

**IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF TEXAS
MARSHALL DIVISION**

MULTIMEDIA TECHNOLOGIES PTE.
LTD.,

Plaintiff,

v.

VIZIO, INC.,

Defendant.

Civil Action No. 2:23-CV-00124-JRG

DEFENDANT’S INVALIDITY CONTENTIONS

I. INTRODUCTION

Pursuant to Rule 3-3 of the Local Patent Rules (“P. R.”) of the Eastern District of Texas, Defendant VIZIO Inc. (“VIZIO” or “Defendant”) hereby provides its Invalidity Contentions with respect to the claims identified by Plaintiff Multimedia Technologies Pte. Ltd. (“MMT” or “Plaintiff”) in its Disclosure of Asserted Claims and Infringement Contentions under Patent Rule 3-1, served on July 20, 2023 (“Infringement Contentions”), in the above captioned case. Plaintiff asserts infringement of the following claims:

U.S. Patent No.	Asserted Claims
9,055,255 (“’255 Patent”)	1-4, 6-13, 15-20
9,232,168 (“’168 Patent”)	1-7, 10-15
9,247,174 (“’174 Patent”)	1-5, 7, 10-13
9,510,040 (“’040 Patent”)	1-4, 11-15, 21
9,578,384 (“’384 Patent”)	1, 3-4, 6-9
10,419,805 (“’805 Patent”)	1-4, 6-18
9,426,527 (“’527 Patent”)	1-11
9,185,325 (“’325 Patent”)	1-8
9,215,393 (“’393 Patent”)	1-20
9,077,928 (“’928 Patent”)	1-4, 8-13, 15-20

Pursuant to P. R. 3-3 and 3-4, Defendant hereby provides its invalidity contentions and related documents pertaining only to the asserted claims as identified by Plaintiff in its Infringement Contentions. With respect to each asserted claim and based on its investigation to date, Defendant hereby: (a) identifies each currently known item of prior art that either anticipates or renders obvious each asserted claim; (b) specifies whether such prior art anticipates each asserted claim or renders it obvious; (c) submits a chart identifying where each element in each asserted claim is disclosed, described, or taught in the prior art, including for each element that is governed by pre-AIA 35 U.S.C. § 112, ¶ 6 and/or 35 U.S.C. § 112(f), the identity of the structure(s), act(s), or material(s) in each item of prior art (if any) that performs the claimed function; and (d) identifies the grounds for invalidating asserted claims based on indefiniteness under pre-AIA 35 U.S.C. § 112, ¶ 2 and/or 35 U.S.C. § 112 (b), or non-enablement or lack of written description under pre-AIA 35 U.S.C. § 112, ¶ 1 and/or 35 U.S.C. § 112 (a). Defendant further relies on and incorporates all prior art references cited in and/or on the cover of the Asserted Patents and their respective prosecution histories, including, for supporting the obviousness of any asserted claim.

In addition, based on its investigation to date, Defendant hereby produces the documents currently in its possession, custody, or control required to accompany these Invalidity and Subject-Matter Eligibility Contentions pursuant to P. R. 3-4.

II. RESERVATION OF RIGHTS

As stated above, pursuant to P. R. 3-3 and 3-4, Defendant hereby provides disclosures and related documents pertaining only to the asserted claims identified by Plaintiff in its Infringement Contentions. Defendant reserves the right to modify, amend, or supplement these Invalidity Contentions to show the invalidity of any additional claims that the Court may allow Plaintiff to later assert. The Local Patent Rules and the Court's Docket Control Order contemplate that these

Invalidity Contentions be prepared and served in response to Plaintiff's Infringement Contentions, but Plaintiff's Infringement Contentions are insufficient in that they lack proper and complete disclosure as to how Defendant allegedly infringes each element of the asserted claims. As such, Defendant reserves the right to modify, amend, and/or supplement these Invalidity Contentions should the Court permit Plaintiff to correct, clarify, amend, and/or supplement its Infringement Contentions.

Defendant's Invalidity Contentions and selection of documents accompanying them are based on information currently available to Defendant and are subject to further revision. For example, Plaintiff (or its counsel) may be in possession of prior art that has not been disclosed to Defendant. As another example, because discovery has only recently begun, Defendant reserves the right to amend or supplement the information provided herein, including identifying and relying on additional references.

To the extent that these Invalidity Contentions reflect or otherwise embody particular constructions of terms or phrases in the asserted claims, Defendant is not proposing any such constructions as proper constructions of those terms or phrases. Various positions put forth in these Invalidity Contentions are predicated on Plaintiff's incorrect and/or overbroad interpretation of its claims in its Infringement Contentions provided to Defendant. These Invalidity Contentions are not intended to, and do not necessarily, reflect Defendant's interpretation of the true and proper scope of the asserted claims. Defendant reserves the right to adopt claim construction positions that differ from any position in this document. Defendant also objects to any attempt by Plaintiff to infer any purported claim constructions from any identification of potential prior art.

In those instances where Defendant asserts that the asserted claims are invalid under 35 U.S.C. § 112 (*e.g.*, no written description, not enabled, and/or indefinite), Defendant has applied the prior art in accordance with its assumption that Plaintiff contends such asserted claims (1) are definite, (2) have written description support, and (3) are enabled, as evidenced by Plaintiff's Infringement Contentions. As such, Defendant's Invalidity Contentions do not represent its agreement or view as to the meaning, definiteness, written description support for, or enablement of any asserted claim.

For the avoidance of doubt, these Invalidity Contentions and accompanying documents are not intended to reflect Defendant's claim construction contentions, which will be disclosed in accordance with the Court's Docket Control Order.

Defendant's Invalidity Contentions may change depending on the Court's construction of the asserted claims, any findings as to the priority date of the asserted claims, and/or positions that Plaintiff or its experts may take concerning claim construction, infringement, and/or invalidity issues. Prior art not included in this disclosure, whether known or unknown to Defendant, may become relevant. In particular, Defendant is currently unaware of the extent, if any, to which Plaintiff will contend that limitations of the asserted claims are not disclosed in the prior art identified by Defendant, or will contend that any of the identified references do not qualify as prior art. To the extent that such an issue arises, Defendant reserves the right to identify other references that, *inter alia*, would have made the addition of the allegedly missing limitation to the disclosed device or method obvious.

