**DECLARATION OF SYLVIA HALL-ELLIS, PH.D.,
UNDER 37 C.F.R § 1.68**

IPR2024-00136
Petitioners' Ex. 1004
Ex.1004.00001

I. INTRODUCTION

1. My name is Sylvia D. Hall-Ellis. I have been retained as an expert on behalf of T-Mobile USA, Inc., AT&T Corp., AT&T Mobility LLC, AT&T Services, Inc., Cellco Partnership d/b/a Verizon Wireless, Nokia of America Corporation, and Ericsson, Inc. (“Petitioners”).

2. I have written this Declaration on behalf of Petitioners to provide my expert opinion regarding the authenticity and public availability of *LTE – The UMTS Long Term Evolution: From Theory to Practice* by Stefania Sesia, Issam Toufik, and Matthew Baker (“Sesia”). My Declaration sets forth my opinions in detail and provides the basis for my opinions regarding the public availability of Sesia.

3. I reserve the right to supplement or amend my opinions, and basis for them, in response to any additional evidence, testimony, discovery, argument, and/or other additional information that may be provided to me after the date of this Declaration.

4. I am being compensated for my time spent working on this matter at my normal consulting rate of \$350 per hour, plus reimbursement for any additional reasonable expenses. My compensation is not in any way tied to the content of this Declaration, the substance of my opinions, or the outcome of this litigation. I have no other interests in this proceeding or with any of the parties.

5. All of the materials that I considered are discussed explicitly in this Declaration.

II. QUALIFICATIONS

6. I am currently an Adjunct Professor in the School of Information at San José State University. I obtained a Master of Library Science from the University of North Texas in 1972 and a Ph.D. in Library Science from the University of Pittsburgh in 1985. Over the last 50-plus years, I have held various positions in the field of library and information resources. I was first employed as a librarian in 1966 and have been involved in the field of library sciences since, holding numerous positions.

7. I am a member of the American Library Association (ALA) and its Association for Library Collections & Technical Services (ALCTS) Division, and I served on the Committee on Cataloging: Resource and Description (which wrote the new cataloging rules) and as the chair of the Committee for Education and Training of Catalogers and the Competencies and Education for a Career in Cataloging Interest Group. I also served as the Chair of the ALCTS Division's Task Force on Competencies and Education for a Career in Cataloging. Additionally, I have served as the Chair for the ALA Office of Diversity's Committee on Diversity, as a member of the REFORMA National Board of Directors, as a member of the Editorial Board for the ALCTS premier cataloging journal, *Library Resources and Technical*

Services, as a Co-Chair of the Library Research Round Table (LRRT) for the American Library Association, and as a member of the LRRT Nominating Committee.

8. I have also given over one hundred presentations in the field, including several on library cataloging systems and Machine-Readable Cataloging (“MARC”) standards. My current research interests include library cataloging systems, metadata, and organization of electronic resources.

9. My full curriculum vitae is attached hereto as Attachment 1A.

III. PRELIMINARIES

10. *Scope of this Declaration.* I am not an attorney and will not offer opinions on the law. I am, however, rendering my expert opinion on the authenticity of the documents referenced herein and on when and how each of these documents was disseminated or otherwise made available to the extent that persons interested and ordinarily skilled in the subject matter or art, exercising reasonable diligence, could have located the documents before on or around the listed dates of their respective publications below.

11. I am informed by counsel that a publication in a printed, electronic, or other version qualifies as publicly accessible as of the date it was disseminated or otherwise made available such that a person interested in and ordinarily skilled in the relevant subject matter could locate it through the exercise of reasonable

diligence. I understand that the determination of public accessibility rests on a case-by-case analysis of the facts particular to an individual publication. I am further informed by counsel that the following five factors can be considered to determine whether a work is publicly available as of a given date: (a) the breadth of dissemination of the work; (b) whether the material is addressed to or of interest to a POSITA; (c) how widely the work was disseminated; (d) for how long the reference was disseminated or available; and, (e) whether the information was disseminated publicly with no expectation of confidentiality.

12. *Persons of ordinary skill in the art.* I am told by counsel that the subject matter of this proceeding generally relates to wireless communications systems.

