AORTIC INNOVATIONS LLC’S LPR 4-2(C) DISCLOSURE

Pursuant to the Western District of Tennessee Local Patent Rules (“LPR”), Paragraph 4-2(c) and the Court’s Scheduling Order (D.I. 21), Plaintiff Aortic Innovations LLC (“Aortic”) respectfully submits its claim constructions and supporting evidence for the claim terms, phrases, or clauses contained in the asserted patents that the parties identified pursuant to LPR 4-2(a) and (b).

Aortic bases these constructions upon its current knowledge, understanding, and belief as to the facts and information available as of this date. Aortic reserves the right to further amend these claim constructions as the parties proceed with discovery and work toward the preparation of a final Joint Claim Construction Statement. In particular, Aortic reserves the right to modify or supplement these LPR 4-2 disclosures to facilitate agreement with Edwards, to avoid duplication of terms or phrases, to reflect newly-received information, or in response to any changes in Edwards’s invalidity contentions. To the extent necessary to clarify the issues for the Court or otherwise avoid ambiguity or confusion, Aortic reserves the right to address a word or phrase

AORTIC’S LPR 4-2(C) DISCLOSURES AND EVIDENCE

separately from the terms listed below, including but not limited to if addressing that word or phrase separately will assist in the resolution of the parties' disputes.

Aortic also reserves the right to revise its proposals regarding claim terms in view of Edwards's proposals and as discovery proceeds. Aortic specifically reserves the right to modify or supplement its constructions once it has had an opportunity to review Edwards's constructions. Aortic further reserves the right to rely on intrinsic and extrinsic evidence identified by Edwards and to add additional intrinsic and extrinsic evidence, particularly for constructions on which the parties disagree. Furthermore, Aortic reserves the right to update its citations to additional relevant intrinsic and extrinsic evidence, such as IPR submissions and/or orders; patent and file history citations, inventor testimony and testimony from attorneys responsible for prosecuting the asserted patents, as well as to identify additional dictionary definitions and prior art.

Aortic also reserves the right to amend these disclosures to the extent Edwards supplements or amends its invalidity contentions or claim construction disclosures. Edwards has not served invalidity contentions that comply with the Court's rules and has otherwise not provided sufficient notice as to its invalidity theories in this case as set forth by Aortic in separate correspondence. Aortic continues to be prejudiced by Edwards's discovery deficiencies, and reserves the right to amend or modify its constructions and evidence for at least this reason.

To confirm the proper construction, in addition to the intrinsic and extrinsic evidence cited below, Aortic may rely on the patents and other references cited during the prosecution of the asserted patents and/or in the IPRs filed by Edwards. Aortic also may rely on one or more of the systems and/or publications identified in the Invalidity Contentions to explain the state of the art and/or to show the ordinary meaning of certain claim terms. Furthermore, Aortic may rely on any

public statement of Edwards and/or its representatives, or any current or former employee of Edwards; and/or any information from other sources, including discovery produced in this case. Aortic may also rely on documents produced pursuant to Local Patent Rule 3-2 to the extent those documents evidence the ordinary meaning of claim terms and/or any different meaning assigned to claim terms by the inventors.

As noted below, Aortic may also rely on testimony from one or more expert witnesses, including any identified by Edwards. Such expert evidence may address the relevant field of art, the level of ordinary skill in the art, that the meaning of certain terms is ascertainable with reasonable certainty, the patents' specifications' disclosure regarding the claims and claim terms, the definiteness of certain terms, and the meaning that certain claim terms would have to a person of ordinary skill in the art based on the asserted patents' disclosure and associated prosecution history, including any extrinsic evidence offered by Edwards or Aortic. Aortic may also rely on references cited on the cover of the asserted patents and/or patents, publications, and/or applications incorporated therein. Aortic also may rely on evidence from and statements made by the parties, their experts, and/or the PTAB in IPR2021-01527, IPR2021-01584, IPR2022-00034, IPR2022-00193, IPR2022-00556, IPR2022-00549, IPR2023-01151, IPR2023-01232, and IPR2023-01325. Aortic also reserves the right to rely on Edwards' SAPIEN 3 Ultra demonstrative and related materials, as well as orders, briefing, evidence and the parties' claim construction presentations from the *Aortic I* matter.

In each instance in which "plain and ordinary meaning" is offered, for clarity and to the extent Edwards argues indefiniteness, Aortic contends that the term is not indefinite.

¹ For the “gridded” term proposed for construction by Edwards appearing in claim 8 of the '834 patent, Aortic is no longer asserting '834 patent, claim 8 in the case. Likewise, for the “radially extending” term in claims 1, 3, 5, and 8 of the '310 Patent, Aortic is no longer asserting those claims pending its appeal in the *Aortic I* matter. To the extent that Edwards continues to seek construction of these terms, Aortic reserves the right to provide its disclosures at a later date.

² Aortic believes that the plain meaning of the “inner frame” term should apply. But given that the Court has already construed this term as a “balloon-expandable frame” in the *Aortic I* matter and held that the same meaning of terms should apply across related patents, Aortic does not plan to dispute the Court’s prior construction of “inner frame” for the '310, '634, and '918 Patents at this time, but reserves all rights to challenge the Court’s construction of this term on any appeals.