The identification of any patent or patent publication shall be deemed to include any counterpart patent or application filed, published, or issued anywhere in the world. The citation to any specifications published by standard-setting organizations shall be deemed to include any

product that implements such specifications and that would qualify as prior art under 35 U.S.C. § 102, *e.g.*, under Sections 102(a), 102(b), or 102(g)(2).

Defendant's claim charts cite to particular teachings and disclosures of the prior art as applied to features of the asserted claims. Persons having ordinary skill in the art, however, may view an item of prior art in the context of other publications, literature, products, and understanding. As such, the cited portions are only exemplary, and Defendant reserves the right to rely on uncited portions of the prior art references and on other publications and expert testimony as aids in understanding and interpreting the cited portions, as providing context thereto, and as additional evidence that the prior art discloses a claim limitation. Defendant further reserves the right to rely on uncited portions of the prior art references, other publications, and testimony to establish bases for combinations of certain cited references that render the asserted claims obvious. Further, for any combination, Defendant reserves the right to rely additionally on information generally known to those skilled in the art or common sense.

The references discussed in the claim charts may disclose the elements of the asserted claims explicitly or inherently, or they may be relied upon to show the state of the art in the relevant time frame. The suggested obviousness combinations are provided in the alternative to Defendant's anticipation contentions and are not to be construed to suggest that any reference included in the combinations is not by itself anticipatory.

Defendant reserves the right to challenge patentability of the asserted claims under pre-AIA 35 U.S.C. § 102(f) and/or 35 U.S.C. § 102(b) in the event Defendant obtains evidence that the named inventor of the Asserted Patents did not invent the subject matter claimed in the Asserted Patents or is not the sole inventor of the Asserted Patents. Should Defendant obtain such evidence, it will provide the name of the person(s) from whom and the circumstances under

which the invention or any part of it was derived. Defendant further reserves the right to assert that the Asserted Patents are unenforceable due to inequitable conduct.

Because discovery has just recently begun, Defendant anticipates that additional prior art and invalidity bases may be found. Defendant's investigation and analysis of the prior art is continuing, and thus Defendant reserves the right to supplement, amend, and/or revise the information provided herein as Defendant conducts further investigation and/or analysis, including identifying, charting, and relying on additional references.

Additionally, in view of likely third-party discovery that will be taken, Defendant reserves the right to present additional items of prior art under 35 U.S.C. §§ 102 (pre-AIA or post-AIA) and/or § 103 located during discovery or further investigation, and to assert contentions of invalidity under, for example, 35 U.S.C. §§ 102(c), (d), or (f). For example, Defendant may issue subpoenas to third parties believed to have knowledge, documents, and/or other evidence concerning invalidity of one or more of the Asserted Claims.

In addition to the positions and prior art identified in these Invalidity Contentions (including the accompanying invalidity claim charts), Defendant also incorporates by reference all invalidity contentions, prior art¹, and invalidity claim charts (including, without limitation, all anticipation positions, obviousness positions (including all prior art combinations and motivations to combine), indefiniteness positions, written description positions, and nonenablement positions) concerning one or more of the Asserted Patents, as disclosed at any time. This includes without limitation disclosures in previous or related litigation, in United States Patent & Trademark Office ("USPTO") proceedings, by the Plaintiff, by any other parties

¹ Prior art appearing in the file histories of the Asserted Patents is not required to be separately produced by Defendant under P.R. 3-4(b).

accused of patent infringement by the Plaintiff, or by the named inventors or any individuals associated with the prosecution and/or post-grant review of the Asserted Patents.

III. IDENTIFICATION OF PRIOR ART PURSUANT TO P.R. 3-3(A)

Pursuant to P. R. 3-3(a), and subject to Defendant's reservation of rights, Defendant identifies each item of prior art that at least evidences the obviousness of one or more of the asserted claims. In its Infringement Contentions, Plaintiff provided the following priority dates for the Asserted Patents: August 17, 2012. Without admitting the validity of this priority date, Defendant uses this priority date for the purposes of these Invalidity Contentions.

In the following sections, Defendant identifies each prior art patent by its number, country of origin, and date of issue, each non-patent prior art publication by, where possible, its title, date of publication, and author and/or publisher, and each prior art system currently known to Defendant by, where possible, its name and date of sale, use, or knowledge. Defendant reserves the right to identify additional non-patent and non-publication prior art systems that were sold, offered for sale, used, etc. prior to the priority date to the extent any such systems becomes known during discovery.

Defendant further relies on and incorporates all prior art references cited in and/or on the cover of the Asserted Patents and their respective prosecution histories, including for supporting the obviousness of any asserted claim. Defendant further relies on and incorporates by reference, as if originally set forth herein, all invalidity positions, and all associated prior art and claim charts, disclosed to Plaintiff by present or former defendants in any lawsuits or other proceedings or by potential or actual licensees to any of the asserted claims. Defendant hereby discloses and identifies as if originally set forth herein, all prior art references listed and/or asserted in the above as invalidating prior art against each of the asserted claims.

IV. INVALIDITY DUE TO ANTICIPATION AND/OR OBVIOUSNESS PURSUANT TO P.R. 3-3(B) AND (C)

In accordance with P. R. 3-3(b) and (c), prior art references anticipating or rendering obvious some or all of the asserted claims are listed in the tables below.

A full citation to each reference is in the Tables above, along with the “Short Name” used to identify each reference throughout this disclosure. The following tables list (i) each anticipating prior art reference, (ii) the asserted claims anticipated by each anticipating reference, (iii) for each anticipating reference, the chart identifying where specifically in that reference each element of each asserted claim is found.

The art cited in the claim charts is illustrative and not exhaustive. Further, these claim charts provide illustrative citations to where each element may be found in the prior art references. The cited references may contain other disclosures of each claim element as well, and

Defendant reserves the right to argue any claim elements of the asserted claims are disclosed in non-cited portions of these references. Similarly, where Defendant cites to a patent figure in the charts, it incorporates the accompanying specification text describing that figure and vice-versa.

1. Prior Art Anticipating and/or Rendering Obvious the Asserted Claims of the '255 Patent

Exhibit	Prior Art Reference
INV-255-A1	LG PZ550

Exhibit	Prior Art Reference
INV-928-B	McCreesh

To the extent that prior art identified by Defendant as anticipating is found not to anticipate, the prior art establishes that the claimed subject matter was obvious to a person of ordinary skill in the art at the time of the alleged invention. To the extent not anticipated, no asserted claim goes beyond combining known elements to achieve predictable results or does more than choose between clear alternatives known to those of skill in the art.

