

How to use Netflix on your Apple TV

Learn about Netflix features on your Apple TV, including how to set up and sign out of your account. If you don't know if Netflix works on your device, follow the steps in the “Set Up Netflix” section.

Netflix Features

Netflix is available on Apple TV (2nd generation) and later.

Resolution

Most devices can stream Netflix in high definition on fast internet connections and will play Netflix in their maximum supported resolution.

Parental controls

Netflix allows you to set [parental controls](#) on individual profiles.

Subtitles & alternate audio

Learn how to use [subtitles](#), [closed captions](#), and [alternate audio](#) (including 5.1 surround sound), which are available on many TV shows and movies. To check if your device supports 5.1 audio, go to any Netflix Original to see if there is a 5.1 audio option. If not, your device does not support this feature. Many devices will let you customize the appearance of subtitles and captions. Some devices will display subtitles and captions in their default appearance or are not configured to display subtitles.

On some devices, you can also stream select titles with Dolby Atmos audio, including the models below. For more information on Dolby Atmos, visit our article about [using Dolby Atmos on Netflix](#).

Device Series	Resolution	Subtitles & Audio
Apple TV (2nd generation)	720p HD	Subtitles, alternate audio, 5.1 surround sound

Device Series	Resolution	Subtitles & Audio
Apple TV (3rd generation)	1080p HD	Subtitles, alternate audio, 5.1 surround sound
Apple TV HD (4th generation)	1080p HD	Subtitles, alternate audio, 5.1 surround sound
Apple TV 4K (1st generation)	4K Ultra HD	Subtitles, alternate audio, 5.1 surround sound, Dolby Atmos NOTE: Dolby Atmos requires tvOS version 12 or later
Apple TV 4K (2nd generation)	4K Ultra HD	Subtitles, alternate audio, 5.1 surround sound, Dolby Atmos
Apple TV 4K (3rd generation)	4K Ultra HD	Subtitles, alternate audio, 5.1 surround sound, Dolby Atmos

Set Up Netflix

▼ Apple TV (2nd and 3rd generation)

To connect your Apple TV to your Netflix account, make sure you are on the home screen and follow the steps below.

1. From the main Apple TV menu, select **Netflix**.
2. Select **Already A Member? Sign in**.

NOTE: If you're not yet a member, set up your membership at Netflix.com on a web or mobile browser.

3. Enter your Netflix email and password.

Your device is now connected to your Netflix account.

▼ Apple TV HD or Apple TV 4K

To connect your Apple TV to your Netflix account, make sure you are on the home screen and follow the steps below.

Install the Netflix app

1. From the home screen, select the **App Store**.
2. In the App Store, search for **Netflix** to find the app, then select **Get** to start installation.
3. After installation, the Netflix app will appear on the home screen.

Sign in to Netflix

1. Open the Netflix app.
2. Select **Sign In** to use an existing Netflix account.

NOTE: If you're not yet a member, set up your membership at Netflix.com on a web or mobile browser.

3. After choosing **Sign In**, enter your Netflix email and password.

Your device is now connected to your Netflix account.

Sign Out of Netflix

▼ Apple TV (2nd and 3rd generation)

To sign out of the Netflix account on your device, follow these steps.

1. Begin from the Netflix home screen.
2. If your account has profiles, select Switch Profiles.
 - If your account does not have profiles, select Sign Out.

3. Select Sign Out.

Once the device finishes deactivating, you can connect as a different user.

▼ **Apple TV HD or Apple TV 4K**

To sign out of the Netflix account on your device, follow these steps.

1. From inside the Netflix app, press the Menu button  on the remote.
2. Select **Settings**.
3. Select **Sign Out**.

Once the device finishes deactivating, you can connect as a different user.

Netflix in Ultra HD

Netflix is available in Ultra HD on select Apple TV streaming media players. To stream in Ultra HD, you will need:

- A TV compatible with Ultra HD streaming from Netflix, connected to your Apple TV via an HDMI port that supports HDCP 2.2 or later (usually the HDMI 1 port).
- A **Netflix plan** that supports streaming in Ultra HD.
- A steady **internet connection speed** of 15 megabits per second or higher.
- **Streaming quality** set to **High**.

The following Apple TV models currently support Netflix in Ultra HD:

- Apple TV 4K (1st generation)
- Apple TV 4K (2nd generation)
- Apple TV 4K (3rd generation)

Netflix in HDR

Netflix is available in Dolby Vision and HDR on the select Apple TV models. To stream in Dolby Vision or HDR, you will need:

- A **Netflix plan** that supports streaming in Ultra HD.
- A streaming device that supports either Dolby Vision or HDR and Netflix.
- A smart TV that supports either Dolby Vision or HDR10 connected to your device via an HDMI port that supports HDCP 2.2 or later (usually the HDMI 1 port).
- A steady **internet connection speed** of 15 megabits per second or higher.
- **Streaming quality** set to **High**.

The following Apple TV models currently support Netflix in Dolby Vision and HDR10 format:

- Apple TV 4K (1st generation)
- Apple TV 4K (2nd generation)
- Apple TV 4K (3rd generation)
