

Exhibit 61

Exhibit No. 61

Claim Chart Showing Infringement of U.S. Patent No. 9,473,602 by Apple iPhone 6s (A1688) Mobile Phone¹

As representative '602 Patent Accused Devices, the Apple iPhone 6s and iPhone 6s Plus directly and/or indirectly infringe the asserted claims of the '602 Patent. Nokia contends each of the following limitations is met literally, and, to the extent a limitation is not met literally, it is met under the doctrine of equivalents.

¹ This claim chart is based on the information currently available to Nokia and is intended to be exemplary in nature. Nokia reserves all rights to update and elaborate its infringement positions, including as Nokia obtains additional information during the course of discovery.

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
Claim 1	
1. A portable electronic device comprising:	Each '602 Patent Accused Device is a portable electronic device that comprises the following elements.
(a) a one piece housing forming enclosed exterior lateral sides and a rear side;	Each of the '602 Patent Accused Devices includes a one piece housing forming enclosed exterior lateral sides and a rear side. For example, as shown below, the representative Apple iPhone 6s has a one piece housing that forms enclosed exterior lateral sides (identified by the red arrows below) and a rear side (outlined in green below). (See, e.g., Ex. 108, Sasken Teardown Report for Apple iPhone 6s A1688 Verizon (“iPhone 6s Report”) at 9; see also Ex. 109, TechInsights Teardown Report for Apple iPhone 6s Plus (“iPhone 6s Plus Report”) at 11.)
(b) a cut out in the rear side of said housing;	Each of the '602 Patent Accused Devices includes a cut out in the rear side of said housing.

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	For example, the representative Apple iPhone 6s includes a cut out in the rear of the housing, as shown below.  (See, e.g., iPhone 6s Report at 9; see also iPhone 6s Plus Report at 11.)
(c) a camera located in said housing and extending to said cut out at said rear side;	Each of the '602 Patent Accused Devices includes a camera located in said housing and extending to said cut out at said rear side. For example, in the representative Apple iPhone 6s, a camera is located in the housing and extends to the cut out at the rear side of the housing, as shown below.

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	 (See, e.g., iPhone 6s Report at 9; see also iPhone 6s Plus Report at 11.)

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	 Camera module cover Main Camera module (See, e.g., iPhone 6s Report at 12; <i>see also</i> iPhone 6s Plus Report at 34.)  (See, e.g., iPhone 6s Report at 39; <i>see also</i> iPhone 6s Plus Report at 66.)

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
(d) an engine section comprising a printed circuit board, a transceiver, a processor and a memory;	Each of the '602 Patent Accused Devices includes an engine section comprising a printed circuit board, a transceiver, a processor and a memory. For example, the representative Apple iPhone 6s contains an engine section comprising a printed circuit board (outlined in pink below). (See, e.g., iPhone 6s Report at 12; see also iPhone 6s Plus Report at 19.) On one side of the circuit board is located a processor (outlined in orange below).

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	 The diagram shows the internal circuit board of an iPhone 6s. On the left side, there is a list of components with callout lines pointing to their locations on the board: Teves Instrumental #35A/953 Backlight Driver Apple #A11, 1022 Baseband / Applications Processor Nano sim holder InvenSense #MP-670 6-axis Gyroscope and Accelerometer Qualcomm #MCM95, 15MAG02 Multimode baseband processor Avago #AFEM-803D FEM with filter On the right side of the circuit board, a transceiver is outlined in yellow, and a memory component is outlined in pink. (See, e.g., iPhone 6s Report at 25; see also iPhone 6s Plus Report at 69.) On the other side of the circuit board are located a transceiver (outlined in yellow below) and a memory (outlined in pink below).

**U. S. Patent No.
9,473,602**

'602 Patent Accused Devices

(See, e.g., iPhone 6s Report at 27; see also iPhone 6s Plus Report at 88.)

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	(See, e.g., iPhone 6s Report at 26; <i>see also</i> iPhone 6s Plus Report at 86.)
(e) a user input section located above the engine section and a battery, wherein the user input section is located adjacent the battery and the engine section;	Each of the '602 Patent Accused Devices includes a user input section located above the engine section and a battery, wherein the user input section is located adjacent the battery and the engine section. For example, the representative Apple iPhone 6s has a touch display, as shown below. (See, e.g., iPhone 6s Report at 9; <i>see also</i> iPhone 6s Plus Report at 12.) When the touch display is removed, as shown below, it can be seen that the battery (outlined in green below) and the engine section (outlined in pink below) are directly beneath and adjacent to the touch display.

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	 (See, e.g., iPhone 6s Report at 10; see also iPhone 6s Plus Report at 16, 19.)
(f) wherein the battery and engine section are housed in the housing and the user input is located in an opening between said exterior lateral sides of said one piece housing of the portable electronic device.	In each '602 Patent Accused Device, the battery and engine section are housed in the housing and the user input is located in an opening between said exterior lateral sides of said one piece housing of the portable electronic device. For example, in the representative Apple iPhone 6s, the battery (outlined in green below) and the engine section (outlined in pink below) are located within the housing.

