DECLARATION OF JERROD HOFF

1. My name is Jerrod Hoff. I am over 18 years of age, a resident of Wisconsin, and competent to make this declaration.

2. I am currently the Vice President of Manufacturing at Mathews Archery, Inc. ("Mathews Archery"), which is located in Sparta, Wisconsin. I make this declaration based on my own knowledge, past experience, and my duties conducted within the ordinary course of business at Mathews Archery. If called upon, I could and would testify to all facts stated in this declaration.

3. I have worked at Mathews Archery, Inc in various roles since May of 2001. From 2001 through 2003 I was the Inventory Manager and responsible for inventory staff, controls, and accuracy. From 2003 through 2006 I was the Software/Materials Manager and responsible for implementation of a new ERP system [redacted] as well as managing the planning and inventory departments. From 2006 through 2012 I was the Director of Operations and responsible for all manufacturing operations. Inventory management and tracking has been under my umbrella of responsibility in each of these roles from 2003 through the present time.

4. As Director of Operations I was involved with and have personal knowledge of the manufacture, inventory and shipping of the Mission Menace and

Mathews Monster bow lines in 2008 and 2009. Mathew McPherson designed both bow models and we began production in 2008. [redacted] That is what we did for the Mission Menace and Mathews Monster. By the end of June 2009 we had made and shipped more than 12,000 Menace bows and more than 11,000 Monster bows.

5. From 2005 through 2006 while working as the Materials Manager and Software Manager, I was responsible for upgrading the ERP software at Mathews Archery to the [redacted] system, and training other employees to use the system. To this day, I am still involved in training employees on business procedures for using the [redacted] system. In addition, I was and continue to be responsible for ensuring proper use of the [redacted] system by employees. I am intimately familiar with how the [redacted] software is used in the normal course of business at Mathews Archery to track the [redacted] Mathews bows.

6. [redacted]. Each bow made and sold by Mathews Archery has an individual serial number which is used to track the sale, shipping, and invoicing for the bow in the [redacted] system. The serial numbers allow Mathews to track, for instance, a bow's shipment date. At the time the Mission Menace and McPherson Monster bows were produced, serial numbers were etched into the bow riser. The serial numbers for each bow were entered into the [redacted] system upon shipment.

7. [redacted] Each sales order includes, among other things, a sales order number, a part number and part description (i.e., indicating the bow make, model, and configuration), and the customer's shipping and billing information. [redacted]

[redacted] Once a sales order is entered, the [redacted] system generates a job order to build the specific bow requested by the customer.

8. When the bow is complete and ready to be shipped an employee in the shipping department verifies that the bow make, model, and configuration matches the job order and generates a shipping list using the [redacted] systems. As part of this process, the employee enters the serial number into the [redacted] system. The [redacted] system generates a shipping list that identifies each bow included in a particular shipment along with its serial number. This document is printed and packaged with the bow for shipment.

9. After the bow is shipped, the billing department generates an invoice for the shipment. [redacted] Each invoice has a unique invoice number and identifies each bow included in an associated shipment by both description and serial number.

10. [redacted] So, once a bow is sold to an end customer, the customer may register the bow with Mathews for our lifetime warranty. If a customer does register a product this would be done by telephone. When a customer calls to register a bow, they provide our service team with the bow serial number. The Mathews employee identifies the [redacted] record for the end customer's bow by serial number and enters the end customer's information into the record for that bow in [redacted] system.

11. Mathews Archery relies on the [redacted] system for its business operations, including warranties, so the accuracy of the records is critical. [redacted] My understanding is that these [redacted] fields are automatically generated and updated by the [redacted] system when data is first entered and when data is modified, so they represent any changes to the data.

12. Appendix A to my declaration is an excel spreadsheet listing 12,110 Mission Menace bows that were produced and shipped by Mathews Archery between September 26, 2008 and June 29, 2009. This spreadsheet was generated at my direction from the [redacted] software by filtering Mathews Archery's sales records for Menace bows with shipped dates prior to June 30, 2009. I have verified that Appendix A is a true and accurate representation of Mathews Archery's records for the Mission Menace bows shipped prior to June 30, 2009.

13. Each row of Appendix A represents an individual bow and records, among other things, a Sales Order #, an Order Date, a bow Serial Number, a Part #, and a Shipped Date. The Part # indicates a bow model and configuration.

[redacted]

14. Mathews Archery's records indicate that a camouflage right-handed Mission Menace bow with serial number 935923 ("Menace '923 bow") was

shipped to Inside Archery on October 27, 2008. Appendix A, page 119 Sales Order 11572 (highlighted row). Based on this serial number, I can estimate that the Menace '923 bow was within the first 1500 Menace bows produced which places this bow in the initial inventory of Menace bows.

15. Appendix B includes copies of the sales order (no. 011572), shipping list (no. 012346), and invoice (no. 0000012691) for the Mission Menace bow that Mathews shipped to Inside Archery on October 27, 2008. These records were obtained from the [redacted] software at my direction. I have verified that Appendix B is a true and accurate representation of the order, shipping, and invoicing documentation for the Menace '923 bow.

16. I have reviewed the December 2008 *Inside Archery* Bow Report article (designated EX2002) and can confirm that the bow and cams photographed in the article are, indeed, a Menace bow and the bow matches the model description of the Menace '923 bow we shipped to Inside Archery according to Appendix A and Appendix B. The bow shown in the article does not appear to have any aftermarket modifications, but looks to be a standard camouflage right-handed Menace bow matching the [redacted] part number.

