Subject: [jvt-experts] MB AFF - some more results
Attachments: tempete.xls; footer.txt

I am forwarding here some more results for MB AFF obtained by using the reference software:

Tempete Sequence over typically used bit rates of 1.5 Mbps to 7.5 Mbps for full res (720x480):

The test conditions were:

- > 150 frames, 2 ref frames, qp values 24, 28,32 and 36, Qp value for B
- > frame = Qp value for P + 2, CAVLC, RD optimization ON, No ABT, No
- > Bipredictive weighting and Temporal Direct Mode Type.
