Get It Now!

What Is It?

ZTRACE GOLD is an invisible software security application that traces the location of missing laptops for recovery.

ZTRACE GOLD is undetectable and unerasable on a laptop's hard drive. The computer completes a handshake with the ZSERVER at every Internet connection. If the laptop is reported missing, a patent pending process occurs for the ZTRACE Recovery Team to identify the computer's exact physical location. The ZTRACE Recovery Team coordinates with local law enforcement for a completely outsourced recovery solution; the entire tracing and monitoring service resides with ZTRACE. For enterprises, ZTRACE GOLD provides a flexible solution that can be managed internally by an organization's own internal security department or outsourced with the ZTRACE Recovery Team.
