## POWER OF ATTORNEY BY APPLICANT

I hereby revoke all previous powers of attorney given in the application identified in either the attached transmittal letter or the boxes below.

| Application Number | Filing Date |
|--------------------|-------------|
|                    |             |

(Note: The boxes above may be left blank if information is provided on form PTO/AIA/82A.)

- ☒ I hereby appoint the Patent Practitioner(s) associated with the following Customer Number as my/our attorney(s) or agent(s), and to transact all business in the United States Patent and Trademark Office connected therewith for the application referenced in the attached transmittal letter (form PTO/AIA/82A) or identified above:
- OR
- ☐ I hereby appoint Practitioner(s) named in the attached list (form PTO/AIA/82C) as my/our attorney(s) or agent(s), and to transact all business in the United States Patent and Trademark Office connected therewith for the patent application referenced in the attached transmittal letter (form PTO/AIA/82A) or identified above. (Note: Complete form PTO/AIA/82C.)

Please recognize or change the correspondence address for the application identified in the attached transmittal letter or the boxes above to:

- ☒ The address associated with the above-mentioned Customer Number
- OR
- ☐ The address associated with Customer Number:
- OR

|                         |  |       |  |     |
|-------------------------|--|-------|--|-----|
| Firm or Individual Name |  |       |  |     |
| Address                 |  |       |  |     |
| City                    |  | State |  | Zip |
| Country                 |  |       |  |     |
| Telephone               |  | Email |  |     |

I am the Applicant (if the Applicant is a juristic entity, list the Applicant name in the box):

**XR Communications, LLC d/b/a Vivato Technologies**

- ☐ Inventor or Joint Inventor (title not required below)
- ☐ Legal Representative of a Deceased or Legally Incapacitated Inventor (title not required below)
- ☒ Assignee or Person to Whom the Inventor is Under an Obligation to Assign (provide signer's title if applicant is a juristic entity)
- ☐ Person Who Otherwise Shows Sufficient Proprietary Interest (e.g., a petition under 37 CFR 1.46(b)(2) was granted in the application or is concurrently being filed with this document) (provide signer's title if applicant is a juristic entity)

### SIGNATURE of Applicant for Patent

The undersigned (whose title is supplied below) is authorized to act on behalf of the applicant (e.g., where the applicant is a juristic entity).

|           |                                                                                     |                 |           |
|-----------|-------------------------------------------------------------------------------------|-----------------|-----------|
| Signature |  | Date (Optional) | 1/10/2018 |
| Name      | Kai Hansen                                                                          |                 |           |
| Title     | Managing Member                                                                     |                 |           |

**NOTE:** Signature - This form must be signed by the applicant in accordance with 37 CFR 1.33. See 37 CFR 1.4 for signature requirements and certifications. If more than one applicant, use multiple forms.

☐ Total of \_\_\_\_\_ forms are submitted.

This collection of information is required by 37 CFR 1.131, 1.32, and 1.33. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 3 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

**This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.**

**New Applications Under 35 U.S.C. 111**  
If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**  
If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**  
If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

## TRANSMITTAL FOR POWER OF ATTORNEY TO ONE OR MORE REGISTERED PRACTITIONERS

NOTE: This form is to be submitted with the Power of Attorney by Applicant form (PTO/AIA/82B) to identify the application to which the Power of Attorney is directed, in accordance with 37 CFR 1.5, unless the application number and filing date are identified in the Power of Attorney by Applicant form. If neither form PTO/AIA/82A nor form PTO/AIA/82B identifies the application to which the Power of Attorney is directed, the Power of Attorney will not be recognized in the application.

**STATEMENT UNDER 37 CFR 3.73(b)**

Applicant/Patent Owner: William J. Crilly, Jr.

Application No./Patent No.: 7,177,369 Filed/Issue Date: February 13, 2007

Titled: MULTIPATH COMMUNICATION METHODS AND APPARATUSES

XR Communications, LLC D/B/A Vivato, Inc., a Limited Liability Company  
(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that it is:

1. ☒ the assignee of the entire right, title, and interest in;
2. ☐ an assignee of less than the entire right, title, and interest in  
(The extent (by percentage) of its ownership interest is \_\_\_\_\_ %); or
3. ☐ an assignee of an undivided interest in the entirety of (a complete assignment from one of the joint inventors was made) the patent application/patent identified above by virtue of either:
  - A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel \_\_\_\_\_, Frame \_\_\_\_\_, or for which a copy thereof is attached.

OR

- B. ☒ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1. From: William J. Crilly To: Mabuhay Networks, Inc.  
The document was recorded in the United States Patent and Trademark Office at  
Reel 012849, Frame 0727, or for which a copy thereof is attached.
2. From: Mabuhay Networks, Inc. To: Vivato, Inc.  
The document was recorded in the United States Patent and Trademark Office at  
Reel 013937, Frame 0808, or for which a copy thereof is attached.
3. From: Vivato, Inc. To: Wayout Wireless, LLC  
The document was recorded in the United States Patent and Trademark Office at  
Reel 018313, Frame 0608, or for which a copy thereof is attached.

☒ Additional documents in the chain of title are listed on a supplemental sheet(s).

☒ As required by 37 CFR 3.73(b)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

Ron Chaffee  
Signature

1/16/12

CEO  
Title

**STATEMENT UNDER 37 CFR 3.73(b) - Supplemental Sheet**

Continuation of chain of title from the inventor(s) to the current assignee.

4. From: Wayout Wireless, LLC To: Vivato Networks, LLC  
The document was recorded in the United States Patent and Trademark Office at  
Reel 019704 , Frame 0789 , or for which a copy thereof is attached.
5. From: Vivato Networks, LLC To: Vivato Networks Holdings, LLC  
The document was recorded in the United States Patent and Trademark Office at  
Reel 020196 , Frame 0093 , or for which a copy thereof is attached.
6. From: Vivato Networks Holdings, LLC To: Aequitas Equipment Finance, LLC  
The document was recorded in the United States Patent and Trademark Office at  
Reel 022783 , Frame 0433 , or for which a copy thereof is attached.
7. From: Aequitas Equipment Finance, LLC To: XR Communications LLC  
The document was recorded in the United States Patent and Trademark Office at  
Reel 023691 , Frame 0645 , or for which a copy thereof is attached.
8. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_ , Frame \_\_\_\_\_ , or for which a copy thereof is attached.
9. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_ , Frame \_\_\_\_\_ , or for which a copy thereof is attached.
10. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_ , Frame \_\_\_\_\_ , or for which a copy thereof is attached.
11. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_ , Frame \_\_\_\_\_ , or for which a copy thereof is attached.
12. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_ , Frame \_\_\_\_\_ , or for which a copy thereof is attached.
13. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_ , Frame \_\_\_\_\_ , or for which a copy thereof is attached.
14. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_ , Frame \_\_\_\_\_ , or for which a copy thereof is attached.
15. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_ , Frame \_\_\_\_\_ , or for which a copy thereof is attached.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

**STATEMENT UNDER 37 CFR 3.73(b)**

Applicant/Inventor/Owner: William J. Crilly, Jr.

Application No./Patent No.: 7,177,369

Filed/Issue Date: 2/13/2007

Titled:

**MULTIPATH COMMUNICATION METHODS AND APPARATUSES**

XR Communications LLC

, a Limited Liability Company

(Name of Assignee)

(Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that it is:

1. ☒ the assignee of the entire right, title, and interest in;
2. ☐ an assignee of less than the entire right, title, and interest in  
(The extent (by percentage) of its ownership interest is \_\_\_\_\_ %); or
3. ☐ the assignee of an undivided interest in the entirety of (a complete assignment from one of the joint inventors was made)

the patent application/patent identified above, by virtue of either:

- A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel \_\_\_\_\_, Frame \_\_\_\_\_, or for which a copy therefore is attached.

OR

- B. ☒ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1. From: Crilly, William J., Jr. To: Mabuhay Networks, Inc.

The document was recorded in the United States Patent and Trademark Office at  
Reel 012849, Frame 0727, or for which a copy thereof is attached.

2. From: Mabuhay Networks, Inc. To: Vivato, Inc.

The document was recorded in the United States Patent and Trademark Office at  
Reel 013937, Frame 0808, or for which a copy thereof is attached.

3. From: Vivato, Inc. To: Wayout Wireless, LLC

The document was recorded in the United States Patent and Trademark Office at  
Reel 018313, Frame 0608, or for which a copy thereof is attached.

☒ Additional documents in the chain of title are listed on a supplemental sheet(s).

☒ As required by 37 CFR 3.73(b)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

### ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

#### **Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)** (application filed on or after May 29, 2000)

The Patent Term Adjustment is 810 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (571)-272-4200.

APPLICANT(s) (Please see PAIR WEB site <http://pair.uspto.gov> for additional applicants):

William J. Crilly JR., Liberty Lake, WA;

## PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail

**Mail Stop ISSUE FEE**  
**Commissioner for Patents**  
**P.O. Box 1450**  
**Alexandria, Virginia 22313-1450**

DATE MAILED: 11/15/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

**Supplemental  
Notice of Allowability**

**Application No.**

10/131,864

**Applicant(s)**

CRILLY, WILLIAM J.

**Examiner**

Jean B. Corielus

**Art Unit**

2611

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--**

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to the phone interview on 11/8/06.
2. ☒ The allowed claim(s) is/are 1-41, 43, 45-80, 82 and 84-95, renumbered as 1-91, respectively.
3. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) ☐ All    b) ☐ Some\*    c) ☐ None    of the:
  1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

\* Certified copies not received: \_\_\_\_\_.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.  
**THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.**

4. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
  - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
    - 1) ☐ hereto or 2) ☐ to Paper No./Mail Date \_\_\_\_\_.
  - (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date \_\_\_\_\_.

Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

**Attachment(s)**

1. ☐ Notice of References Cited (PTO-892)
2. ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3. ☐ Information Disclosure Statements (PTO-1449 or PTO/SB/08),  
Paper No./Mail Date \_\_\_\_\_
4. ☐ Examiner's Comment Regarding Requirement for Deposit  
of Biological Material
5. ☐ Notice of Informal Patent Application (PTO-152)
6. ☐ Interview Summary (PTO-413),  
Paper No./Mail Date \_\_\_\_\_
7. ☒ Examiner's Amendment/Comment
8. ☐ Examiner's Statement of Reasons for Allowance
9. ☐ Other \_\_\_\_\_

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward J Brooks on 11/8/06.

The application has been amended as follows:

**IN THE CLAIMS:**

Claim 52, "44" has been changed to --43--.

Claim 53, "44" has been changed to --43--.

Claim 55, "44" has been changed to --43--.

Claim 57, "44" has been changed to --43--.

Claim 58, "44" has been changed to --43--.

Claim 59, "44" has been changed to --43--.

Claim 66, "44" has been changed to --43--.

Claim 67, "44" has been changed to --43--.

Claim 68, "44" has been changed to --43--.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean B. Corrielus whose telephone number is 571-272-3020.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

|-----------------|-------------|----------------------|---------------------|------------------|

10/131,864 04/25/2002 William J. Crilly JR. MN1-001US 8941

TITLE OF INVENTION: MULTIPATH COMMUNICATION METHODS AND APPARATUSES

| APPLN. TYPE    | SMALL ENTITY | ISSUE FEE DUE | PUBLICATION FEE DUE | PREV. PAID ISSUE FEE | TOTAL FEE(S) DUE | DATE DUE   |
|----------------|--------------|---------------|---------------------|----------------------|------------------|------------|
| nonprovisional | YES          | \$700         | \$300               | \$0                  | \$1000           | 01/02/2007 |

**THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.**

**THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.**

### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

- A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.
- B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

- A. Pay TOTAL FEE(S) DUE shown above, or
- B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

## PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail** Mail Stop ISSUE FEE  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313-1450  
or **Fax** (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

38356 7590 10/02/2006

BROOKS & CAMERON, PLLC  
1221 NICOLLET MALL #500  
MINNEAPOLIS, MN 55403

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

**Certificate of Mailing or Transmission**

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

1. Change of correspondence address or indication of "Fee Address" (37 CFR 1.363).

☐ Change of correspondence address (or Change of Correspondence Address form PTO/SB/122) attached.

☐ "Fee Address" indication (or "Fee Address" Indication form PTO/SB/47; Rev 03-02 or more recent) attached. Use of a Customer Number is required.

2. For printing on the patent front page, list

(1) the names of up to 3 registered patent attorneys or agents OR, alternatively,

(2) the name of a single firm (having as a member a registered attorney or agent) and the names of up to 2 registered patent attorneys or agents. If no name is listed, no name will be printed.

1 \_\_\_\_\_

2 \_\_\_\_\_

3 \_\_\_\_\_

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE

(B) RESIDENCE: (CITY and STATE OR COUNTRY)

Please check the appropriate assignee category or categories (will not be printed on the patent): ☐ Individual ☐ Corporation or other private group entity ☐ Government

4a. The following fee(s) are submitted:

☐ Issue Fee

☐ Publication Fee (No small entity discount permitted)

☐ Advance Order - # of Copies \_\_\_\_\_

4b. Payment of Fee(s): (Please first reapply any previously paid issue fee shown above)

☐ A check is enclosed.

☐ Payment by credit card. Form PTO-2038 is attached.

☐ The Director is hereby authorized to charge the required fee(s), any deficiency, or credit any overpayment, to Deposit Account Number \_\_\_\_\_ (enclose an extra copy of this form).

5. Change in Entity Status (from status indicated above)

☐ a. Applicant claims SMALL ENTITY status. See 37 CFR 1.27.

☐ b. Applicant is no longer claiming SMALL ENTITY status. See 37 CFR 1.27(g)(2).

NOTE: The Issue Fee and Publication Fee (if required) will not be accepted from anyone other than the applicant; a registered attorney or agent; or the assignee or other party in interest as shown by the records of the United States Patent and Trademark Office.

Authorized Signature \_\_\_\_\_

Typed or printed name \_\_\_\_\_

Registration No. \_\_\_\_\_

This collection of information is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

**Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)**  
(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 810 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 810 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**IN THE CLAIMS:**

Claim 85, "83" has been changed to --82--.

Claim 86, "83" has been changed to --82--.

Claim 88, "83" has been changed to --82--.

Claim 89, "83" has been changed to --82--.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean B. Corrielus whose telephone number is 571-272-3020. The examiner can normally be reached on Maxi-Flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/131,864  
Art Unit: 2611

This collection of information is required by 37 CFR 1.16. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

**MS AMENDMENT**  
Commissioner for Patents  
P.O. BOX 1450  
Alexandria, VA 22313-1450

**RESPONSE TO EXAMINER TELECONFERENCE**  
**OF AUGUST 28, 2006**

Dear Examiner Corrielus:

In response to the Teleconference of August 28, 2006, please amend the above-identified application as follows:

**Amendments to the Claims** are reflected in the listing of claims which begins on page 2 of this paper.

**Remarks/Arguments** begin on page 20 of this paper.

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method comprising:  
identifying at least one multipath transmission delay within a reverse path data signal received from a receiving device;  
determining at least one forward path pre-equalization parameter based on said at least one transmission delay; and  
modifying a forward path data signal that is to be transmitted to the receiving device based on said at least one forward path pre-equalization parameter, where said modifying includes selectively setting different transmission power levels for at least two Orthogonal Frequency Division Multiplexing (OFDM) tones in said forward path data signal.
2. (Original) The method as recited in Claim 1, further comprising:  
receiving said reverse path data signal over at least one reverse transmission path.
3. (Original) The method as recited in Claim 2, further comprising:  
transmitting said modified forward path data signal over at least one forward transmission path.

4. (Original) The method as recited in Claim 1, wherein said reverse path data signal includes at least one type of data selected from a group of different types of data comprising Orthogonal Frequency Division Multiplexing (OFDM) data and Quadrature Phase Shift Keying (QPSK) data.
5. (Original) The method as recited in Claim 1, wherein said modified forward path data signal includes at least one type of data selected from a group of different types of data comprising Orthogonal Frequency Division Multiplexing (OFDM) data and Quadrature Phase Shift Keying (QPSK) data.
6. (Original) The method as recited in Claim 5, wherein said modified forward path data signal includes sub-carrier pre-equalized OFDM data.
7. (Original) The method as recited in Claim 6, further comprising:  
generating corresponding Quadrature Phase Shift Keying (QPSK)  
modulation values based on said sub-carrier pre-equalized OFDM data.
8. (Original) The method as recited in Claim 4, wherein identifying said at least one multipath transmission delay includes:  
identifying at least one multipath transmission delay spread that is greater than a guard interval.
9. (Original) The method as recited in Claim 1, wherein said reverse path data signal includes identifiable training data.
10. (Currently Amended) The method as recited in Claim 9, further comprising:  
comparing said received identifiable training data to a local version  
of said training data to identify said at least one multipath transmission delay within said reverse path data signal.

11. (Original) The method as recited in Claim 3, wherein modifying said forward path data signal based on at least one forward path pre-equalization parameter further includes:

selectively inverting and applying a measured channel response to said forward path data signal to significantly reduce subsequent induced deleterious channel response changes to said modified forward path data signal during transmission over said at least one forward transmission path.

12. (Original) The method as recited in Claim 3, wherein said at least one reverse transmission path is substantially reciprocal to said at least one forward transmission path.

13. (Previously Presented) The method as recited in Claim 1, wherein identifying said at least one multipath transmission delay, determining said at least one forward path pre-equalization parameter, and modifying said forward path data signal are performed by a transmitting device.

14. (Previously Presented) The method as recited in Claim 13, wherein said transmitting device includes a base station device that is operatively configured for use in a wireless communication system.

15. (Previously Presented) The method as recited in Claim 13, further comprising:

using at least one transmitting device receive antenna operatively coupled to said transmitting device to receive said reverse path data signal over at least one reverse transmission path from the receiving device.

16. (Previously Presented) The method as recited in Claim 15, wherein said receiving device includes a customer premise equipment (CPE) device that is operatively configured for use in a wireless communication system.

17. (Original) The method as recited in Claim 16, wherein said CPE device includes at least one device selected from a group of devices comprising a computer, a portable computer, a personal digital assistant (PDA), and a mobile communication device.

18. (Previously Presented) The method as recited in Claim 15, wherein said at least one transmitting device receive antenna includes at least one type of antenna selected from a group of suitable types of antennas comprising at least one omnidirectional type of antenna, at least one beam type of antenna, at least one phased array type of antenna, and at least one adaptive antenna.

19. (Previously Presented) The method as recited in Claim 15, wherein said transmitting device is operatively coupled to a plurality of first device receive antennas.

20. (Previously Presented) The method as recited in Claim 13, further comprising;

receiving said reverse path data signal over at least one reverse transmission path; and

causing said transmitting device to post equalize at least a portion of said received reverse path signal.

21. (Previously Presented) The method as recited in Claim 15, wherein determining said at least one forward path pre-equalization parameter based on said at least one transmission delay further includes:

determining at least one angle of arrival of said reverse path data signal with respect to said at least one transmitting device receive antenna.

22. (Previously Presented) The method as recited in Claim 15, further comprising:

using at least one receiving device transmit antenna operatively coupled to said receiving device and configured to transmit said reverse path data signal over said at least one reverse transmission path to said transmitting device.

23. (Previously Presented) The method as recited in Claim 22, wherein a plurality of receiving device transmit antennas are operatively coupled to said receiving device and configured to transmit said reverse path data signal over said at least one reverse transmission path to said transmitting device.

24. (Previously Presented) The method as recited in Claim 22, further comprising:

causing said receiving device to transmit at least two reverse path data signals over said at least one reverse transmission path to said transmitting device.

25. (Original) The method as recited in Claim 24, wherein said at least two reverse path data signals include Orthogonal Frequency-Division Multiple Access (OFDMA) data.

