Pursuant to the Proposed Scheduling Order (D.I. 92) and the applicable Local Rules of the U.S. District Court for the District of Delaware, Counter-Defendant Apple Inc. (“Apple”) hereby provides its Final Invalidity Contentions.

I. INVALIDITY OF ASSERTED PATENTS AND CLAIMS

Counter-Claimants Masimo Corporation and Cercacor Laboratories, Inc. (collectively, “Masimo”) served their Final Infringement Contentions (“Infringement Contentions”) on August 17, 2023, purporting to assert infringement of the following claims (“Asserted Claims”) of U.S. Patent Nos. 10,687,743 (“the ’743 patent”), 10,722,159 (“the ’159 patent”), 8,190,223 (“the ’223 patent”), 10,736,507 (“the ’507 patent”), and 10,984,911 (“the ’911 patent”) (collectively, “Asserted Patents”):

Asserted Patents	Asserted Claims
’743 patent	1, 4-8, 11, 12, 14, 16, 18, 19, 21
’159 patent	1-5, 7-9, 13, 19-23, 25
’223 patent	15, 21, 22, 27, 28, 34, 36, 37, 42, 43
’507 patent	13, 14, 16, 17, 19, 20
’911 patent	1-5, 8, 10-14, 17, 19-25, 28

With respect to each of the Asserted Claims and based on its investigation to date, Apple hereby provides (1) amended charts setting forth where in the prior art references the elements of the Asserted Claims are disclosed or otherwise suggested under sections 102 and 103, (2) an amended identification of claims that are directed to ineligible subject matter under section 101, (3) an amended identification of any limitations that lack definiteness, written description, or lack enablement under section 112, and (4) an amended identification of claims that are invalid due to double-patenting. These Final Invalidity Contentions are subject to Apple’s reservation of rights as set forth below.

The Asserted Patents purport to have the following filing dates:

Asserted Patents	Filing Date
'743 patent	February 14, 2020
'159 patent	February 14, 2020
'223 patent	March 1, 2006
'507 patent	January 25, 2018
'911 patent	September 22, 2020

Masimo has the burden to identify and demonstrate entitlement to any priority date before the aforementioned filing dates. Masimo thus far has not identified, let alone demonstrated entitlement to, any pre-filing priority date for any Asserted Patent. Apple reserves the right to dispute any alleged pre-filing priority date for any Asserted Patent should Masimo identify and attempt to demonstrate entitlement to any such date.

II. RESERVATION OF RIGHTS

Consistent with the Scheduling Order, Apple reserves the right to amend, supplement, modify, or update these Final Invalidity Contentions.

Apple bases these Final Invalidity Contentions on its current knowledge and understanding of Masimo's Final Infringement Contentions served on August 17, 2023, the prior art, and other facts and information available as of the date of these contentions. Discovery is not yet complete, and Apple has not yet completed its investigation, collection of information, discovery, or analysis relating to this action. For example, Masimo has not completed its document production and no depositions, let alone any prior art depositions, have yet occurred. Additionally, Apple has served subpoenas for third-party discovery relating to prior art, but those third-parties have not yet completed their document productions or appeared for depositions. Apple reserves the right to amend, supplement, modify, or update these contentions based on discovery and Apple's ongoing investigation, and to introduce, use, and rely on such materials at trial. Apple further reserves the

diagram, table, or drawing, the described figure, diagram, table, or drawing is incorporated by reference (even if that figure, diagram, table, or drawing is not explicitly cited).

While Apple has identified at least one citation per limitation present in a reference or combination, each and every disclosure of the same or similar limitation in the same reference or combination is not necessarily identified. In an effort to focus the issues, Apple cites only particularly pertinent portions of identified references, even where a reference or combination may contain additional support for a particular claim element. Thus, Apple may rely on uncited portions of the prior art references for additional support for a particular element. Apple may rely upon other prior art identified in future supplements, corroborating references, documentation, source code, products, and testimony, including materials obtained through further investigation and third-party discovery of the prior art identified herein, that demonstrates the invalidating functionality identified in these Final Invalidity Contentions, or that shows the state of the art in the relevant time period (irrespective of whether such references themselves qualify as prior art to the Asserted Patent), and expert testimony to provide context to or aid in understanding the cited portions of the identified prior art.

Additionally, persons of ordinary skill in the art generally read a prior art reference as a whole and in the context of other publications and literature. Numerous prior art references, including those identified herein, in the attached exhibits, and in Apple's August 17, 2023 Final Supplemental Identification of Invalidity References, reflect common knowledge and the state, scope, and content of the prior art before the priority date of the Asserted Claims of the Asserted Patents. Apple may rely on uncited portions of the prior art references and on other publications and expert testimony to provide context and as aids to understanding and interpreting the portions that are cited. The prior art references listed herein and in the accompanying invalidity claim

charts may disclose the elements of the Asserted Claims explicitly and/or inherently. The prior art references herein, in the attached exhibits, and in Apple's August 17, 2023 Final Supplemental Identification of Invalidity References are also relevant for their showing of the state of the art, as well as reasons and motivations for making improvements, additions, and combinations.

