UNDER ARMOUR, INC. v. ATHALONZ, LLC
IPR2024-00636
ATHALONZ EXHIBIT 2014

CLAIM CHART FOR U.S. PATENT NO. 11,013,291 FOR ATHALONZ PRODUCTS

Athalonz provides the following claim chart subject to all reservations, objections, statements, and disclaimers set forth herein and in Athalonz's Infringement Contentions, as well as any amendment, supplement, or modification thereof, which are incorporated herein by reference in their entirety. These claim charts also incorporate by reference Athalonz's Complaint.

Athalonz contends that the shoes charted below are representative of other Athalonz Products, as set forth in Athalonz's infringement contentions.

Athalonz has prepared this claim chart identifying, as specifically as possible at this stage of discovery, where each element of each asserted claim is found within the Athalonz. Athalonz contends that each element of the Asserted Claims is practiced literally by such Athalonz Products. To the extent Under Armour disputes literal infringement, Athalonz contends that any such disputed element is practiced by the Accused Products under the doctrine of equivalents. Athalonz reserves the right to update these charts, upon confirmation through discovery to the extent more information relating to the Athalonz Products or identification of additional Athalonz products becomes available.

This claim chart is not intended to and does not construe the claims of the '291 Patent and does not limit Athalonz's contentions. Athalonz specifically reserves the right to modify and supplement this claim chart. This claim chart is provided to illustrate exemplary information practically available prior to discovery.

CLAIM CHART FOR U.S. PATENT NO. 11,013,291

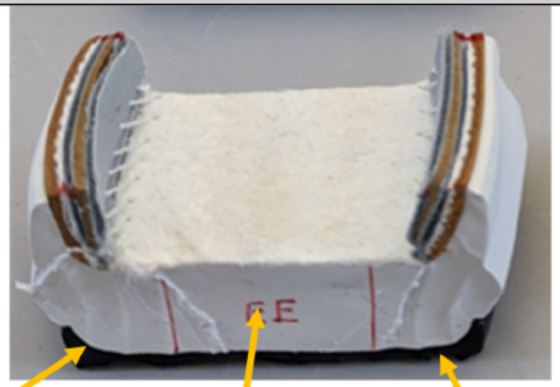

Claim	Exemplary Evidence of Practice
1[pre]: A shoe comprises:	To the extent the preamble is limiting, each of the Athalonz Products is a shoe. For example, the Athalonz EnVe Golf Shoe ("EnVe") is a shoe.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[a]: an upper section;	The Athalonz Products have an upper section. For example, the EnVe has an upper section, as shown below.

UNDER ARMOUR, INC. v. ATHALONZ, LLC

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[b]: a midsole coupled to the upper section;	The Athalonz Products have a midsole coupled to the upper section. For example, the EnVe has a midsole. The midsole is coupled to the upper section with stitching and glue, as shown below.

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[c]: an insole positioned proximal to the midsole and within the upper section; and	The Athalonz Products have an insole positioned proximal to the midsole and within the upper section. For example, the EnVe has an insole. When the shoe is assembled, the insole is positioned proximal to the midsole and is within the upper section. Shown below is the insole and midsole.

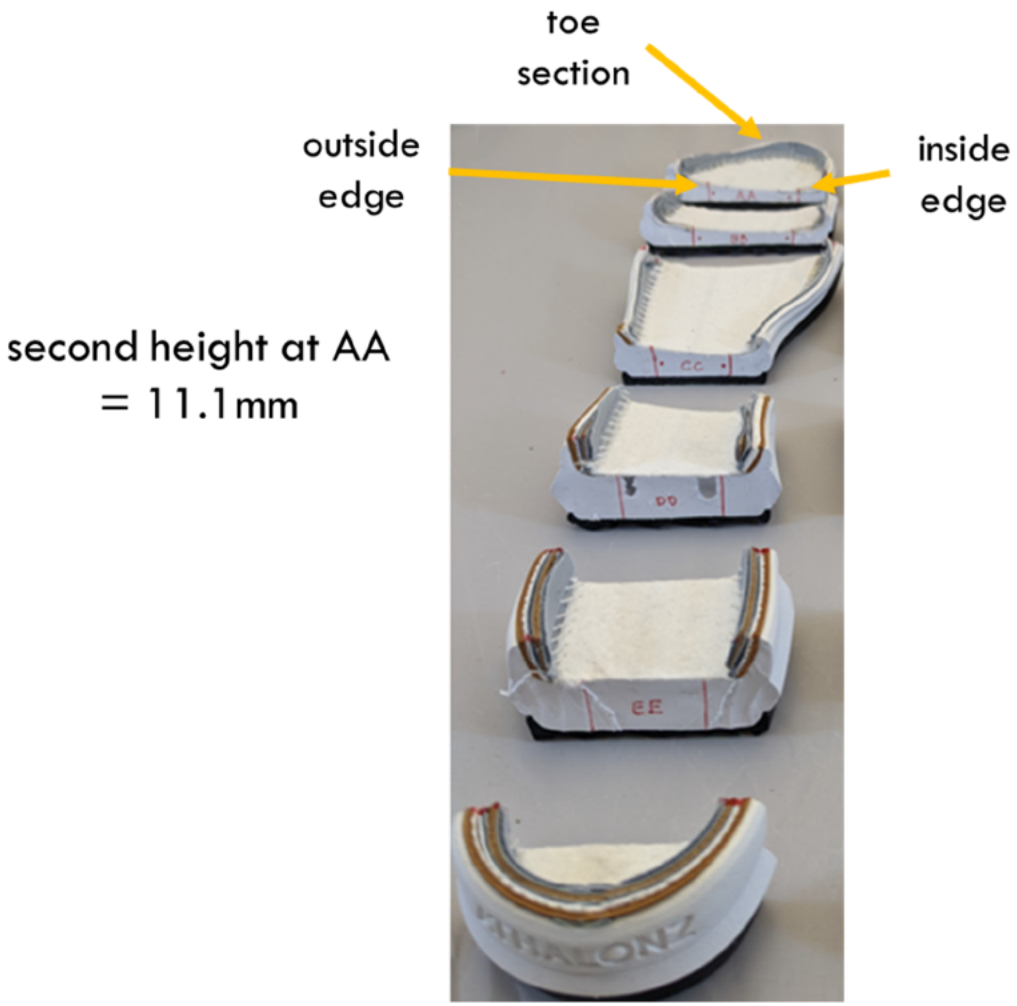

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[d]: a bottom outsole coupled to the midsole,	The Athalonz Products have a bottom outsole coupled to the midsole. For example, the EnVe has a bottom outsole coupled to the midsole, as shown below.

Claim	Exemplary Evidence of Practice
	  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[e]: wherein a combination of the midsole, the insole, and the bottom outsole form an athletic positioning shape, wherein the athletic positioning shape has:	In the Athalonz Products, a combination of the midsole, the insole, and the bottom outsole form an athletic positioning shape. For example, the athletic positioning shape (which is further described below) is shown below in the EnVe:

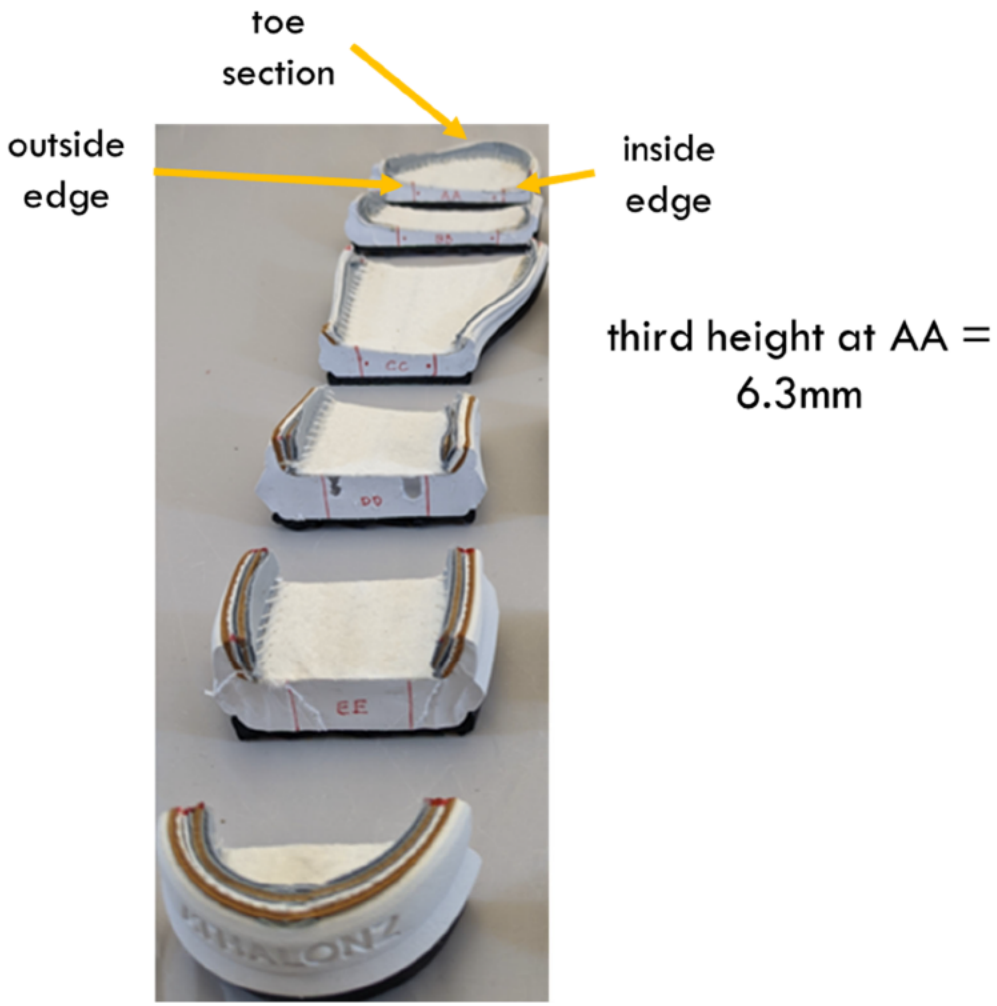

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[f]: a first height at an inside edge	The Athalonz Products have a first height at an inside edge and at an outside edge of the shoe along a heel section of the shoe.

Claim	Exemplary Evidence of Practice
and at an outside edge of the shoe along a heel section of the shoe,	For example, the EnVe has a first height of 20.6mm at an inside edge and at an outside edge of the shoe along a heel section of the shoe, as shown below. 

