Timothy W. Markison

Founding Partner of Garlick & Markison

Founder & CEO of Athalonz, LLC

Co-Founder & CEO of MPP, Inc.

FIELDS OF SPECIALIZATION

Legal

- **Patent application preparation and prosecution:** Covering a wide range of technologies as listed below
- **Patent value generation:** Support clients in building a valuable patent portfolio and support clients in licensing, selling, and/or enforcing patents of their portfolios

Technology

- **Physics of footwear:** How forces traversing through footwear affect human movement
- **Physics of body impact:** How impact forces can be diffused to reduce risk of injury
- **Monitoring athletic movement in concert with physics of footwear:** Monitoring forces through footwear directly corresponds to athletic movement
- **Wireless communications:** new hardware, software, and/or protocols for Bluetooth, wi-fi, cellular, broadcast, point-to-point, and RFID (Radio Frequency IDentification)
- **Database system:** supporting new hardware design and new software architecture
- **Capacitive touch sensing:** for touch screen applications, bio-medical sensing applications, and bio-medical stimulation
- **Wired communication:** using low analog voltage signaling
- **Erase encoding dispersed storage:** for safely and securely storing Big Data
- **Quantum computing:** new quantum mechanics approach to qubits and supporting circuitry thereof
- **Artificial Intelligence** based system for code enhancement
- **Intra & Inter wireless communications for ICs** to substantially reduce power consumption of ICs due to digital data conveyances
- **Battery technologies** regarding charging, discharging, and modeling of batteries

Business

- **Consulting** regarding the business value of patents
- **Strategic patent portfolio development:** regarding the number of inventions to patent protect, when, where, and how to protect inventions, the business objectives of patent portfolio, and the business justification for developing patent portfolio
- **Inventing** independently, on behalf of G&M clients, on behalf of Athalonz, on behalf of MPP, or on behalf of MPP clients

DEGREES

- B.S.E.E. Electrical Engineering & Computer Design from Illinois Institute of Technology, 1984
- Juris Doctorate from Loyola University Chicago School of Law, 1993

PROFESSIONAL MEMBERSHIPS

- Member of USPTO patent bar since 1989
- Member of the Illinois State bar since 1993
- Licensed to practice in the Federal District Courts of Illinois since 1993
- Member of IEEE

PROFESSIONAL POSITIONS

Current Positions

2000 – Present Founding Partner of Garlick & Markison (G&M)

Responsibilities include:

- Managing the preparation and prosecution of patent applications by other attorneys agents of G&M on behalf of its clients
- Managing quality program to maintain a firm-wide issuance rate of over ninety percent and a maintaining an office action to allowance ratio of two or less
- Personally preparing and prosecuting thousands of patent applications for G&M clients
- Creating patent strategies that resulted in billions of dollar in value for clients (spun out patent strategy in 2023, when MPP was launched)
- Supporting clients in licensing, selling, and/or enforcing patents of their portfolios
- Inventing with, and/or on behalf of, clients to expand their respective patent portfolio

2011 – Present Founder & CEO of Athalonz, LLC

Responsibilities include:

- Overseeing business operations
- Leading research & development of footwear that leverages the principles of physics to improve human movement and athletic performance
- Leading the design of physics footwear
- Managing patent protection of physics footwear innovations

- Managing contracts with third parties
- Managing finances of the business

January 2023 – Present Co-Founder & CEO of Markison Patent Portal (MPP), Inc.

Responsibilities include:

- Creating Strategic Patent Plans for MPP customers
 - Analysis of current patent portfolio
 - Determine future patent portfolio options
 - Determine various paths to achieve the future patent portfolio options from the current patent portfolio
 - Determine expense projections for the various paths for the various options
 - Valuation estimates of future patent portfolio based on the various paths for the various options
- Leading engineering team to design and build an automated system to support the creation of Strategic Patent Plans
- Overseeing business operations
- Managing patent protection of innovations steaming from the creation of the automated system
- Leading future product development
- Inventing with, and/or on behalf of, customers to expand their respective patent portfolio

Previous Positions As A Patent Attorney

1997 to 2000 General Counsel of SigmaTel, Inc., Austin, TX

Responsibilities include:

- Managing all legal matters for the company
- Managing patent protection of innovations company products
- Inventing with engineering team to expand company's patent portfolio

1997 to 1999 Partner of Markison & Reckamp, Austin, TX

Responsibilities include:

- Managing the preparation and prosecution of patent applications by other attorneys agents of firm on behalf of its clients
- Managing quality program to maintain high level patent quality
- Preparing and prosecuting patent applications for firm clients

1996 to 1997 Director of IP for Wireless Group of Nortel Networks, Richardson TX

Responsibilities include:

- Creating a strategy to patent protect inventions of the wireless group
- Creating a strategy to exploit patents of the wireless group
- Negotiating IP contracts for the wireless group

1995 to 1996 Sr. Associate at Jenkins & Gilchrist, Austin TX

Responsibilities include:

- Preparing and prosecuting patent applications for firm clients
- Writing legal opinions regarding validity and non-infringement

1988 to 1995 Sr. Attorney, Attorney, and Patent Agent at Motorola, Schaumburg, IL and Austin TX

Responsibilities include:

- Preparing and prosecuting patent applications for Motorola
- Training other practitioners regarding patent application preparation and prosecution
- Negotiating IP contracts for certain departments of Motorola

Previous Positions As An Engineer

1987 to 1988 Sr. Engineer at Micro-Energy, Carol Stream, IL

Responsibilities include:

- Designing commercial grade switch mode power supplies

1984 to 1987 Engineer at Northrup Corp, Rolling Meadows IL

Responsibilities include:

- Designing military grade high-voltage switch mode power supplies

1978 to 1984 Draftsman, Technician, & Jr. Engineer at Power Conversion Products, Crystal Lake IL

Responsibilities include:

- Designing commercial grade battery chargers for battery backup systems

TECHNOLOGY OF PREPARED AND/OR PROSECUTED PATENT APPLICATIONS

The technology covered by the patent applications I have prepared and/or prosecuted, in alphabetical order:

- 3D video processing
- Artificial Intelligence
- Athletic training equipment
- Capacitive touch sense and applications
- Cloud computing
- Cloud storage
- Cold nuclear fusion
- Computer hardware and software architectures
- Cybersecurity
- Cryptocurrency
- Database architecture
- Database applications

- Digital gift card network and processing
- Electric vehicles
- Erasure encoding dispersed storage system and interworking thereof
- Item location tracking
- Intra-IC wireless communications
- Health data analysis systems
- Health management systems
- Liquid Hydrogen power generation
- Motor design
- Monitoring athletic movement in concert with physics of footwear
- Physics of body impact
- Physics of footwear
- Quantum computing
- Radio Frequency Identification
- Secure communication systems
- Wired communication using low analog voltage signaling
- Wireless communications (Bluetooth, wi-fi, cellular, and RFID (radio frequency identification))

PATENTS

As of October 15, 2024, I am a named inventor on 453 issued patents. Appendix I includes a list of my issued patents that were filed during or after 2001. The following is an overview of my patents.

- A) I am a named inventor on 28 U.S. patents assigned to Motorola regarding the subject matter of preventing unauthorized use of land mobile wireless communication systems (e.g., police wireless radio systems, airport wireless radio systems, etc.).
- B) I am a named inventor on 3 U.S. patents assigned to SigmaTel, Inc. The technology is regarding IR communication protocols.
- C) I am a named inventor on 15 U.S. patents assigned to Broadcom, Inc. The technology is regarding wireless communications.
- D) I am a named inventor on 128 U.S. patents assigned to Cleversafe, Inc. The technology is regarding error encoding distributed storage.
- E) I am a named inventor on 26 U.S. patents assigned to Athalonz, LLC. The technology is regarding athletic enhancing footwear based on the principles of physics and portable pitching mounds.
- F) I am a named inventor on 87 U.S. patents assigned to SigmaSense, LLC. The technology is regarding capacitive touch sensing and applications thereof.
- G) I am a named inventor on 46 U.S. patents assigned to Pure Storage, Inc. The technology is regarding error encoding distributed storage.
- H) I am a named inventor on 1 U.S. patent assigned to Markison Patent Portal, Inc. The technology is regarding an improved computer architecture to support protection of technology.
- I) I am a named inventor on 6 U.S. patents assigned to Visa, Inc. The technology is regarding credit card imaging for mobile payment.

J) I am a named inventor on 4 U.S. patents assigned to ViXS Systems, Inc. The technology is regarding integrated circuits.

K) I am a named inventor on 20 U.S. patents that are not assigned. The technology is regarding force impact focusing, force impact diffusing, athletic movement monitoring, and capacitance based data storage.

L) I am a named inventor on 2 U.S. patents assigned to Imageworks Interactive. The technology is regarding data management and organization for specific applications.

M) I am a named inventor on 82 U.S. patents assigned to International Business Machines Corporation. The technology is regarding error encoding distributed storage.

N) I am a named inventor on 3 U.S. patents assigned to Admark Athletic Ventures (now Athalonz). The technology is regarding athletic enhancing footwear based on the principles of physics

O) I am a named inventor on 2 U.S. patents assigned to Xilinx, Inc. The technology is regarding field programmable gate arrays.

As of October 15, 2024, I am a named inventor on 80 pending patent applications. Appendix II includes a list of my pending patent applications.