Apple reserves the right to rely on inventor admissions concerning the scope of the prior art relevant to the Asserted Patents found in, *inter alia*, the prosecution history of the Asserted Patents, related patents, and/or patent applications, any testimony or declarations of the named inventor concerning the Asserted Patents, related patents, patent applications, and/or the claimed inventions, and any papers or evidence submitted by Masimo in connection with the Asserted Patents or this litigation, any other future litigation brought by Masimo involving the Asserted Patents or related patents, *inter partes* review, or reexamination proceedings involving the Asserted Patents or related patents.

The following references, as explained further in Apple's Exhibits and in this cover document, (1) anticipate or render obvious (alone, or in combination with other references as set forth in detail in each claim chart and below) the Asserted Claims; or (2) provide background and context for the Asserted Claims:

A. Patents and Patent Applications

The following prior art patent references, including those patent references identified in Exhibits A-1 – A-18; B-1 – B-18; C-1 – C-15; D-1 – D-17; and E-1 – E-13, anticipate and/or render obvious the Asserted Claims of the Asserted Patents. In addition, Apple incorporates by reference all prior art patents listed as prior art in the Asserted Patents.

A portable reflectometer for the rapid quantification of cutaneous haemoglobin and melanin (“Feather”)	February 1, 1988	J. W. Feather, D. J. Ellis, and G. Leslie	APL_DEL01121952
Wearable Pulse Oximetry in Construction Environments (“Forsyth”)	March 29, 2010	Jason B. Forsyth	APL_DEL01121965
Usability testing of a prototype Phone Oximeter with healthcare providers in high- and low-medical resource environments (“Hudson”)	2012	J. Hudson, S. M. Nguku, J. Sleiman, W. Karlen, G. A. Dumont, C. L. Petersen, C. B. Warriner, and J. M. Ansermino	APL_DEL01122594
Effects of Motion Artifacts on Helmet-Mounted Pulse Oximeter Sensors (“Johnston 2004”)	2004	William S. Johnston, Paul C. Branche, Chirag J. Pujary, and Yitzhak Mendelson	APL_DEL01123334
Investigation of Signal Processing Algorithms for an Embedded Microcontroller-Based Wearable Pulse Oximeter (“Johnston 2006”)	2006	W. S. Johnston and Y. Mendelson	APL_DEL01123336

Title	Date of Publication⁴	Author or Publisher	Production Number
Human-Centered Phone Oximeter Interface Design for the Operating Room (“Karlen”)	2011	Walter Karlen and Guy Dumont	APL_DEL00032489
Wireless PDA-Based Physiological Monitoring System for Patient Transport (“Lin”)	December 2004	Yuan-Hsiang Lin, I-Chien Jan, Patrick Chow-In Ko, Yen-Yu Chen, Jau-Min Wong, and Gwo-Jen Jan	APL_DEL00031220
A Wearable Reflectance Pulse Oximeter for Remote Physiological Monitoring (“Mendelson”)	September 3, 2006	Y. Mendelson, R. J. Duckworth, and G. Comtois	APL_DEL00030452
Skin Reflectance Pulse Oximetry: In Vivo Measurements from the Forearm and Calf (“Mendelson 1991”)	January 1991	Y. Mendelson, Ph.D. and M.J. McGinn, MSc	APL_DEL01124277
Pulse Oximetry (“Moyle”)	2002	John TB Moyle	APL_DEL00031253
Effects of Motion Artifacts on Pulse Oximeter Readings from Different Facial Regions (“Nagre”)	2005	Anmol Nagre and Yitzhak Mendelson	APL_DEL01124384
New hybrid reflectance optical pulse oximetry sensor for lower oxygen saturation measurement and for broader clinical application (“Nogawa”)	1997	Nogawa, Masamichi, Ching, Chong Thong, Ida, Takeyuki, Itakura, Keiko, Takatani, and Setsuo	APL_DEL00037781

