FOR THE DISTRICT OF DELAWARE

LITL LLC,

Plaintiff,

v.

DELL TECHNOLOGIES INC. and DELL
INC.,

Defendants.

Civil Action No. 1:23-cv-00121-RGA

MICROSOFT CORPORATION,

Intervenor-Plaintiff,

v.

LITL LLC,

Intervenor-Defendant.

LITL LLC,

Intervenor-Defendant /
Counterclaim Plaintiff in
Intervention,

v.

MICROSOFT CORPORATION,

Intervenor-Plaintiff /
Counterclaim Defendant in
Intervention.

PLAINTIFF'S INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT

Pursuant to the Court's Scheduling Order (D.I. 37) and Delaware Default ESI Rule 4.c, Plaintiff LiTL LLC ("Plaintiff" or "LiTL") hereby serves the attached initial claim charts regarding infringement by Dell of U.S. Patent Nos. 8,289,688, 8,624,844, 9,563,229, 10,289,154, 9,003,315, 9,880,715, 10,564,818, and 8,612,888 (collectively, the "Asserted Patents").

LiTL's claim charts are based upon the documents that Defendants Dell Technologies Inc. and Dell Inc. (collectively "Defendants" or "Dell") provided to LiTL pursuant to the Scheduling Order and Delaware Default ESI Rule 4.b and information reasonably available to LiTL. To date, Defendants have failed to provide LiTL with the "core technical documents" required under the Scheduling Order and Delaware Default ESI Rule 4.b. As detailed in LiTL's letters to Dell dated March 15 and 18, 2024, and as discussed during our meet and confer on March 28, 2024, Dell's core technical document production to date suffers numerous deficiencies. Dell's production consists entirely of service manuals and owner's manuals, which contain materials available on Dell's website. Dell has failed to provide documents sufficient to show how the accused products operate, and in particular, how different physical configurations detect and cause transitions on the user interface between one configuration and another. Dell was obligated to produce these documents as part of its core technical document production and in response to LiTL's Request Nos. 2-4 and 23-25 of its First Set of Requests for Production of Documents. LiTL reserves the right to supplement its initial claim charts to incorporate additional information regarding the accused products as additional information becomes available.

In the claim charts attached as Exhibits A-H, LiTL identifies the following asserted claims from the Asserted Patents:

Asserted Patent	Asserted Claims	Exhibit
8,289,688	11, 17-19, 21, 22, 27, 28, 30-32	A
8,624,844	10, 16, 17	B
9,563,229	1-6, 8-11, 16-21, 23, 25	C
10,289,154	1-9	D
9,003,315	1-16, 18, 23, 24, 27-29, 53-57	E
9,880,715	1, 2, 4-9, 12, 14-17, 19, 20	F
10,564,818	1-20	G
8,612,888	1, 2, 4-9, 18, 19, 22-27	H

LiTL accuses Defendants of infringing the Asserted Patents with respect to the following products (collectively, the “Accused Products”):

No.	Product Line	Product Name
1	Latitude	Latitude 3120 2-in-1
2	Latitude	Latitude 3140 2-in-1

The claim charts attached as Exhibits A-H identify where each element of each Asserted Claim is found within the Latitude 5330 2-in-1. Based upon the information reasonably available to LiTL and the limited documents that Dell has produced to date, LiTL contends that the Latitude 5330 2-in-1 is representative of each Accused Product because each Accused Product operates in substantially the same manner as the Latitude 5330 2-in-1 insofar as the limitations of the asserted claims of the Asserted Patents are concerned. LiTL reserves the right to amend its identification of a representative product pending Dell's production of the additional documents that it is obligated to produce.

