Heartbeat (computing)

Known as: Heartbeat, Heartbeat protocol

In computer science, a heartbeat is a periodic signal generated by hardware or software to indicate normal operation or to synchronize other parts of a computer system. Usually a heartbeat is sent between machines at a regular interval in the order of seconds. If the endpoint does not receive a heartbeat for a time —usually a few heartbeat intervals—, the machine that should have sent the heartbeat is assumed to have failed. Collapse

Outlier Correction in ECG-Based Human Identification

V. Khoma, Mariusz Pelc, Yuriy Khoma, D. Sabodashko • IC BCI • 2018 • Corpus ID: 64628952

In this article we have proposed a novel method for ECG signal processing in biometric applications. The main idea is to correct... Expand

Simulasi Alat Photoplethysmograph (PPG)

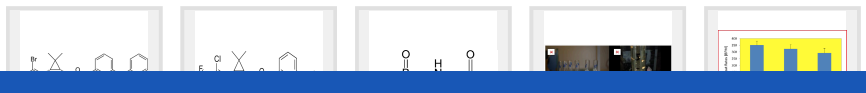

I. Jaya, Wisma Wisma • 2017 • Corpus ID: 115431154

Heart is a vital organ in the human body. The heart functions circulated the blood throughout the body. The volume of blood in a... Expand

International Journal of Current Research in

W. Chung, Jongbin Lee • 2016 • Corpus ID: 212481957

Daphnia magna are common planktonic crustacean of the subclass Phyllopoda that can be found in lakes and ponds all over the... Expand

Detection of both heartbeat and respiration signals from airflow at mouth by using single catheter flow sensor

H. Kawaoka, T. Yamada, M. Matsushima, T. Kawabe, M. Shikida • International Conference on Solid-State Sensors... • 2015 • Corpus ID: 35113784

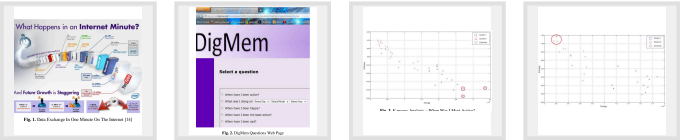

We detect both heartbeat and respiration signals from the airflow at the mouth by using a single catheter flow sensor. To the... Expand

The Big Data Obstacle of Lifelogging

Chelsea Dobbins, M. Merabti, P. Fergus, D. Llewellyn-Jones • 28th International Conference on Advanced... • 2014 • Corpus ID: 15041378

Living in the digital age has resulted in a data rich society where the ability to log every moment of our lives is now possible... Expand

Robust Heartbeat Detector Based on Weighted Correlation and Multichannel Input: Implementation on the ECG Recorded with Textile Electrodes

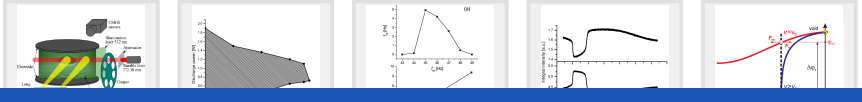

Linda Rattfält, M. Lindén, P. Hult, P. Ask, M. Borga • Int. J. E Health Medical Commun. • 2013 • Corpus ID: 19152243

The aim of this study was to develop and evaluate a robust heartbeat detector for noisy electrocardiograms (ECGs) recorded with... Expand

On the heterogeneous character of the heartbeat instability in complex (dusty) plasmas

M. Pustylnik, A. Ivlev, +4 authors G. Morfill • 2012 • Corpus ID: 118617683

A hypothesis on the physical mechanism generating the heartbeat instability in complex (dusty) plasmas is presented. It is... Expand

Scalability and Resilience in Data Center Networks: Dynamic Flow Reroute as an Example

A. Tam, Kang Xi, H. J. Chao · Global Communications Conference · 2011 · Corpus ID: 429532

The recent literature on data center networks often propose the use of centralized control server to manage resources or for... Expand

Of Changes and their History: Some Ideas for Future IDEs

H. Gall · Working Conference on Reverse Engineering · 2008 · Corpus ID: 1658197

Changes are the heartbeat of a software system. Software has to change to reflect the adapting requirements of business... Expand

Real-time operation without a real-time operating system for instrument control and data acquisition

R. Klein, A. Poglitsch, +6 authors W. Viehhauser · SPIE Astronomical Telescopes + Instrumentation · 2004 · Corpus ID: 62630100

We are building the Field-Imaging Far-Infrared Line Spectrometer (FIFI LS) for the US-German airborne observatory SOFIA. The... Expand