26. (Previously Presented) The method as recited in Claim 22, further comprising:

causing said receiving device to transmit said reverse path data signal over said at least one reverse transmission path to said transmitting device at a bit rate less than about 6 Mbps.

27. (Previously Presented) The method as recited in Claim 22, further comprising:

causing said receiving device to transmit corresponding receiving device transmission power level information to said transmitting device; and

causing said transmitting device to adjust at least one transmission power level associated with said forward path data signal based on said receiving device transmission power level information.

28. (Currently Amended) The method as recited in Claim 13, further comprising:

using at least one transmitting device transmit antenna operatively coupled to said transmitting device to transmit said modified forward path data signal over at least one forward transmission path to ~~[[a]]~~ the receiving device.

29. (Previously Presented) The method as recited in Claim 28, wherein said at least one transmitting device transmit antenna is operatively configured to provide transmission diversity when transmitting said modified forward path data signal.

30. (Previously Presented) The method as recited in Claim 28, wherein said at least one transmitting device transmit antenna is operatively configured to provide spatial division transmission utilizing a spatial division technique when transmitting said modified forward path data signal as a narrow signal to reduce multipath propagation.

31. (Previously Presented) The method as recited in Claim 28, wherein said at least one transmitting device transmit antenna includes at least one type of antenna selected from a group of suitable types of antennas comprising at least one omnidirectional type of antenna, at least one beam type of antenna, at least one phased array type of antenna, and at least one adaptive antenna.

32. (Previously presented) The method as recited in Claim 28, further comprising:

setting at least one antenna pointing parameter associated with said at least one transmitting device transmit antenna based on said at least one forward path pre-equalization parameter.

33. (Previously Presented) The method as recited in Claim 28, further comprising:

setting at least one phased array antenna transmission directing parameter associated with said at least one transmitting device transmit antenna based on said at least one forward path pre-equalization parameter.

34. (Previously Presented) The method as recited in Claim 28, further comprising:

selectively transmitting said modified forward path data signal at one angle with respect to said transmitting device transmit antenna.

35. (Previously Presented) The method as recited in Claim 28, further comprising:

selecting said at least one transmitting device transmit antenna from a plurality of transmitting device transmit antennas that are each operatively coupled to said transmitting device.

36. (Previously presented) The method as recited in Claim 35, further comprising:

selectively transmitting a plurality of beams using two or more transmitting device transmit antennas.

37. (Previously Presented) The method as recited in Claim 36, wherein each of said transmitted plurality of beams is selectively adjusted in phase and amplitude to reduce multipath affects when received by said receiving device.

38. (Previously Presented) The method as recited in Claim 28, further comprising:

using at least one receiving device receive antenna operatively coupled to said receiving device and configured to receive said modified forward path data signal over said at least one forward transmission path from said transmitting device.

39. (Previously Presented) The method as recited in Claim 38, wherein a plurality of receiving device receive antennas are operatively coupled to said receiving device and configured to receive said modified forward path data signal over said at least one forward transmission path from said transmitting device.

40. (Original) The method as recited in Claim 1, wherein determining said at least one forward path pre-equalization parameter based on said at least one transmission delay further includes:  
iteratively selectively identifying different forward path pre-equalization parameters over time to operatively identify and subsequently ignore aliased multipath delays within said reverse path data signal.

41. (Original) The method as recited in Claim 1, wherein determining said at least one forward path pre-equalization parameter based on said at least one transmission delay further includes:

sub-band equalizing said forward path data signal using corresponding frequency domain reverse path data.

42. (Canceled)

43. (Currently Amended) A system comprising:

a first device operatively configured to connect to at least a second device over a wireless communication path, said first device having logic that is configured to detect a multipath transmission delay in at least one reverse path data signal transmitted by said second device, determine at least one forward path pre-equalization parameter based on said detected multipath transmission delay, and pre-equalize a forward path data signal that is to be transmitted to said second device based on said at least one forward path pre-equalization parameter; said first device further comprising:

at least one first device antenna; and

at least one transceiver operatively coupled to said at least one first device antenna and said logic, said at least one transceiver being configured to receive said reverse path data signal over at least one reverse transmission path using said at least one first device antenna and provide said reverse path data signal to said logic, and transmit said forward path data signal from said logic over at least one forward transmission path;

wherein said logic is further configured to cause said transceiver to selectively establish different transmission power levels for at least two Orthogonal Frequency Division Multiplexing (OFDM) tones in said forward path data signal based on said at least one forward path pre-equalization parameter.

44. (Canceled)

45. (Original) The system as recited in Claim 43, wherein said reverse path data signal includes at least one type of data selected from a group of different types of data comprising Orthogonal Frequency Division Multiplexing (OFDM) data and Quadrature Phase Shift Keying (QPSK) data.

46. (Previously Presented) The system as recited in Claim 43, wherein said forward path data signal includes at least one type of data selected from a group of different types of data comprising Orthogonal Frequency Division Multiplexing (OFDM) data and Quadrature Phase Shift Keying (QPSK) data.

47. (Previously Presented) The system as recited in Claim 46, wherein said forward path data signal includes sub-carrier pre-equalized OFDM data.

48. (Original) The system as recited in Claim 47, wherein said logic is further configured to produce corresponding Quadrature Phase Shift Keying (QPSK) modulation values based on said sub-carrier pre-equalized OFDM data.

49. (Original) The system as recited in Claim 45, wherein said logic detects said multipath transmission delay by identifying at least one multipath transmission delay spread that is greater than a guard interval.

50. (Original) The system as recited in Claim 43, wherein said reverse path data signal includes identifiable training data.

51. (Previously Presented) The system as recited in Claim 50, wherein said logic is further configured to compare said identifiable training data to a non-multipath delayed version of said training data to detect said multipath transmission delay.

52. (Previously Presented) The system as recited in Claim 44, wherein said logic is configured to selectively invert and apply a measured channel response to said forward path data signal to significantly reduce subsequent induced deleterious channel response changes to said forward path data signal during transmission over said at least one forward transmission path.

53. (Original) The system as recited in Claim 44, wherein said at least one reverse transmission path is substantially reciprocal to said at least one forward transmission path.

54. (Previously Presented) The system as recited in Claim 43, wherein said first device includes a base station device that is operatively configured for use in a wireless communication system.

55. (Previously Presented) The system as recited in Claim 44, wherein said second device is a customer premise equipment (CPE) device that is operatively configured for use in a wireless communication system.

56. (Original) The system as recited in Claim 55, wherein said CPE device includes at least one device selected from a group of devices comprising a computer, a portable computer, a personal digital assistant (PDA), and a mobile communication device.

57. (Original) The system as recited in Claim 44, wherein said first device is operatively coupled to a plurality of first device receive antennas.

58. (Original) The system as recited in Claim 44, wherein said logic is configured to post-equalize at least a portion of said received reverse path signal.

59. (Original) The system as recited in Claim 44, wherein said logic is further configured to determine at least one angle of arrival of said reverse path data signal with respect to said at least one first device antenna.

60. (Previously Presented) The system as recited in Claim 55, wherein said second device includes at least one second device antenna that is operatively configured to transmit said reverse path data signal over said at least one reverse transmission path to said first device and receive said transmitted forward path data signal from said first device over said at least one forward transmission path.

61. (Previously Presented) The system as recited in Claim 60, wherein said second device includes a plurality of second device antennas that are operatively configured to transmit said reverse path data signal over said at least one reverse transmission path to said first device.

62. (Previously Presented) The system as recited in Claim 60, wherein said second device is configured to transmit at least two reverse path data signals over said at least one reverse transmission path to said first device.

63. (Original) The system as recited in Claim 62, wherein said at least two reverse path data signals include Orthogonal Frequency-Division Multiple Access (OFDMA) data.

64. (Previously Presented) The system as recited in Claim 60, wherein said second device is configured to transmit said reverse path data signal over said at least one reverse transmission path to said first device at a bit rate less than about 6 Mbps.

65. (Previously Presented) The system as recited in Claim 60, wherein said second device is configured to transmit corresponding second device transmission power level information to said first device, and said first device is further configured to adjust at least one transmission power level associated with said forward path data signal based on said second device transmission power level information.

66. (Previously Presented) The system as recited in Claim 44, wherein said at least one first device antenna is operatively configured to provide transmission diversity when transmitting said forward path data signal.

67. (Previously Presented) The system as recited in Claim 44, wherein said at least one first device antenna is operatively configured to provide spatial division transmission utilizing a spatial division technique when transmitting said forward path data signal as a narrow signal to reduce multipath propagation.

68. (Original) The system as recited in Claim 44, wherein said at least one first device antenna includes at least one first device transmit antenna and at least one first device receive antenna.

69. (Original) The system as recited in Claim 68, wherein said at least one first device transmit antenna includes at least one type of antenna selected from a group of suitable types of antennas comprising at least one omnidirectional type of antenna, at least one beam type of antenna, at least one phased array type of antenna, and at least one adaptive antenna.

70. (Original) The system as recited in Claim 68, wherein said at least one first device receive antenna includes at least one type of antenna selected from a group of suitable types of antennas comprising at least one omnidirectional type of antenna, at least one beam type of antenna, at least one phased array type of antenna, and at least one adaptive antenna.

71. (Original) The system as recited in Claim 68, wherein said logic is further configured to establish at least one antenna pointing parameter associated with said at least one first device transmit antenna based on said at least one forward path pre-equalization parameter.

72. (Original) The system as recited in Claim 68, wherein said logic is further configured to establish at least one phased array antenna transmission directing parameter associated with said at least one first device transmit antenna based on said at least one forward path pre-equalization parameter.

73. (Previously Presented) The system as recited in Claim 68, wherein said logic is further configured to cause said at least one transceiver to selectively transmit said forward path data signal at one angle with respect to said at least one first device transmit antenna.

74. (Previously Presented) The system as recited in Claim 68, wherein said logic is further configured to cause said at least one transceiver to select said at least one first device transmit antenna from a plurality of first device transmit antennas that are each operatively coupled to said first device.

75. (Previously Presented) The system as recited in Claim 74, wherein said logic is further configured to cause said at least one transceiver to selectively transmit a plurality of beams using two or more first device transmit antennas.

76. (Original) The system as recited in Claim 75, wherein each of said transmitted plurality of beams is selectively adjusted in phase and amplitude to reduce multipath affects when received by said second device.

77. (Original) The system as recited in Claim 60, wherein said at least one second device antenna includes at least one second device transmit antenna and at least one second device receive antenna.

78. (Previously Presented) The system as recited in Claim 77, wherein said second device includes a plurality of second device receive antennas that are configured to receive said transmitted forward path data signal over said at least one forward transmission path from said first device.

79. (Previously Presented) The system as recited in Claim 43, wherein said logic is further configured to iteratively selectively test different forward path pre-equalization parameters over time such that aliased multipath delays within said reverse path data signal are identifiable.

80. (Original) The system as recited in Claim 43, wherein said logic is configured to provide sub-band equalizing of said forward path data signal using corresponding frequency domain reverse path data.

81. (Canceled)

82. (Currently Amended) An apparatus comprising:  
an Orthogonal Frequency Division Multiplexing (OFDM) processor  
configured to receive coded data and output corresponding OFDM data;  
a pre-equalizer operatively coupled to said OFDM processor and configured  
to receive said OFDM data and output pre-equalized OFDM data based on gathered  
reverse link data;  
at least one antenna; and  
an antenna signal processing component operatively coupled to said  
pre-equalizer and said at least one antenna, said antenna signal processing  
component being configured to receive said pre-equalized OFDM data from said  
pre-equalizer and apply a corresponding transmittable forward link data signal to  
said at least one antenna, the antenna signal processing component being further  
configured to receive a transmitted reverse link data signal using said at least one  
antenna and output corresponding reverse link data; and  
reverse link logic operatively coupled to said at least one antenna, said  
reverse link logic being configured to detect at least one multipath induced delay in  
said reverse link data and provide said gathered reverse link data to said pre-  
equalizer based on said multipath induced delay, wherein said reverse link logic is  
further configured to cause selectively establishing different transmission power  
levels for at least two Orthogonal Frequency Division Multiplexing (OFDM) tones  
in said transmittable forward link data signal.

83. (Canceled)

84. (Original) The apparatus as recited in Claim 82, wherein said pre-equalized  
OFDM data includes sub-carrier pre-equalized OFDM data.

85. (Previously Presented) The apparatus as recited in Claim 83, wherein said  
reverse link logic detects said at least one multipath induced delay by identifying at  
least one transmission delay spread that is greater than a guard interval.

86. (Original) The apparatus as recited in Claim 83, wherein said reverse link data signal includes identifiable training data.

87. (Previously Presented) The apparatus as recited in Claim 86, wherein said reverse link logic is further configured to compare said identifiable training data to a non-delayed version of said training data to detect said at least one transmission delay.

88. (Original) The apparatus as recited in Claim 83, wherein said pre-equalizer is configured to selectively invert and apply a measured channel response to said OFDM data.

89. (Original) The apparatus as recited in Claim 83, wherein a reverse transmission path carrying said transmitted reverse link data signal towards said antenna is at least substantially reciprocal to a forward transmission path carrying said transmittable forward link data signal away from said at least one antenna.

90. (Original) The apparatus as recited in Claim 82, wherein said apparatus includes a base station device suitable for use in a wireless communication system.

91. (Previously Presented) The apparatus as recited in Claim 82, wherein said at least one antenna is operatively configured to provide transmission diversity.

92. (Previously Presented) The apparatus as recited in Claim 82, wherein said at least one antenna is operatively configured to provide a spatial division technique to transmit the data signal as a narrow signal to reduce multipath propagation.

93. (Original) The apparatus as recited in Claim 82, wherein said at least one antenna includes at least one transmit antenna and at least one receive antenna.

94. (Original) The apparatus as recited in Claim 93, wherein said at least one transmit antenna includes at least one type of antenna selected from a group of suitable types of antennas comprising at least one omnidirectional type of antenna, at least one beam type of antenna, at least one phased array type of antenna, and at least one adaptive antenna.

95. (Original) The apparatus as recited in Claim 93, wherein said at least one receive antenna includes at least one type of antenna selected from a group of suitable types of antennas comprising at least one omnidirectional type of antenna, at least one beam type of antenna, at least one phased array type of antenna, and at least one adaptive antenna.

### **REMARKS/ARGUMENTS**

Applicant kindly requests allowance of the subject application.

Claims 1, 10, 28, 43, and 82 are amended, claims 42, 44, 81, and 83 are canceled, and no new claims have been added; as a result, claims 1-41, 43, 45-80, 82, and 84-95 are now pending in this application.

#### **Teleconference August 28, 2006 with Examiner**

Applicant appreciates the Examiner calling in an effort to advance prosecution to place the application in condition for allowance. As discussed on August 28, 2006, independent claims 1, 43, and 82 are amended herein to place the application in condition for allowance. Specifically:

Claim 1 is amended to include the allowable feature(s) of claim 42 (now canceled). Claim 43 is amended to include the allowable feature(s) of claims 44 and 81 (both now canceled). Claim 82 is amended to include the allowable feature(s) of claims 81 and 83 (both now canceled).

#### **Claim Objections**

In the previous Office Action dated July 11, 2006, claims 14, 16, 29-30, 43-44, 54-55, 60-62, 64-67, 73-75, 78-79, 81, 83, 87, 89, and 91-92 were objected to for various informalities (*Office Action* p.2). Appropriate corrections were provided in the Response from the Applicant, and Applicant requested that the claim objections be withdrawn.

#### **Drawing Objections**

In the previous Office Action dated July 11, 2006, the Drawings were objected to because, for example, claim 82 recited a pre-equalizer operatively coupled to a transceiver which is not shown in an embodiment in the drawings (*Office Action* p.3). Appropriate correction was provided and Applicant requested that the drawing objections be withdrawn.

35 U.S.C. §112 Claim Rejections

In the previous Office Action dated July 11, 2006, claims 44, 46-48, 52-53, 55-78, 81, 83, and 85 were rejected under 35 U.S.C. §112, second paragraph, as being indefinite (*Office Action* pp. 2-3). Appropriate corrections were provided in the Response from the Applicant, and Applicant requested that the §112 claim rejections be withdrawn.

Allowable Subject Matter

Applicant notes with appreciation the allowance of claims 1-43, 45, 49-51, 54, 79-80, 82, 84, and 86-95.

Claims 44, 46-48, 52-53, 55-78, 81, 83, and 85 were indicated as being allowable if rewritten to overcome the 35 U.S.C. §112 rejection (*Office Action* p.4). Appropriate amendments were provided in a Response from the Applicant such that the allowed claims would overcome the claim objections described below. Appropriate amendments were also provided for the allowable claims to overcome the 35 U.S.C. §112 rejection. Accordingly, claims 1-41, 43, 45-80, 82, and 84-95 are in condition for allowance.

**CONCLUSION**

Applicant respectfully submits that the claims are in condition for allowance and notification to that effect is earnestly requested. The Examiner is invited to telephone Applicant's attorney at (612) 236-0120 to facilitate prosecution of this matter.

**CERTIFICATE UNDER 37 CFR §1.8:** The undersigned hereby certifies that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail, in an envelope addressed to: **MS AMENDMENT** Commissioner of Patents, P.O. BOX 1450, Alexandria, VA 22313-1450 on this 18<sup>th</sup> day of September, 2006.

**STATEMENT UNDER 37 CFR 3.73(b)**

Applicant/Patent Owner: Vivato, Inc.

Application No./Patent No./Control No.: 10/131,864 Filed/Issue Date: April 25, 2002

Entitled: IMPROVED MULTIPATH COMMUNICATION METHODS AND APPARATUSES

Vivato, Inc., a Corporation

(Name of Assignee)

(Type of Assignee: corporation, partnership, university, government agency, etc.)

states that it is:

1. ☒ the assignee of the entire right, title, and interest; or
2. ☐ an assignee of less than the entire right, title and interest  
(The extent (by percentage) of its ownership interest is \_\_\_\_\_ %)

In the patent application/patent identified above by virtue of either:

A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel \_\_\_\_\_, Frame \_\_\_\_\_, or a true copy of the original assignment is attached.

OR

B. ☒ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1. From: William J. Crilly Jr. To: Mabuhay Networks, Inc.  
The document was recorded in the United States Patent and Trademark Office at  
Reel 012849, Frame 0727, or for which a copy thereof is attached.

2. From: Mabuhay Networks, Inc. To: Vivato, Inc.  
The document was recorded in the United States Patent and Trademark Office at  
Reel 013937, Frame 0808, or for which a copy thereof is attached.

3. From: \_\_\_\_\_ To: \_\_\_\_\_  
The document was recorded in the United States Patent and Trademark Office at  
Reel \_\_\_\_\_, Frame \_\_\_\_\_, or for which a copy thereof is attached.

☐ Additional documents in the chain of title are listed on a supplemental sheet.

As required by 37 CFR 3.73(b)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

|                              | Jean B. Corrielus      | 2611                |  |

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

1) ☒ Responsive to communication(s) filed on 31 July 2006.

2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

4) ☒ Claim(s) 1-95 is/are pending in the application.

4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.

6) ☒ Claim(s) 1-41, 43-80 and 82-95 is/are rejected.

7) ☒ Claim(s) 42 and 81 is/are objected to.

8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

9) ☐ The specification is objected to by the Examiner.

10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
       Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
       Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

    a) ☐ All    b) ☐ Some \* c) ☐ None of:

        1. ☐ Certified copies of the priority documents have been received.

        2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.

        3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

        \* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Allowable Subject Matter***

1. The indicated allowability of claims 1-41, 43-80 and 82-95 is withdrawn in view of the newly discovered reference(s) to Yamamoto and Bao et al. Rejections based on the newly cited reference(s) follow.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 9, 11-17, 20, 22, 28, 29, 38, 40, 43-46, 50, 52-56, 58, 60, 66, 68, 77, and 79 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamamoto US patent No. 6,252,914.