Even if a particular claim element is not expressly found in one of the charted references above, those charted references render the relevant asserted claims obvious without the need to combine with any other references, having in mind the information generally known to those skilled in the art, common sense, and/or routine innovation. Accordingly, Defendant discloses each of the references cited above in Section IV as rendering obvious the asserted claims as shown in the charts referenced above.

In addition, the charted references in combination with one or more of the other charted references (as identified below and in the accompanying claim charts) render obvious the asserted claims. As explained in the accompanying charts, it would have been obvious to a person of skill in the art at the time of the alleged invention of the asserted claims to combine the various references cited herein so as to practice the asserted claims. In addition to the specific combinations of prior art and the specific combinations of groups of prior art disclosed, Defendant reserves the right to rely on any other combination of any prior art references disclosed herein. Defendant further reserves the right to rely upon combinations disclosed within the prosecution history of the references cited herein. These obviousness combinations reflect Defendant's present understanding of the potential scope of the claims that Plaintiff appears to be

advocating and should not be construed as Defendant's acquiescence to Plaintiff's interpretation of the patent claims.

One or more combinations of the prior art references identified above pursuant to P. R. 3-3(a) would have been obvious because these references would have been combined using: known methods to yield predictable results; known techniques in the same way; a simple substitution of one known, equivalent element for another to obtain predictable results; and/or a teaching, suggestion, or motivation in the prior art generally. In addition, it would have been obvious to try combining the prior art references identified above pursuant to P. R. 3-3(a) because there were only a finite number of predictable solutions and/or because known work in one field of endeavor prompted variations based on predictable design incentives and/or market forces either in the same field or a different one. In addition, the combination of the prior art references identified above pursuant to P. R. 3-3(a) would have been obvious because the combination represents the known potential options with a reasonable expectation of success.

Additional evidence that there would have been a motivation to combine the prior art references identified above pursuant to P. R. 3-3(a) includes the interrelated teachings of multiple prior art references; the effects of demands known to the design community or present in the marketplace; the existence of a known problem for which there was an obvious solution encompassed by the asserted claims; the existence of a known need or problem in the field of the endeavor at the time of the invention(s); and the background knowledge that would have been possessed by a person having ordinary skill in the art.

Thus, the motivation to combine the teachings of the prior art references disclosed herein is found in the references themselves and: (1) the nature of the problem being solved, (2) the express, implied, and inherent teachings of the prior art, (3) the knowledge of persons of ordinary

skill in the art, (4) the fact that the prior art is generally directed towards associating images with their content, and (5) the predictable results obtained in combining the different elements of the prior art. Additionally, one would be motivated to address at least the alleged problems or achieve the purported objectives identified in the descriptions of the Asserted Patents.

Any reference or combination of references that anticipates or makes obvious an asserted independent claim also makes obvious any asserted claim dependent on that independent claim because every element of each dependent claim was known by a person of ordinary skill at the time of the alleged invention, and it would have been obvious to combine those known elements with the independent claims at least as a matter of common sense and routine innovation. Accordingly, Defendant contends that each asserted claim would have been obvious not only by the combinations explicitly defined in these contentions, but also by any combination of references that renders obvious an asserted claim.

Numerous prior art references, including those identified above pursuant to P. R. 3-3(a) and in the claim charts reflect common knowledge and the state of the prior art prior to the priority dates of the Asserted Patents. As it would be unduly burdensome to create detailed claim charts for the thousands of invalidating combinations, Defendant has provided illustrative examples of such invalidating combinations below and in the charts attached hereto. For at least the reasons described above and below in the examples provided as well as in the attached claim charts, it would have been obvious to one of ordinary skill in the art to combine any of a number of prior art references, including any combination of those identified in the attached claim charts, to meet the limitations of the asserted claims. As such, Defendant's inclusion of exemplary combinations does not preclude Defendant from identifying other invalidating combinations as appropriate.

B. Identification of Combinations of Prior Art Rendering the Asserted Claims Obvious

The asserted claims are rendered obvious by single references when combined with the knowledge of a person of ordinary skill in the art, combinations of references, and combinations of references when combined with the knowledge of a person of ordinary skill in the art as explained herein and in the exhibits attached hereto.

For each charted reference, the invalidity charts identify specific additional charts/references that it may be combined with under 35 U.S.C. § 103.

C. Motivation to Combine

In *KSR*, the Supreme Court emphasized that an idea that is the result of ordinary innovation, ordinary skill, or common sense should not be patentable. *See KSR Int'l Co. v. Teleflex Inc.*, 550 U.S. 398 (2007). The Supreme Court held that a person of ordinary skill in the art is “a person of ordinary creativity, not an automaton” and “in many cases a person of ordinary skill in the art will be able to fit the teachings of multiple patents together like pieces of a puzzle.” *Id.* at 420-21. Although a patent challenger is not required to show that one of ordinary skill in the art would have had a specific motivation to combine prior art references, such a showing may be helpful to the obviousness analysis. *Id.* at 418; *see also id.* at 402.

One of skill in the art would have been motivated to combine the references identified herein because, for example, the identified combinations fall into one or more of the following categories:

- A combination of elements known in the prior art according to known methods to yield a predictable result;
- A combination that is a simple substitution of one or more known elements for another to obtain a predictable result;
- A combination that involves using a known technique to improve a similar device or method in the same way;

- A combination that involves applying a known technique to a known device or method ready for improvement to yield a predictable result;
- A combination that results from a finite number of identified, predictable solutions with a reasonable expectation of success, such that the solution was one which was “obvious to try”;
- A combination that results from known work in one field of endeavor prompting variations of it for use either in the same field or a different field based on design incentives or other market forces in which the variations were predictable to one of ordinary skill in the art; and
- A teaching, suggestion, or motivation in the prior art that would have led one of ordinary skill in the art to modify the prior art reference or to combine the teachings of various prior art references to arrive at the claimed invention.

Further, the Federal Circuit has held that a motivation to combine references may be implicit for patents claiming an “improvement”:

[A]n implicit motivation to combine exists not only when a suggestion may be gleaned from the prior art as a whole, but when the “improvement” is technology-independent and the combination of references results in a product or process that is more desirable, for example because it is stronger, cheaper, cleaner, faster, lighter, smaller, more durable, or more efficient. Because the desire to enhance commercial opportunities by improving a product or process is universal—and even commonsensical—we have held that there exists in these situations a motivation references themselves. In such situations, the proper question is whether the ordinary artisan possesses knowledge and skills rendering him capable of combining the prior art references.

