ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment is 0 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

APPLICANT(s) (Please see PAIR WEB site http://pair.uspto.gov for additional applicants):

Hiep V. Nguyen, Fort Mill, SC;
US Conec, Ltd., Hickory, NC;
Darrell R. Childers, Hickory, NC;
Michael E. Hughes, Hickory, NC;
Jillcha Fekadu Wakjira, Hickory, NC;
Joseph P. Howard, Hickory, NC;

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The USA offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to encourage and facilitate business investment. To learn more about why the USA is the best country in the world to develop technology, manufacture products, and grow your business, visit SelectUSA.gov.

Change(s) applied
to document,
/Y.C.C./
5/5/2020

IN THE SPECIFICATION:

Please replace paragraph [0035] with the revised new paragraph:

The position of the ferrule holders **300** on the first side **106** of the adapter relative to the ferrule holders **300** on the second side **108** is what allows the optical ferrules to be aligned with one another. There is no need, as discussed above, to worry about the stacking of tolerances as in the prior art. The positioning of the projections **320,322** on the ferrule holders **300** relative to the plurality of grooves **140**, **142** is important. With reference to Figs. 7A and 7B, the projections **320,322** are used to control the x and y locations of the ferrule holders **300**. The ~~surfaces **350**~~ surfaces **340** of the projections **320,322** (Fig. 7A) align with the surfaces **150** in the adapter (Fig. 7B) to control the x direction of the ferrule holder **300** relative to the adapter **100**. The surfaces **352** of the ferrule holder **300** align with the surfaces ~~**352** of~~ **152** of the raised bottom portion **132** and the dropped top portion **134** of the center portion **110** to control the y direction of the ferrule holder **300** relative to the adapter **100**. The surfaces of the projections **320,322** could also align in the y direction, given that they are parallel to the surfaces **352**.

Document Description: Issue Fee Payment (PTO-85B)

Issue Fee Transmittal Form

Application Number	Filing Date	First Named Inventor	Atty. Docket No.	Confirmation No.
15855788	27-Dec-2017	Hiep Nguyen	USCO-053-02	9525

TITLE OF INVENTION :

Alignment Adapter and Alignment Design for a Connector Therefor

Entity Status	Application Type	Art Unit	Class - Subclass	EXAMINER
Regular Undiscounted	Utility under 35 USC 111(a)	2883	059000	OMAR ROJAS

Issue Fee Due	Publication Due	Total Fee(s) Due	Date Due	Prev. Paid Fee
$1000	$0	$1000	18-Jun-2020	$0

1.Change of Correspondence Address and/or Indication Of Fee Address (37 CFR 1.33 & 1.363)

Current Correspondence Address:	Current Indicated Fee Address :
152017 Us Conec Ltd. 1138 25th Street Southeast Hickory NC 28602 UNITED STATES 828-323-8883 eofficeaction@appcoll.com	
☐ Change of correspondence address requested, system generated AIA/122-EFS form attached	☐ Fee Address indication requested, system generated SB/47-EFS form attached

2.Entity Status

Change in Entity Status

○ Applicant certifying micro entity status; system generated Micro Entity certification form attached. See 37 CFR 1.29.
Note: Absent a valid certification of micro entity status, issue fee payment in the micro entity amount will not be accepted at the risk of application abandonment. If this box is checked, you will be prompted to choose a micro entity status on the gross income basis (37 CFR 1.29(a)) or the institution of higher education basis (37 CFR 1.29(d)), and make the applicable certification online.

○ Applicant asserting small entity status. See 37 CFR 1.27.
Note: If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.

◉ Applicant changing to regular undiscounted fee status.
Note: Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

Document Description: Issue Fee Payment (PTO-85B)

3.The Following Fee(s) Are Submitted:

☒ Issue Fee

☐ I authorize USPTO to apply my previously paid issue fee to the current fees due

☐ Publication Fee

☐ The Director is hereby authorized to apply my previously paid issue fee to the current fee due and to charge deficient fees to Deposit Account Number _____

☐ Advance Order - # of copies _____

☐ If **in addition to** the payment of the issue fee amount submitted with this form, there are any discrepancies in any amount(s) due, the Director is authorized to charge any deficiency, or credit any overpayment, to Deposit Account Number _____ . The **issue fee must be submitted** with this form. **If payment of the issue fee does not accompany this form, checking this box and providing a deposit account number will NOT be effective to satisfy full payment of the fee(s) due.**

4.Firm and/or Attorney Names To Be Printed

NOTE: If no name is listed, no name will be printed
For printing on the patent front page, list to be displayed as entered

1. Michael L. Leetzow, P.A.
2. Shubhrangshu Sengupta
3.

5.Assignee Name(s) and Residence Data To Be Printed

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

DATE MAILED: 03/18/2020

APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
15/855,788	12/27/2017	Hiep V. Nguyen	USCO-053-02	9525

TITLE OF INVENTION: Alignment Adapter and Alignment Design for a Connector Therefor

APPLN. TYPE	ENTITY STATUS	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	UNDISCOUNTED	$1000	$0.00	$0.00	$1000	06/18/2020

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), by mail or fax, or via EFS-Web.