As per claim 1, Yamamoto discloses a method and apparatus fig. 1 and 2 comprising estimating propagation path characteristics using circuit 32 (note that by estimating the propagation path characteristics, multipath transmission delay is inherently identified or recognized because the multipath is one of the component that affect characteristics of the communication path) within a reverse path data signal

received from a receiving device 2 ; determining at least one forward path pre-equalization parameter (i. e coefficients see section 51) based on said propagation path characteristics (multipath transmission delay) and filtering (modifying) using section 52 a forward path data signal that is to be transmitted to the receiving device 2 based on said coefficients (forward path pre-equalization) supplied by circuit 51.

As per claim 2, the reverse path data signal is received over at least one reverse path 3 see fig. 1.

As per claim 3, the modified forward data signal (i.e. output of circuit 50) is transmitted over at least one forward transmission path 3 see fig. 1.

As per claim 4, Yamamoto teaches a QPSK modulation scheme is used at the forward path, the reverse path has to use the same type of modulation as well. see col. 4, lines 57-64.

As per claim 5, the forward path includes at least one type of data selected from QPSK see col. 4, lines 57-64.

As per claim 9, said reverse path data signal includes reference signal (identifiable training data) see col. 2, line8-10.

As per claim 11, Yamamoto teaches that a measured of channel response is inverted and applied to said forward path to reduce subsequent channel response changes to said modified forward path data signal during transmission see col. 2, lines 35-42.

As per claim 12, the reverse path is the reciprocal of the forward path see col. 2, lines 35-49.

As per claim 13, the steps recited in claim 1 are performed at the transmitting device 1.

As per claim 14, the transmitting device includes a base station for use inherently in wireless transmission see fig. 1.

As per claim 15, the transmitting device 1 inherently includes an antenna coupled thereto to receive data signal from the receiving device 2.

As per claim 16, the receiving device 2 inherently includes a customer premise equipment configured for use in a wireless system.

As per claim 17, the CPE is a mobile communication device see fig. 1.

As per claim 20, the data is received over a reverse path and the transmitting device 50 post equalizes a portion of said received signal using equalizer 30.

As per claim 22, the transmitting device inherently includes an antenna coupled thereto to transmit data signal to said transmitting device 1.

As per claim 28, see claim 15.

As per claim 29, said transmit antenna inherently provides transmission diversity because of the multipath signal generated.

As per claim 38, see claim 22.

As per claim 40, the pre-equalization parameters generated by Yamamoto have to be different from each other because of the dynamic nature of the transmission path.

As per claim 43, see claim 1.

As per claim 44, the reference further teaches that multipath compensation is provided see col. 3, lines 5-8 therefore the system is a wireless system and inherently includes a first device antenna coupled to the transceiver of fig.1 or 2 and the logic.

as per claim 45 see claim 4.

as per claim 46 see claim 5.

As per claim 50 see claim 9.

As per claim 52 see claim 11.

As per claim 53 see claim 12.

As per claim 54 see claim 14.

As per claim 55, see claim 16.

As per claim 56, see claim 17.

as per claim 58, see claim 20.

As per claim 60, see claim 22.

as per claim 66, see claim 28.

As per claim 68, the antenna inherently includes a transmit and receive antenna.

As per claim 77 see claim 38.

As per claim 79, see claim 40.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6-8, 10, 18-19, 21, 23-27, 30-37, 39, 41, 47-49, 51, 57, 59, 61-65, 67, 69-76, 78 and 80 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto.

As per claim 6, as applied to claim 1 above, Yamamoto discloses every feature of the claimed invention but does not explicitly teach that the signal includes subcarrier pre-equalized OFDM data. However, modifying the signal to include subcarrier pre-equalized OFDM data would have been obvious to one of ordinary skill in the art and the motivation to do so would have been to provide compatibility with systems that uses OFDM modulation scheme.

As per claim 7, it would have been obvious to use OFDM data to generate QPSK modulation values so as to provide compatibility with systems that uses QPSK modulation scheme.

As per claim 8, it would have obvious to one skill in the art to identify transmission delay that is greater than a guard interval for enhanced detection.

As per claim 10, it is known in the art to compare a received training sequence with a local training sequence so as to provide proper indication of transmission medium.

As per claim 18, it would have been obvious that the type of antenna would have been adaptive type so as to take advantage of its enhanced technological feature.

As per claim 19, it would have been obvious to couple the device with a plurality of antenna to enhance signal detection.

As per claim 21, it would have been obvious to one skill in the art to determine at least one angle of arrival of said reverse path with respect to said receive antenna so as to so as to detect delays associated with the received signal.

As per claim 23, it would have been obvious to one skill in the art to include a plurality of transmit antenna in the receiving device to enhance signal detection.

As per claim 24, it would have been obvious to one skill in the art to cause said receiving device to transmit at least two reverse path signals over said at least one reverse transmission path so as to satisfy system requirements.

As per claim 25, see claim 6.

As per claim 26, it would have been obvious to one skill in the art to cause said receiving device to transmit said reverse path signal at a bit rate less than 6 Mbps for better performance.

As per claim 27, it would have been obvious to one skill in the art to cause the receiving device to transmit power level information to the transmit device to adjust its power level so as to reduce signal interference.

as per claim 30, it would have been obvious to one skill in the art to provide spatial division transmission so as to improve signal detection.

As per claim 31, see claim 18.

As per claims 32 and 33, it would have been obvious to one skill in the art to set at least one antenna pointing parameter or phase array associated with said transmit antenna based on the pre-equalization parameter so as to improve signal detection.

As per claim 34, it would have been obvious to one skill in the art to selectively transmit said modify forward path at one angle with respect to said transmit antenna for better performance.

As per claim 35, it would have been obvious to one skill in the art to select one antenna from a plurality of antenna to improve system flexibility.

As per claim 36, it would have been obvious to one skill in the art to selectively transmit a plurality of beam using at least two transmit antenna in order to improve signal detection.

As per claim 37 it would have been obvious to one skill in the art to adjust the plurality of beams in amplitude and in phase so as to improve signal detection.

As per claim 39, it would have been obvious to one skill in the art to include a plurality of receive antennas to receive said modified data signal for better performance.

As per claim 41, it would have been obvious to one skill in the art to subband equalize said forward path using corresponding reverse path data so as to remove interference.

As per claim 47 see claim 6.

As per claim 48 see claim 7.

As per claim 49 see claim 8.

As per claim 51 see claim 10.

As per claim 57 see claim 19.

As per claim 59 see claim 21.

As per claim 61 see claim 23.

As per claim 62 see claim 24.  
As per claim 63, see claim 25.  
As per claim 64 see claim 26.  
As per claim 65 see claim 27 .  
As per claim 67 see claim 30.  
As per claims 69 and 70, see claim 31.  
As per claim 71 see claim 32.  
As per claim 72 see claim 33.  
As per claim 73 see claim 34.  
As per claim 74 see claim 35.  
As per claim 75 see claim 36.  
As per claim 76 see claim 37.  
As per claim 78 see claim 39.  
As per claim 80 see claim 41.

6. Claims 82-95 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bao et al US patent No. 6,792,049.

As per claim 82, Bao et al teaches an apparatus (figs. 2 and 3) comprising: a processor (110-140) configured to receive coded data 101 and output corresponding data; a pre-equalizer 312 operatively coupled to said processor(110-140) and configured to receive said data and output pre-equalized data based on gathered reverse link data; at least one antenna see col. 6, line 28 ; an antenna signal

processing component 314 operatively coupled to said pre-equalizer 314 and said at least one antenna, said antenna signal processing component 314 being configured to receive said pre-equalized data from said pre-equalizer 312 and apply a corresponding transmittable forward link data signal to said at least one antenna. However, Bao does not explicitly teach an OFDM processor is coupled to the pre-equalizer. However, as noted in the background of the invention col. 1 lines 41-43 it is well known in the art to use an OFDM processor to generate OFDM data. Given that fact, it would have been obvious to one skill in the art to incorporate an OFDM processor in Bao et al so as to provide compatibility with system that uses OFDM modulation scheme.

As per claim 83, the apparatus of Bao further comprising a reverse link logic 316 inherently coupled to the antenna and configured to detect channel characteristics (multipath induced delay) and provide said gathered reverse link data to said pre-equalizer see fig. 3 and col. 4, lines 17-33.

As per claim 84, Bao discloses every feature of the claimed invention but does not explicitly teach that the signal includes subcarrier pre-equalized OFDM data. However, modifying the signal to include subcarrier pre-equalized OFDM data would have been obvious to one of ordinary skill in the art and the motivation to do so would have been to provide compatibility with systems that uses OFDM modulation scheme.

As per claim 85, it would have obvious to one skill in the art to identify transmission delay that is greater than a guard interval for enhanced detection.

As per claim 86 said reverse link includes training data see col. 5, lines 55-60.

As per claim 87, the received training sequence and a delay version of the training sequence are compared see col. 5, lines 55-60.

As per claim 88, it would have been obvious to one skill in the art to invert and apply a measured channel response to said OFDM data so as to undo the effect of the transmission medium.

As per claim 89, the reverse path is inherently reciprocal to the forward path.

As per claim 90, the system include a base station use for wireless transmission see col. 3, lines 11, col. 6, lines 37-38.

As per claim 91, the antenna is configured to provide diversity see col. 6, line 29.

As per claim 92 Bao uses spatial diversity see col. 6, line 37.

As per claim 93, the apparatus includes at least one transmit antenna and at least one receive antenna see col. 6, lines 28-29.

As per claims 94 and 95, it would have been obvious that the type of antenna would have been adaptive type so as to take advantage of its enhanced technological feature.

### ***Claim Objections***

7. Claims 10, 28, 83 and 85-89 are objected to because of the following informalities:

Claim 10, line 2, "received" should be deleted, so as to be consistent with antecedent in claim 9.

Claim 28, line 5, "a" should be replaced by --the-- so as to be make use of antecedent in claim 1.

Claim 83, last line, after "pre-equalizer", based on said multipath induced delay" should be inserted. Note that any claim whose base claim s objected is likewise objected. Appropriate correction is required.

***Allowable Subject Matter***

8. Claims 42 and 81 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean B. Corrielus whose telephone number is 571-272-3020. The examiner can normally be reached on Maxi-Flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

TITLE: Method and apparatus for error reduction in an  
orthogonal modulation system

---

**Abstract Text - ABTX (1):**

A method and apparatus reduces error in a communication system that includes multiple orthogonal subcarriers by suppressing a subcarrier in a transmitting communication device and by equalizing a received signal in a receiving communication device. Subcarrier suppression is based on a determination of a signal quality metric with respect to each subcarrier or is based on a determination of excessive signal power overdriving an amplifier of the receiving communication device. Equalization of the received signal is based on an equalization function that reduces a multipath delay introduced to the transmitted signal when the multipath delay exceeds a tolerable multipath delay.

**Brief Summary Text - BSTX (4):**

The limited availability of bandwidth is a critical constraint on the capacity of wireless communication systems. To enhance capacity, orthogonal modulation schemes, such as Orthogonal Frequency Division Multiplexing (OFDM), have been developed for the modulation of information onto a carrier and subsequent transmission of the modulated signal.

**LIST OF CLAIMS / AMENDMENTS**

Claims 1-43, 45, 49-51, 54, 79-80, 82, 84, and 86-95 are allowed.

Please amend claims 14, 16, 29-30, 43-44, 46-47, 51-52, 54-55, 60-62, 64-67, 73-75, 78-79, 81-83, 85, 87, and 91-92 as shown herein.

Claims 1-95 are pending and are listed following:

1. **(previously presented)** A method comprising:  
identifying at least one multipath transmission delay within a reverse path data signal received from a receiving device;  
determining at least one forward path pre-equalization parameter based on said at least one transmission delay; and  
modifying a forward path data signal that is to be transmitted to the receiving device based on said at least one forward path pre-equalization parameter.

2. **(original)** The method as recited in Claim 1, further comprising:  
receiving said reverse path data signal over at least one reverse transmission path.

3. **(original)** The method as recited in Claim 2, further comprising:  
transmitting said modified forward path data signal over at least one forward transmission path.

1           **4. (original)**   The method as recited in Claim 1, wherein said reverse  
2 path data signal includes at least one type of data selected from a group of  
3 different types of data comprising Orthogonal Frequency Division Multiplexing  
4 (OFDM) data and Quadrature Phase Shift Keying (QPSK) data.

5  
6           **5. (original)**   The method as recited in Claim 1, wherein said  
7 modified forward path data signal includes at least one type of data selected from a  
8 group of different types of data comprising Orthogonal Frequency Division  
9 Multiplexing (OFDM) data and Quadrature Phase Shift Keying (QPSK) data.

10  
11           **6. (original)**   The method as recited in Claim 5, wherein said  
12 modified forward path data signal includes sub-carrier pre-equalized OFDM data.

13  
14           **7. (original)**   The method as recited in Claim 6, further comprising:  
15 generating corresponding Quadrature Phase Shift Keying (QPSK)  
16 modulation values based on said sub-carrier pre-equalized OFDM data.

17  
18           **8. (original)**   The method as recited in Claim 4, wherein identifying  
19 said at least one multipath transmission delay includes:

20           identifying at least one multipath transmission delay spread that is greater  
21 than a guard interval.

22  
23           **9. (original)**   The method as recited in Claim 1, wherein said reverse  
24 path data signal includes identifiable training data.  
25

1  
2       **10. (original)**   The method as recited in Claim 9, further comprising:  
3       comparing said received identifiable training data to a local version of said  
4       training data to identify said at least one multipath transmission delay within said  
5       reverse path data signal.

6  
7       **11. (original)**   The method as recited in Claim 3, wherein modifying  
8       said forward path data signal based on at least one forward path pre-equalization  
9       parameter further includes:

10       selectively inverting and applying a measured channel response to said  
11       forward path data signal to significantly reduce subsequent induced deleterious  
12       channel response changes to said modified forward path data signal during  
13       transmission over said at least one forward transmission path.

14  
15       **12. (original)**   The method as recited in Claim 3, wherein said at least  
16       one reverse transmission path is substantially reciprocal to said at least one  
17       forward transmission path.

18  
19       **13. (previously presented)**   The method as recited in Claim 1,  
20       wherein identifying said at least one multipath transmission delay, determining  
21       said at least one forward path pre-equalization parameter, and modifying said  
22       forward path data signal are performed by a transmitting device.

1           **14. (currently amended)**   The method as recited in Claim 13,  
2 wherein said transmitting device includes a base station device that is operatively  
3 ~~configurable~~ configured for use in a wireless communication system.

4  
5           **15. (previously presented)**   The method as recited in Claim 13,  
6 further comprising:

7           using at least one transmitting device receive antenna operatively coupled  
8 to said transmitting device to receive said reverse path data signal over at least one  
9 reverse transmission path from the receiving device.

10  
11           **16. (currently amended)**   The method as recited in Claim 15,  
12 wherein said receiving device includes a customer premise equipment (CPE)  
13 device that is operatively ~~configurable~~ configured for use in a wireless  
14 communication system.

15  
16           **17. (original)**   The method as recited in Claim 16, wherein said CPE  
17 device includes at least one device selected from a group of devices comprising a  
18 computer, a portable computer, a personal digital assistant (PDA), and a mobile  
19 communication device.  
20  
21  
22  
23  
24  
25

1           **18. (previously presented)** The method as recited in Claim 15,  
2 wherein said at least one transmitting device receive antenna includes at least one  
3 type of antenna selected from a group of suitable types of antennas comprising at  
4 least one omnidirectional type of antenna, at least one beam type of antenna, at  
5 least one phased array type of antenna, and at least one adaptive antenna.

6  
7           **19. (previously presented)** The method as recited in Claim 15,  
8 wherein said transmitting device is operatively coupled to a plurality of first  
9 device receive antennas.

10  
11           **20. (previously presented)** The method as recited in Claim 13,  
12 further comprising;

13           receiving said reverse path data signal over at least one reverse transmission  
14 path; and

15           causing said transmitting device to post equalize at least a portion of said  
16 received reverse path signal.

17  
18           **21. (previously presented)** The method as recited in Claim 15,  
19 wherein determining said at least one forward path pre-equalization parameter  
20 based on said at least one transmission delay further includes:

21           determining at least one angle of arrival of said reverse path data signal  
22 with respect to said at least one transmitting device receive antenna.  
23  
24  
25

1           **22. (previously presented)** The method as recited in Claim 15,  
2 further comprising:

3           using at least one receiving device transmit antenna operatively coupled to  
4 said receiving device and configured to transmit said reverse path data signal over  
5 said at least one reverse transmission path to said transmitting device.

6  
7           **23. (previously presented)** The method as recited in Claim 22,  
8 wherein a plurality of receiving device transmit antennas are operatively coupled  
9 to said receiving device and configured to transmit said reverse path data signal  
10 over said at least one reverse transmission path to said transmitting device.

11  
12           **24. (previously presented)** The method as recited in Claim 22,  
13 further comprising:

14           causing said receiving device to transmit at least two reverse path data  
15 signals over said at least one reverse transmission path to said transmitting device.

16  
17           **25. (original)** The method as recited in Claim 24, wherein said at  
18 least two reverse path data signals include Orthogonal Frequency-Division  
19 Multiple Access (OFDMA) data.

1           **26. (previously presented)** The method as recited in Claim 22,  
2 further comprising:

3           causing said receiving device to transmit said reverse path data signal over  
4 said at least one reverse transmission path to said transmitting device at a bit rate  
5 less than about 6 Mbps.

6  
7           **27. (previously presented)** The method as recited in Claim 22,  
8 further comprising:

9           causing said receiving device to transmit corresponding receiving device  
10 transmission power level information to said transmitting device; and

11           causing said transmitting device to adjust at least one transmission power  
12 level associated with said forward path data signal based on said receiving device  
13 transmission power level information.

14  
15           **28. (previously presented)** The method as recited in Claim 13,  
16 further comprising:

17           using at least one transmitting device transmit antenna operatively coupled  
18 to said transmitting device to transmit said modified forward path data signal over  
19 at least one forward transmission path to a receiving device.

20  
21           **29. (currently amended)** The method as recited in Claim 28,  
22 wherein said at least one transmitting device transmit antenna is operatively  
23 configurable configured to provide transmission diversity when transmitting said  
24 modified forward path data signal.  
25

1  
2       **30. (currently amended)**     The method as recited in Claim 28,  
3 wherein said at least one transmitting device transmit antenna is operatively  
4 ~~configurable~~ configured to provide spatial division transmission utilizing a spatial  
5 division technique when transmitting said modified forward path data signal as a  
6 narrow signal to reduce multipath propagation.

7  
8       **31. (previously presented)**   The method as recited in Claim 28,  
9 wherein said at least one transmitting device transmit antenna includes at least one  
10 type of antenna selected from a group of suitable types of antennas comprising at  
11 least one omnidirectional type of antenna, at least one beam type of antenna, at  
12 least one phased array type of antenna, and at least one adaptive antenna.

13  
14       **32. (previously presented)**   The method as recited in Claim 28,  
15 further comprising:

16       setting at least one antenna pointing parameter associated with said at least  
17 one transmitting device transmit antenna based on said at least one forward path  
18 pre-equalization parameter.

19  
20       **33. (previously presented)**   The method as recited in Claim 28,  
21 further comprising:

22       setting at least one phased array antenna transmission directing parameter  
23 associated with said at least one transmitting device transmit antenna based on said  
24 at least one forward path pre-equalization parameter.  
25

1  
2       **34. (previously presented)** The method as recited in Claim 28,  
3 further comprising;  
4       selectively transmitting said modified forward path data signal at one angle  
5 with respect to said transmitting device transmit antenna.

6  
7       **35. (previously presented)** The method as recited in Claim 28,  
8 further comprising:  
9       selecting said at least one transmitting device transmit antenna from a  
10 plurality of transmitting device transmit antennas that are each operatively coupled  
11 to said transmitting device.

