All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without the prior permission of Oxford University Press.

This book is sold subject to the condition that it shall not, by way of trade or otherwise, be lent, resold, hired out, or otherwise circulated without the publisher's prior consent in any form of binding or cover other than that in which it is published, and without a similar condition including this condition being imposed by the subsequent purchaser.

This book includes some words which have or are asserted to have proprietary status as trade marks or otherwise. Their inclusion does not imply that they have acquired for legal purposes a non-proprietary or general significance nor any other judgement concerning their legal status. In cases where the editorial staff have some evidence that a word has proprietary status this is indicated in the entry for that word but no judgement concerning the legal status of such words is made or implied thereby.

☆ **overwrite** *verb*

1 to replace a character on the screen with another character by using the keyboard: *Text to the right of the cursor can be overwritten.* 2 (system operation) to replace an item of data in memory or on disk by putting another item of data in its place: *The original data in the file was lost when it was overwritten.*

/ˌəʊvəˈraɪt/

overwrite, overwriting, overwrote, overwritten

note transitive verb

1 **overwrite** a character, letter, number, symbol

2 **overwrite** a file, record

Pp

p *abbr*

► **pico**

/pi:/

pack¹ *noun*

1 a number of punched cards

2 ► **disk pack**

/pæk/

pl packs

pack² *verb*

to reduce the amount of storage space taken up by data or information: *pack individual bits into a single byte*

/pæk/

pack, packing, packed

note transitive verb

✱ **pack** something *into* a data item, etc

► **unpack**

package *noun*

► **software package**

/'pækɪdʒ/

packed decimal *noun*

a way of encoding decimal numbers in binary form to save storage space. One byte represents two decimal digits: *four numeric bits are packed two to a byte to produce a packed decimal byte string*

/ˌpækt 'desɪml/

pl packed decimals

✱ a **packed decimal** instruction, operand, string

packet *noun*

a group of binary digits forming part of a message. The group is transmitted together, but not always by the same route as other packets which form part the same message: *The data transmission is split into packets of equal size.*

/'pækɪt/

pl packets

✱ send, split data *into* **packets**

note Packets of data are sometimes called 'datagrams'.

packet assembler/disassembler *noun*

► **PAD**

/'pækɪt ə'sembə
,dɪsə'sembə(r)/

packet switching *noun*

a method of sending messages over telephone lines or a network by dividing the messages into units of digital data of fixed length, called packets. The packets are sent separately over the network, by any route that is available, and put together to form the complete message when they arrive: *Packet switching is used on most wide area networks.*

/'pækɪt ,swɪtʃɪŋ/

note no plural

✱ a **packet switching** link, network, system

► **circuit switching**