LiTL contends that for each asserted claim, unless otherwise specified in the claim charts, each claim limitation is literally present in each of the Accused Products identified above. LiTL reserves the right to supplement its initial claim charts in light of Dell's discovery responses and in

light of additional information identified in discovery. To the extent that Dell contends that the Accused Products do not infringe any claim elements literally, Dell infringes under the Doctrine of Equivalents (“DOE”). LiTL reserves the right to supplement its initial claim charts to detail how the Accused Products infringe the Asserted Patents under DOE.

EXHIBIT H

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

LiTL's provision of supporting evidence for the preamble should not be construed as an admission that the preamble is limiting. Furthermore, the contentions in this chart are based on the limited discovery received from Dell to date. LiTL reserves the right to supplement these infringement contentions as additional information becomes available. Further, to the extent that Dell contends that its products do not infringe any claim elements literally, Dell nevertheless infringes under the Doctrine of Equivalents.

Claim	8,612,888 Claims	Latitude 5330 2-in-1
1[a]	A method for accessing and managing <u>digital media libraries</u> on a streamlined computing device with a plurality of selectable I/O profiles, the method comprising:	This step of method claim 1 is performed by the normal and intended operation of the Latitude 5330 2-in-1 when a user accesses and manages digital media libraries on a streamlined computing device with a plurality of selectable I/O profiles. For example:  View Displayed in a Plurality of Selectable I/O Profiles

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
1[b]	displaying a <u>graphical user interface</u> on the computing device, wherein the <u>graphical user interface</u> comprises at least a <u>plurality of views</u> of <u>digital media content</u>;	The Latitude 5330 2-in-1 displays a graphical user interface on the computing device, wherein the graphical user interface comprises at least a plurality of views of digital media content in the Photos app that Dell makes available on the Latitude 5330 2-in-1. For example: The diagram illustrates two side-by-side screenshots of the Windows Photos app. Each screenshot shows a zebra in a field. A yellow rounded rectangle outlines the entire app window, labeled 'Graphical User Interface'. A red rounded rectangle outlines the zebra image, labeled 'Digital Media Content'. Below the left screenshot, an arrow points to the zebra image with the label 'One of the Plurality of Views'. Below the right screenshot, an arrow points to the zebra image with the label 'Another One of the Plurality of Views'. In the center, between the two screenshots, the text 'Plurality of Views' is displayed.

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

1[c]	providing for transition between the plurality of views in response to selection of an I/O profile;	The Latitude 5330 2-in-1 provides for transition between the plurality of views in response to selection of an I/O profile. For example, the Latitude 5330 2-in-1 provides for transition between the plurality of views in response to the user selecting the I/O profile by configuring the Latitude 5330 2-in-1 between laptop mode and easel mode:  The diagram illustrates the transition of the Dell Latitude 5330 2-in-1 between two modes. On the left, the device is in laptop mode, shown as a silver laptop with a black keyboard and a screen displaying a zebra in a grassy field. An arrow labeled "Selection of I/O Profile" points from the laptop mode to the easel mode on the right. On the right, the device is in easel mode, shown as a tablet with a black bezel and a screen displaying the same zebra image. The transition is indicated by the arrow and the text "Selection of I/O Profile".

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

1[d]	providing for <u>transition</u> between the <u>plurality of views</u> in response to activation of a <u>view selector component</u> configured to permit a user to select one of the <u>plurality of views</u>, wherein providing for the <u>transition</u> between the <u>plurality of views</u> in response to selection of the I/O profile includes:	The Latitude 5330 2-in-1 provides for transition between the plurality of views in response to activation of a view selector component configured to permit a user to select one of the plurality of views. For example, the Latitude 5330 2-in-1 provides for transition between the plurality of views in response to activation of a view selector component configured to permit a user to select one of the plurality of views, as shown above for limitation 1[c], by configuring the Latitude 5330 2-in-1 between laptop mode and easel mode:  The screenshot displays the Windows Settings application with the 'Tablet' settings page open. The left sidebar shows various system settings categories, with 'Tablet' selected. The main content area shows options for 'When I sign in' and 'When I use this device as a tablet'. The 'When I use this device as a tablet' dropdown menu is highlighted with a green rectangular box, and its current selection is 'Always switch to tablet mode'. Below this, there is a link to 'Change additional tablet settings'. On the right side of the window, there is a section titled 'What is tablet mode?' with explanatory text and links for 'Get help' and 'Give feedback'. The text 'View Selector Component' is overlaid in large green font across the center of the screenshot.