12  
13       **36. (previously presented)** The method as recited in Claim 35,  
14 further comprising:  
15       selectively transmitting a plurality of beams using two or more transmitting  
16 device transmit antennas.

17  
18       **37. (previously presented)** The method as recited in Claim 36,  
19 wherein each of said transmitted plurality of beams is selectively adjusted in phase  
20 and amplitude to reduce multipath affects when received by said receiving device.  
21  
22  
23  
24  
25

1       **38. (previously presented)** The method as recited in Claim 28,  
2 further comprising:

3           using at least one receiving device receive antenna operatively coupled to  
4 said receiving device and configured to receive said modified forward path data  
5 signal over said at least one forward transmission path from said transmitting  
6 device.

7  
8       **39. (previously presented)** The method as recited in Claim 38,  
9 wherein a plurality of receiving device receive antennas are operatively coupled to  
10 said receiving device and configured to receive said modified forward path data  
11 signal over said at least one forward transmission path from said transmitting  
12 device.

13  
14       **40. (original)** The method as recited in Claim 1, wherein determining  
15 said at least one forward path pre-equalization parameter based on said at least one  
16 transmission delay further includes:

17           iteratively selectively identifying different forward path pre-equalization  
18 parameters over time to operatively identify and subsequently ignore aliased  
19 multipath delays within said reverse path data signal.  
20  
21  
22  
23  
24  
25

1           **41. (original)**   The method as recited in Claim 1, wherein determining  
2 said at least one forward path pre-equalization parameter based on said at least one  
3 transmission delay further includes:

4           sub-band equalizing said forward path data signal using corresponding  
5 frequency domain reverse path data.

6  
7           **42. (original)**   The method as recited in Claim 1, wherein modifying  
8 said forward path data signal based on said at least one forward path pre-  
9 equalization parameter further includes:

10           selectively setting different transmission power levels for at least two  
11 Orthogonal Frequency Division Multiplexing (OFDM) tones in said forward path  
12 data signal based on said at least one forward path pre-equalization parameter.

13  
14           **43. (currently amended)**   A system comprising:  
15           a first device operatively ~~configurable~~ configured to connect to at least a  
16 second device over a wireless communication path, said first device having logic  
17 that is configured to detect a multipath transmission delay in at least one reverse  
18 path data signal transmitted by said second device, determine at least one forward  
19 path pre-equalization parameter based on said detected multipath transmission  
20 delay, and pre-equalize a forward path data signal that is to be transmitted to said  
21 second device based on said at least one forward path pre-equalization parameter.  
22  
23  
24  
25

1           **44. (currently amended)**     The system as recited in Claim 43,  
2 wherein said first device further comprising:

3                 at least one first device antenna; and

4                 at least one transceiver operatively coupled to said at least one first device  
5 antenna and said logic, said at least one transceiver being ~~configurable~~ configured  
6 to receive said reverse path data signal over at least one reverse transmission path  
7 using said at least one first device antenna and provide said reverse path data  
8 signal to said logic, and transmit said ~~modified~~ forward path data signal from said  
9 logic over at least one forward transmission path.

10  
11           **45. (original)**     The system as recited in Claim 43, wherein said  
12 reverse path data signal includes at least one type of data selected from a group of  
13 different types of data comprising Orthogonal Frequency Division Multiplexing  
14 (OFDM) data and Quadrature Phase Shift Keying (QPSK) data.

15  
16           **46. (currently amended)**     The system as recited in Claim 43,  
17 wherein said ~~modified~~ forward path data signal includes at least one type of data  
18 selected from a group of different types of data comprising Orthogonal Frequency  
19 Division Multiplexing (OFDM) data and Quadrature Phase Shift Keying (QPSK)  
20 data.

21  
22           **47. (currently amended)**     The system as recited in Claim 46,  
23 wherein said ~~modified~~ forward path data signal includes sub-carrier pre-equalized  
24 OFDM data.  
25

1  
2       **48. (original)**   The system as recited in Claim 47, wherein said logic  
3 is further configured to produce corresponding Quadrature Phase Shift Keying  
4 (QPSK) modulation values based on said sub-carrier pre-equalized OFDM data.

5  
6       **49. (original)**   The system as recited in Claim 45, wherein said logic  
7 detects said multipath transmission delay by identifying at least one multipath  
8 transmission delay spread that is greater than a guard interval.

9  
10       **50. (original)**   The system as recited in Claim 43, wherein said  
11 reverse path data signal includes identifiable training data.

12  
13       **51. (currently amended)**   The system as recited in Claim 50,  
14 wherein said logic is further configured to compare said received identifiable  
15 training data to a non-multipath delayed version of said training data to detect said  
16 multipath transmission delay.

17  
18       **52. (currently amended)**   The system as recited in Claim 44,  
19 wherein said logic is configured to selectively invert and apply a measured  
20 channel response to said forward path data signal to significantly reduce  
21 subsequent induced deleterious channel response changes to said modified  
22 forward path data signal during transmission over said at least one forward  
23 transmission path.  
24  
25

1           **53. (original)**   The system as recited in Claim 44, wherein said at  
2 least one reverse transmission path is substantially reciprocal to said at least one  
3 forward transmission path.

4  
5           **54. (currently amended)**   The system as recited in Claim 43,  
6 wherein said first device includes a base station device that is operatively  
7 ~~configurable~~ configured for use in a wireless communication system.

8  
9           **55. (currently amended)**   The system as recited in Claim 44,  
10 ~~further comprising: wherein~~ said second device, ~~in the form of~~ is a customer  
11 premise equipment (CPE) device that is operatively ~~configurable~~ configured for  
12 use in a wireless communication system.

13  
14           **56. (original)**   The system as recited in Claim 55, wherein said CPE  
15 device includes at least one device selected from a group of devices comprising a  
16 computer, a portable computer, a personal digital assistant (PDA), and a mobile  
17 communication device.

18  
19           **57. (original)**   The system as recited in Claim 44, wherein said first  
20 device is operatively coupled to a plurality of first device receive antennas.

21  
22           **58. (original)**   The system as recited in Claim 44, wherein said logic  
23 is configured to post-equalize at least a portion of said received reverse path  
24 signal.  
25

1  
2       **59. (original)**   The system as recited in Claim 44, wherein said logic  
3 is further configured to determine at least one angle of arrival of said reverse path  
4 data signal with respect to said at least one first device antenna.

5  
6       **60. (currently amended)**   The system as recited in Claim 55,  
7 wherein said second device includes at least one second device antenna that is  
8 operatively ~~configurable~~ configured to transmit said reverse path data signal over  
9 said at least one reverse transmission path to said first device and receive said  
10 transmitted ~~modified~~ forward path data signal from said first device over said at  
11 least one forward transmission path.

12  
13       **61. (currently amended)**   The system as recited in Claim 60,  
14 wherein said second device includes a plurality of second device antennas that are  
15 operatively ~~configurable~~ configured to transmit said reverse path data signal over  
16 said at least one reverse transmission path to said first device.

17  
18       **62. (currently amended)**   The system as recited in Claim 60,  
19 wherein said second device is ~~configurable~~ configured to transmit at least two  
20 reverse path data signals over said at least one reverse transmission path to said  
21 first device.

1       **63. (original)**   The system as recited in Claim 62, wherein said at  
2   least two reverse path data signals include Orthogonal Frequency-Division  
3   Multiple Access (OFDMA) data.

4  
5       **64. (currently amended)**   The system as recited in Claim 60,  
6   wherein said second device is ~~configurable~~ configured to transmit said reverse  
7   path data signal over said at least one reverse transmission path to said first device  
8   at a bit rate less than about 6 Mbps.

9  
10       **65. (currently amended)**   The system as recited in Claim 60,  
11   wherein said second device is ~~configurable~~ configured to transmit corresponding  
12   second device transmission power level information to said first device, and said  
13   first device is further ~~configurable~~ configured to adjust at least one transmission  
14   power level associated with said forward path data signal based on said second  
15   device transmission power level information.

16  
17       **66. (currently amended)**   The system as recited in Claim 44,  
18   wherein said at least one first device antenna is operatively ~~configurable~~  
19   configured to provide transmission diversity when transmitting said ~~modified~~  
20   forward path data signal.

1           **67. (currently amended)**   The system as recited in Claim 44,  
2 wherein said at least one first device antenna is operatively ~~configurable~~  
3 configured to provide spatial division transmission utilizing a spatial division  
4 technique when transmitting said ~~modified~~ forward path data signal as a narrow  
5 signal to reduce multipath propagation.

6  
7           **68. (original)**   The system as recited in Claim 44, wherein said at  
8 least one first device antenna includes at least one first device transmit antenna  
9 and at least one first device receive antenna.

10  
11           **69. (original)**   The system as recited in Claim 68, wherein said at  
12 least one first device transmit antenna includes at least one type of antenna  
13 selected from a group of suitable types of antennas comprising at least one  
14 omnidirectional type of antenna, at least one beam type of antenna, at least one  
15 phased array type of antenna, and at least one adaptive antenna.

16  
17           **70. (original)**   The system as recited in Claim 68, wherein said at  
18 least one first device receive antenna includes at least one type of antenna selected  
19 from a group of suitable types of antennas comprising at least one omnidirectional  
20 type of antenna, at least one beam type of antenna, at least one phased array type  
21 of antenna, and at least one adaptive antenna.  
22  
23  
24  
25

1           **71. (original)**   The system as recited in Claim 68, wherein said logic  
2 is further configured to establish at least one antenna pointing parameter  
3 associated with said at least one first device transmit antenna based on said at least  
4 one forward path pre-equalization parameter.

5  
6           **72. (original)**   The system as recited in Claim 68, wherein said logic  
7 is further configured to establish at least one phased array antenna transmission  
8 directing parameter associated with said at least one first device transmit antenna  
9 based on said at least one forward path pre-equalization parameter.

10  
11           **73. (currently amended)**   The system as recited in Claim 68,  
12 wherein said logic is further ~~configurable~~ configured to cause said at least one  
13 transceiver to selectively transmit said ~~modified~~ forward path data signal at one  
14 angle with respect to said at least one first device transmit antenna.

15  
16           **74. (currently amended)**   The system as recited in Claim 68,  
17 wherein said logic is further ~~configurable~~ configured to cause said at least one  
18 transceiver to select said at least one first device transmit antenna from a plurality  
19 of first device transmit antennas that are each operatively coupled to said first  
20 device.  
21  
22  
23  
24  
25

1       **75. (currently amended)**     The system as recited in Claim 74,  
2 wherein said logic is further ~~configurable~~ configured to cause said at least one  
3 transceiver to selectively transmit a plurality of beams using two or more first  
4 device transmit antennas.

5  
6       **76. (original)**     The system as recited in Claim 75, wherein each of  
7 said transmitted plurality of beams is selectively adjusted in phase and amplitude  
8 to reduce multipath affects when received by said second device.

9  
10       **77. (original)**     The system as recited in Claim 60, wherein said at  
11 least one second device antenna includes at least one second device transmit  
12 antenna and at least one second device receive antenna.

13  
14       **78. (currently amended)**     The system as recited in Claim 77,  
15 wherein said second device includes a plurality of second device receive antennas  
16 that are ~~configurable~~ configured to receive said transmitted ~~modified~~ forward path  
17 data signal over said at least one forward transmission path from said first device.

18  
19       **79. (currently amended)**     The system as recited in Claim 43,  
20 wherein said logic is further ~~configurable~~ configured to iteratively selectively test  
21 different forward path pre-equalization parameters over time such that aliased  
22 multipath delays within said reverse path data signal are identifiable.

1           **80. (original)**   The system as recited in Claim 43, wherein said logic  
2 is configured to provide sub-band equalizing of said forward path data signal using  
3 corresponding frequency domain reverse path data.

4  
5           **81. (currently amended)**   The system as recited in Claim 43 ~~44~~,  
6 wherein said logic is further ~~configurable~~ configured to cause said transceiver to  
7 selectively establish different transmission power levels for at least two  
8 Orthogonal Frequency Division Multiplexing (OFDM) tones in said forward path  
9 data signal based on said at least one forward path pre-equalization parameter.

10  
11           **82. (currently amended)**   An apparatus comprising:  
12       an Orthogonal Frequency Division Multiplexing (OFDM) processor  
13 configured to receive coded data and output corresponding OFDM data;  
14       a pre-equalizer operatively coupled to said OFDM processor and  
15 configured to receive said OFDM data and output pre-equalized OFDM data based  
16 on gathered reverse link data;  
17       at least one antenna; and  
18       ~~a transceiver~~ an antenna signal processing component operatively coupled  
19 to said pre-equalizer and said at least one antenna, said ~~transceiver~~ antenna signal  
20 processing component being configured to receive said pre-equalized OFDM data  
21 from said pre-equalizer and apply a corresponding transmittable forward link data  
22 signal to said at least one antenna.

1  
2       **83. (currently amended)**     The apparatus as recited in Claim 82,  
3 wherein said ~~transceiver~~ antenna signal processing component is ~~configurable~~  
4 configured to receive a transmitted reverse link data signal using said at least one  
5 antenna and output corresponding reverse link data, and further comprising:

6       reverse link logic operatively coupled to said at least one antenna ~~and said~~  
7 ~~operatively coupled to said at least one first device antenna~~, said reverse link logic  
8 being configured to detect at least one multipath induced delay in said reverse link  
9 data and provide associated said gathered reverse link data to said pre-equalizer.

10  
11       **84. (original)**     The apparatus as recited in Claim 82, wherein said  
12 pre-equalized OFDM data includes sub-carrier pre-equalized OFDM data.

13  
14       **85. (currently amended)**     The apparatus as recited in Claim 82 ~~83~~,  
15 wherein said reverse link logic detects said at least one multipath induced delay by  
16 identifying at least one transmission delay spread that is greater than a guard  
17 interval.

18  
19       **86. (original)**     The apparatus as recited in Claim 83, wherein said  
20 reverse link data signal includes identifiable training data.  
21  
22  
23  
24  
25

1       **87. (currently amended)**     The apparatus as recited in Claim 86,  
2 wherein said reverse link logic is further configured to compare said received  
3 identifiable training data to a non-delayed version of said training data to detect  
4 said at least one transmission delay.

5  
6       **88. (original)**     The apparatus as recited in Claim 83, wherein said  
7 pre-equalizer is configured to selectively invert and apply a measured channel  
8 response to said OFDM data.

9  
10       **89. (original)**     The apparatus as recited in Claim 83, wherein a  
11 reverse transmission path carrying said transmitted reverse link data signal  
12 towards said antenna is at least substantially reciprocal to a forward transmission  
13 path carrying said transmittable forward link data signal away from said at least  
14 one antenna.

15  
16       **90. (original)**     The apparatus as recited in Claim 82, wherein said  
17 apparatus includes a base station device suitable for use in a wireless  
18 communication system.

19  
20       **91. (currently amended)**     The apparatus as recited in Claim 82,  
21 wherein said at least one antenna is operatively ~~configurable~~ configured to provide  
22 transmission diversity.  
23  
24  
25

1           **92. (currently amended)**   The apparatus as recited in Claim 82,  
2 wherein said at least one antenna is operatively ~~configurable~~ configured to provide  
3 a spatial division technique to transmit the data signal as a narrow signal to reduce  
4 multipath propagation.

5  
6           **93. (original)**   The apparatus as recited in Claim 82, wherein said at  
7 least one antenna includes at least one transmit antenna and at least one receive  
8 antenna.

9  
10          **94. (original)**   The apparatus as recited in Claim 93, wherein said at  
11 least one transmit antenna includes at least one type of antenna selected from a  
12 group of suitable types of antennas comprising at least one omnidirectional type of  
13 antenna, at least one beam type of antenna, at least one phased array type of  
14 antenna, and at least one adaptive antenna.

15  
16          **95. (original)**   The apparatus as recited in Claim 93, wherein said at  
17 least one receive antenna includes at least one type of antenna selected from a  
18 group of suitable types of antennas comprising at least one omnidirectional type of  
19 antenna, at least one beam type of antenna, at least one phased array type of  
20 antenna, and at least one adaptive antenna.

**REMARKS**

Applicant respectfully requests reconsideration and allowance of the subject application. Claims 1-95 are pending, of which claims 14, 16, 29-30, 43-44, 46-47, 51-52, 54-55, 60-62, 64-67, 73-75, 78-79, 81-83, 85, 87, and 91-92 have been amended to place the application in condition for allowance.

**Allowable Subject Matter**

Claims 1-43, 45, 49-51, 54, 79-80, 82, 84, and 86-95 have been allowed, and claims 44, 46-48, 52-53, 55-78, 81, 83, and 85 are indicated as being allowable if rewritten to overcome the 35 U.S.C. §112 rejection (*Office Action* p.4). Applicant appreciates the indications of allowability.

Appropriate amendments have been provided for allowed claims to overcome the claim objections as described below. Appropriate amendments have also been provided for the allowable claims to overcome the 35 U.S.C. §112 rejection. Accordingly, all pending claims 1-95 are in condition for allowance.

**Claim Objections**

Claims 14, 16, 29-30, 43-44, 54-55, 60-62, 64-67, 73-75, 78-79, 81, 83, 87, 89, and 91-92 are objected to for various informalities (*Office Action* p.2). Appropriate corrections have been provided and Applicant respectfully requests that the claim objections be withdrawn. Specifically:

Claims 14, 16, 29-30, 43-44, 54-55, 60-62, 64-67, 73-75, 78-79, 81, 83, and 91-92 are amended to replace “configurable” with “configured”;

1 Claims 30, 67, and 92 are amended to clarify “spatial division”. Support for  
2 the claim amendments can be found in the specification at least at page 8,  
3 lines 15-22;

4 Claims 51 and 87 are amended to delete “received”;

5 Claim 55 is amended to replace “further comprising” with “wherein”;

6 Claim 83 is amended to delete “associated”;

7 Claim 85 is amended to be dependent upon claim 83; and

8 Claim 89 is dependent upon claim 83 which is dependent upon claim 82.  
9 Claim 89 recites “said transmittable forward link data signal” which is introduced in  
10 claim 82. As such, claim 89 has not been amended to delete “transmittable” as the  
11 Office suggests.

### 12 **Drawing Objections**

13 The Drawings are objected to because, for example, claim 82 recites a  
14 pre-equalizer operatively coupled to a transceiver which is not shown in an  
15 embodiment in the drawings (*Office Action* p.3). Appropriate correction has been  
16 provided and Applicant respectfully requests that the drawing objections be  
17 withdrawn.  
18

19 Specifically, claim 82 is amended to recite “an antenna signal processing  
20 component operatively coupled to said pre-equalizer and said at least one  
21 antenna”, as shown in Fig. 3. Support for the amendment can be found in the  
22 specification at least at p.19 lines 6-19. Accordingly, corrected drawing sheets are  
23 not required.

\* If the entry in column 1 is less than the entry in column 2, write "0" in column 3.  
\*\* If the "Highest Number Previously Paid For" IN THIS SPACE is less than 20, enter "20".  
\*\*\* If the "Highest Number Previously Paid For" IN THIS SPACE is less than 3, enter "3".  
The "Highest Number Previously Paid For" (Total or Independent) is the highest number found in the appropriate box in column 1.

This collection of information is required by 37 CFR 1.16. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

|                              |                                      |  |                                           |  |

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

1) ☒ Responsive to communication(s) filed on 13 June 2006.

2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

4) ☒ Claim(s) 1-95 is/are pending in the application.

4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

5) ☒ Claim(s) 1-43, 45, 49-51, 54, 79, 80, 82, 84 and 86-95 is/are allowed.

6) ☒ Claim(s) 44, 46-48, 52, 53, 55-78, 81, 83 and 85 is/are rejected.

7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.

8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

9) ☐ The specification is objected to by the Examiner.