DyStar Textilfarben GmbH & Co. Deutschland KG v. C.H. Patrick Co., 464 F.3d 1356, 1368 (Fed. Cir. 2006). The prior art references identified herein explicitly or implicitly refer to other prior art references, share common authors or inventors, were published in the same journals, presented at the same conferences, were presented as proposals to standards working groups, and/or were developed at common companies, schools, or organizations, all of which would motivate one of skill in the art to combine them. As such, detailed motivations to combine can be found in each exhibit of the charted references. These references are also within the fields of the Asserted Patents and are directed to similar subject matter within those fields. Additionally, any products, devices, or processes described in the references existed and/or were invented before or

during the period in which the claimed inventions were developed, providing further motivation to combine them.

To the extent Plaintiff challenges a combination of prior art with respect to a particular element, Defendant reserves all rights to supplement these contentions to further specify the motivation to combine the prior art. Defendant may rely on cited or uncited portions of the prior art, other documents, and/or expert testimony to establish that a person of ordinary skill in the art would have been motivated to modify or combine the prior art so as to render the claims invalid as obvious.

D. There Is No Evidence of Any Indicia of Nonobviousness

There is no evidence of any indicia of nonobviousness, including any long-felt but unsolved need; copying; failure of others; commercial success due to the patented invention; no industry praise; no unexpected results; no industry skepticism and no licensing. Each is addressed in turn below:

No long felt but unsolved need. There was no long-felt but unsolved need that the Asserted Claims solve. The concepts described in the Asserted Patents were all well known before the alleged invention dates of the Asserted Patents as evidenced by the patents themselves, their file histories and references cited therein, and the prior art identified herein, including those identified in the above-referenced Exhibits. In addition, there was no long felt but unsolved need because there is nothing particularly compelling about the claimed methods, systems, and apparatus.

No copying. Plaintiff has provided no credible evidence that the alleged inventions of the Asserted Patents were copied or that any functionality that practices the Asserted Patents was copied. Copying “requires evidence of efforts to replicate a specific product.” *Wyers v. Master Lock Co.*, 616 F.3d 1231, 1246 (Fed. Cir. 2010). Here, Plaintiff has not, and cannot, show that

Defendant copied any product that embodies the Asserted Patents. Further, evidence of copying is “not sufficient to demonstrate nonobviousness of the claimed invention” where, as here, there is a “substantial question of validity raised by the prior art references” cited by Defendant.

Amazon.com, Inc. v. Barnesandnoble.com, Inc., 239 F.3d 1343, 1366 (Fed. Cir. 2001). As explained in detail in these contentions, the Asserted Patents are rendered obvious by the prior art. Thus, Plaintiff cannot show any nexus between any alleged copying and the merits of the claimed inventions of the Asserted Patents.

No failure of others. Although “[n]onobviousness is suggested by the failure of others to find a solution to the problem which the patents in question purport to solve,” *Symbol Techs., Inc. v. Opticon, Inc.*, 935 F.2d 1569, 1578 (Fed. Cir. 1991), this is not such a case. As explained in detail in these contentions, the alleged inventions or the Asserted Patents were well known in the art, the claimed technology straightforward and predictable.

No commercial success. Plaintiff has not provided any evidence that any alleged success of its products or any other products is due to the alleged inventions claimed in the Asserted Patents. A patentee bears the burden of demonstrating that the relevant commercial success is attributable to the claimed invention “as opposed to other economic and commercial factors unrelated to the technical quality of the patented subject matter.” *Cable Elec. Prods, Inc. v. Genmark, Inc.*, 770 F. 2d 1015, 1027 (Fed. Cir. 1985). Here, Plaintiff has not shown and cannot show that Defendant’s success is due to the alleged invention of the Asserted Patents. The commercial success of the accused product is unrelated to the purported inventions of the Asserted Patents. Furthermore, if any commercial success is due to any of the concepts disclosed in the Asserted Patents, those concepts are also present in the prior art and thus are irrelevant to the question of obviousness. *See Tokai Corp. v. Easton Enterprises, Inc.*, 632 F.3d 1358, 1369-70

(Fed. Cir. 2011) (“If commercial success is due to an element in the prior art, no nexus exists.”); *In re Huai-Hung Kao*, 639 F.3d 1057, 1068 (Fed. Cir. 2011) (“Where the offered secondary consideration actually results from something other than what is both claimed and novel in the claim, there is no nexus to the merits of the claimed invention.”); *Ormco Corp. v. Align Tech., Inc.*, 463 F.3d 1299, 1312 (Fed. Cir. 2006) (“[I]f the feature that creates the commercial success was known in the prior art, the success is not pertinent.”).

No industry praise. Plaintiff has presented no evidence of industry praise for the alleged inventions of the Asserted Patents or any functionality that allegedly practices the Asserted Patents. To the extent any praise is related to any functionality that allegedly practices the Asserted Patents, that praise is not due to the allegedly novel features of the Asserted Patents, but instead only to features present in the prior art, which is not a sufficient nexus to be relevant to the question of industry praise for purposes of obviousness. *See Muniauction, Inc. v. Thomson Corp.*, 532 F.3d 1318, 1328 (Fed. Cir. 2008).

No unexpected results. There is no evidence of any unexpected results when the elements of the Asserted Claims were combined. Instead, as discussed above, the concepts claimed in the Asserted Patents were already combined or would have been obvious to combine in the same manner as the Asserted Claims. These prior art systems and products, as described in in these contentions, disclosed the same combinations of elements, and the same results of such combinations, that are recited in the Asserted Claims of the Asserted Patents. Thus, there were no unexpected results that arose from combining the well-known elements in the Asserted Claims of the Asserted Patents.

No industry skepticism. Plaintiff has presented no evidence that others were skeptical before the alleged invention date of the Asserted Patents, nor can it. In fact, there was no industry

skepticism concerning the claimed concepts that predates the Asserted Patents. Instead, many companies and individuals were already using the concepts claimed in the Asserted Patents. Thus, there was no industry skepticism that using or combining these well-known prior art concepts would be viable; others in the field were already combining them in the same manner as arranged in the Asserted Claims.