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
		
1[e]	permitting the user to rotate a <u>display component</u> of the computing device about a <u>longitudinal axis</u> running along an interface between the <u>display component</u> and a <u>base</u> of the streamlined computing device;	The Latitude 5330 2-in-1 permits the user to rotate a display component of the computing device about a longitudinal axis running along an interface between the display component and a base of the streamlined computing device. For example: 

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
1[f]	wherein rotating the display component about the longitudinal axis from a closed mode to a first physical orientation configures the computing device into a laptop mode having a first physical configuration of the display component and the base, with one of the plurality of views as a default display; and	This step of method claim 1 is performed by the normal and intended operation of the Latitude 5330 2-in-1 when a user rotates the display component about the longitudinal axis from a closed mode to a first physical orientation to configure the computing device into a laptop mode having a first physical configuration of the display component and the base, with one of the plurality of views as a default display. For example: 
1[g]	wherein rotating the display component about the longitudinal axis from the closed mode to a second physical orientation configures the computing device into another display mode having a second physical configuration of the display component and the base, with another one of the plurality of views as the default display;	This step of method claim 1 is performed by the normal and intended operation of the Latitude 5330 2-in-1 when a user rotates the display component about the longitudinal axis from the closed mode to a second physical orientation to configure the computing device into another display mode having a second physical configuration of the display component and the base, with another one of the plurality of views as the default display. For example: 

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

1[h]	associating at least one of a <u>plurality of visual representations</u> with <u>digital media content</u> ;	The Latitude 5330 2-in-1 associates at least one of a plurality of visual representations with digital media content in the Photos app. For example, each of the thumbnails in the Photos app depicted below is associated with underlying digital media content, e.g., a photo.  The screenshot displays the Windows Photos application window. At the top, there's a title bar 'Photos' and a navigation bar with tabs: 'Collection', 'Albums', 'People', 'Folders', and 'Video Editor'. A search bar is present with the placeholder text 'Search people, places, or things...'. Below the navigation bar, there's a promotional banner for 'Microsoft Clipchamp' with the text 'Our new multi-track video edi...' and an 'Install' button. A 'View by' dropdown menu is set to 'Date taken'. The main area shows a grid of photo thumbnails. The first row is labeled 'August 2023' and contains five thumbnails: a zebra, a white chair, a blue bird, a dog's face, and a glass of orange juice. The second row is labeled 'July 2023' and contains three thumbnails: playing cards, chess pieces, and a cupcake. The text 'Plurality of Visual Representations' is overlaid on the right side of the image. The Windows taskbar is visible at the bottom, showing the search bar, task view button, and various application icons. The system tray shows the date and time as '2:41 PM 8/26/2023'.
------	--	--

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

1[i]	<u>executing</u> the association with the at least one of the <u>plurality of visual representations</u> with <u>digital media content</u> in response to selection;	The Latitude 5330 2-in-1 executes the association with the at least one of the plurality of visual representations with digital media content in response to selection. For example, the association between one of the thumbnails and the underlying digital media content, e.g., a photo, is executed when the thumbnail is clicked, as depicted below:  The screenshot displays the Windows Photos application interface. At the top, there are tabs for 'Collection', 'Albums', 'People', 'Folders', and 'Video Editor', along with a search bar. Below the tabs, a Microsoft Clipchamp advertisement is visible. The main area shows a gallery of photos organized by date. The 'August 2023' section contains five thumbnails: a zebra, a white chair, a blue bird, a dog's face, and a glass of orange juice. A green arrow labeled 'Execution' points to the zebra thumbnail. Below this, the 'July 2023' section shows three thumbnails: a playing card, chess pieces, and a Christmas cake. The text 'Plurality of Visual Representations' is overlaid on the right side of the image grid. The Windows taskbar at the bottom shows the search bar, task view button, and several pinned applications, with the system tray displaying the temperature (84°F) and date/time (3:22 PM, 8/26/2023).
------	---	---