10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
       Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
       Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
       a) ☐ All    b) ☐ Some \*    c) ☐ None of:  
           1. ☐ Certified copies of the priority documents have been received.  
           2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
           3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Claim Objections***

1. Claims 14, 16, 29, 30, 43, 44, 54, 55, 60, 61, 62, 64, 65, 66, 67, 73, 74, 75, 78, 79, 81, 83, 87, 89, 91 and 92 are objected to because of the following informalities:  
claim 14, line 3, "configurable" should be replaced by "configured" the same comment applies equally to claims 16, 29, 30, 43, 44, 54, 55, 60, 61, 62, 64, 65, 66, 67, 73, 74, 75, 78, 79, 81, 83, 91, 92 and to any other claims reciting similar limitation.  
Claim 30, line 3, what does it mean by "spatial division"? The same comment applies to claim 67, and 92.  
Claim 55, "further comprising" should be replaced by "wherein".  
Claim 83, line 9, "associated" should be deleted.  
The dependency of claim 85 should be changed to "83" so as to provided antecedent basis for the recitation "said reverse ling logic" and "said at least one multipath".  
Claim 87, line 2, "received" should be deleted. The same comment applied to claim 51, line 2.  
Claim 89, line 4, "transmittable" should deleted. Note that any claim whose base claim is objected is likewise objected.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 44, 46-48, 52, 53, 55-78, 81, 83 and 85 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 44, line before last, "said modified forward path" lacks of proper antecedent basis.

Claim 46, lines 1-2, "said modified forward path" lacks of proper antecedent basis.

Claim 81 the limitation "said transceiver" lacks of proper antecedent basis.

Claim 83 the limitation "reverse link logic operatively coupled to said at least one antenna and said operatively coupled to said at least one first device antenna" is unclear. In addition, the limitation "said operatively coupled" and "said at least one first device antenna" lack of proper antecedent basis.

Note that any claim whose base claim is objected is likewise objected.

### ***Drawings***

4. The drawings are objected to because the claims for instance claim 82 recites "a pre-equalizer" operatively coupled to a "transceiver". However it is noted that the drawing fig. 3 shows the functional block diagram of a "transceiver" as included function blocks 302 304 306 and 308. There is no embodiment of the drawing showing "a pre-equalizer" coupled to a "transceiver". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as

"amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. Applicant's arguments, see comment pages 36 and 39, filed 6/13/06, with respect to rejection of claims 1, 43 and 82 have been fully considered and are persuasive. The rejection of claims 1-95 has been withdrawn.

***Allowable Subject Matter***

6. Claims 1-43, 45, 49-51, 54, 79-80, 82, 84, 86-95 allowed. However, the claims must be amended if necessary to overcome any objection set forth above.

7. Claims 44, 46-48, 52, 53, 55-78, 81, 83 and 85 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

**SPECIFICATION AMENDMENTS**

Please amend the specification as follows:

Substitute the paragraph starting at page 15, line 20, with the following:

Reference is now made to Fig. 1, which is a block diagram depicting an exemplary communication system 100 operating in a multipath environment. Here, a base station device 102 is configured to exchange data with at least one customer premise equipment (CPE) device 104 through an antenna 108 and over a wireless communication link. Base station device 102 is further operatively configured to send and receive data via one or more networks 106. In this manner, data can be received through network 106 by base station 102, and then forwarded over a wireless communication link to CPE device 104 using antenna 108. Likewise, in reverse order, CPE device 104 can transmit data over a wireless communication link to base station device 102 through antenna 108, and base station 102 may then forward the received data to other device device(s) via network 106.

Substitute the paragraph starting at page 17, line 24, with the following:

Transceiver 208 is configured to receive data from and provide data to CPE mechanism(s) 210. CPE mechanism(s) 210 is representative of one or more mechanisms associated with the functionality of CPE device 104. Thus, for example, in certain implementations CPE device 104 includes a computer or like computing device. As such, CPE mechanism(s) 210 may take the form of a

1 processor that is coupled to memory and operatively configured to perform  
2 functions in accord with one or more computer instructional programs, e.g.,  
3 application programs. In still other implementations, CPE device [[1-4]] 104 may  
4 include a mobile telephone, in which case, CPE mechanism(s) 210 may include a  
5 signal processor and other circuitry for converting digital audio data into an  
6 applicable analog audio signal and converting an analog audio signal into  
7 corresponding digital data.

8  
9 Substitute the paragraph starting at page 18, line 11, with the following:

10 Logic 212 is provided in this example to represent any applicable additional  
11 logic/circuitry that may be used to implement the all or part of the methods and  
12 apparatuses of the present invention. In certain implementations, logic 212 may  
13 be incorporated in transceiver 208. For this reason, logic 212 is depicted within a  
14 dashed line box.

15  
16 Substitute the paragraph starting at page 24, line 20, with the following:

17 ~~As an~~ An example of known headers that may be used to support training  
18 sequences, sequences can be found in the IEEE 802.11a standard. IEEE 802.11a  
19 provides short and long sequences totaling a duration of about 8  $\mu$ s. The 8  $\mu$ s may  
20 be used to ascertain delay spread to approximately 8  $\mu$ s delay. The known  
21 sequences have sufficient low frequency energy per burst (here, low being  
22 between about 100 kHz and 125 kHz, 1/8  $\mu$ s resolution) to determine fine  
23 variations in the complex channel response.  
24  
25

**LIST OF CLAIMS / AMENDMENTS**

Please amend claims 1, 13-16, 18-24, and 26-39 as shown herein.

Claims 1-95 are pending and are listed following:

1. **(currently amended)** A method comprising:  
identifying at least one multipath transmission delay within a  
reverse path data signal received from a receiving device;  
determining at least one forward path pre-equalization  
parameter based on said at least one transmission delay; and  
modifying a forward path data signal that is to be transmitted  
to the receiving device based on said at least one forward path  
pre-equalization parameter.
2. **(original)** The method as recited in Claim 1, further comprising:  
receiving said reverse path data signal over at least one  
reverse transmission path.
3. **(original)** The method as recited in Claim 2, further comprising:  
transmitting said modified forward path data signal over at  
least one forward transmission path.

- 1 4. (original) The method as recited in Claim 1, wherein said reverse  
2 path data signal includes at least one type of data selected from a  
3 group of different types of data comprising Orthogonal Frequency  
4 Division Multiplexing (OFDM) data and Quadrature Phase Shift  
5 Keying (QPSK) data.
- 6  
7 5. (original) The method as recited in Claim 1, wherein said  
8 modified forward path data signal includes at least one type of data  
9 selected from a group of different types of data comprising  
10 Orthogonal Frequency Division Multiplexing (OFDM) data and  
11 Quadrature Phase Shift Keying (QPSK) data.
- 12  
13 6. (original) The method as recited in Claim 5, wherein said  
14 modified forward path data signal includes sub-carrier pre-equalized  
15 OFDM data.
- 16  
17 7. (original) The method as recited in Claim 6, further comprising:  
18 generating corresponding Quadrature Phase Shift Keying  
19 (QPSK) modulation values based on said sub-carrier pre-equalized  
20 OFDM data.
- 21  
22  
23  
24  
25

1       8.    (original)   The method as recited in Claim 4, wherein identifying  
2           said at least one multipath transmission delay includes:

3                 identifying at least one multipath transmission delay spread  
4                 that is greater than a guard interval.

5  
6       9.    (original)   The method as recited in Claim 1, wherein said reverse  
7           path data signal includes identifiable training data.

8  
9       10.   (original)   The method as recited in Claim 9, further comprising:  
10                 comparing said received identifiable training data to a local  
11                 version of said training data to identify said at least one multipath  
12                 transmission delay within said reverse path data signal.

13  
14       11.   (original)   The method as recited in Claim 3, wherein modifying  
15           said forward path data signal based on at least one forward path  
16           pre-equalization parameter further includes:

17                 selectively inverting and applying a measured channel  
18                 response to said forward path data signal to significantly reduce  
19                 subsequent induced deleterious channel response changes to said  
20                 modified forward path data signal during transmission over said at  
21                 least one forward transmission path.

1 12. (original) The method as recited in Claim 3, wherein said at least  
2 one reverse transmission path is substantially reciprocal to said at  
3 least one forward transmission path.

4  
5 13. (currently amended) The method as recited in Claim 1,  
6 wherein identifying said at least one multipath transmission delay,  
7 determining said at least one forward path pre-equalization  
8 parameter, and modifying said forward path data signal are  
9 performed by a first transmitting device.

10  
11 14. (currently amended) The method as recited in Claim 13,  
12 wherein said first transmitting device includes a base station device  
13 that is operatively configurable for use in a wireless communication  
14 system.

15  
16 15. (currently amended) The method as recited in Claim 13,  
17 further comprising:

18 using at least one first transmitting device receive antenna  
19 operatively coupled to said first transmitting device to receive said  
20 reverse path data signal over at least one reverse transmission path  
21 from ~~a second~~ the receiving device.  
22  
23  
24  
25

1       **16. (currently amended)**     The method as recited in Claim 15,  
2       wherein said ~~second~~ receiving device includes a customer premise  
3       equipment (CPE) device that is operatively configurable for use in a  
4       wireless communication system.

5  
6       **17. (original)**     The method as recited in Claim 16, wherein said CPE  
7       device includes at least one device selected from a group of devices  
8       comprising a computer, a portable computer, a personal digital  
9       assistant (PDA), and a mobile communication device.

10  
11       **18. (currently amended)**     The method as recited in Claim 15,  
12       wherein said at least one ~~first~~ transmitting device receive antenna  
13       includes at least one type of antenna selected from a group of  
14       suitable types of antennas comprising at least one omnidirectional  
15       type of antenna, at least one beam type of antenna, at least one  
16       phased array type of antenna, and at least one adaptive antenna.

17  
18       **19. (currently amended)**     The method as recited in Claim 15,  
19       wherein said ~~first~~ transmitting device is operatively coupled to a  
20       plurality of first device receive antennas.  
21  
22  
23  
24  
25

1       **20. (currently amended)**     The method as recited in Claim 13,  
2       further comprising;

3               receiving said reverse path data signal over at least one  
4       reverse transmission path; and

5               causing said ~~first~~ transmitting device to post equalize at least  
6       a portion of said received reverse path signal.

7  
8       **21. (currently amended)**     The method as recited in Claim 15,  
9       wherein determining said at least one forward path pre-equalization  
10      parameter based on said at least one transmission delay further  
11      includes:

12              determining at least one angle of arrival of said reverse path  
13      data signal with respect to said at least one ~~first~~ transmitting device  
14      receive antenna.

15  
16      **22. (currently amended)**     The method as recited in Claim 15,  
17      further comprising:

18              using at least one ~~second~~ receiving device transmit antenna  
19      operatively coupled to said ~~second~~ receiving device and configured  
20      to transmit said reverse path data signal over said at least one reverse  
21      transmission path to said ~~first~~ transmitting device.

1       23. (currently amended)     The method as recited in Claim 22,  
2       wherein a plurality of ~~second~~ receiving device transmit antennas are  
3       operatively coupled to said ~~second~~ receiving device and configured  
4       to transmit said reverse path data signal over said at least one reverse  
5       transmission path to said ~~first~~ transmitting device.

6  
7       24. (currently amended)     The method as recited in Claim 22,  
8       further comprising:

9               causing said ~~second~~ receiving device to transmit at least two  
10       reverse path data signals over said at least one reverse transmission  
11       path to said ~~first~~ transmitting device.

12  
13       25. (original)     The method as recited in Claim 24, wherein said at  
14       least two reverse path data signals include Orthogonal Frequency-  
15       Division Multiple Access (OFDMA) data.

16  
17       26. (currently amended)     The method as recited in Claim 22,  
18       further comprising:

19               causing said ~~second~~ receiving device to transmit said reverse  
20       path data signal over said at least one reverse transmission path to  
21       said ~~first~~ transmitting device at a bit rate less than about 6 Mbps.

1       **27. (currently amended)**     The method as recited in Claim 22,  
2       further comprising:

3               causing said ~~second~~ receiving device to transmit  
4       corresponding ~~second~~ receiving device transmission power level  
5       information to said ~~first~~ transmitting device; and

6               causing said ~~first~~ transmitting device to adjust at least one  
7       transmission power level associated with said forward path data  
8       signal based on said ~~second~~ receiving device transmission power  
9       level information.

10  
11       **28. (currently amended)**     The method as recited in Claim 13,  
12       further comprising:

13               using at least one ~~first~~ transmitting device transmit antenna  
14       operatively coupled to said ~~first~~ transmitting device to transmit said  
15       modified forward path data signal over at least one forward  
16       transmission path to a ~~second~~ receiving device.

17  
18       **29. (currently amended)**     The method as recited in Claim 28,  
19       wherein said at least one ~~first~~ transmitting device transmit antenna is  
20       operatively configurable to provide transmission diversity when  
21       transmitting said modified forward path data signal.  
22  
23  
24  
25

1       **30. (currently amended)**     The method as recited in Claim 28,  
2       wherein said at least one ~~first~~ transmitting device transmit antenna is  
3       operatively configurable to provide spatial division transmission  
4       when transmitting said modified forward path data signal.

5  
6       **31. (currently amended)**     The method as recited in Claim 28,  
7       wherein said at least one ~~first~~ transmitting device transmit antenna  
8       includes at least one type of antenna selected from a group of  
9       suitable types of antennas comprising at least one omnidirectional  
10      type of antenna, at least one beam type of antenna, at least one  
11      phased array type of antenna, and at least one adaptive antenna.

12  
13      **32. (currently amended)**     The method as recited in Claim 28,  
14      further comprising:

15           setting at least one antenna pointing parameter associated  
16      with said at least one ~~first~~ transmitting device transmit antenna based  
17      on said at least one forward path pre-equalization parameter.

18  
19      **33. (currently amended)**     The method as recited in Claim 28,  
20      further comprising:

21           setting at least one phased array antenna transmission  
22      directing parameter associated with said at least one ~~first~~  
23      transmitting device transmit antenna based on said at least one  
24      forward path pre-equalization parameter.  
25

1  
2 34. (currently amended) The method as recited in Claim 28,  
3 further comprising;

4 selectively transmitting said modified forward path data  
5 signal at one angle with respect to said ~~first~~ transmitting device  
6 transmit antenna.

7  
8 35. (currently amended) The method as recited in Claim 28,  
9 further comprising:

10 selecting said at least one ~~first~~ transmitting device transmit  
11 antenna from a plurality of ~~first~~ transmitting device transmit  
12 antennas that are each operatively coupled to said ~~first~~ transmitting  
13 device.

14  
15 36. (currently amended) The method as recited in Claim 35,  
16 further comprising:

17 selectively transmitting a plurality of beams using two or  
18 more ~~first~~ transmitting device transmit antennas.

19  
20 37. (currently amended) The method as recited in Claim 36,  
21 wherein each of said transmitted plurality of beams is selectively  
22 adjusted in phase and amplitude to reduce multipath affects when  
23 received by said ~~second~~ receiving device.  
24  
25

1       **38. (currently amended)**     The method as recited in Claim 28,  
2       further comprising:

3               using at least one ~~second~~ receiving device receive antenna  
4       operatively coupled to said ~~second~~ receiving device and configured  
5       to receive said modified forward path data signal over said at least  
6       one forward transmission path from said ~~first~~ transmitting device.

7  
8       **39. (currently amended)**     The method as recited in Claim 38,  
9       wherein a plurality of ~~second~~ receiving device receive antennas are  
10      operatively coupled to said ~~second~~ receiving device and configured  
11      to receive said modified forward path data signal over said at least  
12      one forward transmission path from said ~~first~~ transmitting device.

13  
14      **40. (original)**     The method as recited in Claim 1, wherein determining  
15      said at least one forward path pre-equalization parameter based on  
16      said at least one transmission delay further includes:

17              iteratively selectively identifying different forward path  
18      pre-equalization parameters over time to operatively identify and  
19      subsequently ignore aliased multipath delays within said reverse  
20      path data signal.

1       **41. (original)**   The method as recited in Claim 1, wherein determining  
2       said at least one forward path pre-equalization parameter based on  
3       said at least one transmission delay further includes:

4               sub-band equalizing said forward path data signal using  
5       corresponding frequency domain reverse path data.

6  
7       **42. (original)**   The method as recited in Claim 1, wherein modifying  
8       said forward path data signal based on said at least one forward path  
9       pre-equalization parameter further includes:

10              selectively setting different transmission power levels for at  
11       least two Orthogonal Frequency Division Multiplexing (OFDM)  
12       tones in said forward path data signal based on said at least one  
13       forward path pre-equalization parameter.

14  
15       **43. (original)**   A system comprising:

16              a first device operatively configurable to connect to at least a  
17       second device over a wireless communication path, said first device  
18       having logic that is configured to detect a multipath transmission  
19       delay in at least one reverse path data signal transmitted by said  
20       second device, determine at least one forward path pre-equalization  
21       parameter based on said detected multipath transmission delay, and  
22       pre-equalize a forward path data signal that is to be transmitted to  
23       said second device based on said at least one forward path  
24       pre-equalization parameter.  
25

1  
2 **44. (original)** The system as recited in Claim 43, wherein said first  
3 device further comprising:

4 at least one first device antenna; and

5 at least one transceiver operatively coupled to said at least  
6 one first device antenna and said logic, said at least one transceiver  
7 being configurable to receive said reverse path data signal over at  
8 least one reverse transmission path using said at least one first device  
9 antenna and provide said reverse path data signal to said logic, and  
10 transmit said modified forward path data signal from said logic over  
11 at least one forward transmission path.

12  
13 **45. (original)** The system as recited in Claim 43, wherein said  
14 reverse path data signal includes at least one type of data selected  
15 from a group of different types of data comprising Orthogonal  
16 Frequency Division Multiplexing (OFDM) data and Quadrature  
17 Phase Shift Keying (QPSK) data.

18  
19 **46. (original)** The system as recited in Claim 43, wherein said  
20 modified forward path data signal includes at least one type of data  
21 selected from a group of different types of data comprising  
22 Orthogonal Frequency Division Multiplexing (OFDM) data and  
23 Quadrature Phase Shift Keying (QPSK) data.  
24  
25

- 1 47. (original) The system as recited in Claim 46, wherein said  
2 modified forward path data signal includes sub-carrier pre-equalized  
3 OFDM data.
- 4
- 5 48. (original) The system as recited in Claim 47, wherein said logic  
6 is further configured to produce corresponding Quadrature Phase  
7 Shift Keying (QPSK) modulation values based on said sub-carrier  
8 pre-equalized OFDM data.
- 9
- 10 49. (original) The system as recited in Claim 45, wherein said logic  
11 detects said multipath transmission delay by identifying at least one  
12 multipath transmission delay spread that is greater than a guard  
13 interval.
- 14
- 15 50. (original) The system as recited in Claim 43, wherein said  
16 reverse path data signal includes identifiable training data.
- 17
- 18 51. (original) The system as recited in Claim 50, wherein said logic  
19 is further configured to compare said received identifiable training  
20 data to a non-multipath delayed version of said training data to  
21 detect said multipath transmission delay.
- 22
- 23
- 24
- 25

1       **52. (original)**   The system as recited in Claim 44, wherein said logic  
2       is configured to selectively invert and apply a measured channel  
3       response to said forward path data signal to significantly reduce  
4       subsequent induced deleterious channel response changes to said  
5       modified forward path data signal during transmission over said at  
6       least one forward transmission path.

7  
8       **53. (original)**   The system as recited in Claim 44, wherein said at  
9       least one reverse transmission path is substantially reciprocal to said  
10      at least one forward transmission path.

11  
12      **54. (original)**   The system as recited in Claim 43, wherein said first  
13      device includes a base station device that is operatively configurable  
14      for use in a wireless communication system.

15  
16      **55. (original)**   The system as recited in Claim 44, further comprising:  
17                      said second device, in the form of a customer premise  
18      equipment (CPE) device that is operatively configurable for use in a  
19      wireless communication system.