Simultaneous Invention. Individuals working independently of the Asserted Patents' named inventor(s) simultaneously or near-simultaneously invented the alleged invention of the Asserted Claims of the Asserted Patents. Such evidence supports a finding that the Asserted Claims would have been obvious to a person of ordinary skill in the art at the time of the invention. *See Geo. M. Martin Co. v. Alliance Mach. Sys.*, 618 F.3d 1294, 1305 (Fed. Cir. 2010) ("Independently made, simultaneous invention, made within a comparatively short space of time, are persuasive evidence that the claimed apparatus was the product only of ordinary mechanical or engineering skill.") (citing *Concrete Appliances Co. v. Gomery*, 269 U.S. 177, 184 (1925)) (internal quotations omitted); *see also Ecolochem, Inc. v. So. Cal. Edison Co.*, 227 F.3d 1361, 1379 (Fed. Cir. 2000).

V. INVALIDITY UNDER 35 U.S.C. § 112 PURSUANT TO P.R. 3-3(D)

The following Invalidity Contentions set forth below, pursuant to P. R. 3-3(d), are subject to revision and amendment pursuant to Federal Rule of Civil Procedure 26(e) and the Orders of record in this matter to the extent appropriate in light of further investigation and discovery regarding the defenses below, the Court's construction of the claims at issue, and/or the review and analysis of expert witnesses.

A. Indefiniteness under 35 U.S.C. § 112

Claims are indefinite under 35 U.S.C. § 112(b) and/or pre-AIA 35 U.S.C. § 112, ¶ 2 when they "fail to inform, with reasonable certainty, those skilled in the art about the scope of the

invention.” *See Nautilus, Inc. v. Biosig Instruments, Inc.*, 134 S. Ct. 2120, 2124 (2014). To the extent an asserted apparatus claim includes both apparatus and method limitations, that claim is invalid for indefiniteness under § 112³ because it fails to identify or notify the public of what constitutes direct infringement. *See IPXL Holdings, L.L.C. v. Amazon.com, Inc.*, 430 F.3d 1377 (Fed. Cir. 2005).

35 U.S.C. § 112 also requires that the claimed subject matter be what “the inventor or a joint inventor regards as the invention.” “Where it would be apparent to one of skill in the art, based on the specification, that the invention set forth in a claim is not what the patentee regarded as his invention, we must hold that claim invalid under § 112, paragraph 2.” *Allen Eng'g Corp. v. Bartell Indus., Inc.*, 299 F.3d 1336, 1349 (Fed. Cir. 2002).

In addition to Defendant’s reservation of rights stated above, Defendant notes that the Court’s Docket Control Order contemplates that all indefiniteness issues be brought to the Court’s attention through the *Markman* briefing process, Defendant’s detailed arguments as to indefiniteness will be presented at that time, through the *Markman* meet and confer and briefing processes. Moreover, Defendant’s contentions are based on the manner in which Plaintiff is alleging infringement, to the extent such allegations are apparent from Plaintiff’s infringement contentions, which are deficient in a number of respects.

B. Lack of Enablement/Written Description Under 35 U.S.C. § 112

35 U.S.C. § 112(a) and/or pre-AIA 35 U.S.C. § 112, ¶ 1 requires that the specification contain a written description of the invention. To satisfy the written description requirement, the specification must describe the claimed invention in sufficient detail that one skilled in the art can reasonably conclude that the inventor had possession of the claimed invention at the time of

³ Unless otherwise noted, references to § 112 refers to pre-AIA and corresponding portions of current 35 U.S.C. § 112.

filing the patent application. *See generally Ariad Pharm., Inc. v. Eli Lilly and Co.*, 598 F.3d 1336 (Fed. Cir. 2010) (en banc). “[T]he hallmark of written description is disclosure.” *Boston Scientific Corp. v. Johnson & Johnson*, 647 F.3d 1353, 1361-62 (Fed. Cir. 2011) (citation omitted). The test for whether a specification adequately describes an invention is “whether the disclosure of the application relied upon reasonably conveys to those skilled in the art that the inventor had possession of the claimed subject matter as of the filing date. . . . [T]he test requires an objective inquiry into the four corners of the specification from the perspective of a person of ordinary skill in the art. . . . [I]t is a question of fact.” *Ariad Pharms., Inc.*, 598 F.3d at 1351; *Boston Scientific*, 647 F.3d at 1362. Moreover, “it is the specification itself that must demonstrate possession.” *Ariad Pharms., Inc.*, 598 F.3d at 1352.

The enablement requirement of § 112 demands that the patent specification enable “those skilled in the art to make and use the full scope of the claimed invention without ‘undue experimentation.’” *Genentech, Inc. v. Novo Nordisk A/S*, 108 F.3d 1361, 1365 (Fed. Cir. 1997) (quoting *In re Wright*, 999 F.2d 1557, 1561 (Fed. Cir. 1993)). “To be enabling, the specification of a patent must teach those skilled in the art how to make and use the full scope of the claimed invention without undue experimentation.” *MagSil Corp. v. Hitachi Global Storage Techs.*, 687 F.3d 1377, 1380-81 (Fed. Cir. 2012) (citation omitted). “[T]he scope of the claims must be less than or equal to the scope of the enablement.” *Nat’l Recovery Tech., Inc. v. Magnetic Separation Sys., Inc.*, 166 F.3d 1190, 1196 (Fed. Cir. 1999).

Certain claims of the patents-in-suit are not supported by the written description and are not enabled.

C. The Following Claims and Limitations are Invalid Under 35 U.S.C. § 112

1. '255 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'255 Patent	Claims 1, 3, 10, 12, 13, 19, 20	<p>“associated with,” and “a processor associated with the intelligent television/TV,”</p> <p>“substantially simultaneously,”</p> <p>“substantially an entire area of a screen of the TV,”</p> <p>“determine/determining, by the processor and in response to receiving the first live TV application input, a first live TV application feature/a live application feature to present via the display,”</p> <p>“global panel feature/input,”</p> <p>“determine/determining, by the processor and in response to receiving the home screen input, a global panel feature to present via the display,”</p> <p>“the processor”</p>	<p>The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.</p>
'255 Patent	Claims 19, 20,	“input device”	<p>The term requires construction as a means-plus-function limitation under 35 U.S.C. § 112 ¶ 6.</p>
'255 Patent	Claims 7, 16	“manager,” and “provider”	<p>The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.</p>

