Email Permissions

A user's email is a protected property and access to that information must be specifically requested by the app and granted by the user.

User permission	Description
email	Provides access to the user's primary email address in the <code>email</code> property. Do not spam users. Your use of email must comply both with Facebook policies and with the CAN-SPAM Act.

Note: There is no way for apps to obtain email addresses for a user's friends.