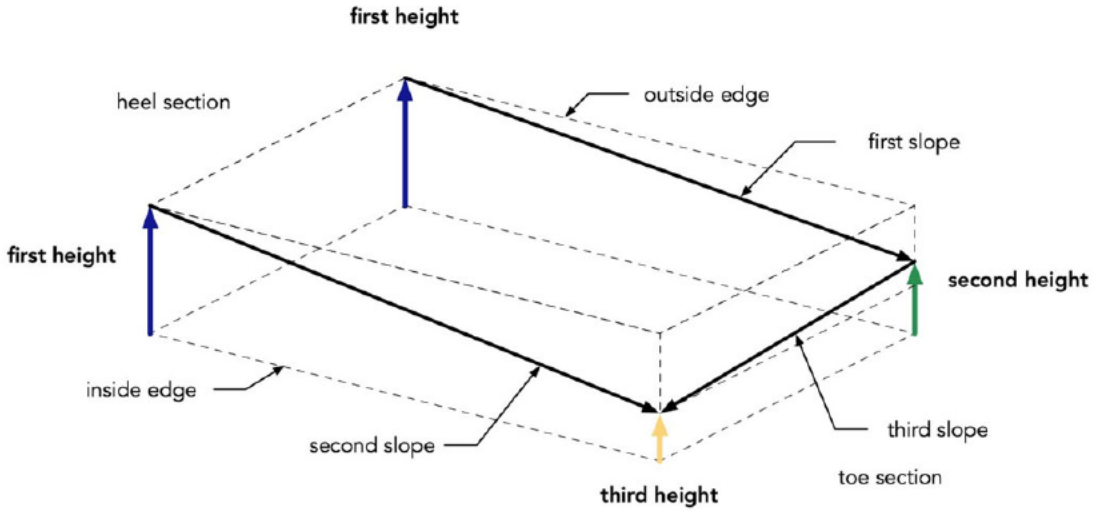

Claim	Exemplary Evidence of Practice
	To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[g]: a second height on the outside edge of the shoe at a toe section of the shoe,	The Athalonz Products have a second height on the outside edge of the shoe at a toe section of the shoe. For example, the EnVe has a second height of 11.1mm on the outside edge of the shoe at a toe section of the shoe, as shown below.

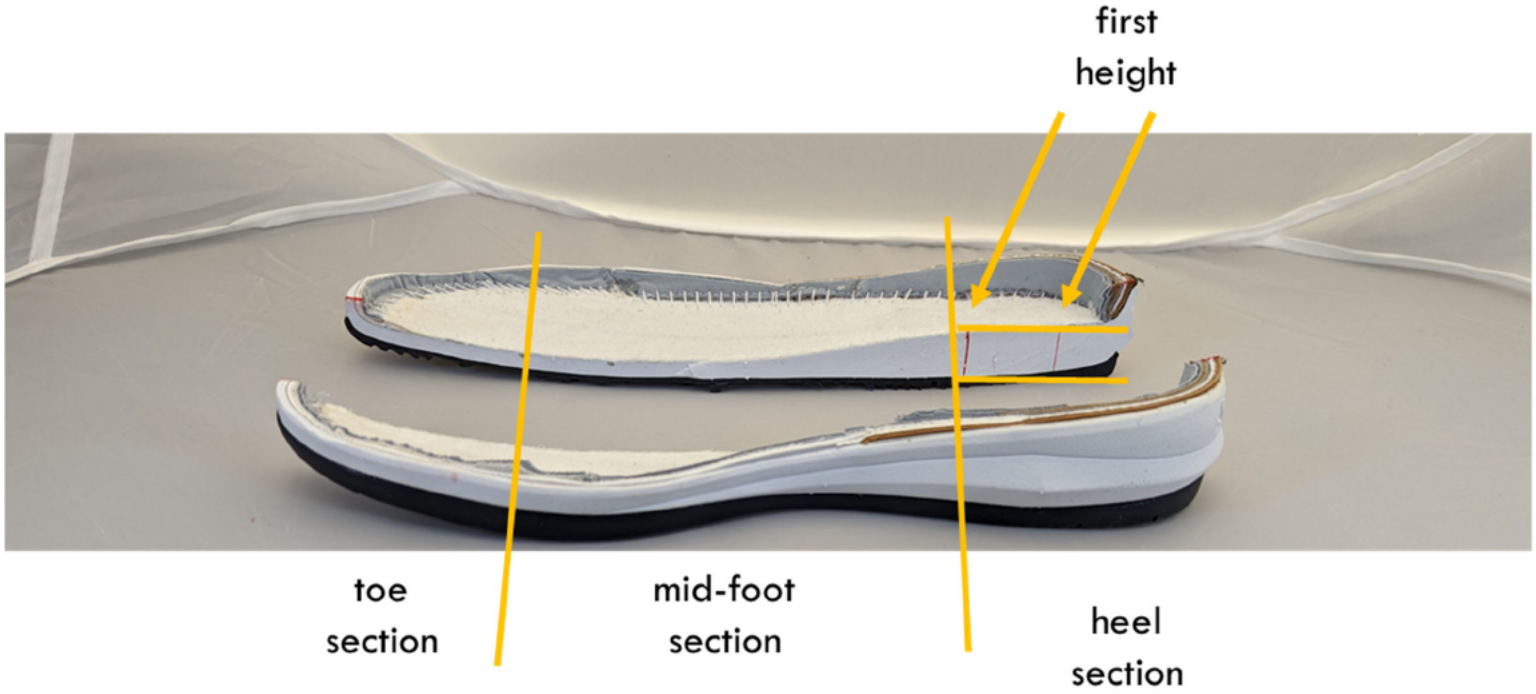

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

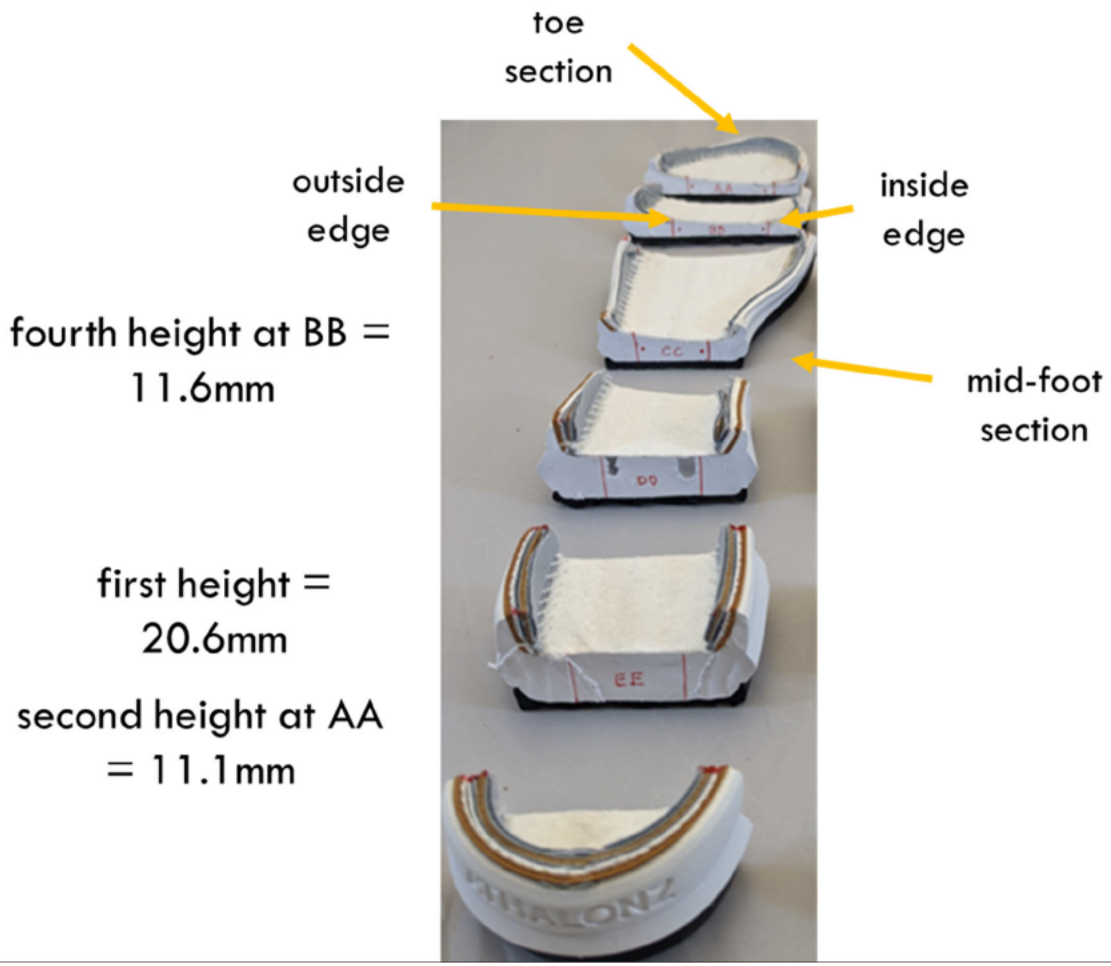

Claim	Exemplary Evidence of Practice
1[h]: a third height on the inside edge of the shoe at the toe section of the shoe, and	The Athalonz Products have a third height on the inside edge of the shoe at the toe section of the shoe. For example, the EnVe has a third height of 6.3mm on the inside edge of the shoe at a toe section of the shoe, as shown below.

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

UNDER ARMOUR, INC. v. ATHALONZ, LLC
IPR2024-00636
ATHALONZ EXHIBIT 2014
Page 13 of 70

Claim	Exemplary Evidence of Practice
1[i]: the first height being greater than the second height and the second height being greater than the third height, wherein a first slope is formed by the first height and the second height, wherein a second slope[] is formed by the first height and the third height, and wherein a third slope is formed by the second height and the third height.	The Athalonz Products have the first height being greater than the second height and the second height being greater than the third height, wherein a first slope is formed by the first height and the second height, wherein a second slope[] is formed by the first height and the third height, and wherein a third slope is formed by the second height and the third height. For example, the EnVe has a first height of 20.6mm, which is greater than a second height of 11.1mm, which is greater than a third height of 6.3mm. A first slope is formed by the first height and the second height, a second slope is formed by the first height and the third height, and a third slope is formed by the second height and the third height, as shown below.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
2: The shoe of claim 1 further comprises: the athletic positioning shape including the heel section, a mid-foot section, and a toe section, wherein the mid-foot section is between the heel section and the toe section, and wherein the heel section has the first height throughout.	The Athalonz Products have the athletic positioning shape including the heel section, a mid-foot section, and a toe section, wherein the mid-foot section is between the heel section and the toe section, and wherein the heel section has the first height throughout. For example, the EnVe has a heel section, a mid-foot section, and a toe section, wherein the mid-foot section is between the heel section and the toe section, as shown below. The heel section has the first height throughout.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

