Education:

Auburn University, Ph.D., July 1991. Major emphasis on CMOS analog and digital IC design. Dissertation - *Design of Very High Speed Sense Amplifiers for CMOS Random Access Memory*.

University of Tennessee, M.S.E.E., December 1988. Major emphasis on analog and digital circuit design. Thesis - *Development of a Radiation Hardened 600 Watt Switchmode Power Converter*.

University of Tennessee, B.S.E.E. with High Honors, January 1985. Senior year specialization in analog circuit design.

Work Experience:

8/17 – Founder, River Rock Engineering, primary activities are technical, startup, and IP consulting.

9/13 – 7/17 Fellow, Analogic Inc. Joined Analogic via acquisition of PocketSonics startup. Chief architect for handheld medical ultrasound imaging systems. This included leading a team and directing system architecture, fully custom CMOS integrated front-end circuit design, software architecture and interfaces, and overall product approach. This effort led to an FDA approved, hand-held, battery powered, 6000 channel, 3D imaging system targeted for vascular access applications.

8/98 – Associate, Professor, University of Virginia. Research in mixed-signal CMOS integrated circuit design. Principle focus areas are integrated imaging and signal processing, smart sensors, low-voltage low-power RF and baseband design, and analog design techniques in 'digital' processes. Developing and teaching courses in analog and mixed-signal integrated circuit design. Moved to non-resident appointment in the Fall of 2013 upon joining Analogic. Currently engaged in low power RF research.

1/04 – 9/13 Co-Founder, CEO, and CTO, PocketSonics, Inc. Built medical device startup based on unique ultrasound imaging architecture. Invented or co-invented several unique ultrasound imaging technologies. Negotiated University licensing, created business structure, hired long-term CEO, and led technical development of a handheld 3D volume capable ultrasound imaging system, including fully-custom CMOS integrated circuit front-end, and an industry unique signal processing stack, leading to partnership with and later acquisition by Analogic, Inc.

8/96 - 8/98 Principal Scientist, Hewlett-Packard Laboratories. Technical lead on multiple mixed-signal optoelectronic image capture, processing, and display IC designs. Extensive transistor level design of analog and digital CMOS circuits. Exploration of new technologies and mentoring of other engineers. Development of modeling software and

custom CAD tools for circuit analysis and design. Led IC designs in optical sensing and navigation, optical mouse, disk drive read channels, and microdisplays.

7/91 - 8/96 Member Technical Staff, Hewlett-Packard Laboratories. Designed CMOS mixed signal processing integrated circuits for mass storage products. Principal architect and designer of new integrated optoelectronic image acquisition and processing IC. This chip was the principal enabler of several new HP products.

3/88 - 7/91 Graduate Research Assistant, Auburn University. Developed high speed CMOS sense amplifier topologies for memory circuits. Also developed memory circuits optimized for quasi-static low temperature operation. Test circuits were fabricated and experimental results published.

3/88 - 7/91 Graduate Teaching Assistant, Auburn University. Served as instructor teaching junior and senior level electronics courses. Student teaching effectiveness average rating of 4.5/5.0 for last recent four quarters. Total teaching experience of 11 quarters.

9/86 - 3/88 Graduate Research Assistant, University of Tennessee. Designed and implemented radiation hardened switchmode power supply. Addressed key stability issues with extensive computer simulation techniques.

2/85 - 8/86 Development Engineer, NASA Langley Research Center, Hampton, VA. Developed measurement techniques and instrumentation for the characterization of composite materials.

9/84 - 1/85 Assistant Engineer, Control Technology Inc., Knoxville, TN, part-time while attending school, 25-30 hrs/week. Developed firmware and hardware for industrial controller peripherals.

9/82 - 12/83 Assistant Engineer, Technology for Energy Corporation, Knoxville, TN, part-time while attending school, 25 - 30 hrs/week. Developed graphics software for nuclear power system monitoring.

Consulting & Other Work:

5/22 - Expert Witness, TCL Electronics Holdings Limited, TTE Technology, Inc., TCT Mobile (US) Inc., and TCL Communication Limited, Patents and document analysis, Kirkland & Ellis LLP, Integrated circuits.

11/21 - 5/22 Expert Witness, Intel, Patents and document analysis, reports, Kirkland & Ellis LLP, Integrated circuits.