20  
21      **56. (original)**   The system as recited in Claim 55, wherein said CPE  
22      device includes at least one device selected from a group of devices  
23      comprising a computer, a portable computer, a personal digital  
24      assistant (PDA), and a mobile communication device.  
25

- 1 57. (original) The system as recited in Claim 44, wherein said first  
2 device is operatively coupled to a plurality of first device receive  
3 antennas.
- 4
- 5 58. (original) The system as recited in Claim 44, wherein said logic  
6 is configured to post-equalize at least a portion of said received  
7 reverse path signal.
- 8
- 9 59. (original) The system as recited in Claim 44, wherein said logic  
10 is further configured to determine at least one angle of arrival of said  
11 reverse path data signal with respect to said at least one first device  
12 antenna.
- 13
- 14 60. (original) The system as recited in Claim 55, wherein said  
15 second device includes at least one second device antenna that is  
16 operatively configurable to transmit said reverse path data signal  
17 over said at least one reverse transmission path to said first device  
18 and receive said transmitted modified forward path data signal from  
19 said first device over said at least one forward transmission path.
- 20
- 21 61. (original) The system as recited in Claim 60, wherein said  
22 second device includes a plurality of second device antennas that are  
23 operatively configurable to transmit said reverse path data signal  
24 over said at least one reverse transmission path to said first device.  
25

1  
2 62. (original) The system as recited in Claim 60, wherein said  
3 second device is configurable to transmit at least two reverse path  
4 data signals over said at least one reverse transmission path to said  
5 first device.

6  
7 63. (original) The system as recited in Claim 62, wherein said at  
8 least two reverse path data signals include Orthogonal Frequency-  
9 Division Multiple Access (OFDMA) data.

10  
11 64. (original) The system as recited in Claim 60, wherein said  
12 second device is configurable to transmit said reverse path data  
13 signal over said at least one reverse transmission path to said first  
14 device at a bit rate less than about 6 Mbps.

15  
16 65. (original) The system as recited in Claim 60, wherein said  
17 second device is configurable to transmit corresponding second  
18 device transmission power level information to said first device, and  
19 said first device is further configurable to adjust at least one  
20 transmission power level associated with said forward path data  
21 signal based on said second device transmission power level  
22 information.  
23  
24  
25

1 66. (original) The system as recited in Claim 44, wherein said at  
2 least one first device antenna is operatively configurable to provide  
3 transmission diversity when transmitting said modified forward path  
4 data signal.

5  
6 67. (original) The system as recited in Claim 44, wherein said at  
7 least one first device antenna is operatively configurable to provide  
8 spatial division transmission when transmitting said modified  
9 forward path data signal.

10  
11 68. (original) The system as recited in Claim 44, wherein said at  
12 least one first device antenna includes at least one first device  
13 transmit antenna and at least one first device receive antenna.

14  
15 69. (original) The system as recited in Claim 68, wherein said at  
16 least one first device transmit antenna includes at least one type of  
17 antenna selected from a group of suitable types of antennas  
18 comprising at least one omnidirectional type of antenna, at least one  
19 beam type of antenna, at least one phased array type of antenna, and  
20 at least one adaptive antenna.  
21  
22  
23  
24  
25

- 1       70. (original) The system as recited in Claim 68, wherein said at  
2       least one first device receive antenna includes at least one type of  
3       antenna selected from a group of suitable types of antennas  
4       comprising at least one omnidirectional type of antenna, at least one  
5       beam type of antenna, at least one phased array type of antenna, and  
6       at least one adaptive antenna.
- 7
- 8       71. (original) The system as recited in Claim 68, wherein said logic  
9       is further configured to establish at least one antenna pointing  
10      parameter associated with said at least one first device transmit  
11      antenna based on said at least one forward path pre-equalization  
12      parameter.
- 13
- 14      72. (original) The system as recited in Claim 68, wherein said logic  
15      is further configured to establish at least one phased array antenna  
16      transmission directing parameter associated with said at least one  
17      first device transmit antenna based on said at least one forward path  
18      pre-equalization parameter.
- 19
- 20      73. (original) The system as recited in Claim 68, wherein said logic  
21      is further configurable to cause said at least one transceiver to  
22      selectively transmit said modified forward path data signal at one  
23      angle with respect to said at least one first device transmit antenna.
- 24
- 25

1       **74. (original)**   The system as recited in Claim 68, wherein said logic  
2       is further configurable to cause said at least one transceiver to select  
3       said at least one first device transmit antenna from a plurality of first  
4       device transmit antennas that are each operatively coupled to said  
5       first device.

6  
7       **75. (original)**   The system as recited in Claim 74, wherein said logic  
8       is further configurable to cause said at least one transceiver to  
9       selectively transmit a plurality of beams using two or more first  
10      device transmit antennas.

11  
12      **76. (original)**   The system as recited in Claim 75, wherein each of  
13      said transmitted plurality of beams is selectively adjusted in phase  
14      and amplitude to reduce multipath affects when received by said  
15      second device.

16  
17      **77. (original)**   The system as recited in Claim 60, wherein said at  
18      least one second device antenna includes at least one second device  
19      transmit antenna and at least one second device receive antenna.  
20  
21  
22  
23  
24  
25

1 78. (original) The system as recited in Claim 77, wherein said  
2 second device includes a plurality of second device receive antennas  
3 that are configurable to receive said transmitted modified forward  
4 path data signal over said at least one forward transmission path  
5 from said first device.

6  
7 79. (original) The system as recited in Claim 43, wherein said logic  
8 is further configurable to iteratively selectively test different forward  
9 path pre-equalization parameters over time such that aliased  
10 multipath delays within said reverse path data signal are identifiable.

11  
12 80. (original) The system as recited in Claim 43, wherein said logic  
13 is configured to provide sub-band equalizing of said forward path  
14 data signal using corresponding frequency domain reverse path data.

15  
16 81. (original) The system as recited in Claim 43, wherein said logic  
17 is further configurable to cause said transceiver to selectively  
18 establish different transmission power levels for at least two  
19 Orthogonal Frequency Division Multiplexing (OFDM) tones in said  
20 forward path data signal based on said at least one forward path pre-  
21 equalization parameter.

1       **82. (original)**   An apparatus comprising:

2                   an Orthogonal Frequency Division Multiplexing (OFDM)  
3                   processor configured to receive coded data and output corresponding  
4                   OFDM data;

5                   a pre-equalizer operatively coupled to said OFDM processor  
6                   and configured to receive said OFDM data and output pre-equalized  
7                   OFDM data based on gathered reverse link data;

8                   at least one antenna; and

9                   a transceiver operatively coupled to said pre-equalizer and  
10                  said at least one antenna, said transceiver being configured to receive  
11                  said pre-equalized OFDM data from said pre-equalizer and apply a  
12                  corresponding transmittable forward link data signal to said at least  
13                  one antenna.

14  
15       **83. (original)**   The apparatus as recited in Claim 82, wherein said  
16                   transceiver is configurable to receive a transmitted reverse link data  
17                   signal using said at least one antenna and output corresponding  
18                   reverse link data, and further comprising:

19                  reverse link logic operatively coupled to said at least one  
20                  antenna and said operatively coupled to said at least one first device  
21                  antenna, said reverse link logic being configured to detect at least  
22                  one multipath induced delay in said reverse link data and provide  
23                  associated said gathered reverse link data to said pre-equalizer.

1       **84. (original)** The apparatus as recited in Claim 82, wherein said  
2       pre-equalized OFDM data includes sub-carrier pre-equalized OFDM  
3       data.

4  
5       **85. (original)** The apparatus as recited in Claim 82, wherein said  
6       reverse link logic detects said at least one multipath induced delay  
7       by identifying at least one transmission delay spread that is greater  
8       than a guard interval.

9  
10       **86. (original)** The apparatus as recited in Claim 83, wherein said  
11       reverse link data signal includes identifiable training data.

12  
13       **87. (original)** The apparatus as recited in Claim 86, wherein said  
14       reverse link logic is further configured to compare said received  
15       identifiable training data to a non-delayed version of said training  
16       data to detect said at least one transmission delay.

17  
18       **88. (original)** The apparatus as recited in Claim 83, wherein said  
19       pre-equalizer is configured to selectively invert and apply a  
20       measured channel response to said OFDM data.  
21  
22  
23  
24  
25

1 89. (original) The apparatus as recited in Claim 83, wherein a  
2 reverse transmission path carrying said transmitted reverse link data  
3 signal towards said antenna is at least substantially reciprocal to a  
4 forward transmission path carrying said transmittable forward link  
5 data signal away from said at least one antenna.

6  
7 90. (original) The apparatus as recited in Claim 82, wherein said  
8 apparatus includes a base station device suitable for use in a wireless  
9 communication system.

10  
11 91. (original) The apparatus as recited in Claim 82, wherein said at  
12 least one antenna is operatively configurable to provide transmission  
13 diversity.

14  
15 92. (original) The apparatus as recited in Claim 82, wherein said at  
16 least one antenna is operatively configurable to provide spatial  
17 division.

18  
19 93. (original) The apparatus as recited in Claim 82, wherein said at  
20 least one antenna includes at least one transmit antenna and at least  
21 one receive antenna.  
22  
23  
24  
25

1       **94. (original)**   The apparatus as recited in Claim 93, wherein said at  
2       least one transmit antenna includes at least one type of antenna  
3       selected from a group of suitable types of antennas comprising at  
4       least one omnidirectional type of antenna, at least one beam type of  
5       antenna, at least one phased array type of antenna, and at least one  
6       adaptive antenna.

7  
8       **95. (original)**   The apparatus as recited in Claim 93, wherein said at  
9       least one receive antenna includes at least one type of antenna  
10      selected from a group of suitable types of antennas comprising at  
11      least one omnidirectional type of antenna, at least one beam type of  
12      antenna, at least one phased array type of antenna, and at least one  
13      adaptive antenna.

**REMARKS**

Applicant respectfully requests reconsideration and allowance of the subject application. Claims 1-95 are pending, of which claims 1, 13-16, 18-24, and 26-39 have been amended.

**35 U.S.C. §103 Claim Rejections**

**A.** Claims 1, 13-15, 22-25, 28, 43, and 54 are rejected under 35 U.S.C. §103(a) for obviousness over U.S. Patent No. 6,870,515 to Kitchener et al. (hereinafter, "Kitchener"), in view of U.S. Patent Publication No. 2003/0058929 to Cox et al. (hereinafter, "Cox") (*Office Action* p.2).

**B.** Claims 2-3, 16-17, 44, 55-57, 60-62, 68, and 77-78 are rejected under 35 U.S.C. §103(a) for obviousness over Kitchener in view of Cox, and further in view of U.S. Patent Publication No. 2002/0089927 to Fischer et al. (hereinafter, "Fischer") (*Office Action* p.4).

**C.** Claims 4, 25, 45, and 63 are rejected under 35 U.S.C. §103(a) for obviousness over Kitchener in view of Cox, and further in view of U.S. Patent Publication No. 2002/0065047 to Moose (hereinafter, "Moose") (*Office Action* p.7).

**D.** Claims 5-6 and 46-47 are rejected under 35 U.S.C. §103(a) for obviousness over Kitchener in view of Cox, and further in view of U.S. Patent No. 6,377,819 to Gesbert (hereinafter, "Gesbert") (*Office Action* p.8).

**E.** Claims 7 and 48 are rejected under 35 U.S.C. §103(a) for obviousness over Kitchener in view of Cox and Gesbert, and further in view of

1 U.S. Patent Publication No. 2002/0165626 to Hammons, Jr. et al. (hereinafter,  
2 "Hammons") (*Office Action* p.9).

3 F. Claims 8 and 49 are rejected under 35 U.S.C. §103(a) for  
4 obviousness over Kitchener in view of Cox, and further in view of U.S. Patent No.  
5 6,912,247 to Miyashita et al. (hereinafter, "Miyashita") (*Office Action* p.10).

6 G. Claims 9 and 50 are rejected under 35 U.S.C. §103(a) for  
7 obviousness over Kitchener in view of Cox, and further in view of U.S. Patent No.  
8 5,930,267 to Daneshrad et al. (hereinafter, "Daneshrad") (*Office Action* p.11).

9 H. Claims 10 and 51 are rejected under 35 U.S.C. §103(a) for  
10 obviousness over Kitchener in view of Cox and Daneshrad, and further in view of  
11 U.S. Patent No. 6,052,412 to Ruether et al. (hereinafter, "Ruether") (*Office Action*  
12 p.11).

13 I. Claims 11 and 52 are rejected under 35 U.S.C. §103(a) for  
14 obviousness over Kitchener in view of Cox and Fischer, and further in view of  
15 U.S. Patent No. 6,665,308 to Rakib et al. (hereinafter, "Rakib") (*Office Action*  
16 p.12).

17 J. Claims 12, 53, and 67 are rejected under 35 U.S.C. §103(a) for  
18 obviousness over Kitchener in view of Cox and Fischer, and further in view of  
19 U.S. Patent No. 5,648,955 to Jensen et al. (hereinafter, "Jensen") (*Office Action*  
20 p.13).

21 K. Claim 58 is rejected under 35 U.S.C. §103(a) for obviousness over  
22 Kitchener in view of Cox and Fischer, and further in view of U.S. Patent No.  
23 6,741,643 to McGibney (hereinafter, "McGibney") (*Office Action* p.14).

1        L.     Claims 59, 69-70, and 73 are rejected under 35 U.S.C. §103(a) for  
2 obviousness over Kitchener in view of Cox and Fischer, and further in view of  
3 U.S. Patent Publication No. 2005/0143132 to Proctor, Jr. et al. (hereinafter,  
4 "Proctor") (*Office Action* p.15).

5        M.     Claims 65-66 are rejected under 35 U.S.C. §103(a) for obviousness  
6 over Kitchener in view of Cox and Fischer, and further in view of U.S. Patent  
7 Publication No. 2005/0207334 to Hadad (hereinafter, "Hadad") (*Office Action*  
8 p.17).

9        N.     Claim 71 is rejected under 35 U.S.C. §103(a) for obviousness over  
10 Kitchener in view of Cox and Fischer, and further in view of U.S. Patent  
11 Publication No. 2002/0009058 to Kelly et al. (hereinafter, "Kelly") (*Office Action*  
12 p.18).

13        O.     Claim 72 is rejected under 35 U.S.C. §103(a) for obviousness over  
14 Kitchener in view of Cox and Fischer, and further in view of U.S. Patent No.  
15 6,023,242 to Dixon (hereinafter, "Dixon") (*Office Action* p.19).

16        P.     Claims 74-76 are rejected under 35 U.S.C. §103(a) for obviousness  
17 over Kitchener in view of Cox and Fischer, and further in view of U.S. Patent  
18 Publication No. 6,804,312 to Win et al. (hereinafter, "Win") (*Office Action* p.19).

19        Q.     Claims 40 and 79 are rejected under 35 U.S.C. §103(a) for  
20 obviousness over Kitchener in view of Cox, and further in view of U.S. Patent No.  
21 6,314,147 to Liang et al. (hereinafter, "Liang") (*Office Action* p.20).

22        R.     Claims 41 and 80 are rejected under 35 U.S.C. §103(a) for  
23 obviousness over Kitchener in view of Cox, and further in view of U.S. Patent No.  
24 6,868,377 to Laroche (hereinafter, "Laroche") (*Office Action* p.21).

1        S.     Claims 42 and 81 are rejected under 35 U.S.C. §103(a) for  
2 obviousness over Kitchener in view of Cox, and further in view of U.S. Patent  
3 Publication No. 2002/0191540 to Fujii et al. (hereinafter, "Fujii") (*Office Action*  
4 p.22).

5        T.     Claim 20 is rejected under 35 U.S.C. §103(a) for obviousness over  
6 Kitchener in view of Cox, and further in view of McGibney (*Office Action* p.23).

7        U.     Claims 18, 21, 31, and 34 are rejected under 35 U.S.C. §103(a) for  
8 obviousness over Kitchener in view of Cox, and further in view of Proctor (*Office*  
9 *Action* p.23).

10       V.     Claim 26 is rejected under 35 U.S.C. §103(a) for obviousness over  
11 Kitchener in view of Cox, and further in view of Hammons (*Office Action* p.24).

12       W.     Claims 27 and 29 are rejected under 35 U.S.C. §103(a) for  
13 obviousness over Kitchener in view of Cox, and further in view of Hadad (*Office*  
14 *Action* p.24).

15       X.     Claim 30 is rejected under 35 U.S.C. §103(a) for obviousness over  
16 Kitchener in view of Cox, and further in view of Jensen (*Office Action* p.24).

17       Y.     Claim 32 is rejected under 35 U.S.C. §103(a) for obviousness over  
18 Kitchener in view of Cox, and further in view of Kelly (*Office Action* p.24).

19       Z.     Claim 33 is rejected under 35 U.S.C. §103(a) for obviousness over  
20 Kitchener in view of Cox, and further in view of Dixon (*Office Action* p.25).

21       Z1.    Claims 35-39 are rejected under 35 U.S.C. §103(a) for obviousness  
22 over Kitchener in view of Cox, and further in view of Win (*Office Action* p.25).

23       Z2.    Claim 82 is rejected under 35 U.S.C. §103(a) for obviousness over  
24 U.S. Patent Publication No. 2002/0085118 to Harris et al. (hereinafter, "Harris") in  
25

1 view of U.S. Patent No. 6,031,866 to Oler et al. (hereinafter, "Oler") (*Office*  
2 *Action* p.25).

3 **Z3.** Claims 83 and 90 are rejected under 35 U.S.C. §103(a) for  
4 obviousness over Harris in view of Oler, and further in view of Cox (*Office Action*  
5 p.26).

6 **Z4.** Claim 84 is rejected under 35 U.S.C. §103(a) for obviousness over  
7 Harris in view of Oler, and further in view of Gesbert (*Office Action* p.27).

8 **Z5.** Claim 85 is rejected under 35 U.S.C. §103(a) for obviousness over  
9 Harris in view of Oler, and further in view of Miyashita (*Office Action* p.27).

10 **Z6.** Claim 86 is rejected under 35 U.S.C. §103(a) for obviousness over  
11 Harris in view of Oler, and further in view of Daneshrad (*Office Action* p.27).

12 **Z7.** Claim 84 is rejected under 35 U.S.C. §103(a) for obviousness over  
13 Harris in view of Oler, and further in view of Miyashita (*Office Action* p.27).

14 **Z8.** Claim 87 is rejected under 35 U.S.C. §103(a) for obviousness over  
15 Harris in view of Oler, and further in view of Ruether (*Office Action* p.27).

16 **Z9.** Claim 88 is rejected under 35 U.S.C. §103(a) for obviousness over  
17 Harris in view of Oler, and further in view of Ralob (*Office Action* p.28).

18 **Z10.** Claims 89 and 92 are rejected under 35 U.S.C. §103(a) for  
19 obviousness over Harris in view of Oler, and further in view of Jensen (*Office*  
20 *Action* p.28).

21 **Z12.** Claim 91 is rejected under 35 U.S.C. §103(a) for obviousness over  
22 Harris in view of Oler, and further in view of Haded (*Office Action* p.28).

23 **Z13.** Claim 93 is rejected under 35 U.S.C. §103(a) for obviousness over  
24 Harris in view of Oler, and further in view of Kitchener (*Office Action* p.28).

25

1        **Z14.** Claims 94-95 are rejected under 35 U.S.C. §103(a) for obviousness  
2 over Harris in view of Oler, and further in view of Proctor (*Office Action* p.28).  
3 Applicant respectfully traverses the rejections.

4  
5        The Office rejects independent claims 1 and 43 together over the  
6 Kitchener-Cox combination (*Office Action* p.2 ¶s 4-7; p.3 ¶11). Kitchener is only  
7 cited for a first device connected to a second device over a wireless  
8 communication path (*Office Action* p.2; *Kitchener* col.1, lines 17-21; Fig. 1). As  
9 the Office recognizes, Kitchener does not disclose detecting multipath delay and  
10 adjusting for the delay (*Office Action* p.2).