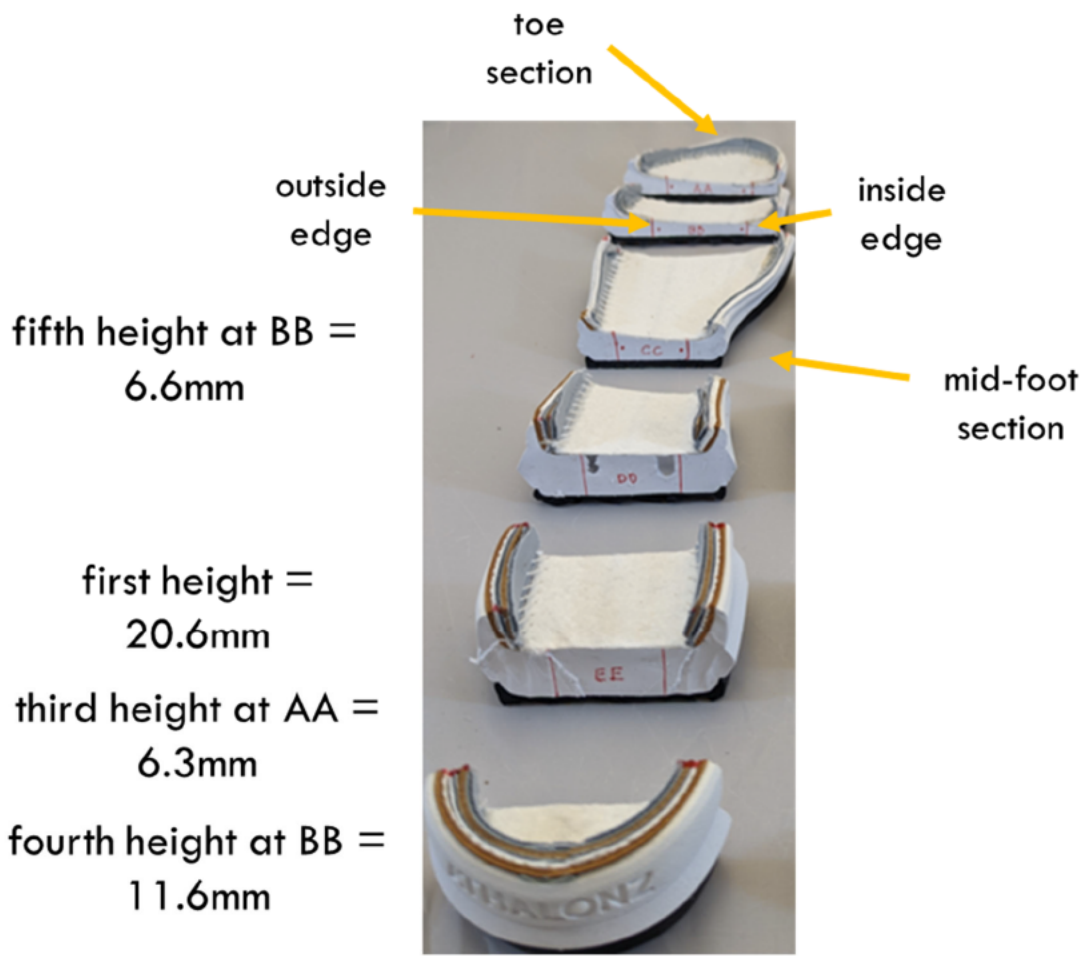

Claim	Exemplary Evidence of Practice
3: The shoe of claim 2 further comprises: a fourth height at the outside edge of the shoe at a transition from the mid-foot section to the toe section, wherein the fourth height is greater than the second height and wherein the fourth height is less than the first height.	The Athalonz Products have a fourth height at the outside edge of the shoe at a transition from the mid-foot section to the toe section, wherein the fourth height is greater than the second height and wherein the fourth height is less than the first height. For example, the EnVe has a fourth height of 11.6mm at a transition from the mid-foot section to the toe section. The fourth height of 11.6mm is greater than the second height of 11.1mm and less than the first height of 20.6mm. 

Claim	Exemplary Evidence of Practice
	To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

EXHIBIT G

CLAIM CHART FOR U.S. PATENT NO. 11,064,760 BY ATHALONZ PRODUCTS

Athalonz provides the following infringement claim chart subject to all reservations, objections, statements, and disclaimers set forth herein and in Athalonz's Infringement Contentions, as well as any amendment, supplement, or modification thereof, which are incorporated herein by reference in their entirety. These claim charts also incorporate by reference Athalonz's Complaint.

Athalonz contends that the shoes charted below are representative of other Athalonz Products, as set forth in Athalonz's infringement contentions.

Athalonz has prepared these infringement claim charts identifying, as specifically as possible at this stage of discovery, where each element of each asserted claim is found within the Accused Products. Athalonz contends that each element of the Asserted Claims is practiced literally by such Accused Products. To the extent Under Armour disputes literal infringement, Athalonz contends that any such disputed element is practiced by the Accused Products under the doctrine of equivalents. Athalonz reserves the right to update these charts, upon confirmation through discovery to the extent more information relating to the Accused Products or identification of additional infringing products becomes available.

This claim chart is not intended to and does not construe the claims of the '760 Patent and does not limit Athalonz's infringement contentions. Athalonz specifically reserves the right to modify and supplement this claim chart. This preliminary claim chart is provided to illustrate exemplary information practically available prior to discovery.

Page 23 of 70

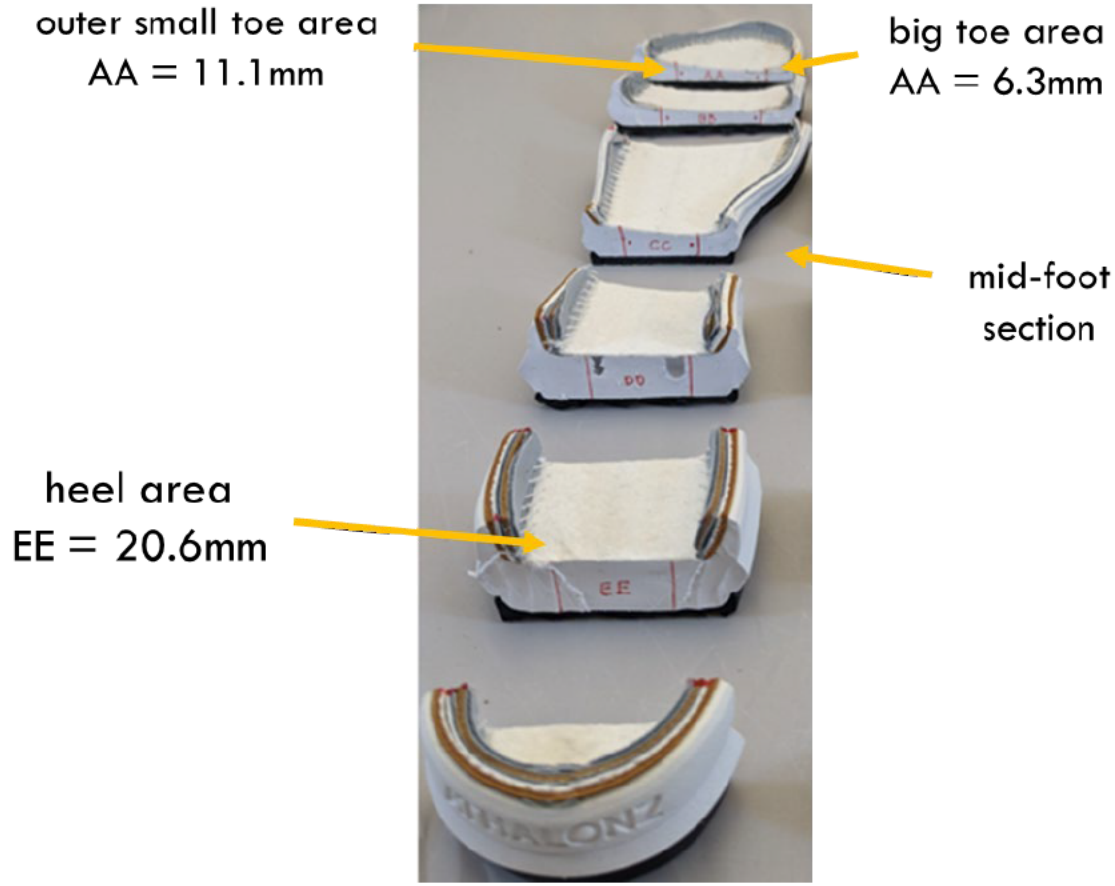

CLAIM CHART FOR U.S. PATENT NO. 11,064,760

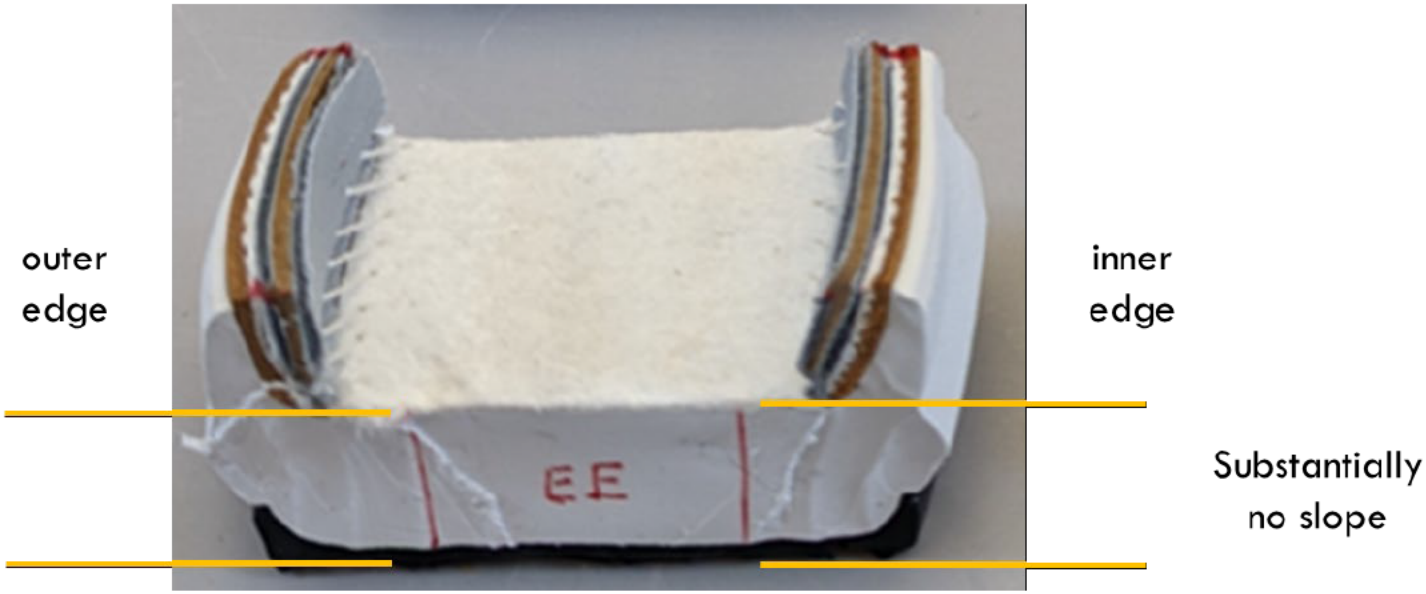

Claim	Exemplary Evidence of Practice
1[pre]: A pair of shoes comprises:	To the extent the preamble is limiting, each of the Athalonz Products is a pair of shoes. For example, the Athalonz EnVe Golf Shoes ("EnVe") are a pair of shoes.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[a]: a left foot shoe including;	The Athalonz Products have a left foot shoe. In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons; therefore in certain images below the right foot shoe is pictured and is representative of the left foot shoe For example, the EnVe has a left foot shoe.

