Subject: [jvt-experts] JVT-E149r2 has been uploaded

Dear All,

JVT-E149r2 is based on my review of JVT-E146d5ncm. Some text revised in response to questions in JVT-E146d5ncm was added and I noticed a few differences from JVT-E149r1.

- Modifications relative to JVT-E146d5ncm.
- Small editorial changes
- Caught some omissions from JVT-E149, and JVT-E149r1
- Added details linking Annex A and HRD DPB verifier.
- Revised description of "Sliding Window" mode

TECHNICAL changes:

1. 7.3.2.1 added syntax element **max_sliding_window_size_minus_one**
2. 7.4.2.1 added syntax element **max_sliding_window_size_minus_one**
3. 7.4.3.2 include mention of **max_sliding_window_size_minus_one**
4. 8.3.6.1 general description from JVT-E149r1
5. 8.3.6.6 Sliding window operation
6. A.6.1 must comply with DPB verifier with capacity determined by the level
7. A.6.2 replaced reference memory with decoded picture buffer memory
8. A.6.3 Defined capacity of DPB in frames used in HRD
9. C.1.2.(1-4) Reorder and modify text of operations: Decode, Mark, Remove, Add. Conformance is only tested in addition step this ordering simplifies the description.
10. C.1.2.5 Conformance references DPB capacity calculated in A.6.3

Regards,

Louie