17. Mathews Archery also has possession of two physical Mission Menace bows that were also produced and shipped around the same time as the Menace '923 bow; a left-handed Mission Menace serial number 940817 ("Menace '817 bow") that was shipped on November 18, 2008, and a right-handed Mission Menace serial number 937455 ("Menace '455 bow") that was shipped on November 4, 2008. Appendix A, page 10, Sales Order 10268 (Menace '817) & page 11, Sales Order 10275 (Menace '455) (rows are highlighted). Based on these serial numbers, I can estimate that the Menace '817 was within the first 2500 Menace bows produced, and that the Menace '455 was within the first 2000 Menace bows produced.

18. To my knowledge Menace '817 and Menace '455 bows were originally sold to a retail store and subsequently to end customers. Mathews Archery obtained these bows from the end customer for compensation. I have personally inspected these two bows and they are Menace bows and the serial numbers appear to be unaltered. Photos of these two bows are copied below from EX2017. Each of these bows bear the same serial number as our shipping records (Appendix A) and match the Make and Model description of the shipping records, i.e., camouflage left-handed (Menace '817) and right-handed (Menace '455) bows.

940817

19. Appendix C to my declaration is an excel spreadsheet listing 11,263 Mathews Monster bows that were produced and shipped by Mathews Archery between February 27, 2009 and June 30, 2009. This spreadsheet was generated at my direction from the [redacted] software by filtering Mathews Archery's sales records for Monster bows with shipped dates on or prior to June 30, 2009. I have verified that Appendix C is a true and accurate representation of Mathews Archery's inventory records for the Mathews Monster bows shipped on or before to June 30, 2009.

20. Each row of Appendix C represents an individual bow and records, among other things, a Sales Order #, an Order Date, a bow Serial Number, a Part #, and a Shipped Date. The Part # indicates a bow model and configuration. For the Mathews Monster there were many different configurations. Part numbers that begin with either [redacted] indicate that the bow was a Monster model bow. Part numbers that include [redacted] indicate a configured product. Other numbers and letters in the part number indicate various draw lengths, draw weights, colors, grips, and strings.

21. Mathews Archery's inventory records indicate that a Mathews Monster bow with serial number 978783 ("Monster '783 bow") was shipped to Inside Archery on March 23, 2009. Appendix C, page 276, Sales Order 418382 (highlighted row). Based on this serial number, I can estimate that the Monster '786 bow was within the first 2000 Monster bows produced which places it within the initial inventory of Monster bows.

22. Appendix D includes copies of the sales order (no. 418382), shipping list (no. 515452), and invoice (no. 0000506692) for the Mathews Monster bow that Mathews shipped to Inside Archery on March 23, 2009. These records were obtained from the [redacted] software at my direction. I have verified that Appendix D is a true and accurate representation of the order, shipping, and invoicing documentation for the Monster '783 bow.

23. I have reviewed the June 2009 *Inside Archery* Bow Report article (designated EX2003) and can confirm that the bow and cams photographed in the article is, indeed, a Monster bow and it matches the model description of the Monster '783 bow we shipped to Inside Archery according to Appendix C and Appendix D. The bow shown in the article does not appear to have any aftermarket modifications, but looks to be a standard

camouflage right-handed 70# bow with a 29-inch draw length matching the shipping description in Appendix D.

24. Mathews Archery also has possession of a physical Mathews Monster bow that was also produced and shipped around the same time as the Monster '783 bow; Mathews Monster serial number 986775 ("Monster '775 bow") that was shipped on April 21, 2009. Appendix C, page 283, Sales Order 418690 (highlighted row). Based on this serial number, I can estimate that the Monster '775 bow was within the first 5500 Monster bows produced. An excerpt from Appendix C showing the shipping information for the Monster '775 bow is copied below.

25. To my knowledge the Monster '775 bow was originally sold to a retail store and then shipped to that store on April 21, 2009. Mathews Archery subsequently obtained this bow. I have personally inspected this bow and it is a Monster bow and the serial number appears to be unaltered. Photographs of this bow are copied below from EX2017. This bow bears the same serial number as our shipping records (Appendix C) and matches the Make and Model description of the shipping records, i.e., camouflage right-handed 27-inch draw length Monster bow.

26. I have reviewed the figures in U.S. Patent No. 8,683,989. Based on my personal knowledge of the Mission Menace bows and a visual inspection of

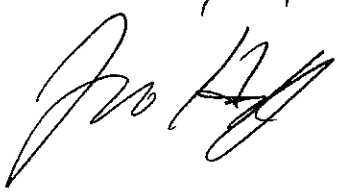

the cams of the Menace '817 and Menace '455 bows, I can confirm that the Mission Menace cams are substantially the same as those depicted in FIGS. 1 and 2 of U.S. Patent No. 8,683,989. In addition, based on my personal knowledge of the Mathews Monster bows and a visual inspection of the cams of the Monster '775 bow, I can confirm that the Mathews Monster cams are substantially the same as those depicted in FIGS. 4 and 5 of U.S. Patent No. 8,683,989.

27. While it is not possible to know with certainty which employees entered any particular data into the [redacted] system, I do have personal knowledge about the data entry processes that employees at Mathews Archery regularly employ in the course of business to track bow sales, shipping, invoicing and I know that only trained and authorized employees are involved in these data entry processes. This knowledge is based on my responsibility in overseeing the upgrade to Mathew's ERP system that included adding the [redacted] system, my responsibility in supervising the employee training on the system, and my continued responsibility to ensure the inventory system is properly managed and to address any employee questions regarding the use of the [redacted] system. I have no reason

to believe that any of the records in Appendices A-D were created in any manner different from the routine practices that Mathews Archery employs.

28. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct to the best of my knowledge. I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the full knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.
