COATED ALUMINIUM
FOR COFFEE CAPSULES

Italcoat developed a specific **coated aluminium** to supply manufacturers of **aluminium coffee capsules to be sealed with aluminium lids**.

PRODUCT DESCRIPTION

- Chemically degreased & pre-treated
- BPA NIA External Coating
- PVC FREE Internal Coating

Stratigraphy

- Lubricant
- External Lacquer (BPA NIA)
- Aluminium
- Internal Lacquer (PVC Free)
- Lubricant

Both internal and external lacquers are suitable for the coffee brewing process

TECHNICAL SPECIFICATIONS

ALLOY: 8xxx

TEMPER: "0"

THICKNESS: from 0,09mm up to 0,10mm

AVAILABLE COLOURS: All kind

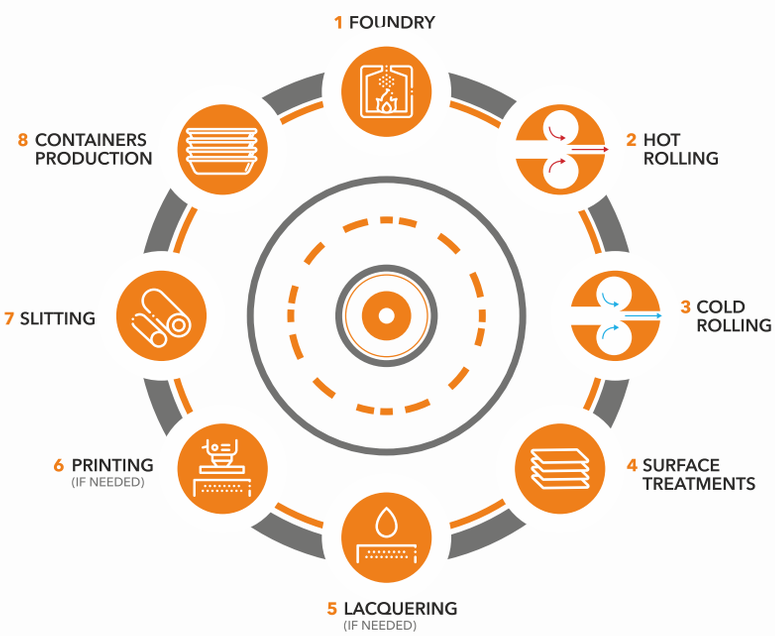
Nespresso USA, Inc. Ex. 1027

CHOOSE A MONO-MATERIAL PACKAGING

One of the main advantages of mono-material packaging is its enhanced recycling capacity, which favours circular economy: an easier recycling process with lower environmental impact.

ALUMINIUM THE SUSTAINABLE SOLUTION

Aluminium can be defined as **the most circular material**. It is **infinitely and 100% recyclable**. Aluminium waste, both post-industrial and post-consumer, through the recycling and melting process becomes new raw material, without losing any properties.



INTEGRATED SUPPLY CHAIN

Italocat is a part of Laminazione Sottile Group. The Group's companies work in an integrated production chain and manufacture rolled aluminium products, in different alloys, dimensions and superficial treatments, including lacquering and printing, and aluminium food trays.
