4 MHz RF Microneedling

Dialed-In Depth Control

Proprietary customizable delay feature optimizes the time the needle is at ideal treatment temperature.

- Less radiant heat minimizes discomfort
- Reduces the risk of Post-Inflammatory Hyperpigmentation (PIH)

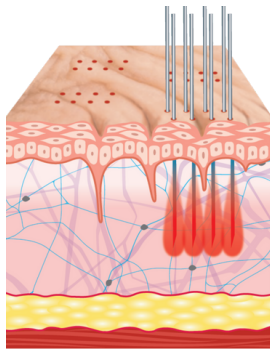

The only handpiece on the market with dialed-in depth control.

- From 0.1mm to 4.0mm for face, neck, and body treatments

Versatile clinical configurations include:

- 6 tip configurations
- Insulated and non-insulated needles with unlimited pulse count
- 25 pin, 49 pin, 64 pin

FDA CLEARED TO PROVIDE EXPONENTIAL OUTCOMES

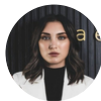

PiXel8 RF Microneedling delivers micro-injuries and controlled heat to promote dermal layer remodeling, targeting symptoms at the source. Promotion of new collagen and elastin leads to continuous improvements over time.

PiXel8 treatments result in smooth and even skin appearance supported by the production of new collagen and elastin.

REAL RESULTS

"Having such advanced technology in our practice sets us apart, we offer high-yield, customizable treatments that deliver immediate, impactful results, setting our practice apart and fostering patient loyalty keeping our practice fully booked and patients returning with confidence and satisfaction."

Ashley Herman, DNP
Founder, Insula Aesthetics