11/21 - 5/22 Expert Witness, Samsung, Patents and document analysis, Kirkland & Ellis LLP, Integrated circuits.

6/21 - 12/21 Expert Witness, Porsche AG and Porsche Cars North America, Inc., Patents and document analysis, Kirkland & Ellis LLP, Amplifier circuits.

4/21 – Technical Consulting, Dark Vision Technologies Inc., Ultrasound system and ASIC architecture design.

10/20 - 6/21 Expert Witness, RAI Strategic Holdings Inc., RAI Strategic Holdings Inc. et al. v. Altria Client Services LLC et al., 1:20-cv-00393-LO-TCB, Jones Day, electronic vapor systems, reports, depositions, IPR petition declarations.

10/19 – Expert Witness, NXP, NXP v. Impinj, IPR2020-00553, IPR2020-00556, Jones Day, RFID circuits, reports.

2/19 – 5/19 Expert Witness, Supersonic Imagine (SSI), SSI v. Verasonics, Morgan, Lewis & Bockius LLP, ultrasound data processing.

5/18 - 10/19 Expert Witness, Tektronix, Inc., Tektronix v. Rohde Schwarz, IPR2018-00643, IPR2018-00647, Jones Day (transferred from Perkins Coie), LLP, data acquisition systems and circuits, reports and deposition.

10/17 - 2/18 Technical Consulting, Caretaker Medical, Medical diagnostics design.

10/17 - 6/20 Expert Consultant, Intel Inc., Patents and documents analysis, Kirkland & Ellis, LLP, digital and mixed-signal CMOS circuits.

7/17 – 6/18 Expert Witness, Barco, Inc., Barco v. T-Rex Property, CV11-1375-PHX-SRB, Nuestel Law Offices, LTD, network system architectures, reports.

12/14 - 2/16 Expert Consultant, Samsung Inc., Patents and documents analysis, Kirkland & Ellis, LLP, mixed-signal CMOS circuits.

7/14 – 8/14 Expert Consultant, Intel Inc., Patents and documents analysis, Kirkland & Ellis, LLP, mixed-signal CMOS circuits.

11/12 - 5/13 Expert Witness, Sound Design Technologies, Sound Design v. Oticon, Inc., Perkins Coie, Brown & Bain, LLP, mixed-signal CMOS circuits.

2/09 – 6/11 Expert Witness, Samsung, Spansion v. Samsung, Kirkland & Ellis, LLP, mixed-signal CMOS circuits.

8/09 – 6/10 Expert Witness, IBM, MOSAID v. IBM, Kirkland & Ellis, LLP, mixed-signal CMOS circuits.

10/09 - 2/10 Expert Witness, Cisco, Cisco Systems v. MOSAID, Kirkland & Ellis, LLP, mixed-signal electronics.

4/09 – 6/09 Expert Witness, Apple Computer, Wong, Cabello, Rutherford & Brucculeri, LLP, mixed-signal electronics, USB protocol.

8/08 –12/10 Expert Witness, Samsung, Kirkland & Ellis, LLP, mixed-signal CMOS circuits.

3/08 – 3/09 Expert Witness, AMIS, AMIS v. PowerDsine, Perkins Coie Brown & Bain, pre-trial deposition, POE integrated circuits, protocols, POE product evals, reports.

10/07 – 2/08 Expert Witness, Analog Devices, Analog Devices v. Silicon Laboratories, Proskauer Rose LLP, pre-trial deposition, mixed-signal CMOS isolation circuits.

7/07 - 1/09 Expert Witness, Micron, MOSAID v. Micron, Kirkland & Ellis, LLP, mixed-signal CMOS circuits.

3/07 – 7/07 Expert Witness, Samsung, Samsung v. Matsushita, Kirkland & Ellis, LLP, mixed-signal CMOS circuits.

9/06 – 5/07 Expert Witness, Samsung, Samsung v. Ericson, Kirkland & Ellis, LLP, mixed-signal CMOS circuits.

3/05 – 11/05 Expert Witness, Sigmatel, Sigmatel v. Actions Semiconductor, Kirkland & Ellis, LLP, mixed-signal CMOS circuits, firmware evaluation.