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
1[j]	transitioning a display on the computing device to a view of the <u>digital media content</u> in response to the act of executing the association; and	The Latitude 5330 2-in-1 transitions a display on the computing device to a view of the digital media content in response to the act of executing the association. For example, the Photos app transitions to a view of the digital media content, e.g., a photo, after a user clicks a thumbnail: 

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

1[k]	providing for display of <u>user digital media content</u> and <u>referenced digital media content</u> in the view of the digital media content.	The Latitude 5330 2-in-1 provides for display of user digital media content and referenced digital media content in the view of the digital media content. For example, user digital media content (e.g., content provided by the user in the Photos app) can be displayed in the view of the digital media content after a user clicks on the corresponding thumbnail, as depicted below:  Visual Representations of User Digital Media Content
------	--	--

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

User Digital Media
Content

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL’S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, referenced digital media content can be shared by a third-party using the Photos app. For example, the third-party ah3wolf@outlook.com can send photos to the user ahwolf2@outlook.com by selecting the visual representations (e.g., thumbnails) of referenced digital media content and using the ‘Share’ and ‘Mail’ options in the Photos app:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Visual Representations of
Referenced Digital Media
Content

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Visual Representations of
Referenced Digital Media
Content

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the user ahwolf2@outlook.com can then download the shared photos and save them to a location on the user's hard drive, where they are automatically imported from this location into the Photos app:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the referenced digital media content (e.g., content shared with the user by a third party in the Photos app) can be displayed in the view of the digital media content after the corresponding thumbnail is clicked, as depicted below:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
		 Referenced Digital Media Content

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

2	The method according to claim 1, further comprising an act of displaying in the view <u>user digital media content</u> and <u>referenced digital media content</u> in response to the act of <u>executing</u> the association with the at least one of the <u>plurality of visual representations</u>.	The Latitude 5330 2-in-1 displays in the view user digital media content and referenced digital media content in response to the act of executing the association with the at least one of the plurality of visual representations. For example, each of the thumbnails in the Photos app depicted below is associated with underlying digital media content, e.g., a photo.  The screenshot shows the Windows Photos application window. At the top, there's a title bar with 'Photos' and window controls. Below it is a navigation bar with tabs: 'Collection' (selected), 'Albums', 'People', 'Folders', and 'Video Editor'. A search bar is present with the text 'Search people, places, or things...'. The main area displays a grid of photo thumbnails. The first row shows a Microsoft Clipchamp advertisement. Below it, a section for 'August 2023' shows 7 photos. The second row shows a section for 'July 2023' showing 3 photos. The thumbnails include a zebra, a white chair, a basketball hoop, a sunset, a blue bird, a dog's face, and a fruit. The text 'Plurality of Visual Representations' is overlaid on the right side of the image. The Windows taskbar is visible at the bottom with various icons and system information like '85°F' and '3:33 PM 8/26/2023'.
---	---	---

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the association between the user digital media content (e.g., content provided by the user in the Photos app) and its corresponding thumbnail is executed when the thumbnail is clicked, as depicted below:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the Photos app displays in the view user digital media content (e.g., content provided by the user in the Photos app) after a user clicks on the corresponding thumbnail:

User Digital Media
Content

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL’S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the association between the referenced digital media content (e.g., content shared with the user by a third party in the Photos app, as shown above in limitation 1[k]) and its corresponding thumbnail is executed when the thumbnail is clicked, as depicted below:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
		For example, the Photos app displays in the view referenced digital media content (e.g., content shared with the user by a third party in the Photos app) after a user clicks on the corresponding thumbnail:  Referenced Digital Media Content