2. '168 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'168 Patent	Claims 1, 4, 11, 13	“associated with,” “receiving, by a processor of the intelligent television, a selection associated with a first navigation bar in the user interface of the intelligent television,” “can contain,” “cannot contain,” “determining if a second user interface, associated with the selection, can contain a second navigation bar,” “if a second user interface, associated with the selection, can contain a second navigation bar, rendering a horizontal navigation bar as the second navigation bar in the second user interface,” “user interface device,” and “if a second user interface, associated with the selection, cannot contain a second navigation bar, rendering a different user interface device for the second navigation bar in the second user interface”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'168 Patent	Claims 1, 4, 11, 13	“user interface device”	The term requires construction as a means-plus-function limitation under 35 U.S.C. § 112 ¶ 6.
'168 Patent	Claims 5, 13	“too large,” “user interface device,” and “if the second navigation bar is too	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
		large for the second user interface, the processor renders different user interface device”	to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
’168 Patent	Claims 7, 14	“is needed,” “is not needed,” and “determining if a drop-down navigation bar is needed;”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

3. ’174 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
’174 Patent	Claims 1, 10	“associated with,” “receiving/receives a first directional input via the input device associated with the television,” “determining/determines, based on a first direction associated with the first directional input, a second content panel to display via the television in the application panel interface”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
’174 Patent	Claims 1, 10	“input device”	The term requires construction as a means-plus-function limitation under 35 U.S.C. § 112 ¶ 6.
’174 Patent	Claims 2, 11	“representative of,” “retrieving/retrieve, from a memory, a first image that is representative of the at least one of content source and the content information”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
			lacks written description and enabling support.
'174 Patent	Claim 4	“associated with,” “determining, based on a second direction associated with the second directional input, a third content panel to display via the television.”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'174 Patent	Claim 5, 13	“associated with,” “displaying/display, via the television, the content information associated with the determined source”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'174 Patent	Claim 7	“associated with,” and “wherein the second content information comprises information associated with TV series episode content information”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

4. '040 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'040 Patent	Claims 1, 11, 21	“associated with,” “indication associated with a selection by a user,” “highlighted as being associated,” “wherein at least one of the sources is highlighted as being associated with the first content information”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'040 Patent	Claims 2, 12	“associated with,” “identifying a user associated with the received indication,” “retrieving one or more settings associated with the identified user,” “retrieving, from memory, content information associated with the identified user”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'040 Patent	Claims 3, 13	“associated with,” “identifying a user associated with the received indication,” “retrieving, from memory, one or more settings associated with the identified user,” “retrieving, from memory, content information associated with the identified user and the one or more settings associated with the user;”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'040 Patent	Claims 4, 14	“associated with,” “receiving a second indication associated with a selection by a user”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

5. '384 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'384 Patent	Claims 1, 3-4, and 6-9	The phrases and/or terms: “a master view,” “a characteristic,” “a collection view,” “determining, by the processor, if the selection in the collection view is for a series or one of a movie or single show,” “a navigation to view VOD content is an ordered set of user interfaces,” “a top level,” “a bottom level,” and “two user-selectable devices.”	<p>The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.</p> <p>In addition, the “navigation” limitation in claim 1, and the “user-selectable devices” limitation in claim 6, are recited as performing functions (<i>i.e.</i>, viewing VOD content and viewing a collection view, respectively), but lack a structure for performing those stated function. These terms therefore require construction as a means-plus-function limitation under pre-AIA 35 U.S.C. § 112 ¶ 6 and/or 35 U.S.C. § 112(f); <i>Williamson v. Citrix Online, LLC</i>, 792 F.3d 1339 (Fed. Cir. 2015) (en banc). Because the specification fails to disclose any</p>

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
			corresponding structure for performing the required functions associated with these limitations, all Challenged Claims and/or claim 6 are invalid as indefinite under pre-AIA 35 U.S.C. ¶ 112, ¶ 2 and/or 35 U.S.C. § 112(b).
'384 Patent	Claim 6	The phrases and/or terms: “a master view,” “user-selectable devices,” and “a collection view.”	This claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

6. '805 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'805 Patent	Claims 1-2, 10-11, 17-18	“content provider module” and “subservice	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'805 Patent	Claims 3, 12	“serve one or more applications of the TV with EPG information in a read-only format”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'805 Patent	Claims 4, 13	“the media data provider is configured to provide media metadata personalized for a user”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'805 Patent	Claims 6, 15	The phrases and/or terms: “provide a real-time view of media sources,” “maintain a list of connected media sources”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'805 Patent	Claim 7	“the media browser maintains a non-permanent storage”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'805 Patent	Claims 9, 16	“other contents”	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

7. '325 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'325 Patent	1-8	The phrases and/or terms: “providing, by a processor of the intelligent television, a first catalog view,” “at least three different items of VOD content on a display,” “have a watched status,” “a first user interface device,” “sort,” “a first selection of the first user interface device,” “select between the three watched statuses,” “a second catalog view of one or more different items of VOD content,” “each with the first one of,” “displayed with,” “a second selection of the first user interface device,” “the at least three different items of VOD content of the first catalog view,” “a second one of the not watched status, the partially watched status, and the fully watched status,” “a third catalog view of one or more different items of VOD content,” and “each with the second one of.”	<p>The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.</p> <p>In addition, the “a first user interface device” limitation is recited as performing a function (<i>i.e.</i>, sorting VOD content), but lacks a structure for performing its stated function. It therefore requires construction as a means-plus-function limitation under pre-AIA 35 U.S.C. § 112 ¶ 6 and/or 35 U.S.C. § 112(f); <i>Williamson v. Citrix Online, LLC</i>, 792 F.3d 1339 (Fed. Cir. 2015) (en banc). Because the specification fails to disclose any corresponding structure for performing the required functions associated with these limitations, all Challenged Claims are invalid as indefinite under pre-AIA 35 U.S.C. ¶ 112, ¶ 2 and/or 35 U.S.C. § 112(b).</p>

8. '527 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'527 Patent	Claims 1, 7	wherein the first view is sorted based on at least three of the metadata characteristics	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'527 Patent	Claim 7	“An intelligent television system comprising: ... a processor in communication with the memory, the processor that: executes a VOD data service ... receives content ... determines metadata ... creates a file ... stores the metadata ... receives a criteria ... executes a user interface ...”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