13. I have been informed by counsel that a “person of ordinary skill in the art at the time of the inventions” is a hypothetical person who is presumed to be familiar with the relevant field and its literature at the time of the inventions. This hypothetical person is also a person of ordinary creativity, capable of understanding the scientific principles applicable to the pertinent field.

14. I am told by counsel that persons of ordinary skill in this subject matter or art would have had at least a Bachelor’s degree in electrical engineering, computer engineering, computer science, physics, or the equivalent, and at least two years of experience working in the field. Relevant working experience would include experience with cellular telecommunications and networking, radio-access network

architectures, protocols, and signal propagation in wireless networks. Additional graduate education could substitute for professional experience, or significant experience in the field could substitute for formal education.

15. It is my opinion that such a person would have been engaged in research, learning through study and practice in the field and possibly through formal instruction the bibliographic resources relevant to his or her research. In the 2011 timeframe, such a person would have had access to a vast array of long-established print and electronic resources in the area of wireless communications systems.

IV. DOCUMENT 1: EXHIBIT 1003 (“SESIA”)

16. Exhibit 1003 is a true and correct copy of the electronic book titled *LTE – The UMTS Long Term Evolution: From Theory to Practice*, 2nd edition, edited by Stefania Sesia, Issam Toufik, and Matthew Baker (“Sesia”) and issued by John Wiley and Sons with a 2011 copyright date. The text of Exhibit 1003 is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. In preparing my Declaration, I reviewed 106 sections from 13 chapters which appear on 107 pages in the Sesia book (*see* Attachment 1B for a complete listing). Exhibit 1003 was found within the custody of a library – a place where, if authentic, a copy of this book would likely be. I further note that the copyright page on Exhibit 1003 lists all four ISBN numbers for the Sesia textbook, including the print, ePDF, oBook, and

epub versions. Ex. 1003 at iv. The presence of all four ISBNs indicates to me that all versions of the Sesia textbook share the same content. Exhibit 1003 is a true and correct copy in a condition that creates no suspicion about its authenticity.

17. Attached hereto as Attachment 1C is a true and correct copy of the MARC record for this electronic book from the King Library at San José State University (San José, California).¹ I personally identified and retrieved the library catalog record (*see* Attachment 1C). Attachment 1C and the online book bear International Standard Books Number (ISBN) 978-0-470-97850-4 on the copyright page which is identical to the ISBN for the online version of the book listed on the publisher's website. The publisher's website indicates that the Sesia book was published on July 22, 2011² (*see* Ex. 1013).

18. John Wiley & Sons is an American multinational publisher that was established in 1807 in Manhattan. The firm produces books, journals, and encyclopedias, in print and electronic versions, as well as online products and services, training materials, and educational materials for undergraduate, graduate,

and continuing education students.³ The Scientific, Technical, Medical, and Scholarly division (known as Wiley-Blackwell), publishes, in print and online, 1,600 scholarly peer-reviewed journals and an extensive collection of books, reference works, databases, and laboratory manuals in the life and physical sciences, medicine and allied health, engineering, the humanities, and the social sciences. The subscription-based Wiley Online Library delivers access to over 4 million articles from 1,600 journals, more than 22,000 books, and hundreds of reference works, laboratory protocols, and databases from John Wiley & Sons and its imprints. The Sesia book is part of the Wiley Online Library, where it is listed as being first published July 22, 2011.

19. Furthermore, the metadata for Exhibit 1003 further supports that Sesia was published at least by July 22, 2011, and that it is an authentic copy. For example, the metadata for Exhibit 1003 (provided as a screenshot below) states that the document was document was created on July 13, 2011, and that the date of the metadata is July 19, 2011, as shown in the “xmp:ModifyDate” and “xmp:CreateDate” below.

³ [https://en.wikipedia.org/wiki/Wiley_\(publisher\)](https://en.wikipedia.org/wiki/Wiley_(publisher))

Figure A – Screenshot of Ex. 1003 Metadata.