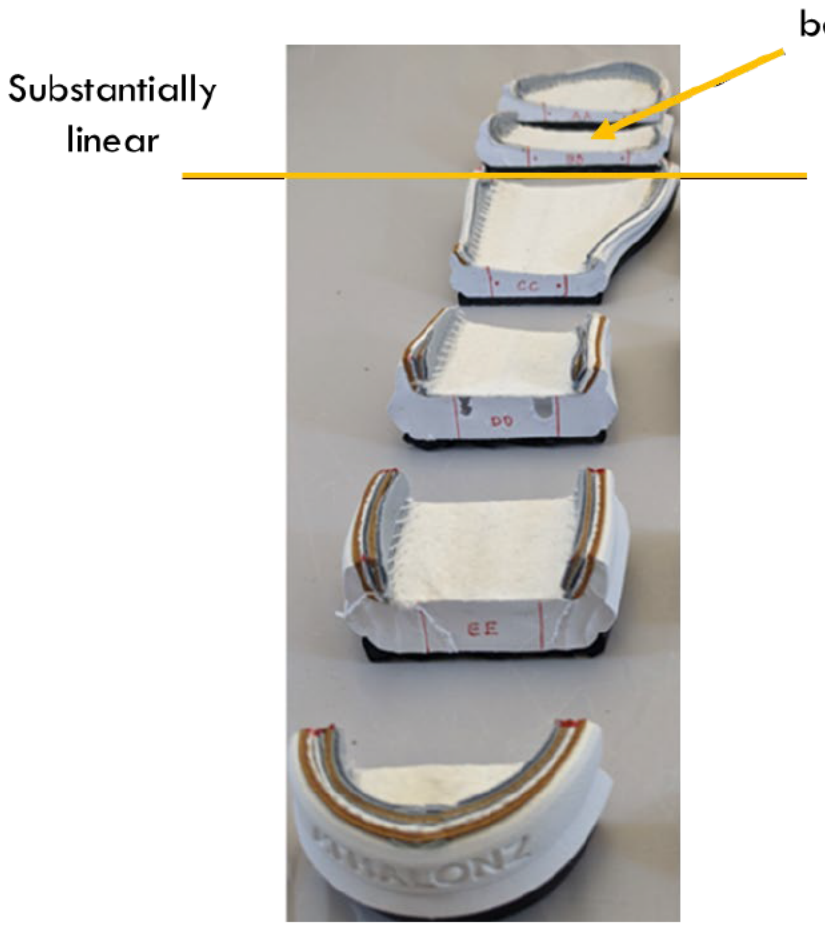

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[b]: a left upper shoe portion; and	The Athalonz Products have a left upper shoe portion. For example, the EnVe has a left upper shoe portion, as shown below.

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[c]: a left sole coupled to the left upper shoe portion;	The Athalonz Products have a left sole coupled to the left upper shoe portion. For example, the EnVe has a left sole coupled to the left upper shoe portion using stitching and glue, as shown below.

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[d]: wherein a foot platform of the left sole provides an athletic positioning of a left big toe area at a lower position than a left heel area of the left shoe and at a lower position	In the Athalonz Products, a foot platform of the left sole provides an athletic positioning of a left big toe area at a lower position than a left heel area of the left shoe and at a lower position than an outer small toe area of the left shoe. For example, the EnVe has a foot platform of the left sole and a left heel area of a left shoe, as shown below. The foot platform of the left sole provides an athletic positioning of a left big toe area at a lower position than a left heel area of the left shoe and at a lower position than an outer small toe area of the left shoe. The left heel area has a height of 20.66mm, the left big toe area is at a lower position at a height of 6.3mm and the outer small toe area of the left shoe has a height of 11.1mm, as shown below.

Claim	Exemplary Evidence of Practice
than an outer small toe area of the left shoe, wherein,	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[e]: from an inner edge to an outer edge of the	In the Athalonz Products, from an inner edge to an outer edge of the left shoe, the left heel area has substantially no slope.

Claim	Exemplary Evidence of Practice
left shoe, the left heel area has substantially no slope, and wherein,	For example, in the EnVe, from an inner edge to an outer edge of the left shoe, the left heel area has substantially no slope, as shown below.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[f]: from the inner edge to the outer edge of the left shoe at a cross section at a ball of a ball, a bottom of the left sole is	In Athalonz Products, from the inner edge to the outer edge of the left shoe at a cross section at a ball of a ball, a bottom of the left sole is substantially linear. For example, in the EnVe, from the inner edge to the outer edge of the left shoe at a cross section at a ball of a ball, a bottom of the left sole is substantially linear, as shown below. The bottom of the shoe is also shown, which is substantially linear.

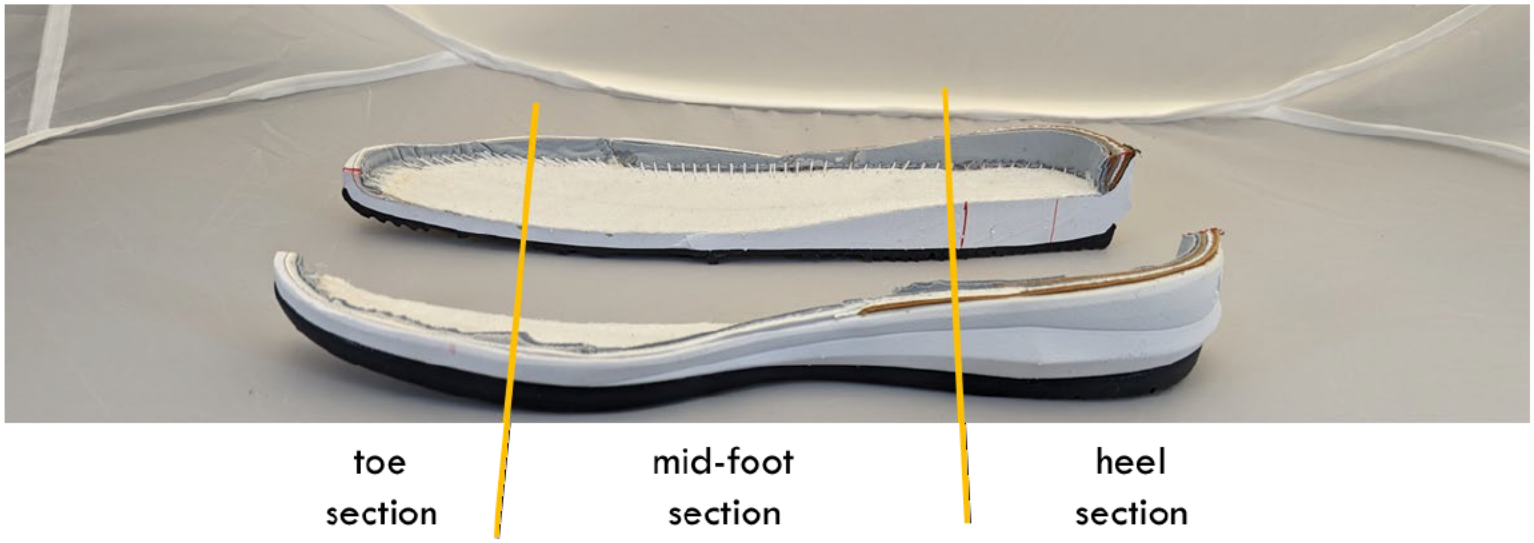

Claim	Exemplary Evidence of Practice
substantially linear; and	  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[g]: a right foot shoe including:	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons.

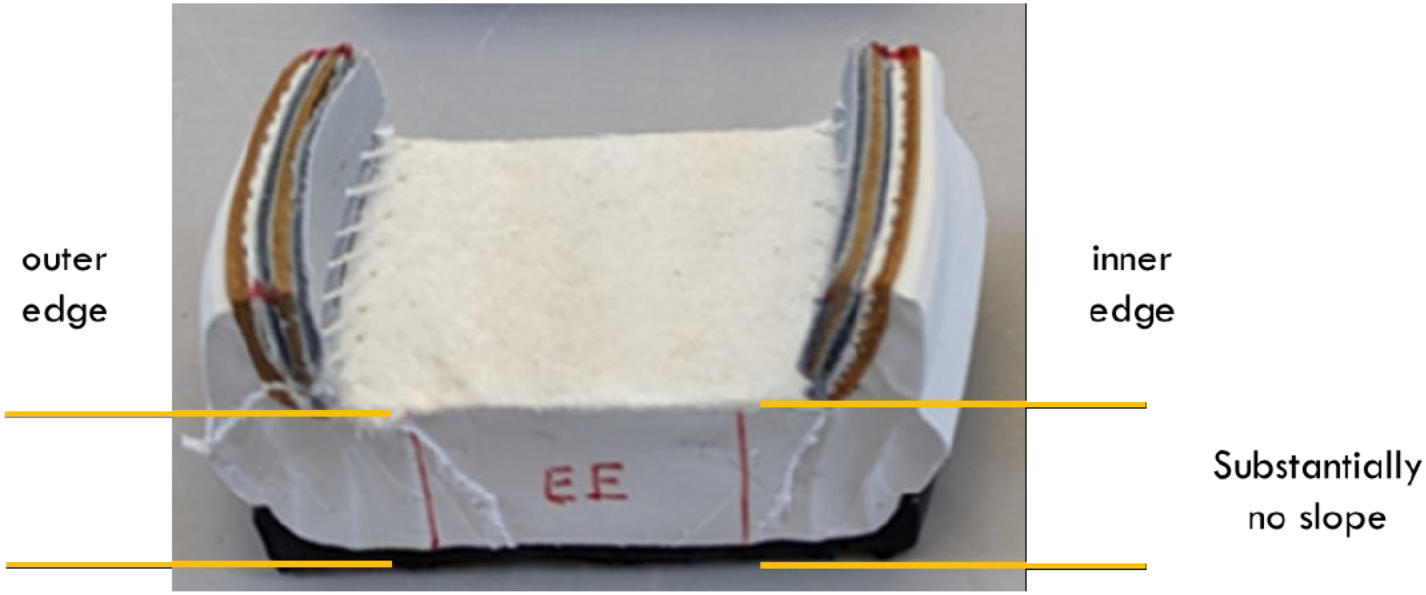

Claim	Exemplary Evidence of Practice
	right foot shoe  *See* claim 1[a]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[h]: a right upper shoe portion; and	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 1[b]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[i]: a right sole coupled to the	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons.