11  
12        **Claim 43** recites a system comprising a first device operatively  
13 configurable to:

14        connect to at least a second device over a wireless communication path,  
15 said first device having logic that is configured to detect a multipath transmission  
16 delay in at least one reverse path data signal transmitted by said second device,

17        determine at least one forward path pre-equalization parameter based on  
18 said detected multipath transmission delay, and

19        pre-equalize a forward path data signal that is to be transmitted to said  
20 second device based on said at least one forward path pre-equalization parameter.

21  
22        The Office cites to Cox ¶[0029] for equalizer parameters that are developed  
23 based on time delays in a transmitted signal and applied to the equalizer (*Office*  
24 *Action* pp.2-3 ¶6). The Office relies entirely on Cox ¶[0029] as a basis to reject all  
25

1 of the features recited in claim 43, other than Kitchener for "a first device  
2 operatively configurable to connect to at least a second device over a wireless  
3 communication path", as recited in claim 43.

4 Applicant disagrees because Cox is clearly directed to only a receiver  
5 device as stated in the title for an *Adaptive Wireless Communication Receiver* and  
6 "for adaptive processing in a communication system receiver" (Cox, Abstract).  
7 Cox describes that an equalizer controller and a signal properties evaluation  
8 module develop equalizer operating parameters by which an equalizer in the  
9 receiver is configured to compensate for time delays introduced in a signal  
10 transmitted over a wireless medium (Cox ¶[0029]; Fig. 4). The signal properties  
11 are evaluated to determine whether the equalizer can enter a power saving mode  
12 when an incoming signal does not need equalization to conserve power, such as in  
13 a receiver that operates on batteries (Cox Abstract; ¶[0082; Fig. 4).

14 Contrary to only the receiver device in Cox that includes the components  
15 for signal property evaluation, Applicant describes and claims that it is the first  
16 device (i.e., transmitting device) which has the "logic that is configured to detect a  
17 multipath transmission delay in at least one reverse path data signal transmitted by  
18 said second device" (i.e., the receiving device), as described in claim 43. Further,  
19 the first device (i.e., transmitting device) determines the path pre-equalization  
20 parameter, and pre-equalizes the forward path data signal "that is to be transmitted  
21 to said second device based on said at least one forward path pre-equalization  
22 parameter", as recited in claim 43.

23 Cox describes only a receiving device that equalizes a received signal,  
24 whereas Applicant describes and claims that a transmitting device detects a  
25

1 multipath transmission delay in a reverse path data signal, determines a forward  
2 path pre-equalization parameter, and pre-equalizes a forward path data signal that  
3 is to be transmitted.

4 The Office also contends that it would have been obvious to modify the  
5 system of Kitchener (a first device connected to a second device over a wireless  
6 communication path) to develop equalizer parameters based on multipath delay as  
7 taught by Cox. Applicant disagrees that the Kitchener-Cox combination provides  
8 a basis to reject the combination of features recited in independent claims 1 and 43  
9 because modifying a receiving device in Kitchener as described by Cox does not  
10 suggest a transmitting device that detects a multipath transmission delay in a  
11 reverse path data signal, determines a forward path pre-equalization parameter,  
12 and pre-equalizes a forward path data signal that is to be transmitted, as recited in  
13 claim 43.

14 Accordingly, claim 43 along with dependent claims 44-81 are allowable  
15 over the Kitchener-Cox combination for at least these reasons and Applicant  
16 requests that the §103 rejection be withdrawn.

17  
18 Claims 44-81 are allowable by virtue of their dependency upon claim 43  
19 (either directly or indirectly) and the §103 rejections should be withdrawn.  
20 Additionally, some or all of claims 44-81 are allowable over the Kitchener-Cox  
21 combination for independent reasons, and are allowable over the additional  
22 combinations of references described above in the rejections A-S because the  
23 additional references do not address the deficiencies of Kitchener and/or Cox as  
24 described above in the response to the rejection of claim 43.  
25

1  
2 **Claim 1** recites a method comprising:

3 identifying at least one multipath transmission delay within a reverse  
4 path data signal received from a receiving device;

5 determining at least one forward path pre-equalization parameter  
6 based on said at least one transmission delay; and

7 modifying a forward path data signal that is to be transmitted to the  
8 receiving device based on said at least one forward path pre-equalization  
9 parameter.  
10

11 As described above in response to the rejection of claim 43, Kitchener  
12 and/or Cox do not teach or suggest the combination of features recited in claim 1.  
13 Specifically, Cox is only directed to a receiving device that equalizes a received  
14 signal and/or conserves power in the receiving device, whereas Applicant  
15 describes and claims identifying a multipath transmission delay within a reverse  
16 path data signal received from a receiving device, determining a forward path  
17 pre-equalization parameter, and modifying a forward path data signal that is to be  
18 transmitted to the receiving device, as recited in claim 1.

19 Accordingly, claim 1 along with dependent claims 2-42 are allowable over  
20 the Kitchener-Cox combination for at least these reasons and Applicant requests  
21 that the §103 rejection be withdrawn.  
22

23 **Claims 2-42** are allowable by virtue of their dependency upon claim 1  
24 (either directly or indirectly) and the §103 rejections should be withdrawn.  
25

1 Additionally, some or all of claims 2-42 are allowable over the Kitchener-Cox  
2 combination for independent reasons, and are allowable over the additional  
3 combinations of references described above in the rejections A-J and Q-Z1  
4 because the additional references do not address the deficiencies of Kitchener  
5 and/or Cox as described above in the response to the rejections of claims 1 and 43.

6  
7 **Claim 82** recites an apparatus comprising:

8 an Orthogonal Frequency Division Multiplexing (OFDM) processor  
9 configured to receive coded data and output corresponding OFDM data;

10 a pre-equalizer operatively coupled to said OFDM processor and  
11 configured to receive said OFDM data and output pre-equalized OFDM  
12 data based on gathered reverse link data;

13 at least one antenna; and

14 a transceiver operatively coupled to said pre-equalizer and said at  
15 least one antenna, said transceiver being configured to receive said  
16 pre-equalized OFDM data from said pre-equalizer and apply a  
17 corresponding transmittable forward link data signal to said at least one  
18 antenna.

19  
20 The Office rejects independent claim 82 over the Harris-Oler combination  
21 (*Office Action* p.25 ¶s 160-164). However, Harris and/or Oler do not teach or  
22 suggest the combination of features recited in claim 82, such as OFDM data that is  
23 pre-equalized based on gathered reverse link data.

1 The Office cites to Harris ¶s [0018] and [0028] for an OFDM processor that  
2 receives coded data and outputs corresponding OFDM data to be transmitted, and  
3 a pre-equalizer coupled to the OFDM processor to receive the OFDM data and  
4 output pre-equalized OFDM data based on gathered reverse link data (*Office*  
5 *Action* p.25). Applicant disagrees because there is no indication in the cited ¶s of  
6 Harris that the OFDM data is pre-equalized based on gathered reverse link data, as  
7 recited in claim 82.

8 Harris only describes “the use of the pre-equalization of the OFDM signal  
9 at the transmitter” for NTSC signal suppression ¶[0018], and that a “receiver  
10 further includes a decoder that decodes the single binary data stream according to  
11 forward error correction coding included in the binary data stream” ¶[0028].  
12 Again, there is no indication in Harris that OFDM data is pre-equalized based on  
13 gathered reverse link data, as recited in claim 82.

14 The Office recognizes that Harris does not describe an antenna, and cites to  
15 Oler col.5, lines 12-32 and Fig. 1 for an antenna and a transceiver (*Office*  
16 *Action* p.26). However, there is no indication in the cited section of Oler that the  
17 transceiver receives pre-equalized OFDM data from a pre-equalizer, as recited in  
18 claim 82. Additionally, Applicant disagrees that Oler would be combined with  
19 Harris because the references are “in the same field of endeavor” as the Office  
20 contends (*Office Action* p.26 ¶163). Harris is directed to embedding an OFDM  
21 modulated data signal into a composite video signal (*Harris Title*), whereas Oler is  
22 directed to a duplex decision feedback equalization system (*Oler Title*). There is  
23 no motivation to combine Oler with Harris to reject the features of claim 82.  
24  
25

1 Accordingly, claim 82 along with dependent claims 83-95 are allowable  
2 over the Harris-Oler combination for at least these reasons and Applicant requests  
3 that the §103 rejection be withdrawn.

4  
5 Claims 83-95 are allowable by virtue of their dependency upon claim 82  
6 (either directly or indirectly) and the §103 rejections should be withdrawn.  
7 Additionally, some or all of claims 83-95 are allowable over the Harris-Oler  
8 combination for independent reasons, and are allowable over the additional  
9 combinations of references described above in the rejections Z3-Z14 because the  
10 additional references do not address the deficiencies of Harris and/or Oler as  
11 described above in the response to the rejection of claim 82.

12  
13 Conclusion

14 Pending claims 1-95 are in condition for allowance and Applicant  
15 respectfully requests issuance of the subject application. If any issues remain that  
16 preclude issuance of the application, the Examiner is urged to contact the  
17 undersigned attorney before issuing a subsequent Action.

18  
19 Respectfully Submitted,

20  
21 Dated: June 13, 2006

|                              | -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address -- |                                           |  |

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

1) ☒ Responsive to communication(s) filed on 25 April 2005.

2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

4) ☒ Claim(s) 1-95 is/are pending in the application.

4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.

6) ☒ Claim(s) 1-95 is/are rejected.

7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.

8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

9) ☐ The specification is objected to by the Examiner.

10) ☒ The drawing(s) filed on 25 April 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
     Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
     Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

    a) ☐ All    b) ☐ Some \* c) ☐ None of:

        1. ☐ Certified copies of the priority documents have been received.

        2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.

        3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

    \* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Drawings***

1. The drawings filed on April 25, 2002 are accepted.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 13-15, 22-25, 28, 43, and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener et al. (US 6,870, 515 B2) in view of Cox et al. (US 2003/0058929 A1).
4. Regarding claim 43, Kitchener discloses a system comprising a first device operatively configured to connect to at least a second device over a wireless communication path (column 1, lines 17-21 and figure 1).
5. However, Kitchener is silent about detecting multipath delay and adjusting for the delay.
6. In the same field of endeavor, however, Cox discloses a system comprising said first device having logic that is configured to detect a multipath transmission delay in at least one reverse path data signal transmitted by said second device, determine at least one forward path pre-equalization parameter based on said detected multipath transmission delay, and pre-equalize a forward path data signal that is to be transmitted to said second device based on said at least one forward path pre-equalization

parameter (paragraph 29, equalizer parameters are developed based on time delays in a transmitted signal and applied to the equalizer).

7. It would have been obvious to one having ordinary skill in the art at the time of the invention to develop equalizer parameters based on multipath delay as taught by Cox in the system of Kitchener because Cox compensates for time delays introduced in a signal transmitted over a wireless medium.

8. As to claim 54, Kitchener is silent about a base station.

9. In the same field of endeavor, however, Cox discloses a system wherein the first device includes a base station device that is operatively configurable for use in a wireless communications system (paragraph 44 and figure 1, a base station and mobile station comprise the communications system).

10. It would have been obvious to one having ordinary skill in the art at the time of the invention to include a base station as taught by Cox in the system of Kitchener because Cox compensates for time delays introduced in a signal transmitted over a wireless medium.

11. As to claims 1 and 13, claims 1 and 13 are method claims corresponding to apparatus claim 1 and recite substantially the same limitations, and therefore are similarly analyzed as apparatus claim 1 above.

12. As to claim 14, claim 14 is a method claim corresponding to apparatus claim 54 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 54 above.

13. As to claim 15, claim 15 is a method claim corresponding to apparatus claim 57 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 57 below.

14. As to claims 22-25, claims 22-25 are method claims corresponding to apparatus claims 60-63 and recite substantially the same limitations, and therefore are similarly analyzed as apparatus claims 60-63 below.

15. As to claim 28, claim 28 is a method claim corresponding to apparatus claim 57 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 57 below.

16. Claims 2-3, 16-17, 44, 55-57, 60-62, 68, and 77-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Fischer et al. (US 2002/0089927 A1).

17. Regarding claim 44, Kitchener is silent about a first device antenna.

18. In the same field of endeavor, however, Fischer discloses a device comprising at least one first device antenna, and at least one transceiver operatively coupled to said at least one first device antenna and said logic, said at least one transceiver being configurable to receive said reverse path data signal over at least one reverse transmission path using at least one first device antenna and provide said reverse path data signal to said logic, and transmit said modified forward path data signal from said logic over at least one forward transmission path. (paragraph 43 and figure 1, elements 103, 104, 112, and 113, the transceiver 103 is coupled to logic 112 and 113 and antenna 104 for transmitting and receiving).

19. It would have been obvious to one having ordinary skill in the art at the time of the invention to use an antenna as taught by Fischer in the system of Kitchener because Fischer implements wireless communication devices that effectively utilize the wireless medium to establish and maintain successful wireless communications for many applications.

20. As to claim 55, Kitchener discloses a system further comprising said second device, in the form of a customer premise equipment (CPE) device that is operatively configurable for use in a wireless communication system (column 11, lines 12-19 and figure 16, element 161).

21. As to claim 56, Kitchener discloses a system wherein said CPE device includes at least one device selected from a group of devices comprising a computer, a portable computer, a personal digital assistant (PDA), and a mobile communication device (column 2, lines 43-47, a PDA, mobile phone, or other device is used).

22. As to claim 57, Kitchener discloses a system wherein said first device is operatively coupled to a plurality of first device receive antennas (column 1, lines 17-20 and figure 1, elements 12 and 13, a plurality of antennas at the receiver).

23. As to claim 60, Kitchener discloses a system wherein said second device includes at least one second device antenna that is operatively configurable to transmit said reverse path data signal over said at least one reverse transmission path to said first device and receive said transmitted modified forward path data signal from said first device over said at least one forward transmission path (paragraph 43 and figure 1,

elements 103, 104, 112, and 113, a transceiver 103 is coupled to logic 112 and 113 and antenna 104 for transmitting and receiving).

24. As to claim 61, Kitchener discloses a system wherein said second device includes a plurality of second device antennas that are operatively configurable to transmit said reverse path data signal over said at least one reverse transmission path to said first device (column 1, lines 17-20 and figure 1, elements 10 and 11, a plurality or antennas at the transmitter).

25. As to claim 62, Kitchener discloses a system wherein said second device is configurable to transmit at least two reverse path data signals over said at least one reverse transmission path to said first device (column 3, lines 17-20, a plurality of beams or signals are transmitted).

26. As to claim 68, Kitchener is discloses a system wherein said at least one first device antenna includes at least one first device transmit antenna and at least one first device receive antenna (column 3, lines 37-45, a device has transmit and receive antenna elements).

27. As to claim 77, Kitchener discloses a system wherein said at least one second device antenna includes at least one second device transmit antenna and at least one second device receive antenna (column 3, lines 37-45, a device has transmit and receive antenna elements).

28. As to claim 78, Kitchener discloses a system wherein said second device includes a plurality of second device antennas that are configurable to receive said transmitted modified forward path data signal over said at least one forward

transmission path from said first device (column 3, lines 37-45, a device has a plurality of receive antenna elements).

29. As to claims 2-3, claims 2-3 are method claims corresponding to apparatus claim 44 and recite substantially the same limitations, and therefore are similarly analyzed as apparatus claim 44 above.

30. As to claims 16-17, claims 16-17 are method claims corresponding to apparatus claims 55-56 and recite substantially the same limitations, and therefore are similarly analyzed as apparatus claims 55-56 above.

31. Claims 4, 25, 45, and 63 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Moose (US 2002/0065047 A1).

32. Regarding claim 45, Kitchener is silent about the type of reverse path data.

33. In the same field of endeavor, however, Moose discloses a system wherein said reverse path data signal includes at least one type of data selected from a group of different data types comprising Orthogonal Frequency Division Multiplexing (OFDM) data and Quadrature Phase Shift Keying (QPSK) data (paragraph 38, OFDM data is used).

34. It would have been obvious to one having ordinary skill in the art at the time of the invention to use OFDM or QPSK data as taught by Moose in the system of Kitchener because Moose readily overcomes signal distortion.

35. As to claim 63, Kitchener is silent about multiple OFDM data signals.

36. In the same field of endeavor, however, Moose discloses a system wherein said at least two reverse path data signals include Orthogonal Frequency-Division Multiple Access (OFDMA) data (paragraph 38, OFDM data is used in multiple signals).

37. It would have been obvious to one having ordinary skill in the art at the time of the invention to use OFDMA data as taught by Moose in the system of Kitchener because Moose readily overcomes signal distortion.

38. As to claim 4, claim 4 is a method claim corresponding to apparatus claim 45 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 45 above.

39. As to claim 25, claim 25 is a method claim corresponding to apparatus claim 63 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 63 above.

40. Claims 5-6 and 46-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Gesbert et al. (US 6,377,819 B1).

41. Regarding claim 46, Kitchener is silent about the types of data included in the forward path signal.

42. In the same field of endeavor, however, Gesbert discloses a system wherein said modified forward path data signal includes at least one type of data selected from a group of different types of data comprising Orthogonal Frequency division Multiplexing (OFDM) data and Quadrature Phase shift Keying (QPSK) data (column 8, lines 44-47, OFDM signals are transmitted).

43. It would have been obvious to one having ordinary skill in the art at the time of the invention to use OFDM or QPSK data as taught by Gesbert in the system of Kitchener because Gesbert allows multiple users to share the same time slot, frequency slot, and code, even in the absence of accurate transmit channel knowledge.

44. As to claim 47, Kitchener is silent about including sub-carrier pre-equalized OFDM data.

45. In the same field of endeavor, however, Gesbert discloses a system wherein said modified forward path data signal includes sub-carrier pre-equalized OFDM data (column 8, lines 44-47, sub-carrier OFDM data is broadcasted).

46. It would have been obvious to one having ordinary skill in the art at the time of the invention to include sub-carrier pre-equalized OFDM data as taught by Gesbert in the system of Kitchener because Gesbert allows multiple users to share the same time slot, frequency slot, and code, even in the absence of accurate transmit channel knowledge.

47. As to claims 5-6, claims 5-6 are method claims corresponding to apparatus claims 46-47 and recite substantially the same limitations, and therefore are similarly analyzed as apparatus claims 46-47 above.

48. Claims 7 and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Gesbert and further in view of Hammons, JR, et al. (US 2002/0165626 A1).

49. Regarding claim 48, Kitchener is silent about producing QPSK values.

50. In the same field of endeavor, however, Hammons discloses a system wherein said logic is further configured to produce corresponding Quadrature Phase Shift Keying (QPSK) modulation values based on said sub-carrier pre-equalized OFDM data (paragraph 104, OFDM with QPSK sub-carrier modulation is utilized).

51. It would have been obvious to one having ordinary skill in the art at the time of the invention to produce QPSK modulation values as taught by Hammons in the system of Kitchener because Hammons enhances system reliability and throughput in a multiple antenna system.

52. As to claim 7, claim 7 is a method claim corresponding to apparatus claim 48 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 48 above.

53. Claims 8 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Miyashita et al. (US 6,912,247 B2).

54. Regarding claim 49, Kitchener is silent about identifying delay.

55. In the same field of endeavor, however, Miyashita discloses a system wherein said logic detects said multipath transmission delay by identifying at least one multipath transmission delay spread that is greater than a guard interval (column 7, lines 22-24).

56. It would have been obvious to one having ordinary skill in the art at the time of the invention to detect delay as taught by Miyashita in the system of Kitchener because Miyashita removes signal defects and makes it easy to maintain high quality data transmission.