20. In addition, the Wiley Online Library provides the Digital Object Identifier (DOI) for Sesia, which is 10.1002/9780470978504. When one inputs this DOI number into doi.org, they are redirected to the Wiley Online Library’s webpage for Sesia. A DOI number is an identifier regularly relied upon by librarians. It is defined by ISO 26324 and is used for identifying documents, especially academic papers. The International DOI Foundation, which is a well-known non-profit whose website is www.doi.org, manages the DOI system. The DOI system allows any member of the public to enter a DOI identifier to retrieve the object (usually a website URL) attached to the identifier. Furthermore, a DOE can be registered with a third-party registration agency. For Sesia, its DOI is registered with CrossRef, a registration agency, a non-profit organization that allows members to “create metadata records that identify, describe, and locate their work.” <https://www.crossref.org/membership/>. According to CrossRef, Sesia’s DOI is for an “EDITED BOOK published 22 July 2011.” (quoting https://search.crossref.org/?from_ui=yes&q=10.1002%2F9780470978504). This

further supports that Sesia was publicly available at least by July 22, 2011.

21. Therefore, it is my opinion that the Sesia book was publicly available at latest by July 22, 2011, and meets the five criteria outlined above (§11): (1) the Sesia book was listed on the Wiley Online Library website that is available worldwide through the Internet; (2) the content is addressed to or of interest to a POSITA as identified above (§§12-15); (3) the book was disseminated globally; (4) the Sesia book continues to be available through various retailers and the Wiley Online Library; and, (5) there was no expectation that the book would be kept confidential when it was published.

V. SUMMARY OF OPINIONS

22. In view of the foregoing, it is my opinion that Sesia was publicly available no later than the corresponding date listed in the table below:

Exhibit	Publication	Publicly Available No Later Than
1003	<i>LTE – The UMTS Long Term Evolution: From Theory to Practice</i> . 2nd ed. Edited by Stefania Sesia, Issam Toufik, and Matthew Baker. Chichester, United Kingdom: Wiley, c2011.	July 22, 2011

23. In signing this Declaration, I recognize that the Declaration will be filed as evidence in a case before the Patent Trial and Appeal Board of the United States Patent and Trademark Office. I also recognize that I may be subject to cross-examination in the case and that cross-examination will take place within the United States. If cross-examination is required of me, I will appear for cross-examination

within the United States during the time allotted for cross-examination.

24. I hereby declare that all statements made of my own knowledge are true and that all statements made on information and belief are believed to be true. I further declare that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of the Title 18 of the United States Code and that such willful false statements may jeopardize the validity of this proceeding.

 520 ##\$a""Where this book is exceptional is that the reader will
 not just learn how LTE works but why it works" Adrian Scrase, ETSI
 Vice-President, International Partnership Projects Following on the
 success of the first edition, this book is fully updated, covering
 the latest additions to LTE and the key features of LTE-Advanced.
 This book builds on the success of its predecessor, offering the
 same comprehensive system-level understanding built on explanations
 of the underlying theory, now expanded to include complete coverage
 of Release 9 and the developing specifications for LTE-Advanced.
 The book is a collaborative effort of more than 40 key experts
 representing over 20 companies actively participating in the
 development of LTE, as well as academia. The book highlights
 practical implications, illustrates the expected performance, and
 draws comparisons with the well-known WCDMA/HSPA standards. The
 authors not only pay special attention to the physical layer,
 giving an insight into the fundamental concepts of OFDMA-FDMA and
 MIMO, but also cover the higher protocol layers and system
 architecture to enable the reader to gain an overall understanding
 of the system. Key New Features: Comprehensively updated with the
 latest changes of the LTE Release 8 specifications, including
 improved coverage of Radio Resource Management RF aspects and
 performance requirements. Provides detailed coverage of the new LTE
 Release 9 features, including: eMBMS, dual-layer beamforming, user
 equipment positioning, home eNodeBs / femtocells and pico cells and
 self-optimizing networks. Evaluates the LTE system performance.
 Introduces LTE-Advanced, explaining its context and motivation, as
 well as the key new features including: carrier aggregation,
 relaying, high-order MIMO, and Cooperative Multi-Point transmission
 (CoMP). Includes an accompanying website containing a complete list
 of acronyms related to LTE and LTE-Advanced, with a brief
 description of each This book is an invaluable reference for all
 research and development engineers involved in implementation of
 LTE or LTE-Advanced, as well as graduate and PhD students in
 wireless communications. Network operators, service providers and
 R&D managers will also find this book insightful."-- \$cProvided by