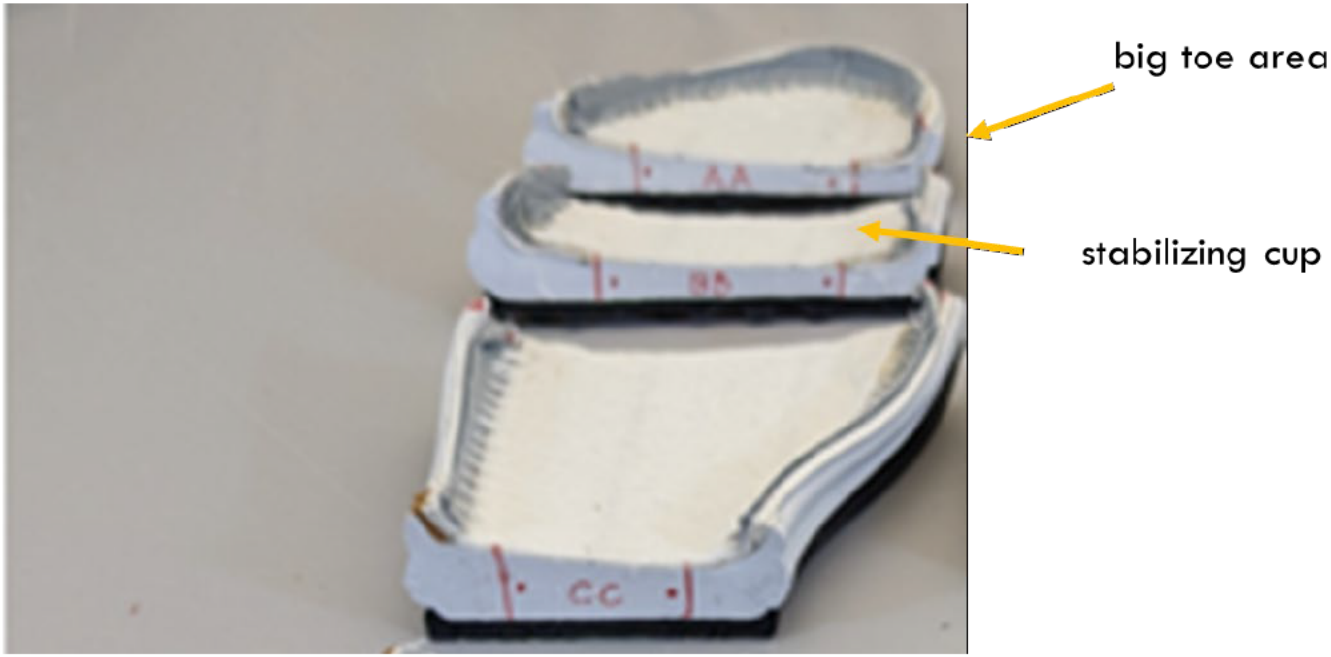

Claim	Exemplary Evidence of Practice
right upper shoe portion;	*See* claim 1[c]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[j]: wherein a right foot platform of the right sole provides an athletic positioning of a right big toe area of the right shoe at a lower position than a right heel area of the right shoe and at a lower position than an outer small toe area of the right shoe and wherein,	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 1[d]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[k]: from an inner edge to an outer edge of the right shoe, the right heel area has substantially no slope, and wherein,	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 1[e]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

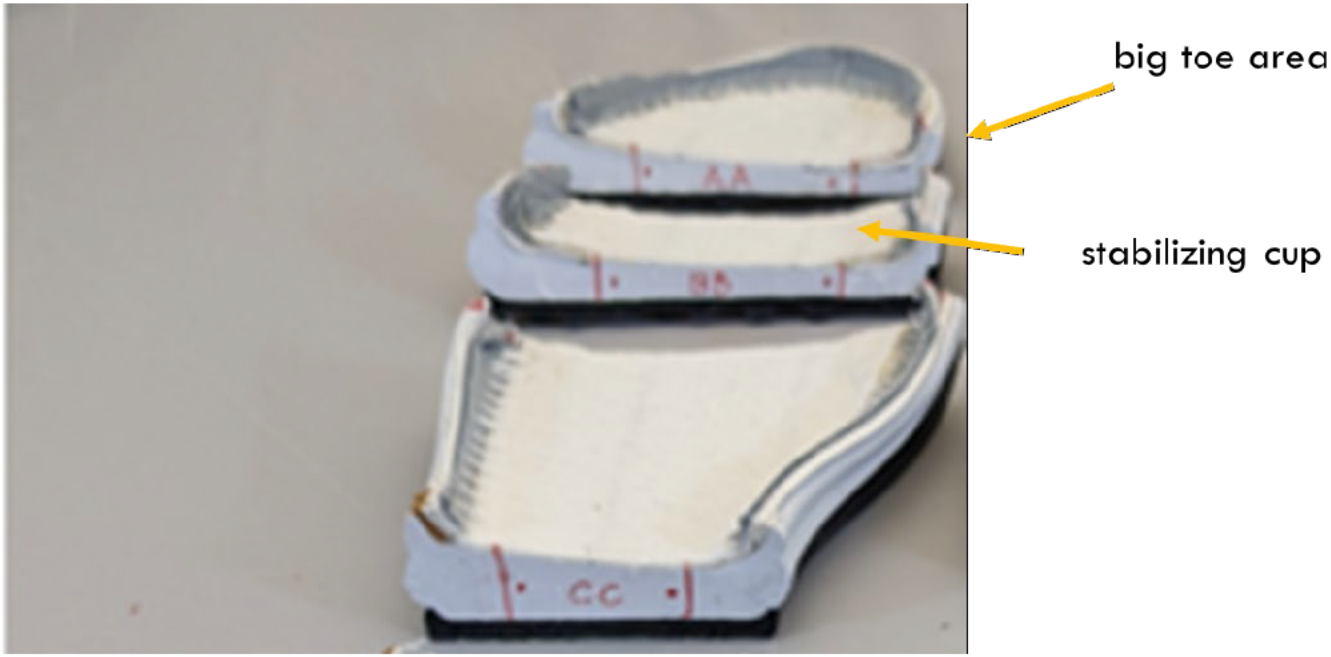

Claim	Exemplary Evidence of Practice
1[l]: from the inner edge to the outer edge of the right shoe at a cross section at a ball of a ball, a bottom of the right sole is substantially linear.	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 1[f]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
2[pre]: The pair of shoes of claim 1, wherein the foot platform of the left sole comprises:	The Athalonz Products have a foot platform of the left sole. *See* claim 1[d]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
2[a]: a heel section that, from the inner edge to the outer edge of the left shoe, has substantially no slope;	The Athalonz Products have a heel section that, from the inner edge to the outer edge of the left shoe, has substantially no slope. *See* claim 1[e]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
2[b]: a toe section that provides the left big toe area of the left shoe at the lower position than the left heel area of the left shoe and at the lower position than the outer small toe area of the left shoe; and	The Athalonz Products have a toe section that provides the left big toe area of the left shoe at the lower position than the left heel area of the left shoe and at the lower position than the outer small toe area of the left shoe. *See* claim 1[d]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
2[c]: a mid-foot section having a	The Athalonz Products have a mid-foot section having a shape to transition from the heel section to the toe section.

Claim	Exemplary Evidence of Practice
shape to transition from the heel section to the toe section.	For example, the EnVe has a mid-foot section with a shape to transition from the heel section to the toe section, as shown below.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
3: The pair of shoes of claim 2, wherein the heel section of the foot platform of the left sole comprises: a heel platform that includes a surface having substantially no slope from the inner edge to the outer edge of the left shoe and for a length of the surface, wherein, when the left shoe is worn, the heel platform supports a left heel of a wearer.	The Athalonz Products have the heel section of the foot platform of the left sole comprises: a heel platform that includes a surface having substantially no slope from the inner edge to the outer edge of the left shoe and for a length of the surface, wherein, when the left shoe is worn, the heel platform supports a left heel of a wearer. For example, in the EnVe, the heel section of the left sole comprises a heel platform that includes a surface having substantially no slope from the inner edge to the outer edge of the left shoe, as shown below. When the left shoe is worn, the heel platform supports a left heel of a wearer.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
4: The pair of shoes of claim 2, wherein the toe section of the foot platform of the left sole comprises: a stabilizing cup in the left big toe area, wherein, when the left shoe is worn, the stabilizing cup functions to, at least one of, stabilize and position a left big toe of a wearer in a particular location in the left big toe area.	The Athalonz Products have the toe section of the foot platform of the left sole comprises: a stabilizing cup in the left big toe area, wherein, when the left shoe is worn, the stabilizing cup functions to, at least one of, stabilize and position a left big toe of a wearer in a particular location in the left big toe area. For example, the EnVe has a toe section with a stabilizing cup in the left big toe area, as shown below. When the shoe is worn, the stabilizing cup functions to stabilize and position a left big toe of a wearer in a particular location in the left big toe area.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
5: The pair of shoes of claim 2, wherein the toe section of the foot platform of the left sole comprises: a stabilizing cup in the left big toe area, wherein, when the left shoe is worn, the stabilizing cup functions to, at least one of, stabilize and position a left ball-of-foot of a wearer in a particular location in the left big toe area.	The Athalonz Products have the toe section of the foot platform of the left sole comprises: a stabilizing cup in the left big toe area, wherein, when the left shoe is worn, the stabilizing cup functions to, at least one of, stabilize and position a left ball-of-foot of a wearer in a particular location in the left big toe area. For example, the EnVe has a toe section with a stabilizing cup in the left big toe area, as shown below. When the shoe is worn, the stabilizing cup functions to stabilize and position a left ball-of-foot of a wearer in a particular location in the left big toe area.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
6: The pair of shoes of claim 1, wherein the foot platform of the left sole comprises: a specific bottom that includes one of: a sport specific tread pattern; a spike pattern; a sliding coupling pattern; and a cleat pattern.	In the Athalonz Products, the foot platform of the left sole comprises a specific bottom that includes one of a sport specific tread patter; a spike pattern; a sliding coupling pattern; and a cleat pattern. For example, in the EnVe, the left foot platform comprises a specific bottom that includes a golf cleat pattern, as shown below.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
7[pre]: The pair of shoes of claim 1, wherein the foot platform of the right sole comprises:	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 2[pre]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
7[a]: a heel section that, from the inner edge to the outer edge of the right shoe, has substantially no slope;	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 2[a]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
7[b]: a toe section that provides the right big toe area of the right shoe at the lower position than the right heel area of the right shoe and at the lower position than the outer small toe area of the right shoe; and	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 2[b]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
7[c]: a mid-foot section having a shape to transition from the heel section to the toe section.	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 2[c]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
8: The pair of shoes of claim 7, wherein the heel section of the foot platform of the right sole comprises: a heel platform that includes a surface having substantially no slope from the inner edge to the outer edge of the right shoe and for a length of the surface, wherein, when the right shoe is worn, the heel platform supports a right heel of a wearer.	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 3. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
9: The pair of shoes of claim 7, wherein the toe section of the foot platform of the right sole comprises: a stabilizing cup in the right big toe area, wherein, when the right shoe is worn, the stabilizing cup functions to, at least one of, stabilize and position a right big toe of a wearer in a particular location in the right big toe area.	In the Athalonz Products, for purposes of this claim, the left foot shoe and right foot shoe function in the same manner and meet the claim for the same reasons. *See* claim 4. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

EXHIBIT H

CLAIM CHART FOR U.S. PATENT NO. 10,674,786 FOR ATHALONZ PRODUCTS

Athalonz provides the following infringement claim chart subject to all reservations, objections, statements, and disclaimers set forth herein and in Athalonz's Infringement Contentions, as well as any amendment, supplement, or modification thereof, which are incorporated herein by reference in their entirety. These claim charts also incorporate by reference Athalonz's Complaint.

