale

Good data starts with the freedom to access the web with transparency and anonymity. Bright Data’s Datacenter Proxies are unparalleled in the industry for business-grade scaling. Widely known as the leading proxy infrastructure, Bright Datacenter Proxies outperform the rest in terms of network reliability, comprehensive global coverage, compliance, and premium quality of service.

- ✓ Global coverage, including US, China, & Europe
- ✓ Gather vast amounts of public web data with total anonymity

Fastest and most stable Datacenter proxies

Proxies that work reliably save you time and get you uninterrupted access to vast troves of web data. Reliable Datacenter Proxies are those that can perform as your business scales. But not all Datacenter proxy networks are built alike. Bright Data's Datacenter Proxy Server is able to support at scale, so that your data arrives reliably for real-time data-driven decisions.

- ✓ Country, state, & city-level targeting
- ✓ Shared or dedicated IPs

Accessibility

Proxy integration, made easy for developers

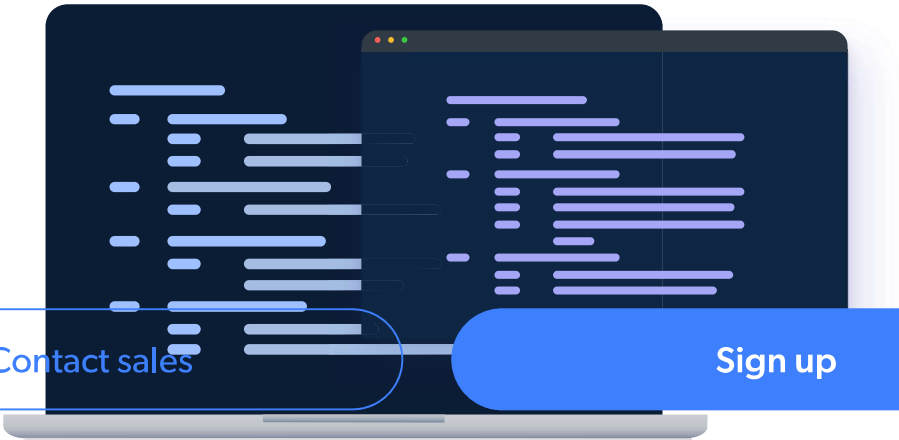

- ✓ No-hassle integration for first-timers with Bright Data API
- ✓ Documentation made easy for developers
- ✓ Manage proxies with developer-favorite Bright Data Proxy Manager
- ✓ Define custom rules for optimized DC Proxies results