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

4	The method according to claim 1, further comprising an act of associating the at least one of the <u>plurality of visual representations</u> with a <u>remote service provider</u>.	The Latitude 5330 2-in-1 associates the at least one of the plurality of visual representations with a remote service provider. For example, the Photos app associates the thumbnails with OneDrive when the user saves an album in OneDrive: 
---	--	---

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the album depicted below has been saved to OneDrive:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the Photos app opens OneDrive when the user clicks the highlighted icon:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the thumbnails are associated with OneDrive in the OneDrive web browser:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

5	The method of claim 4, further comprising an act storing the association between the at least one <u>visual representation</u> with the <u>remote service provider</u> in at least one of a device profile and a <u>user profile</u>.	The Latitude 5330 2-in-1 stores the association between the at least one visual representation with the remote service provider in at least one of a device profile and a user profile. For example: For example, the thumbnails are associated with OneDrive in the OneDrive web browser:  Plurality of Visual Representations
---	--	---

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the highlighted icon in the Photos app indicates this album containing the thumbnail is associated with OneDrive:

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
		For example, the Photos app stores the association between the thumbnails and OneDrive in a user's OneDrive Account: 

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
6[a]	The method according to claim 1 further comprising acts of:	Method claim 1 is performed by the normal and intended operation of the Latitude 5330 2-in-1.
6[b]	configuring access to a <u>remote service</u> ; and	The Latitude 5330 2-in-1 configures access to a remote service. For example: For example, the Photos app allows a user to configure access to OneDrive by selecting the user's OneDrive folder as the location to save digital media content (e.g., photos) to: 

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

6[c]	integrating <u>operations</u> provided by the <u>remote service provider</u> into the view of the <u>digital media content</u> .	The Latitude 5330 2-in-1 integrates operations provided by the remote service provider into the view of the digital media content. For example, the Photos app allows a user to save digital media content (e.g., a photo) to the user's OneDrive folder by using the 'See more' and 'Save as' options that are integrated into the view of the digital media content (e.g., a photo), as depicted below:  The screenshot shows a Windows Photos application window titled 'Photo 1.jpg'. The main area displays a photograph of a zebra standing in a field of tall grass. A red rounded rectangle is drawn around the zebra photo. The top of the window has a toolbar with icons for back, rotate, delete, favorite, share, and more options. The bottom of the window shows the Windows taskbar with the search bar, task view button, and several pinned application icons. The system tray on the right shows the date and time as 1:28 PM on 8/30/2023. Digital Media Content

27[c]	an execution component configured to <u>transition</u> the <u>graphical user interface</u> between the <u>plurality of views</u> in response to selection of an I/O profile, wherein selecting the I/O profile includes:	The Latitude 5330 2-in-1 includes an execution component configured to transition the graphical user interface between the plurality of views in response to selection of an I/O profile. For example, the Latitude 5330 2-in-1 provides for transition between the plurality of views in response to the user selecting the I/O profile by configuring the Latitude 5330 2-in-1 between laptop mode and easel mode: The diagram illustrates the transition of the graphical user interface (GUI) between two modes of the Latitude 5330 2-in-1 device. On the left, the device is in laptop mode, with the screen displaying a zebra image. An arrow labeled 'Selection of I/O Profile' points to the right, where the device is in easel mode, also displaying the zebra image. Both screens are labeled 'Graphical User Interface'. View Displayed in a Plurality of Selectable I/O Profiles

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
27[d]	responding to user rotation of a <u>display component</u> of the computing device about a <u>longitudinal axis</u> running along an interface between the <u>display component</u> and a <u>base</u> of the streamlined computing device;	The Latitude 5330 2-in-1 responds to user rotation of a display component of the computing device about a longitudinal axis running along an interface between the display component and a base of the streamlined computing device. For example:
27[e]	responding to rotation of the <u>display component</u> about the <u>longitudinal</u> from a closed mode to a first physical orientation configures the computing device into a <u>laptop mode</u> having a <u>first physical configuration</u> of the <u>display component</u> and the <u>base</u> with <u>one of the plurality of views as a default display</u>; and	The Latitude 5330 2-in-1 responds to rotation of the display component about the longitudinal from a closed mode to a first physical orientation configures the computing device into a laptop mode having a first physical configuration of the display component and the base with one of the plurality of views as a default display. For example, see limitation 1[f].

