About

I have worked on the Trusted Computing Group now since its inception, and was chair of the TPM workgroup for over a decade. Currently I am "Chair Emeritus". In the past I was on The Board of Directors, Chair of the TCG Software Stack workgroup, and been a key contributor to the TPM workgroup since TCGA days. I also was on the Technical committee and have contributed to the Server WG, Virtualization WG, Security Eval WG, and many others.

I was a Master Inventor at both IBM and Lenovo with 134 issued patents, (more in the works). I very much enjoy teaching, (My PhD is in Applied Math), and writing books (A Practical Guide To TPM 2.0, on which I am co-author and A Practical Guide to Opal Drives are my latest).

In the past I have been the lead engineer on the Center for Natural Computing, a member of the technical staff advising the President of the IBM PC division, a Reliability Engineer for Substrate development, and a Yield Prediction engineer for chip development.

Specialties: Security architecture and evaluation of solutions, privacy, Human Computer Interaction, Reliability, Math, Intellectual Property,

actually it is still true if you put in k/x instead of $1/x$, as long as k is non-negative. The proof is not too difficult, but it is surprising.

James Rutledge (Jamie)

Executive | Board Member | Advisor | Inventor | Doer | Investor

April 30, 2009, James managed Dave directly

Dave is a meticulous problem solver that looks for the four corner cases. He is a pleasure to work with, in that he can solve most any problem logically and methodically. A good team player and has the ability to work on complex tasks and solve the unsolvable.

John Nicholson

Adjunct Professor at Duke University Pratt School of Engineering
July 28, 2006, John worked with Dave on the same team

Dave is one of the most intelligent, inventive, and creative problem solving persons I know. Excellent team player and highly productive innovator. A top inventor and mentor for IP in Lenovo and IBM and technical leader in Trusted Computing Group.
