About ProQuest Digital Dissertations

With more than 1.6 million entries, the *Dissertation Abstracts* database is the single, authoritative source for information about doctoral dissertations and master's theses. The database represents the work of authors from over 1,000 graduate schools and universities. We add some 47,000 new dissertations and 12,000 new theses to the database each year.

The database includes bibliographic citations for materials ranging from the first U.S. dissertation, accepted in 1861, to those accepted as recently as last semester. Citations for dissertations published from 1980 forward also include 350-word abstracts written by the author. Citations for master's theses from 1988 forward include 150-word abstracts. The full text of more than one million of these titles is available in paper and microform formats. Institutional subscribers to ProQuest Digital Dissertations receive on-line access to the complete file of dissertations in digital format starting with titles published from 1997 forward.

PQDD offer the following services:

- The most current two years of the Dissertation Abstracts database, over 100,000 citations and abstracts, **freely** available for searching.
- The **full text** of over 100,000 dissertations is available now at this Web site. Dissertations are available in two formats: Full PDF and TIFF images wrapped in PDF.

Institutional subscribers to ProQuest Digital Dissertations receive on-line access to the complete file of dissertations in digital format starting with titles published from 1997 forward.

PQDD offer the following services:

- The most current two years of the Dissertation Abstracts database, over 100,000 citations and abstracts, **freely** available for searching.
- The **full text** of over 100,000 dissertations is available now at this Web site. Dissertations are available in two formats: Full PDF and TIFF images wrapped in PDF.
 - Those institutions that submit dissertations electronically will see their documents in full PDF; those that submit in paper will see their documents in TIFF images. Students who want tips on preparing digital dissertations and theses can go straight to [UMI's Guidelines for Submitting Electronic Theses and Dissertations](#).
 - A library subscription option to the entire full text collection of new dissertation titles also is available.

In addition to World Wide Web access to the Dissertation Abstracts database and on-line access to the full-text of new dissertations, **ProQuest Digital Dissertations** offers the following services at **no charge** to the library or graduate school:

- Digital submission via FTP is now available. The only paper documentation now required is the publishing agreement form, copyright registration, abstract and title page.
- Each institution that publishes with Bell & Howell Information and Learning will receive free campus-wide on-line access to the full text (in PDF format) of dissertations and theses submitted by that institution **regardless** of the format submitted.
 - Full text files can be downloaded to any IP address within the institution.
- Free twenty-four page previews of dissertations and theses submitted from 1997 forward.
 - Linked to Dissertation Abstracts on the Web, these PDF preview files are available for viewing at no charge.
- Bell & Howell Information and Learning will provide each participating institution with a unique Web URL that links a listing of citations, abstracts and twenty-four page previews of current dissertations and theses submitted by that institution.
 - **Current Research** @ will be updated monthly, providing each graduate institution with a Web presence that showcases graduate research.
 - Please see: <http://wwwlib.umi.com/cresearch/main> for links to institutional registration pages.
- Beginning with dissertations received in 2000, all titles will receive an ISBN (International Standard Book Number). Titles will be listed in the UMI Dissertation Abstracts database and other well known on-line and web-based book distributors and databases.