Claim	8,612,888 Claims	Latitude 5330 2-in-1
27[f]	responding to rotation of the <u>display component</u> about the <u>longitudinal axis</u> from the closed mode to a second physical orientation configures the computing device into another display mode having <u>a second physical configuration</u> of the <u>display component</u> and the <u>base</u> with another <u>one of the plurality of views as the default display</u>;	The Latitude 5330 2-in-1 responds to rotation of the display component about the longitudinal axis from the closed mode to a second physical orientation configures the computing device into another display mode having a second physical configuration of the display component and the base with another one of the plurality of views as the default display. For example, see limitation 1[g].

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

27[g]	a <u>view selector component</u> configured to <u>transition</u> between the <u>plurality of views</u> in response to activation;	The Latitude 5330 2-in-1 includes a view selector component configured to transition between the plurality of views in response to activation. For example, the view selector component is configured to transition the Latitude 5330 2-in-1 between the plurality of views in response to configuring the Latitude 5330 2-in-1 between laptop mode and easel mode:  The screenshot shows the Windows Settings application with the 'Tablet' settings page selected. The left sidebar lists various settings categories, with 'Tablet' highlighted. The main content area shows the 'Tablet' settings, including a dropdown menu for 'When I use this device as a tablet' which is set to 'Always switch to tablet mode'. This dropdown is highlighted with a green box, and a green label 'View Selector Component' is overlaid on the image. Other settings visible include 'When I sign in' and 'What is tablet mode?'. The Windows taskbar is visible at the bottom.

27[h]

a **storage component** configured to store an association between at least one of a **plurality of visual representations** and **digital media content**;

The Latitude 5330 2-in-1 includes a storage component configured to store an association between at least one of a plurality of visual representations and digital media content.

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

For example, the Photos app stores the association between the plurality of visual representations (e.g., thumbnails) and the digital media content (e.g., the underlying photos), as shown above for limitation 1[h].

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL’S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

Claim	8,612,888 Claims	Latitude 5330 2-in-1
27[i]	wherein the execution component is further configured to <u>execute</u> the association with the at least one of the <u>plurality of visual representations</u> with <u>digital media content</u> in response to selection and transition the display to a view of the <u>digital media content</u> in response to the act of <u>executing</u> the association; and	The Latitude 5330 2-in-1 includes the execution component further configured to execute the association with the at least one of the plurality of visual representations with digital media content in response to selection and transition the display to a view of the digital media content in response to the act of executing the association. For example, the association between one of the thumbnails and the underlying digital media content, e.g., a photo, is executed when the thumbnail is clicked, as shown above for limitation 1[i]. For example, the Photos app transitions to a view of the digital media content, e.g., a photo, after a user clicks a thumbnail, as shown above for limitation 1[j].

EXHIBIT H: INITIAL CLAIM CHARTS REGARDING DELL'S INFRINGEMENT OF U.S. PATENT NO. 8,612,888

27[j]	wherein the <u>display component</u> is configured to display <u>user digital media content</u> and <u>referenced digital media content</u> in the view of the digital media content.	The Latitude 5330 2-in-1 includes the display component configured to display user digital media content and referenced digital media content in the view of the digital media content. For example, the display component is configured to display user digital media content (e.g., content provided by the user in the Photos app) in the view of the digital media content: Display Component  Display Component
