Hello Theresa - I want to confirm that you received my application. I sent it by fedex on Tuesday, and you should have received it yesterday.

Rani - here's what I suggest:

(1) Microsoft MN-820 Broadband networking wireless notebook kit
Contains a "G" router and a laptop wireless card.
Retails from Microsoft for \$100, but you can get it for about \$85 At a
number of places - see this list and pick one (check for availability
and inexpensive shipping) - www.buy.com is usually a good place for
this kind of stuff.

(2) Microsoft MN-710 Broadband Networking Wireless USB 2.0 Adapter
Available from Microsoft for \$50 each. I found these

http://reviews.cnet.com/Microsoft_MN_710/4014-3251_7-30798745.html?tag=ob_50&orderby=50&sort=asc

Good luck.

- Ben
