

Mastering biology to advance human health

Our mission

We deliver powerful, reliable tools that fuel scientific discoveries and drive exponential progress to master biology to advance human health. Cited in more than 8,200 research papers, our innovative single cell, spatial, and in situ technologies enable discoveries across oncology, immunology, neuroscience, and more. Our talented, dedicated science professionals have a distinguished record of creating innovative instruments, reagents, and software that analyze biological systems at a resolution that matches the complexity of biology.

Our culture

To succeed in our mission, we have a unique culture at 10x. Like all great companies, we strive to be an awesome place to work, delight our customers, exercise good judgment, act with integrity, and believe in accountability. We believe there are a few things that set 10x apart. We invite you to read our culture document to learn more.

Working at 10x

Behind every breakthrough is an extensive network of talented individuals contributing their unique perspectives, backgrounds, and areas of expertise. This kind of collaboration is

essential to building a strong and effective workplace, and it's our goal to create an inclusive environment that reflects the diversity of the communities and the goals we serve. The discoveries we make now, as a team, will lead to better technologies, better treatments, and a better future.