12/03 – 9/04 Expert Witness, Agere, Agere v. Broadcom, Kirkland & Ellis, LLP. Testimony at Markman, pre-Markman and pre-trial depositions, mixed-signal CMOS circuits, VCOs, interface, biasing.

8/98 - 6/03 Technical Consultant, Agilent Technologies. Exploratory design and simulation of next-generation circuit technologies.

2/01 - 3/01 Technical Consultant, Displaytech. Analysis of circuit issues in silicon-backplane microdisplays.

Awards:

Best Paper of Conf. Award, Hewlett-Packard Design Technology Conference, May 1997.

Best Paper of Session Award, Hewlett-Packard Design Technology Conference, May 1994.

Auburn University Outstanding Graduate Student Award, March 1991.

Sigma Xi Carolyn Carr Outstanding Research Award, February 1991.

Tech Brief Award, NASA Langley Research Center, June 7, 1990.

Invention Disclosure Award, NASA Langley Research Center, December 1, 1989.

Outstanding Performance Award, NASA Langley Research Center, December 1985.

Invited Guest, National Security Forum, Air War College, May 23-27, 2002

Affiliations/Service:

Program Committee, VLSI Circuits Symposium, 2002 – 2007

Program Committee, Great Lakes Symposium on VLSI Circuits, 2003 - 2008

Associate Editor, IEEE/OSA Journal of Display Technology, 2004 - 2006

Associate Editor, IEEE Transactions on Very Large Scale Integration Systems, 2003 - 2005

Reviewer, IEEE Journal of Solid State Circuits, 1999 - 2005

Associate Director, Rodman Scholars Program, School of Engineering, UVa, 2000 – 2004

Mentor, NIH Biotech Training Grant, 2000-2005

Chairman, UVa ECE Graduate Committee, 2000-2002

Chairman, UVa SEAS Rules and Courses Committee, 2002- 2004

Board of Directors, University of Virginia Institute for Microelectronics, 1999 – 2008

Boy Scout Adult Leader, Troop 17, Charlottesville, VA, 2003 – 2006

Institute of Electrical and Electronics Engineers

Phi Eta Sigma and Sigma Xi, National Honor Societies

Tau Beta Pi, National Engineering Honor Society

Eta Kappa Nu, National Electrical Engineering Honor Society

Patents (Issued US Patents Only):

W. F. Walker, M. I. Fuller, K. Ranganathan, J. A. Hossack, T. N. Blalock, “Front end circuitry with analog sampling and decoding for ultrasound imaging systems and methods of use,” U. S. Patent No. 9,989,497, June 5, 2018.

J. A. Hossack, M. I. Fuller, and T. N. Blalock, “Tracked ultrasound vessel imaging,” U. S. Patent No. 9,445,780 B2, September, 20, 2016.

T. N. Blalock, W. F. Walker, and J. A. Hossack, “Ultrasound imaging beam-former apparatus and method,” U. S. Patent No. 9,275,630, March 1, 2016.

T. N. Blalock, “Floating transducer drive, system employing the same and method of operating,” U. S. Patent No. 9,254,118 B2, March 3, 2015.

T. N. Blalock, W. F. Walker, and J. A. Hossack, “Ultrasonic transducer drive,” U. S. Patent No. 9,244,160, January 26, 2016.

J. A. Hossack, T. N. Blalock, and W. F. Walker, “Efficient architecture for 3D and planar Ultrasonic Imaging--Synthetic Axial Acquisition and Method Thereof,” U. S. Patent No. 8,057,392, November 15, 2011.

J. A. Hossack, T. N. Blalock, and W. F. Walker, “Hybrid Dual Layer Diagnostic Ultrasound Transducer Array,” U. S. Patent No. 7,750,537, July 6, 2010.

W. F. Walker, J. A. Hossack, and T. N. Blalock, "An Intuitive Ultrasonic Imaging System and Related Method Thereof," U. S. Patent No. 7,699,776, April 20, 2010.

J. A. Hossack, W. F. Walker, and T. N. Blalock, “Efficient ultrasound system for two-dimensional C-scan imaging and related method thereof,” U.S. Patent No. 7,402,136, July 22, 2008.

I. Bararav, T. N. Blalock, A. Machida, G. E. Smith, and J. K. Ang, “Imaging system and apparatus for combining finger recognition and finger navigation,” U. S. Patent No. 7,274,808, September 25, 2007.

