Subject: Error in MAX_QP value in reference software

Karsten, Experts,

I just came across a minor bug that exists in the latest versions of the reference software. The maximum value for QP is defined as:

```
#define MAX_QP      52
```

The value should be 51.

Having a quick look at where this is used, I believe that the usage throughout the software is correct, only the value needs to be reduced by 1 to be consistent with the draft.

Best regards,
Anthony
