Subject: [jvt-experts] question on default weighting for bi-prediction

Experts,

I've been reading over Section 10.4.3 on Implicit bi-predictive weighting.
My question is have we specified somewhere the default weighting for B-bipredicted macroblocks when both weighted_bipred_explicit_flag and weighted_bipred_implicit_flag are zero?

Thanks much.

Sincerely,
Peter Borgwardt, VideoTele.com