I. Bararav, T. N. Blalock, A. Machida, G. E. Smith, and J. K. Ang, “System and method for multiplexing illumination in combined finger recognition and finger navigation module,” U. S. Patent No. 7,158,659, January 2, 2007.

M. L. Reed and T. N. Blalock, "High sensitivity infrared sensing apparatus and related method thereof," U.S. Patent No. 6,900,440, May 31, 2005.

R. W. Walker, T. N. Blalock, and N. Gaddis, " Electro-optical material-based grey scale generating method," U.S. Patent No. 6,795,064, September, 21, 2004.

H. F. Christensen, D. Sojourner, J. M. Hermsen, X. Zhang, and T. N. Blalock, "Gamma correction for displays," U.S. Patent No. 6,700,561, March 2, 2004.

J. J. Corcoran, T. N. Blalock, P. J. VandeVoorde, and T. K. Knotts, "Apparatus and method for protecting integrated charge storage elements from photo-induced currents," U.S. Patent No. 6,586,283, July 1, 2003.

T. N. Blalock and K. N. Nishimura, "Pixel Driver that Generates, in Response to a Digital Input Value, a Pixel Drive Signal having a Duty Cycle that Determines the Apparent Brightness of the Pixel," U.S. Patent No. 6,441,829, August 27, 2002.

T. N. Blalock and K. N. Nishimura, "System and Method for On-Chip Calibration of Illumination Sources for an Integrated Circuit Display," U..S. Patent No. 6,344,641, February 5, 2002.

T. N. Blalock, and K. A. Nishimura, " System and method for on-chip calibration of illumination sources for an integrated circuit display," U.S. Patent No. 6,344,641, February 5, 2002.

R. W. Walker, T. N. Blalock, and N. Gaddis, "Electro-optical Material-Based Display Device having Analog Pixel Drivers," U.S. Patent No. 6,329,974, December 11, 2001.

T. N. Blalock, N. Gaddis, and R. W. Walker, "Analog Pixel Drive Circuit for an Electro-Optical material-Based Display Device," U.S. Patent No. 6,249,269, June 19, 2001.

K. N. Nishimura and T. N. Blalock, "Multi-Channel, Parallel, Matched Digital-to-Analog Conversion Method, Multi-Channel, Parallel, Matched Digital-to-Analog Converter, and Analog Drive Circuit Incorporating Same," U.S. Patent No. 6,169,505, Jan. 2, 2001.

R. A. Baumgartner and T. N. Blalock "Low Differential Light Level Photoreceptors," U.S. Patent No. 5,769,384, June 23, 1998.

C. E. Moore, R. A. Baumgartner, T. N. Blalock, T. M. Walley, R. A. Zimmer, R. Badyal, L. C. Tsai, L. S. Metz, S. Leung, J. S. Ignowski, K. R. Stafford, R. Chiu, and R. A. Baugh, “Analog implementation of a partial response maximum likelihood (PRML) read channel,” U.S. Patent No. 5,734,680, March 31, 1998.

T. N. Blalock, R. A. Baumgartner, T. Hornak, M. Smith, and B. Tullis, "Method and Device for Tracking Relative Movement by Correlating Signals from an Array of Photoelements" U.S. Patent No. 5,729,008, March 17, 1998.

T. N. Blalock, R. A. Baumgartner, T. Hornak and D. Beard, "Offset Removal and Spatial Frequency Band Filtering Circuitry for Photoreceiver Signals," U.S. Patent No. 5,703,353, Dec. 30, 1997.

T. N. Blalock and T. Hornak, "Bucket Brigade Analog Delay Line with Voltage Limiting Feedback," U.S. Patent No. 5,291,083, March 1, 1994.

J. A. Companion, J. S. Heyman, B. A. Mineo, A. R. Cavalier and T. N. Blalock, “Rapidly Quantifying the Relative Distension of a Human Bladder,” U. S. Patent No. 5,058,591, Oct. 22, 1991.

J. A. Companion, J. S. Heyman, B. A. Mineo, A. R. Cavalier and T. N. Blalock, “Rapidly Quantifying the Relative Distension of a Human Bladder,” U. S. Patent No. 4,852,578, Aug. 1, 1989.
