Subject: IPR2024-00367, -00368
Date: Wednesday, February 19, 2025 11:14:42 AM

Counsel,

From the Panel: Before we can rule on the pending motion for a protective order and motion to seal in both IPR2024-00367 and IPR2024-00368, Patent Owner needs to perform the following actions in each proceeding:

First, Patent Owner must refile the confidential declaration (IPR2024-00367 Paper 17 and IPR2024-00368 Paper 21) as an exhibit (we will expunge the improperly filed Paper once that is completed).

Second, pursuant to the proposed protective order, Patent Owner must also file as an exhibit a public version of the declaration. In preparing the public version of the declaration, Patent Owner should only redact information that is confidential. For example, if a sentence contains a mix of confidential and public information, the redaction should only cover the confidential portion. When making the redactions, Patent Owner should take care not to redact any public information, including information made public in the Sur-replies.

Patent Owner should complete these actions no later than February 28, 2025.

Additionally, Patent Owner is authorized to file, no later than February 28, 2025, a revised motion to seal explaining why the specific material redacted should be sealed.

Regards,

Andrew Kellogg,
Deputy Chief Clerk, Trials
Patent Trial and Appeal Board