Title	Date of Publication⁴	Author or Publisher	Production Number
Using Discovery and Monitoring Services to Support Context-Aware Remote Assisted Living Applications (“Rodrigues”)	2009	André Luiz B. Rodrigues, Izabela C. Gomes, Leila N. Bezerra, Alexandre Sztajnberg, Sérgio T. Carvalho, Alessandro Copetti, and Orlando Loques	APL_DEL00036886
PDA based ambulatory pulse oximeter	May 31, 2006	Arpita Shah	APL_DEL01125726
A Flexible Data Processing Technique for a Tele-assistance System of Elderly People (“Tablado”)	June 2004	Alberto Tablado, Arantza Illarramendi, Miren I. Bagüés, Jesús Bermúdez, and Alfredo Goñi	APL_DEL00032254
Experimental and Clinical Evaluation of a Noninvasive Reflectance Pulse Oximeter Sensor (“Takatani 1992”)	October 1992	Setsuo Takatani, Charles Davies, Naoki Sakakibara, Andrew Zurick, Erik Kraenzler, Leonard R. Golding, George P. Noon, Yukihiro Nose, and Michael E. DeBakey	APL_DEL01125978
A Portable Setup for Comparing Transmittance and Reflectance Pulse Oximeters for Field Testing Applications (“Traviglia”)	2004	Daniel Traviglia and Yitzhak Mendelson	APL_DEL01126094
Design of Pulse Oximeters (“Webster”)	1997	J G Webster	APL_DEL00030690

C. Non-Patent/Non-Publication References, Including Product, System, Knowledge, and Use Prior Art

Apple also contends that the Asserted Claims of the Asserted Patents are invalid in view of public knowledge and uses and/or offers for sale or sales of products, systems, and services that are prior art under pre-AIA 35 U.S.C. § 102(a) or (b) or AIA 35 U.S.C. § 102(a)(1), and/or prior

inventions made in the United States by other inventors who had not abandoned, suppressed, or concealed them under 35 U.S.C. § 102(g), and that anticipate or render obvious the Asserted Claims.

The following lists each item of prior art under pre-AIA 35 U.S.C. § 102(a), (b), and/or (g) or AIA 35 U.S.C. § 102(a)(1) by the name of the item and, to the extent now known, when the item became publicly known or was used, offered for sale, or sold, the identities of the persons or entities that made the item public, publicly used it, or made the offer for sale, and the identities of the person(s) or entities involved in, and the circumstances surrounding the making of, the invention. Apple contends that the following descriptions are stated on information and belief, and are supported by the information and documents that will be produced by Apple and/or third parties. As discovery is not complete, Apple's list of prior art below is not complete or exhaustive but is Apple's current understanding based on information available without the benefit of discovery. Thus, Apple continues to investigate these events and reserves the right to amend the following list as information becomes available to it.

Furthermore, to the extent that Apple cites to or relies on patents or publications to show the disclosure of non-patent/non-publication prior art references, such as products and/or services, the disclosure of the patent or publication references may not be co-extensive with the disclosure of the non-patent/non-publication references (and *vice versa*), and each such reference may be considered and/or relied upon independently. Moreover, the documents which describe each prior art product or system identified below may independently qualify as prior art references.

The following prior art references, including those publications identified in Exhibits A-1 – A-18; B-1 – B-18; C-1 – C-15; D-1 – D-17; and E-1 – E-13, anticipate and/or render obvious the

Asserted Claims of the Asserted Patents. In addition, Apple incorporates by reference all prior art publications listed as prior art in the Asserted Patents.

Prior Art	Date ⁵	Exemplary Documents Cited
Apple Watch Series 0 and/or prior versions and related systems (“Apple Watch Series 0”)	2011	
NatureSpirit CMS-50F and/or prior versions and related systems (“CMS-50F”)	2011	• CMS 50-F Wrist Sleep Study Pulse Oximeter With Alarms & Memory (APL_DEL01121381) • NatureSpirit CMS50F Instructions to User (APL_DEL01119477)
Fitbit Surge Fitness Watch System and/or prior versions and related systems (“Fitbit Surge”)	May 2015	• Fitbit's New Fitness Watch Can Display Your Calls And Track Your Location While You Run, Oct. 27, 2014 (“Fitbit’s New Fitness Watch”) (APL_DEL00030308) • Fitbit, Fitbit Surge Fitness Super Watch User Manual Version 1.0, May 2015 (“Surge Manual”) (APL_DEL00030259) • Wayback Machine, Fitbit Surge Fitness Super Watch User Manual Version 1.0, May 2015 (“Wayback Machine: Fitbit Surge”) (APL_DEL00030689) • DC Rainmaker, Fitbit Surge In-Depth Review, Jan. 20, 2015 (“Surge Review”) (APL_DEL00030150)

⁵ The prior art was known, in public use, publicly available, offered for sale, or sold at least as early as the date indicated in the chart.

IV. DISCLOSURE OF INVALIDITY DUE TO ANTICIPATION UNDER 35 U.S.C. § 102

A pre-AIA patent claim is invalid where “the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for patent.” Pre-AIA 35 U.S.C. § 102(a). “The statutory