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	A photograph of the internal components of an iPhone 6s. The device is shown from the back, with the metal housing removed. The large black battery is in the center, featuring the Apple logo and text: 'Li-ion Battery', '3.82V nominal voltage', 'APN: 91M-00001A', a warning triangle, 'WARNING: Authorized Service Provider Only. Potential for fire or burning. Do not disassemble, puncture, crush, heat, or burn.', 'Do Not Dispose in Fire', 'Recycle Here', and 'Li-ion'. To the right of the battery is the logic board, which has a green rectangular box around it. Above the logic board is a small white component, possibly a camera or sensor, with a pink rectangular box around it. The entire assembly is set against a blue grid background. (See, e.g., iPhone 6s Report at 12; <i>see also</i> iPhone 6s Plus Report at 19.) The user input of the representative Apple iPhone 6s is located in an opening between the exterior lateral sides of the one piece housing of the device. The picture below depicts the housing of the iPhone 6s with the majority of the internal components removed.

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	The image shows the internal components of an iPhone 6s. A large, rectangular, silver-colored metal frame (the housing) is shown. In the center of the frame, there is a large, dark, rectangular opening. A touch display assembly, which is a thin, dark, rectangular piece with a small circular cutout at the top, is being inserted into this opening. The assembly is held in place by several small, blue, rectangular components. The entire assembly is resting on a blue and white checkered surface. (See, e.g., iPhone 6s Report at 38; see also iPhone 6s Plus Report at 14). As can be seen in the picture below, the touch display of the iPhone 6s is placed into the opening in the housing between the exterior lateral sides.

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
	(See, e.g., iPhone 6s Report at 9; <i>see also</i> iPhone 6s Plus Report at 12.) (See, e.g., iPhone 6s Report at 10; <i>see also</i> iPhone 6s Plus Report at 16, 18-19.)

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
Claim 15	
15. A housing for a portable electronic device comprising:	Each '602 Patent Accused Device includes a housing for a portable electronic device comprising the following elements. <i>See</i> Claim 1(a).
(a) a one piece housing forming enclosed exterior lateral sides and a rear side;	Each '602 Patent Accused Device includes a one piece housing forming enclosed exterior lateral sides and a rear side. <i>See</i> Claim 1(a).
(b) a cut out in the rear side of said housing, said cut out configured to receive at least part of a camera;	Each '602 Patent Accused Device includes a cut out in the rear side of said housing, said cut out configured to receive at least part of a camera. <i>See</i> Claim 1(b)-(c).
(c) wherein the housing is configured to receive a battery and an engine section, wherein a user input is located in an opening between said exterior lateral sides of said one piece housing of the portable electronic device, wherein the battery and engine section are configured to be housed in the housing such that the user input section is located above the engine section and the battery, and wherein the user input section is located adjacent the battery and the engine section.	In each '602 Patent Accused Device, the housing is configured to receive a battery and an engine section, a user input is located in an opening between said exterior lateral sides of said one piece housing of the portable electronic device, the battery and engine section are configured to be housed in the housing such that the user input section is located above the engine section and the battery, and the user input section is located adjacent the battery and the engine section. <i>See</i> Claim 1(d)-(f).

U. S. Patent No. 9,473,602	'602 Patent Accused Devices
Claim 22	
22. A mobile phone comprising:	Each '602 Patent Accused Device is a mobile phone that comprises the following elements.
(a) a one piece housing of the mobile phone forming enclosed exterior lateral sides and a rear side of the mobile phone;	Each of the '602 Patent Accused Devices includes a one piece housing forming enclosed exterior lateral sides and a rear side of the mobile phone. <i>See</i> Claim 1(a).
(b) a cut out in the rear side of said housing;	Each of the '602 Patent Accused Devices includes a cut out in the rear side of said housing. <i>See</i> Claim 1(b).
(c) a camera located in said housing and extending to said cut out at said rear side;	Each of the '602 Patent Accused Devices includes a camera located in said housing and extending to said cut out at said rear side. <i>See</i> Claim 1(c).
(d) an engine section comprising a printed circuit board, a transceiver, a processor and a memory;	Each of the '602 Patent Accused Devices includes an engine section comprising a printed circuit board, a transceiver, a processor and a memory. <i>See</i> Claim 1(d).
(e) a user input section located above the engine section and a battery, wherein the user input section is located adjacent the battery and the engine section;	Each of the '602 Patent Accused Devices includes a user input section located above the engine section and a battery, wherein the user input section is located adjacent the battery and the engine section. <i>See</i> Claim 1(e).
(f) wherein the battery and engine section are housed in the housing and the user input is located in an opening between said exterior lateral sides of said one piece housing of the mobile phone.	In each '602 Patent Accused Device, the battery and engine section are housed in the housing and the user input is located in an opening between said exterior lateral sides of said one piece housing of the mobile phone. <i>See</i> Claim 1(f).