9. '393 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'393 Patent	Claims 1, 10, 16	<p>“determining that a new reporting period has begun”</p> <p>“determines that a new reporting period has begun”</p> <p>“determining that a new reporting period has begun”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'393 Patent	Claims 1, 16	<p>“the processor formatting a report having at least one attribute of the television”</p> <p>“formatting a report having at least one attribute of the television”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'393 Patent	Claims 1, 16	<p>“wherein the report comprises a set of Claim data associated with substantially static attributes of the television”</p> <p>“formatting a report having at least one attribute of the television, wherein the report comprises a set of core data associated with substantially static attributes of the television”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'393 Patent	Claims 1, 10, 16	<p>“the processor determining that a new transmission period has begun”</p> <p>“determines that a new transmission period has begun”</p> <p>“determining that a new transmission period has begun”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'393 Patent	Claims 1, 10, 16	<p>“the processor determining that the stored report is unsent”</p> <p>“determines that the stored report is unsent”</p> <p>“determining that the stored report is unsent”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'393 Patent	Claims 1, 10, 16	<p>“determining one or more of if the report was successfully transmitted and if the report was successfully received”</p> <p>“determines one or more of if the report was successfully transmitted and if the report was successfully received”</p> <p>“determining one or more of if the report was successfully transmitted and if the report was successfully received”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'393 Patent	Claims 2, 11	<p>“formatting the report with first-time data, the first-time data being associated with a first power-up of the television”</p> <p>“the processor formatting the report with first-time data, the first-time data being associated with a first power-up of the television”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'393 Patent	Claims 3, 12	<p>“ upon determining the report contains first-time data, omitting the deleting of the report from the non-volatile memory”</p> <p>“upon determining the report contains first-time data, omitting the deleting of the report from the non-volatile memory”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'393 Patent	Claims 11-15		Claims 11-15 are invalid for lack of definiteness because they improperly mix more than one class of patentable subject matter (method and apparatus). <i>See, e.g., IPXL Holdings, L.L.C. v. Amazon.com, Inc.</i> , 430 F.3d 1377 (Fed. Cir. 2005). More specifically, claims 11-15 recite methods but depend from claim 10, which recites an apparatus.
'393 Patent	Claims 17-20		Claims 17-20 are invalid for lack of definiteness because they improperly mix more than one class of patentable subject matter (method and apparatus). <i>See, e.g., IPXL Holdings, L.L.C. v. Amazon.com, Inc.</i> , 430 F.3d 1377 (Fed. Cir. 2005). More specifically, claims 17-20 recite methods but depend from claim 16, which recites an non-transitory computer medium.

10. '928 Patent

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'928 Patent	Claim 1	“one or more of capturing and receiving data associated with usage of a television including one or more of activity data, application data, application manager data, system time/date information and activity data associated with another component of the television; storing the data”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'928 Patent	Claim 1	“determining whether a report is a first report associated with a first power-up of the television” /	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'928 Patent	Claim 1	“determining a report number for the report, the report number usable to estimate when the report was generated”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'928 Patent	Claim 1	“generating the report by aggregating the one or more of the captured and received data and appending the determined report number to the report, wherein the first report is formatted to include first report information, and subsequent reports include customized information”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'928 Patent	Claim 1		Claim 1 is invalid for lack of definiteness because it improperly mixes more than one class of patentable subject matter (method and apparatus). <i>See, e.g., IPXL Holdings, L.L.C. v. Amazon.com, Inc.</i> , 430 F.3d 1377 (Fed. Cir. 2005). Additionally, dependent claims 2-4 are likewise indefinite since they depend from claim 1.
'928 Patent	Claim 2	“upon completion of the transmitting of the report, receiving a failure indicator associated with transmitting the report”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'928 Patent	Claims 3, 11	<p>“wherein capturing the data further comprises capturing a most used application activity of the television”</p> <p>“wherein the activity monitor identifies a most used activity of the television”</p>	The claims are invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
'928 Patent	Claim 8	“wherein capturing the data further comprises capturing an uninstalled application activity of the television”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'928 Patent	Claim 9	“an activity monitor”	<p>The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.</p> <p>In addition, the “activity monitor” limitation is recited as performing a function (<i>i.e.</i>, “identify usage activity of a television, the usage activity represented by one or more of activity data, application data, application manager data, system time/date information and usage activity data associated with another component of a television, and store information associated with the usage activity in the storage device”), but lacks a structure for performing its stated function. It therefore requires construction as a means-plus-function limitation under pre-AIA 35 U.S.C. § 112 ¶ 6 and/or 35 U.S.C. § 112(f); <i>Williamson v. Citrix Online, LLC</i>, 792 F.3d 1339 (Fed. Cir. 2015) (en banc). Because the specification fails to disclose any corresponding structure for</p>

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
			performing the required function associated with the “an activity monitor,” Claims 9-15 are invalid as indefinite under pre-AIA 35 U.S.C. ¶ 112, ¶ 2 and/or 35 U.S.C. § 112(b).
'928 Patent	Claim 9	“a report generator”	<p>The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.</p> <p>In addition, the “report generator” limitation is recited as performing a function (<i>i.e.</i>, “access the information in the storage device and generate a usage report, the usage report including report number information, the report number information usable to estimate when the report was generated, as determined by assessing whether the report is a first report or a subsequent report, the first report being associated with a first power-up of the television and wherein the first report is formatted to include first report information, and subsequent reports include customized information”), but lacks a structure for performing its stated function. It therefore requires construction as a means-plus-function limitation under pre-AIA 35 U.S.C. § 112 ¶ 6 and/or 35 U.S.C. § 112(b); <i>Williamson v. Citrix Online, LLC</i>, 792 F.3d 1339 (Fed. Cir. 2015) (en banc). Because the</p>

Asserted Patent	Asserted Claim(s)	Claim Term(s)	Invalidity Under 35 U.S.C. § 112
			specification fails to disclose any corresponding structure for performing the required function associated with the “a report generator,” Claims 9-15 are invalid as indefinite under pre-AIA 35 U.S.C. ¶ 112, ¶ 2 and/or 35 U.S.C. § 112(b).
'928 Patent	Claim 9	“wherein the activity monitor is operable to identify usage activity of a television, the usage activity represented by one or more of activity data, application data, application manager data, system time/date information and usage activity data associated with another component of a television, and store information associated with the usage activity in the storage device”	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.
'928 Patent	Claim 9	“wherein the report generator is operable to access the information in the storage device and generate a usage report, the usage report including report number information, the report number information usable to estimate when the report was generated, as determined by assessing whether the report is a first report or a subsequent report, the first report being associated with a first power-up of the television and wherein	The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.