Athalonz contends that the shoes charted below are representative of other Athalonz Products, as set forth in Athalonz's infringement contentions.

Athalonz has prepared these infringement claim charts identifying, as specifically as possible at this stage of discovery, where each element of each asserted claim is found within the Athalonz Products. Athalonz contends that each element of the Asserted Claims is practiced literally by such Athalonz Products. To the extent Under Armour disputes literal infringement, Athalonz contends that any such disputed element is practiced by the Athalonz Products under the doctrine of equivalents. Athalonz reserves the right to update these charts, upon confirmation through discovery to the extent more information relating to the Athalonz Products or identification of additional infringing products becomes available.

This claim chart is not intended to and does not construe the claims of the '786 Patent and does not limit Athalonz's infringement contentions. Athalonz specifically reserves the right to modify and supplement this claim chart. This preliminary claim chart is provided to illustrate exemplary information practically available prior to discovery.

CLAIM CHART FOR U.S. PATENT NO. 10,674,786

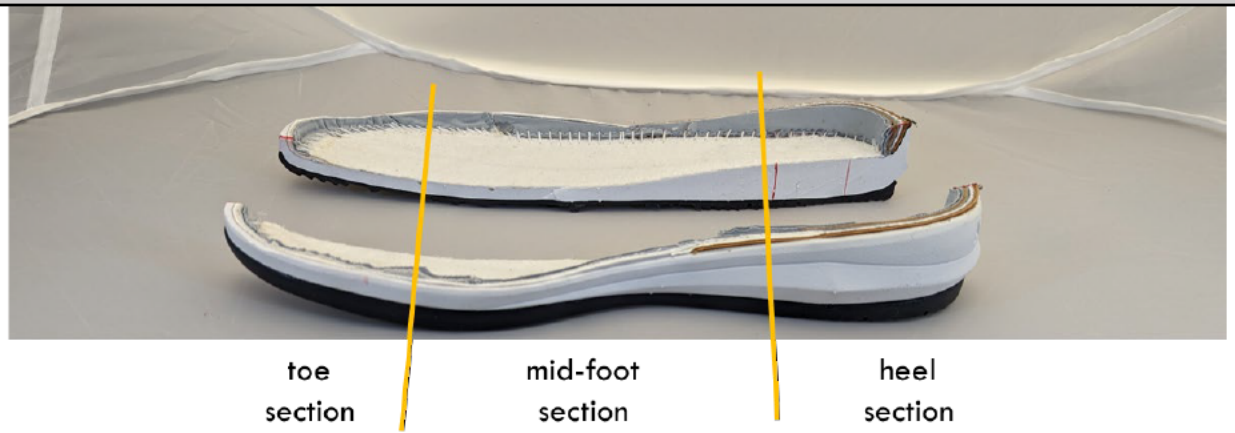

Claim	Exemplary Evidence of Practice
1[pre]: An apparatus comprises:	To the extent the preamble is limiting, each of the Athalonz Products is an apparatus. For example, the Athalonz EnVe Golf Shoe ("EnVe") is a shoe with an insole, which is an apparatus.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[a]: a heel platform section that has a uniform height from an outer edge to an inner edge of the apparatus at	The Athalonz Products each have a heel platform section that has a uniform height from an outer edge to an inner edge of the apparatus at the rear edge of the apparatus. The Athalonz Products have a heel platform section. For example, the EnVe has a heel platform section as shown below. The heel platform section is at the rear edge of the apparatus. The EnVe has a uniform height from an outer edge to an inner edge of the apparatus at the rear edge of the apparatus.

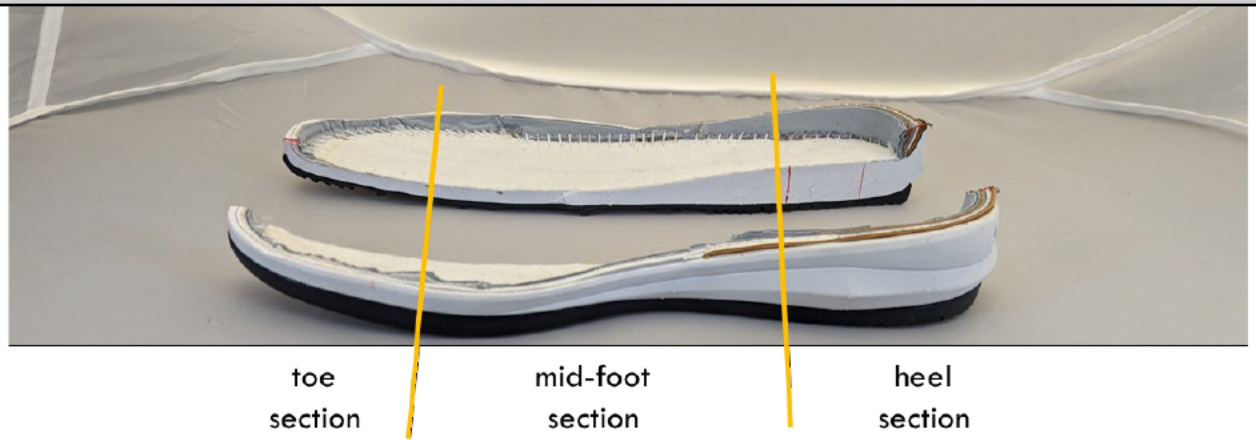

Claim	Exemplary Evidence of Practice
the rear edge of the apparatus	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
1[b]: wherein the uniform height establishes a reference slope from the outer edge to the inner edge, the reference slope substantially parallel to a bottom surface of the apparatus	In the Athalonz Products, the uniform height establishes a reference slope from the outer edge to the inner edge, the reference slope substantially parallel to a bottom surface of the apparatus. For example, the EnVe has a reference slope from the outer edge to the inner edge that is substantially parallel to a bottom surface of the apparatus.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[c]: a mid-foot section juxtaposed to the heel platform section; and	The Athalonz Products have a mid-foot section juxtaposed to the heel platform section. For example, the EnVe has a mid-foot section juxtaposed to the heel platform section.

ATHALONZ EXHIBIT 2014
Page 50 of 70

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[d]: a toe section juxtaposed to the mid-foot section	The Athalonz Products have a toe section juxtaposed to the mid-foot section. For example, the EnVe has a toe section juxtaposed to the mid-foot section.

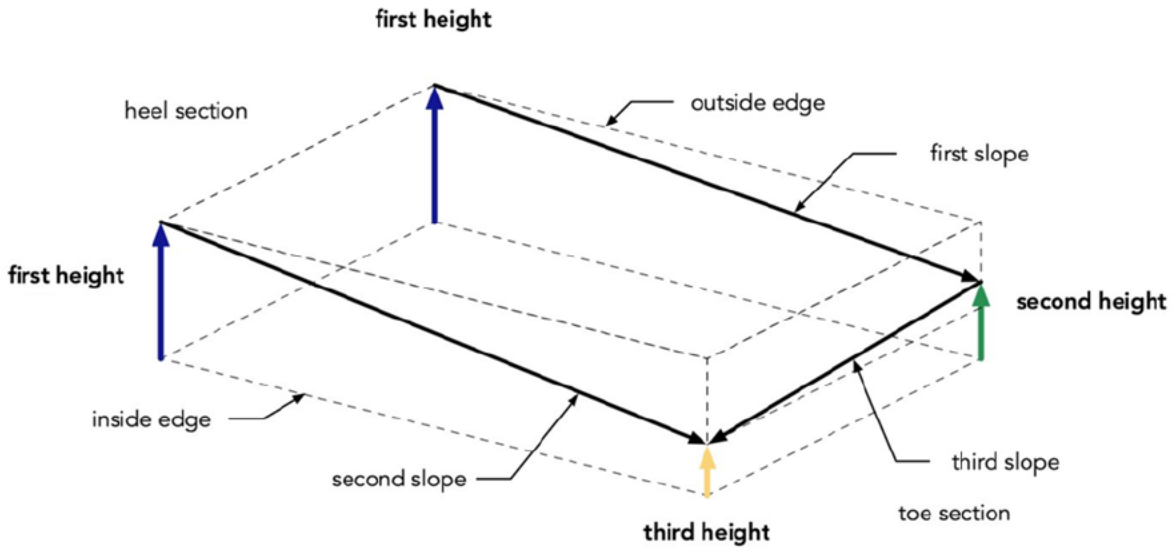

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
1[e]: wherein the mid-foot section and the toe section form an angled support platform that has a first slope along the inner edge of the apparatus from a front edge of the apparatus to the heel platform	In the Athalonz Products, the mid-foot section and the toe section form an angled support platform that has a first slope along the inner edge of the apparatus from a front edge of the apparatus to the heel platform section, a second slope along the front edge of the apparatus from the inner edge to the outer edge of the apparatus, and a third slope along the outer edge of the apparatus from the front edge of the apparatus to the heel platform section. This is shown below:

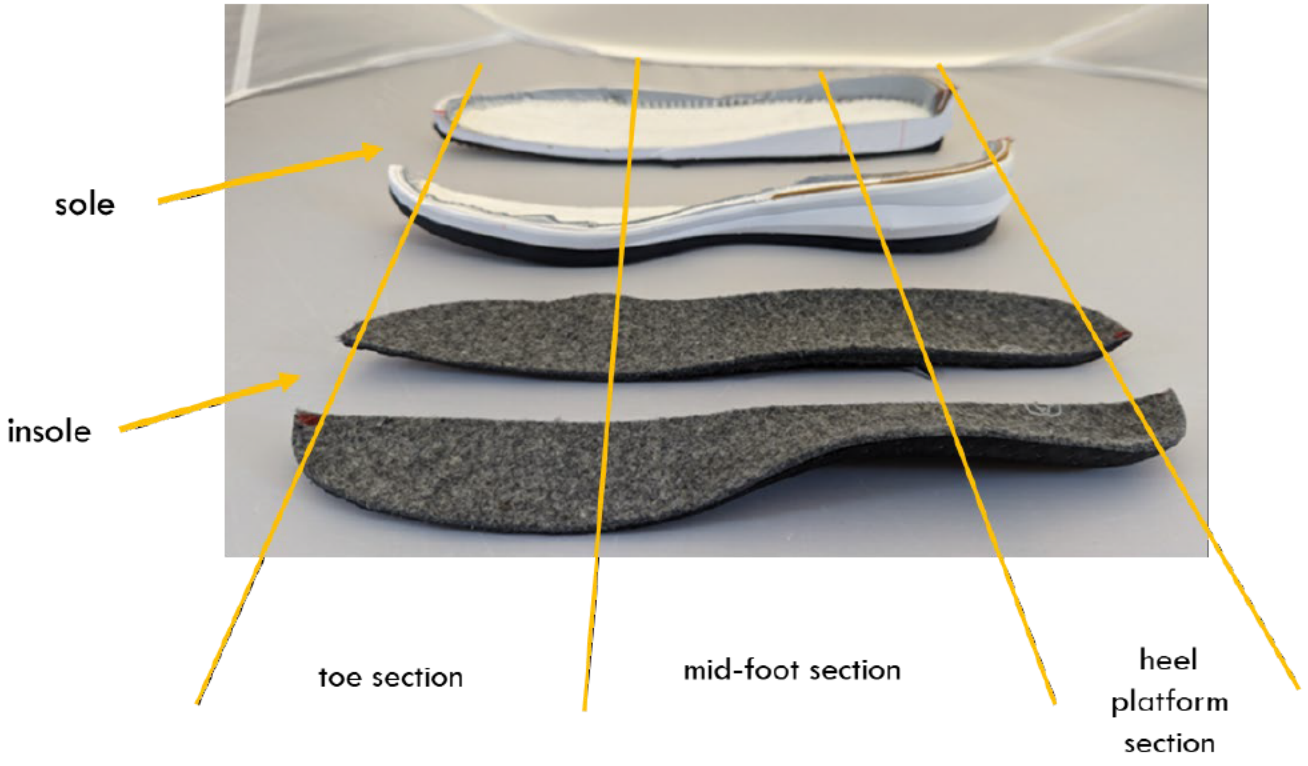

Claim	Exemplary Evidence of Practice
section, a second slope along the front edge of the apparatus from the inner edge to the outer edge of the apparatus, and a third slope along the outer edge of the apparatus from the front edge of the apparatus to the heel platform section, the first slope, second slope, and the third slope each greater than the reference slope	 For example, in the EnVe, the first height is 20.6mm, the second height is 11.1mm, and the third height is 6.3mm. This is shown below:

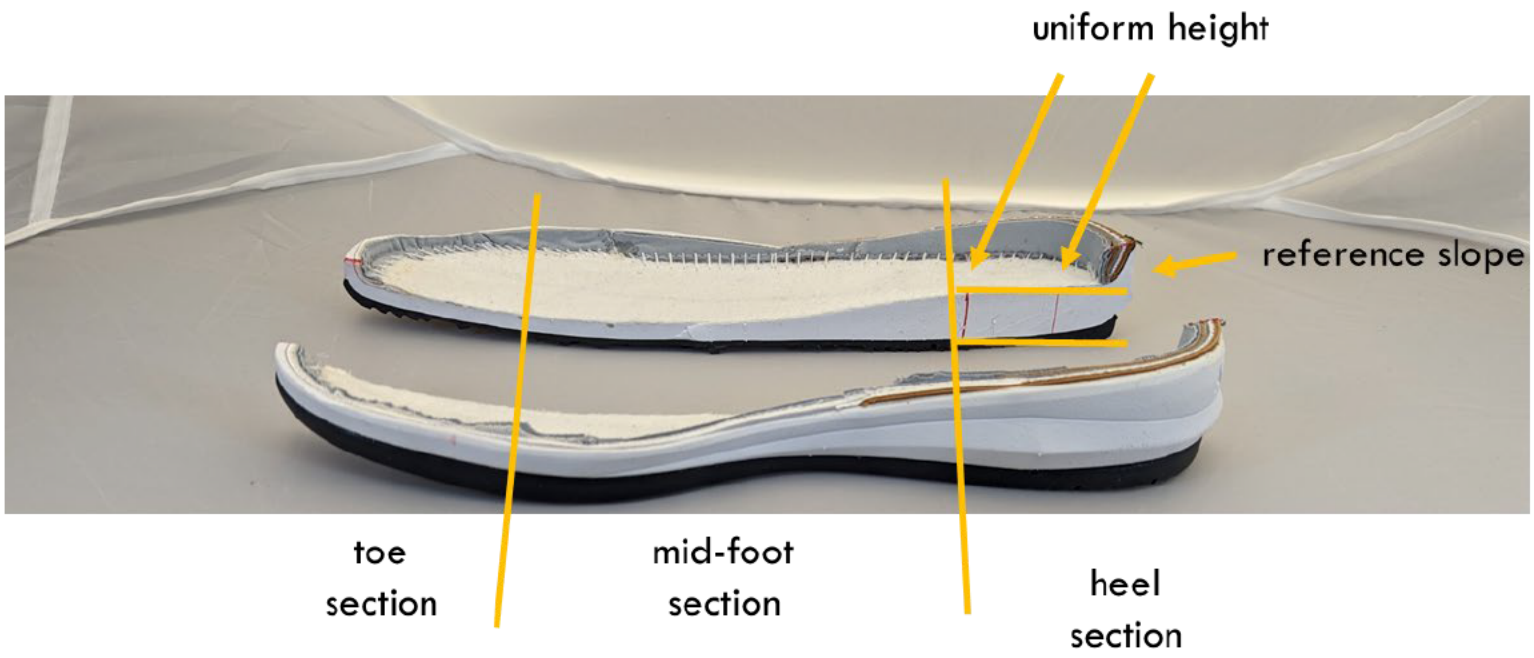

UNDER ARMOUR, INC. v. ATHALONZ, LLC
IPR2024-00636
ATHALONZ EXHIBIT 2014
Page 53 of 70

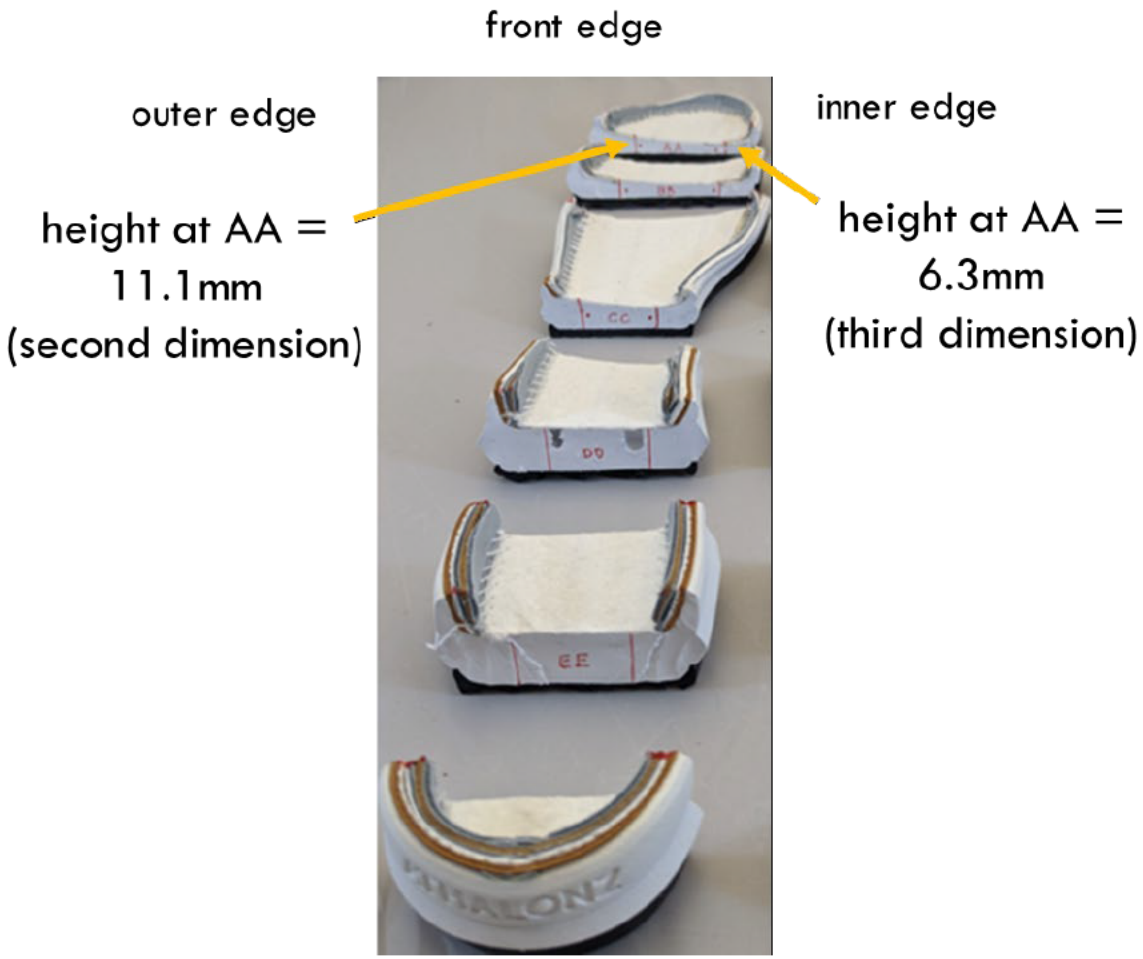

Claim	Exemplary Evidence of Practice
	 In the Athalonz Products, the first slope, second slope, and the third slope are each greater than the reference slope. For example, in the EnVe, the reference slope is substantially 0. Each of the first slope, the second slope, and the third slope are greater than 0.

