FS COMPLETION SYSTEM

FS COMPLETION SYSTEM

FREEDOM SERIES

"Using FS, we targeted 18 days with decreased well swap time and ensuring safe operations. Freedom Series with iControl enabled us to safely achieve our most efficient pad in the basin, shaving an additional 1.3 days off our FS target."

Addison Kowal, Crescent Point

Crescent Point's Fastest Pad in the Bakken

330 Stages, 16.7 Days

Show us the curves!

Years ago we originated 'continuous pumping', a term often misused in the industry.

The advent of 24/7 fracturing is within reach. Downing's continuous pumping technology including its patented Hot Swap system, is pushing operational boundaries, enabling frac fleets to maintain continuous operations. From the newest frac fleets to the oldest pumps, Downing is driving operational efficiency to the technical limits. Contact us today at sales@downingusa.com or visit www.continuouspumping.com.

We were happy to see [World Oil](#) publish an article on the value of MQTT with frac operations. MQTT, introduced to frac operations by Downing 6 years ago, forms the backbone of Downing's FS Net system. Downing has successfully integrated this system with dozen of pumpers, operators and other third parties needing data captured. This data is then easily streamed into platforms like ColdBore and Corva. Contact us today at sales@downingusa.com or visit www.continuouspumping.com.

Downing's Freedom Series with our patented FS Hot Swap system set a new record, continuously pumping 162.4 hours and executing 49 pump swaps while frac'ing. Only a weather stoppage kept the record from being longer. Congratulations to [Apache Corporation](#) and [PureFrac](#) for their record setting performance. Contact us today at sales@downingusa.com or visit www.continuouspumping.com.