57. As to claim 8, claim 8 is a method claim corresponding to apparatus claim 49 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 49 above.

58. Claims 9 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Daneshrad et al. (US 5,930,267).

59. Regarding claim 50, Kitchener is silent about the use of training data.

60. In the same field of endeavor, however, Daneshrad discloses a system wherein said reverse path data signal includes identifiable training data (column 2, lines 52-57, training data is received).

61. It would have been obvious to one having ordinary skill in the art at the time of the invention to use training data as taught by Daneshrad in the system of Kitchener because Daneshrad reduces the total amount of time require to transmit synchronization information.

62. As to claim 9, claim 9 is a method claim corresponding to apparatus claim 50 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 50 above.

63. Claims 10 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable Kitchener in view of Cox and Daneshrad and further in view of Ruether et al. (US 6,052,412).

64. Regarding claim 51, Kitchener is silent about comparing the received training data to a non-delayed version.

65. In the same field of endeavor, however, Ruether discloses a system wherein said logic is further configured to compare said received identifiable training data to a non-multipath delayed version of said training data to detect said multipath transmission delay (column 8, lines 27-33).

66. It would have been obvious to one having ordinary skill in the art at the time of the invention to compare the received training data as taught by Ruether in the system of Kitchener because Ruether is capable of supporting voice, conventional modem, and PCM modem communications.

67. As to claim 10, claim 10 is a method claim corresponding to apparatus claim 51 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 51 above.

68. Claims 11 and 52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of Rakib et al. (US 6,665,308 B1).

69. Regarding claim 52, Kitchener is silent about inverting and applying a measured channel response.

70. In the same field of endeavor, however, Rakib discloses a system wherein said logic is configured to selectively invert and apply a measured channel response to said forward path data signal to significantly reduce subsequent induced deleterious channel response changes to said modified forward path data signal during transmission over said at least one forward transmission path (column 8, lines 64-67).

71. It would have been obvious to one having ordinary skill in the art at the time of the invention to invert and apply a channel response as taught by Rakib in the system of Kitchener because Rakib predistorts the transmitted signal so that it arrives undistorted.

72. As to claim 11, claim 11 is a method claim corresponding to apparatus claim 52 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 52 above.

73. Claims 12, 53, and 67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of Jensen et al. (US 5,648,955).

74. Regarding claim 53, Kitchener is silent about the reverse and forward transmission paths being reciprocal.

75. In the same field of endeavor, however, Jensen discloses a system wherein said at least one reverse transmission path is substantially reciprocal to said at least one forward transmission path (column 11, lines 28-40, paths between the base station and user station are reciprocal).

76. It would have been obvious to one having ordinary skill in the art at the time of the invention to utilize reciprocal paths as taught by Jensen in the system of Kitchener because Jensen provides a simple and flexible over-air protocol for use with a mobile telephone system.

77. Regarding claim 67, Kitchener is silent about providing spatial division transmission.

78. In the same field of endeavor, however, Jensen discloses a system wherein said at least one first device antenna is operatively configurable to provide spatial division transmission when transmitting said modified forward path data signal column 11, lines 34-40, spatial diversity antennas are used at the base station).

79. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide spatial division transmission as taught by Jensen in the system of Kitchener because Jensen provides a simple and flexible over-air protocol for use with a mobile telephone system.

80. As to claim 12, claim 12 is a method claim corresponding to apparatus claim 53 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 53 above.

81. Claim 58 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of McGibney (US 6,741,643 B1).

82. Regarding claim 58, Kitchener is silent about post-equalization.

83. In the same field of endeavor, however, McGibney discloses a system wherein said logic is configured to post-equalize at least a portion of said received reverse path signal (abstract, post-equalization is used).

84. It would have been obvious to one having ordinary skill in the art at the time of the invention to post-equalize the reverse path signal as taught by McGibney in the system of Kitchener because McGibney reduces the effects of frequency selective multipath fading.

85. Claims 59, 69, 70 and 73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of Proctor, JR. et al. (US 2005/0143132 A1).

86. Regarding claim 59, Kitchener is silent about determining the angle of arrival.

87. In the same field of endeavor, however, Proctor discloses a system wherein said logic is further configured to determine at least one angle of arrival of said reverse path data signal with respect to said at least one first device antenna (paragraph 69, an angle of arrival calculation is performed).

88. It would have been obvious to one having ordinary skill in the art at the time of the invention to determine the angle of arrival as taught by Proctor in the system of Kitchener because Proctor provides an inexpensive antenna apparatus for use with a mobile subscriber unit.

89. As to claim 69, Kitchener is silent about the type of transmit antenna used.

90. In the same field of endeavor, however, Proctor discloses a system wherein said at least one first device transmit antenna includes at least one type of antenna selected from a group of suitable types of antennas comprising at least one omnidirectional type of antenna, at least one beam type of antenna, and at least one adaptive antenna (paragraphs 1, 4, 5, and 19, adaptive, omnidirectional, and beam antennas are used).

91. It would have been obvious to one having ordinary skill in the art at the time of the invention to use the type of antenna taught by Proctor in the system of Kitchener because Proctor provides an inexpensive antenna apparatus for use with a mobile subscriber unit.

92. As to claim 70, Kitchener is silent about the type of receive antenna used.

93. In the same field of endeavor, however, Proctor discloses a system wherein said at least one first device receive antenna includes at least one type of antenna selected from a group of suitable types of antennas comprising at least one omnidirectional type of antenna, at least one beam type of antenna, and at least one adaptive antenna (paragraphs 1, 4, 5, and 19, adaptive, omnidirectional, and beam antennas are used).

94. It would have been obvious to one having ordinary skill in the art at the time of the invention to use the type of antenna taught by Proctor in the system of Kitchener because Procotor provides an inexpensive antenna apparatus for use with a mobile subscriber unit.

95. Regarding claim 73, Kitchener is silent about selecting the angle of transmission.

96. In the same field of endeavor, however, Procotor discloses a system wherein said logic is further configurable to cause said at least one transceiver to selectively transmit said modified forward path data signal at one angle with respect to said at least one first device transmit antenna (paragraph 17, the transmit antenna angle is selected based on scanning data).

97. It would have been obvious to one having ordinary skill in the art at the time of the invention to select the angle of transmission as taught by Proctor in the system of Kitchener because Procotor provides an inexpensive antenna apparatus for use with a mobile subscriber unit.

98. Claim 64 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of Hammons.

99. Regarding claim 64, Kitchener is silent about the bit rate of transmission.

100. In the same field of endeavor, however, Hammons discloses a system wherein said second device is configurable to transmit said reverse path data signal over said at least one reverse transmission path to said first device at a bit rate less than about 6 Mbps (paragraph 87, transmit antennas transmit at a rate of 1 bps).

101. It would have been obvious to one having ordinary skill in the art at the time of the invention to transmit at less than 6 Mbps as taught by Hammons in the system of Kitchener because Hammons enhances system reliability and throughput in a multiple antenna system.

102. Claims 65-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of Hadad (US 2005/0207334 A1).

103. Regarding claim 65, Kitchener is silent about transmitting power level information for adjusting the power level.

104. In the same field of endeavor, however, Hadad discloses a system wherein said second device is configurable to transmit corresponding second device transmission power level information to said first device, and said first device is further configurable to adjust at least one transmission power level associated with said forward path data signal based on said second device transmission power level information paragraph 264, the Subscriber Unit sends power adjustment values to the base station, which makes power adjustments based on the received values).

105. It would have been obvious to one having ordinary skill in the art at the time of the invention to adjust the power level as taught by Hadad in the system of Kitchener because Haded provides superior performance achieved at lower phase noise.

106. As to claim 66, Kitchener is silent about providing transmission diversity.

107. In the same field of endeavor, however, Hadad discloses a system wherein said at least one first device antenna is operatively configurable to provide transmission diversity when transmitting said modified forward path data signal (paragraph 41).

108. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide transmission diversity as taught by Hadad in the system of Kitchener because Haded provides superior performance achieved at lower phase noise.

109. Claim 71 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of Kelly et al. (US 2002/0009058 A1).

110. Regarding claim 71, Kitchener is silent about establishing an antenna pointing parameter.

111. In the same field of endeavor, however, Kelly discloses a system wherein said logic is further configured to establish at least one antenna pointing parameter associated with said at least one first device transmit antenna based on said at least one forward path pre-equalization parameter (paragraph 212, an antenna pointing parameter is established based on configuration parameters).

112. It would have been obvious to one having ordinary skill in the art at the time of the invention to utilize a pointing parameter as taught by Kelly in the system of Kitchener because Kelly provides an improved approach for providing access to the Internet over a satellite communication system.

113. Claim 72 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of Dixon (US 6,023,242).

114. Regarding claim 72, Kitchener is silent about an antenna directing parameter.

115. In the same field of endeavor, however, Dixon discloses a system wherein said logic is further configured to establish at least one phased array antenna transmission directing parameter associated with said at least one first device transmit antenna based on said at least one forward path pre-equalization parameter (column 25, lines 21-34, phased array antenna steering parameters direct the antenna to the desired position).

116. It would have been obvious to one having ordinary skill in the art at the time of the invention to utilize an antenna directing parameter as taught by Dixon in the system of Kitchener because Dixon facilitates communication between a person located in a remote area and a head office.

117. Claims 74-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and Fischer and further in view of Win et al. (US 6,804,312 B1).

118. Regarding claim 74, Kitchener is silent about selecting a transmit antenna.

119. In the same field of endeavor, however, Win discloses a system wherein said logic is further configurable to cause said at least one transceiver to select said at least one first device transmit antenna from a plurality of first device transmit antennas that are each operatively coupled to said first device (column 8, lines 38-43, a subset of antennas is selected from a plurality of transmit antennas).

120. It would have been obvious to one having ordinary skill in the art at the time of the invention to select an antenna or antennas as taught by Win in the system of Kitchener because Win provides an advantageous signal-to-noise ratio.

121. As to claim 75, Kitchener discloses a system wherein said logic is further configurable to cause said at least one transceiver to selectively transmit a plurality of beams using two or more first device transmit antennas (column 3, lines 17-20, a plurality of beams or signals are selected and transmitted).

122. As to claim 76, Kitchener is silent about adjusting the phase and amplitude of transmitted beams.

123. In the same field of endeavor, however, Win discloses a system wherein each of said transmitted plurality of beams is selectively adjusted in phase and amplitude to reduce multipath effects when received by said second device (column 8, lines 61-67).

124. It would have been obvious to one having ordinary skill in the art at the time of the invention to adjust the phase and amplitude of transmitted beams as taught by Win in the system of Kitchener because Win provides an advantageous signal-to-noise ratio.

125. Claims 40 and 79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Liang et al. (US 6,314,147 B1).

126. Regarding claim 79, Kitchener is silent about testing the pre-equalization parameters.

127. In the same field of endeavor, however, Liang discloses a system wherein said logic is further configurable to iteratively selectively test different forward path pre-equalization parameters over time such that aliased multipath delays within said reverse path data signal are identifiable (column 10, lines 36-38, testing for multipath delay is performed).

128. It would have been obvious to one having ordinary skill in the art at the time of the invention to selectively test the pre-equalization parameters as taught by Liang in the system of Kitchener because Liang provides improved symbol estimation in the presence of Cci, ISI, and noise.

129. As to claim 40, claim 40 is a method claim corresponding to apparatus claim 79 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 79 above.

130. Claims 41 and 80 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Laroche (US 6,868,377 B1).

131. Regarding claim 80, Kitchener is silent about sub-band equalizing the forward path signal.

132. In the same field of endeavor, however, Laroche discloses a system wherein said logic is configured to provide sub-band equalizing of said forward path data signal using corresponding frequency domain reverse path data (column 3, lines 23-26).

133. It would have been obvious to one having ordinary skill in the art at the time of the invention to sub-band equalize as taught by Laroche in the system of Kitchener because Laroche inexpensively and efficiently processes audio and speech signals.

134. As to claim 41, claim 41 is a method claim corresponding to apparatus claim 80 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 80 above.

135. Claims 42 and 81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Fujii et al. (US 2002/0191540 A1).

136. Regarding claim 81, Kitchener is silent about establishing different transmission power levels.

137. In the same field of endeavor, however, Fujii discloses a system wherein said logic is further configurable to cause said transceiver to selectively establish different transmission power levels for at least two Orthogonal Frequency Division Multiplexing (OFDM) tones in said forward path data signal based on said at least one forward path pre-equalization parameter (paragraph 57, and equalization coefficient or parameter is used to adjust the power control for OFDM tones).

138. It would have been obvious to one having ordinary skill in the art at the time of the invention to establish different power levels as taught by Fujii in the system of Kitchener because Fujii efficiently performs communications between nodes by using a transmission medium that the communication qualities change.

139. As to claim 42, claim 42 is a method claim corresponding to apparatus claim 81 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 81 above.

140. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of McGibney.

141. Regarding claim 20, claim 20 is a method claim corresponding to apparatus claim 58 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 58 above.

142. Claims 18, 21, 31, and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Proctor.

143. Regarding claim 18, claim 18 is a method claim corresponding to apparatus claim 70 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 70 above.

144. Regarding claim 21, claim 21 is a method claim corresponding to apparatus claim 59 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 59 above.

145. Regarding claim 31, claim 31 is a method claim corresponding to apparatus claim 69 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 69 above.

146. Regarding claim 34, claim 34 is a method claim corresponding to apparatus claim 73 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 73 above.

147. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Hammons.

148. Regarding claim 26, claim 26 is a method claim corresponding to apparatus claim 64 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 64 above.

149. Claims 27 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Haded.

150. Regarding claim 27, claim 27 is a method claim corresponding to apparatus claim 65 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 65 above.

151. Regarding claim 29, claim 29 is a method claim corresponding to apparatus claim 66 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 66 above.

152. Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Jensen.

153. Regarding claim 30, claim 30 is a method claim corresponding to apparatus claim 67 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 67 above.

154. Claim 32 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Kelly.

155. Regarding claim 32, claim 32 is a method claim corresponding to apparatus claim 71 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 71 above.

156. Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Dixon.

157. Regarding claim 33, claim 33 is a method claim corresponding to apparatus claim 72 and recites substantially the same limitations, and therefore is similarly analyzed as apparatus claim 72 above.

158. Claims 35-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitchener in view of Cox and further in view of Win.

159. Regarding claims 35-39, claims 35-39 are method claims corresponding to apparatus claims 74-76 and recite substantially the same limitations, and therefore are similarly analyzed as apparatus claims 74-78 above.

160. Claim 82 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harris et al. (US 2002/0085118 A1) in view of Oler et al. (US 6,031,866).

161. Regarding claim 82, Harris discloses an apparatus comprising:

an Orthogonal Frequency division Multiplexing (OFDM) processor configured to receive coded data and output corresponding OFDM data (paragraph 28, received data is decoded, and paragraph 18, OFDM data is transmitted);

a pre-equalizer operatively coupled to said OFDM processor and configured to receive said OFDM data and output pre-equalized OFDM data based on gathered reverse link data (paragraph 18, the OFDM signal is pre-equalized at the transmitter);

162. However, Harris is silent about the presence of an antenna.

163. In the same field of endeavor, however, Oler discloses an apparatus comprising:

at least one antenna (figure 1, element 20); and

a transceiver operatively coupled to said pre-equalizer and said at least one antenna, said transceiver being configured to receive said pre-equalized OFDM data from said pre-equalizer and apply a corresponding transmittable forward link data signal to said at least one antenna (figure 1, elements 10, 16, and 20 and column 5, lines 12-32).

164. It would have been obvious to one having ordinary skill in the art at the time of the invention to utilize an antenna as taught by Oler in the apparatus of Harris because Oler minimizes the overall complexity of equalization.

165. Claims 83 and 90 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Cox.

166. Regarding claim 83, Harris is silent about detecting delay.

167. In the same field of endeavor, however, Cox discloses an apparatus wherein said transceiver is configurable to receive a transmitted reverse link data signal using said at least one antenna and output corresponding reverse link data, and further comprising:

reverse link logic operatively coupled to said at least one antenna and said operatively coupled to at least one first device antenna, said reverse link logic being configured to detect at least one multipath induced delay in said reverse link data and provide associated said gathered reverse link data to said pre-equalizer (paragraph 29,

signal characteristics such as delay are determined and sent to a stage prior to equalization where parameters are developed based on the characteristics).

168. It would have been obvious to one having ordinary skill in the art at the time of the invention to apply delays to a pre-equalizer as taught by Cox in the system of Harris because Cox compensates for time delays introduced in a signal transmitted over a wireless medium.

169. As to claim 90, claim 90 recites substantially the same limitations as claim 54, and therefore is similarly analyzed as claim 54 above.

170. Claim 84 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Gesbert.

171. Regarding claim 84, claim 84 recites substantially the same limitations as claim 47, and therefore is similarly analyzed as claim 47 above.

172. Claim 85 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Miyashita.

173. Regarding claim 85, claim 85 recites substantially the same limitations as claim 49, and therefore is similarly analyzed as claim 49 above.

174. Claim 86 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Daneshrad.

175. Regarding claim 86, claim 86 recites substantially the same limitations as claim 50, and therefore is similarly analyzed as claim 50 above.

176. Claim 87 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and Daneshrad and further in view of Ruether.

177. Regarding claim 87, claim 87 recites substantially the same limitations as claim 51, and therefore is similarly analyzed as claim 51 above.

178. Claim 88 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Rakib.

179. Regarding claim 88, claim 88 recites substantially the same limitations as claim 52, and therefore is similarly analyzed as claim 52 above.

180. Claims 89 and 92 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Jensen.

181. Regarding claim 89, claim 89 recites substantially the same limitations as claim 53, and therefore is similarly analyzed as claim 53 above.

182. As to claim 92, claim 92 recites substantially the same limitations as claim 67, and therefore is similarly analyzed as claim 67 above.

183. Claim 91 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Haded.

184. Regarding claim 91, claim 91 recites substantially the same limitations as claim 66, and therefore is similarly analyzed as claim 66 above.

185. Claim 93 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Kitchener.

186. Regarding claim 93, claim 93 recites substantially the same limitations as claim 68, and therefore is similarly analyzed as claim 68 above.

187. Claims 94 and 95 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Oler and further in view of Proctor.

188. Regarding claims 94-95, claims 94-95 recite substantially the same limitations as claims 69-70, and therefore are similarly analyzed as claims 69-70 above.

***Other Prior Art Cited***

189. The prior art made of record and not relied upon is considered pertinent to the applicant's disclosure.

190. Mosebrook et al. (US 5,848,054) discloses a system providing spatial division transmission.

191. Sevaston (US 6,567,040 B1) discloses a system having a phased array antenna transmission directing parameter.

192. Agee et al. (US 2004/0095907 A1) discloses a system which selects a transmit antenna from a plurality of antennas and selectively adjusts a transmitted plurality of beams in phase and amplitude.

193. Schultz (US 6,611,511 B1) discloses a system comprising a phased array type antenna.

194. Kohno et al. (US 6,763,062 B1) discloses a system that selectively adjusts a transmitted plurality of beams in phase and amplitude.

195. Chen et al. (US 2004/0184521 A1) discloses a system wherein received training data is compared to non-delayed training data.

***Contact Information***

196. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Caroline Angelo whose telephone number is 571-272-

8730. The examiner can normally be reached on 8 am - 4:30 pm Monday through Friday.

197. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

198. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

CJA

A handwritten signature in black ink, appearing to read "Jay K. Patel". The signature is fluid and cursive, with a horizontal line extending from the "J" and a stylized "Patel" following.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  | |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  | |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  | |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  | |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |   |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  | |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  | |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  | |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  | |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |   |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  | |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  | |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  | |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  | |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |   |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  | |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |         |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |       |          |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  | |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |   |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |    |  |  |  |  |  |  |  |  |  |     |  |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |  |  |  |  |  |  |  |       |  |      |  |  |  |  |  |