UNDER ARMOUR, INC. v. ATHALONZ, LLC

ATHALONZ EXHIBIT 2014
Page 54 of 70

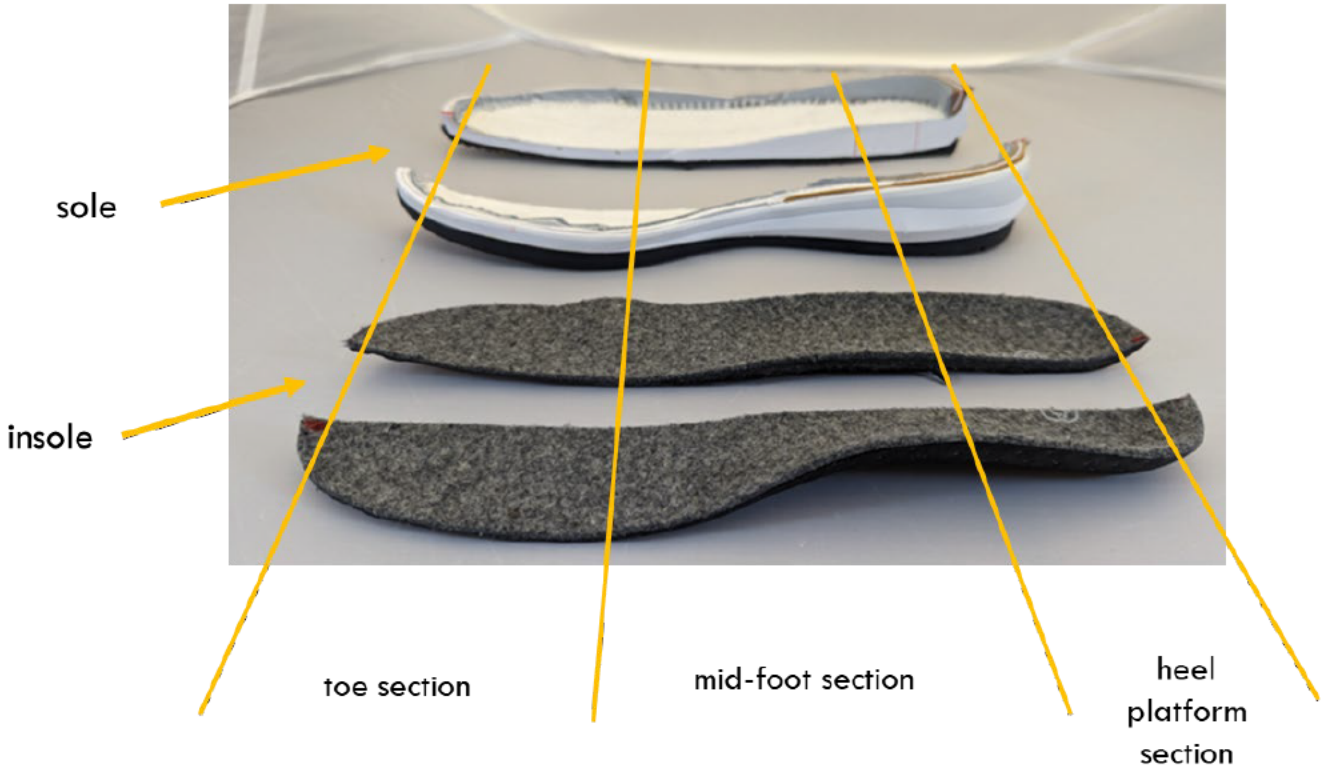

Claim	Exemplary Evidence of Practice
1[f]: wherein the toe section is lower than the heel platform section as a result of the first, second, and third slopes.	In the Athalonz Products, the toe section is lower than the heel platform as a result of the first, second, and third slopes. For example, as shown below, in the EnVe the toe section (second height of 11.1mm and third height of 6.3mm) is lower than the heel platform (first height of 20.6mm) section as a result of the first, second, and third slopes.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
2: The apparatus of claim 1 further comprises: the heel platform section, the mid-foot section, and the toe section constituting at least one of an insole for footwear; and a sole of footwear.	In the Athalonz Products, the heel platform section, the mid-foot section, and the toe section constituting at least one of an insole for footwear; and a sole of footwear. For example, in the EnVe, the heel platform section, the mid-foot section, and the toe section constitute an insole for footwear and a sole of footwear.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

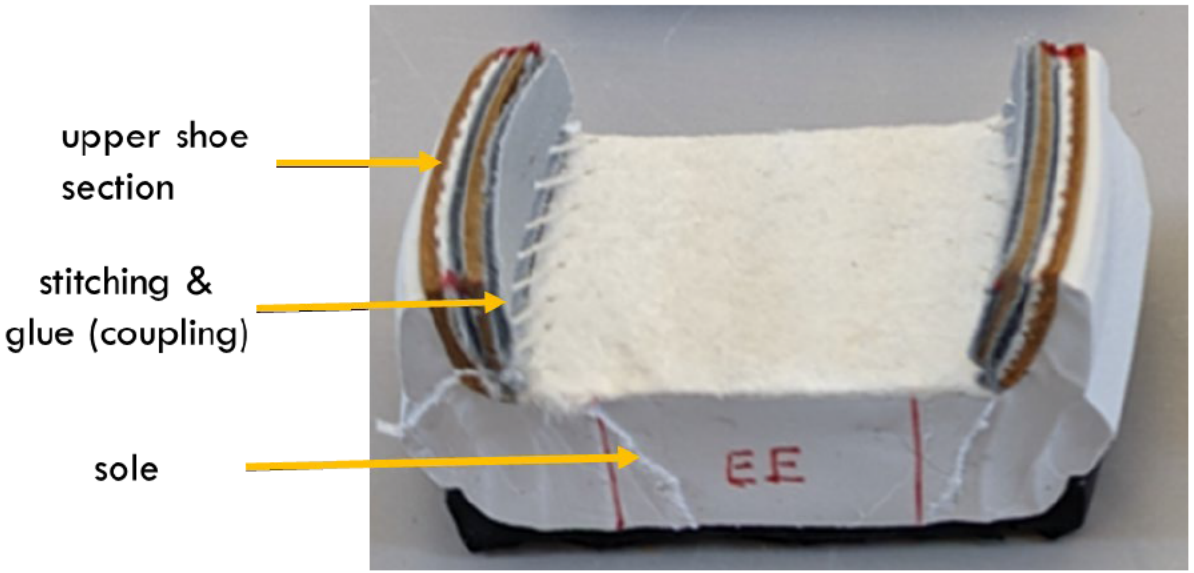

Claim	Exemplary Evidence of Practice
3[a]: The apparatus of claim 1 further comprises: the heel platform section has a uniform platform height, wherein, from a front edge of the heel platform to the rear edge of the apparatus, the uniform platform height has the reference slope; and	In the Athalonz Products, the heel platform section has a uniform platform height, wherein, from a front edge of the heel platform to the rear edge of the apparatus, the uniform platform height has the reference slope. For example, in the EnVe, the heel platform section has a uniform platform height, wherein, from a front edge of the heel platform to the rear edge of the apparatus, the uniform platform height has the reference slope, as shown below.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
3[b]: the toe section and the	In the Athalonz Products, the toe section and the mid-foot section having a second dimension at a front outer edge of the apparatus and a third dimension at a front inner edge of the apparatus.

Claim	Exemplary Evidence of Practice
mid-foot section having a second dimension at a front outer edge of the apparatus and a third dimension at a front inner edge of the apparatus.	For example, in the EnVe, the toe section and the mid-foot section has a second dimension of 11.1mm at a front outer edge of the apparatus and a third dimension of 6.3mm at a front inner edge of the apparatus. 

Claim	Exemplary Evidence of Practice
	To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
4: The apparatus of claim 1 further comprises: **an insole on a first surface of the apparatus covering one or more of:** **at least a portion of the heel platform section;** **at least a portion of the mid-foot section; and** **at least a portion of the toe section.**	The Athalonz Products have an insole on a first surface of the apparatus covering one or more of: at least a portion of the heel platform section; at least a portion of the mid-foot section; and at least a portion of the toe section. For example, in the EnVe, when the shoe is assembled the insole covers at least a portion of the heel platform section, at least a portion of the mid-foot section, and at least a portion of the toe section, as shown below (disassembled).  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
5[pre]: A shoe:	To the extent the preamble is limiting, each of the Athalonz Products is a shoe. *See* claim 1[a]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
5[a]: an upper shoe section; and	The Athalonz Products have an upper shoe section. For example, the EnVe has an upper shoe portion, as shown below.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
5[b]: a sole coupled to the upper shoe section, wherein the sole includes:	The Athalonz Products have a sole coupled to the upper shoe section. For example, the EnVe has a sole coupled to the upper shoe section using stitching and glue, as shown below.  To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
5[b]: a specific bottom; and	The Athalonz Products have a specific bottom. For example, the EnVe has a specific bottom, as shown below.

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
5[c]: an athletic positioning sole section having:	The Athalonz Products have an athletic positioning sole section. For example, the EnVe has an athletic positioning sole section, as shown below.

Claim	Exemplary Evidence of Practice
	 To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
5[d]: a heel platform section	The Athalonz Products have a heel platform section that has a uniform height from an outer edge to an inner edge of the athletic positioning sole section at a rear edge of the athletic positioning sole section, wherein the uniform height establishes

Claim	Exemplary Evidence of Practice
that has a uniform height from an outer edge to an inner edge of the athletic positioning sole section at a rear edge of the athletic positioning sole section, wherein the uniform height establishes a reference slope from the outer edge to the inner edge, the reference slope substantially parallel to a bottom surface of the sole;	a reference slope from the outer edge to the inner edge, the reference slope substantially parallel to a bottom surface of the sole. *See* claim 1[b]. To the extent Under Armour disputes literal practice for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
5[e]: a mid-foot section; and	The Athalonz Products have a mid-foot section. *See* claim 1[c]. To the extent Under Armour disputes literal infringement for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
5[f]: a toe section, wherein the mid-foot section and the toe section	The Athalonz Products have a toe section, wherein the mid-foot section and the toe section form an angled support platform that has a first slope along the inner edge of the athletic positioning sole section from a front edge of the athletic positioning sole section to the heel platform section, a second slope along the front edge of the athletic positioning sole section from the inner edge to the outer edge of the athletic positioning sole section, and a third slope along the outer edge of the athletic

Claim	Exemplary Evidence of Practice
form an angled support platform that has a first slope along the inner edge of the athletic positioning sole section from a front edge of the athletic positioning sole section to the heel platform section, a second slope along the front edge of the athletic positioning sole section from the inner edge to the outer edge of the athletic positioning sole section, and a third slope along the outer edge of the athletic positioning sole section from the front edge of the athletic positioning sole section to the heel	positioning sole section from the front edge of the athletic positioning sole section to the heel platform section, the first slope, second slope, and the third slope each greater than the reference slope. *See* claim 1[e]. To the extent Under Armour disputes literal infringement for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
platform section, the first slope, second slope, and the third slope each greater than the reference slope.

Page 67 of 70

Claim	Exemplary Evidence of Practice
6[a]: The shoe of claim 5 further comprises: the heel platform section has a uniform platform height, wherein, from a front edge of the heel platform to the rear edge of the athletic positioning sole section, the uniform platform height has the reference slope; and	In the Athalonz Products, the heel platform section has a uniform platform height, wherein, from a front edge of the heel platform to the rear edge of the athletic positioning sole section, the uniform platform height has the reference slope. *See* claim 3[a]. To the extent Under Armour disputes literal infringement for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
6[b]: the toe section having a second dimension at a front outer edge of the apparatus and a third dimension at a front inner edge of the apparatus.	In the Athalonz Products, the toe section having a second dimension at a front outer edge of the apparatus and a third dimension at a front inner edge of the apparatus. *See* claim 3[b].

Claim	Exemplary Evidence of Practice
7: The shoe of claim 5 further comprises: **an insole on a first surface of the apparatus covering one or more of:** **at least a portion of the heel platform section;** **at least a portion of the mid-foot section; and** **at least a portion of the toe section.**	In the Athalonz Products, an insole on a first surface of the apparatus covering one or more of: at least a portion of the heel platform section; at least a portion of the mid-foot section; and at least a portion of the toe section. *See* claim 4. To the extent Under Armour disputes literal infringement for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.

Claim	Exemplary Evidence of Practice
8: The shoe of claim 5, wherein the specific bottom comprises one of: a cleat pattern bottom; a baseball spike bottom; a basketball bottom; a tennis bottom; a golf bottom; an ice skate bottom; a ski boot bottom; a cross-trainer bottom; a running shoe bottom; a walking shoe bottom; a dress shoe bottom; and a snowboard boot bottom.	In the Athalonz Products, the specific bottom comprises one of: a cleat pattern bottom; a baseball spike bottom; a basketball bottom; a tennis bottom; a golf bottom; an ice skate bottom; a ski boot bottom; a cross-trainer bottom; a running shoe bottom; a walking shoe bottom; a dress shoe bottom; and a snowboard boot bottom. *See* claim 5[b]. To the extent Under Armour disputes literal infringement for this element, the Athalonz Products practice this element under the doctrine of equivalents. That is, the Athalonz Products perform substantially the same function, in substantially the same way, to achieve substantially the same result.