			performing the required function associated with the “an activity monitor,” Claims 16-20 are invalid as indefinite under pre-AIA 35 U.S.C. § 112 ¶ 2 and/or 35 U.S.C. § 112(b).
'928 Patent	Claim 16	“a report generator operable to access the stored information and generate a report, the report including report number information determined by assessing whether the report is a first report associated with a first power-up of the television or a subsequent report associated with customized information, the report number information being usable to estimate when the report was generated”	<p>The claim is invalid under 35 U.S.C. § 112(a) and/or (b) or pre-AIA 35 U.S.C. § 112 ¶¶ 1, 2 because the claim limitations fail to inform those skilled in the art about the scope of the invention with reasonable certainty and/or lacks written description and enabling support.</p> <p>In addition, the “report generator” limitation is recited as performing a function (<i>i.e.</i>, “operable to access the stored information and generate a report”), but lacks a structure for performing its stated function. It therefore requires construction as a means-plus-function limitation under pre-AIA 35 U.S.C. § 112 ¶ 6 and/or 35 U.S.C. § 112(b); <i>Williamson v. Citrix Online, LLC</i>, 792 F.3d 1339 (Fed. Cir. 2015) (en banc). Because the specification fails to disclose any corresponding structure for performing the required function associated with the “a report generator,” Claims 16-20 are invalid as indefinite under pre-AIA 35 U.S.C. ¶ 112, ¶ 2 and/or 35 U.S.C. § 112(b).</p>

VI. SECTION 101 DEFENSES

The asserted claims of the Asserted Patents are invalid because they do not constitute patentable subject matter under 35 U.S.C. § 101. Section 101 broadly provides that “[w]henever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.” 35 U.S.C. § 101. However, this section “contains an important implicit exception: laws of nature, natural phenomena, and abstract ideas are not patentable.” *Alice Corp. Pty. Ltd. v. CLS Bank Int’l*, 134 S. Ct. 2347, 2354 (2014); *see also Bilski v. Kappos*, 561 U.S. 593, 601 (2010) (citation omitted). The asserted claims in this case all claim a patent ineligible abstract idea.

A section 101 analysis consists of a “two-step analytical framework to identify patents that, in essence, claim nothing more than abstract ideas.” *BASCOM Glob. Internet Servs., Inc. v. AT&T Mobility LLC*, 827 F.3d 1341, 1347 (Fed. Cir. 2016).

First, the Court must determine whether the claims are “directed to” a patent-ineligible concept, such as an abstract idea. *Alice*, 134 S. Ct. at 2355. Courts “treat[] analyzing information by steps people go through in their minds, or by mathematical algorithms, without more, as essentially mental processes within the abstract-idea category.” *Synopsys, Inc. v. Mentor Graphics Corp.*, 839 F.3d 1138, 1146 (Fed. Cir. 2016). Method claims that describe concepts “long practiced in our society” have also been found to be directed to an abstract idea. *Intell. Ventures I LLC v. Capital One Bank (USA)*, 792 F.3d 1363, 1369-70 (Fed. Cir. 2015); *Content Extraction & Transmission LLC v. Wells Fargo Bank*, 776 F.3d 1343, 1347 (Fed. Cir. 2014) (“The concept of data collection, recognition and storage is undisputedly well-known. Indeed, humans have always performed these functions.”). And, “the essentially result-focused, functional character of claim language has been a frequent feature of claims held ineligible under

§ 101, especially in the area of using generic computer and network technology to carry out economic transactions.” *Elec. Power Grp., LLC v. Alstom S.A.*, 830 F.3d 1350, 1356 (Fed. Cir. 2016).

Second, the claim limitations are examined for an “inventive concept.” *Alice*, 134 S. Ct. at 2355. “The prohibition against patenting abstract ideas cannot be circumvented by attempting to limit the use of [the idea] to a particular technological environment,” *Id.* at 2358, nor is it sufficient to “append[] . . . well-understood, routine, conventional activities previously engaged in by workers in the field.” *Intell. Ventures I LLC v. Symantec Corp.*, 838 F.3d 1307, 1313 (Fed. Cir. 2016) (quotation omitted). Ultimately, “[c]laims that amount to nothing significantly more than an instruction to apply [an] abstract idea . . . using some unspecific, generic computer and in which each step does no more than require a generic computer to perform generic computer functions do not make an abstract idea patent-eligible.” *Id.* at 1315 (quotations and citations omitted); see *In re TLI Commc’ns LLC Patent Litig.*, 823 F.3d 607, 613 (Fed. Cir. 2016).

The asserted claims of the Asserted Patents recite unpatentable subject matter under 35 U.S.C. § 101 as detailed in Defendant’s Subject Matter Eligibility Contentions, shown in the table below:

Patent	Exhibit
’255 Patent	Exhibit INV-255-C
’168 Patent	Exhibit INV-168-C
’174 Patent	Exhibit INV-174-C
’040 Patent	Exhibit INV-040-C
’384 Patent	Exhibit INV-384-C
’805 Patent	Exhibit INV-805-C
’527 Patent	Exhibit INV-527-C
’325 Patent	Exhibit INV-325-C
’928 Patent	Exhibit INV-928-C
’393 Patent	Exhibit INV-393-C

Pursuant to Section (b) of the Court's Standing Order Regarding Subject Matter

Eligibility Contentions, in addition to the references and materials identified above in Sections III and IV, Defendant further identifies the following documents and materials upon which Defendant may rely for the purposes of demonstrating that each of the Asserted Claims do not qualify as patent-eligible subject matter.

Prior Art Patents, Applications, and Publications

VII. P.R. 3-4 DOCUMENT PRODUCTION

A. Documents Related to the Accused Products/Instrumentalities Under P.R. 3-4(a)

Pursuant to P. R. 3-4(a), Defendant has produced documents bates labeled VIZIO-MMT-00000192-131016, VIZIO-MMT-00139643-143550 and will continue to produce, documentation sufficient to show the operation of the Accused Products that Defendant understands are accused of infringement.

B. Documents Related to Prior Art Under P.R. 3-4(b)

Pursuant to P. R. 3-4(b), Defendant is producing concurrently herewith documents bates labeled VIZIO-MMT-00131017-00139642, reflecting the prior art references identified above and/or in the attached charts in connection with Defendant's P. R. 3-3(a) disclosures. Defendant further reserves the right to supplement their accompanying P.R. 3-4(b) document production

should it later discover additional prior art documents, information, testimony, prior art systems and related documentation, and/or software or hardware code, including but not limited to information provided by third parties after the date of service of these Invalidity Contentions.