By mail, send to: Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

By fax, send to: (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

152017 7590 03/18/2020

Us Conec Ltd.
1138 25th Street Southeast
Hickory, NC 28602

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being transmitted to the USPTO via EFS-Web or by facsimile to (571) 273-2885, on the date below.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or

Notice of Allowability	Application No. 15/855,788	Applicant(s) Nguyen et al.	
	Examiner Omar R Rojas	Art Unit 2883	AIA (FITF) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☑ This communication is responsive to the amendment and arguments filed 02/10/2020.
   ☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2. ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

3. ☑ The allowed claim(s) is/are 12-13,22-25 and 27-37 . As a result of the allowed claim(s), you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see **http://www.uspto.gov/patents/init_events/pph/index.jsp** or send an inquiry to **PPHfeedback@uspto.gov.**

4. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

   Certified copies:

   a) ☐ All b) ☐ Some *c) ☐ None of the:

   1. ☐ Certified copies of the priority documents have been received.
   2. ☐ Certified copies of the priority documents have been received in Application No. _____ .
   3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

   * Certified copies not received: _____ .

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
   ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____ .

   Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).

6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Attachment(s)

1. ☐ Notice of References Cited (PTO-892)
2. ☐ Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date _____.
3. ☐ Examiner's Comment Regarding Requirement for Deposit of Biological Material _____.
4. ☐ Interview Summary (PTO-413), Paper No./Mail Date. _____.
5. ☐ Examiner's Amendment/Comment
6. ☐ Examiner's Statement of Reasons for Allowance
7. ☐ Other _____.

This collection of information is required by 37 CFR 1.16. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

RESPONSE

Dear Sir:

In response to the Office Action mailed on November 18, 2019, and the Interview Summary mailed on January 31, 2020, Applicant responds as follows::

IN THE CLAIMS:

Claims 1-11. Canceled.

12. (Previously Presented) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body to engage corresponding grooves in an adapter, the first and second outside surfaces being on opposite sides of the main body, the first projection having a different shape than the second projection, and wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces; and

a single cantilevered latch attached to one of the top surface and the bottom surface rearwardly of and unconnected to the first projection and the second projection.

13. (Previously Presented) The ferrule holder according to claim 12, where the projections engage a groove in a plug.

14 -21. Canceled.

22. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends from the first end rearwardly toward the second end.

23. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends along a length of the ferrule holder.

24. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections has a chamfered front end.

25. (Previously Presented) The ferrule holder according to claim 12, wherein one of the projections has at least one dimension that is different than the other projection.

26. Canceled.

27. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a width of the projection.

28. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a height of the projection.

29. (Previously Presented) The ferrule holder according to claim 12, wherein the projections slidingly engage a corresponding groove in a plug.

30. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a vertical side surface to align the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

31. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a horizontal top surface to align the ferrule holder with a horizontal wall of

a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

32. (Previously Presented) A ferrule holder comprising:

a main body;

a single central opening in the main body and extending from a first end to a second end to retain a single fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, the projections extending along a length of the main body at least partially in a front half of the main body, and wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces; and

a single cantilevered latch attached to one of the top surface and the bottom surface rearwardly of and unconnected to the first projection and the second projection.

33. (Previously Presented) The ferrule holder according to claim 32, wherein one of the projections is on a first outside surface of the main body of the ferrule holder and has at least one dimension that is different than the other projection on an opposite second outside surface.

34. (Previously Presented) The ferrule holder according to claim 33, wherein the first outside surface is a top surface of the main body and the opposite second outside surface is a bottom surface of the main body, or vice versa.

35. (Previously Presented) The ferrule holder according to claim 32, wherein the projections have surfaces to control movement of the main body relative to the adapter.

36. (Previously Presented) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces, the first projection having a different shape than the second projection and the projections having surfaces to the control movement of the main body relative to an adapter; and

a single cantilevered latch attached to one of the top surface and the bottom surface rearwardly of and unconnected to the first projection and the second projection.

37. (Previously Presented) The ferrule holder according to claim 12, wherein the first and second projections each have two side walls, at least one of the side walls from the first projection being offset in a lateral direction from each of the side walls of the second projection.

REMARKS

In the above-referenced Office Action, the Examiner indicated that the amendments to the claims and the specification from the Amendment filed on September 24, 2019, have been entered. Thus, the claims above reflect those amendments. Applicant also submits that the additional sentence in the specification has been entered and is not repeated here.

In that Office Action, the Examiner indicated that there were only two issues remaining in the case: 1) the specification had new matter; and 2) the claims were rejected under 35 U.S.C. § 112(a).

The Examiner indicated that the word "shape" was new matter in the specification and had to be removed. The claims were rejected because the word "shape" was not supported by the specification. Applicant called the Examiner to bring to his attention that different shapes found support in the provisional application, an application that was incorporated by reference and also from which the present application claims priority. See Interview Summary. Since support has been provided, the addition of the sentence in the last amendment is not new matter and the claims now find support in the specification. Thus, the claims are allowable.

Applicant agrees with the Examiner's statements in the summary.

The Examiner is invited to telephone the undersigned in the event the Examiner would like to discuss the merits of the application or this response.

Respectfully submitted,

/Michael L. Leetzow/

ROJAS, OMAR R

ART UNIT	PAPER NUMBER
2883	

NOTIFICATION DATE	DELIVERY MODE
01/31/2020	ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

eofficeaction@appcoll.com
michael@leetzow.com
ssengupta@usconec.com

Applicant-Initiated Interview Summary	**Application No.** 15/855,788	**Applicant(s)** Nguyen et al.	
	Examiner Omar R Rojas	**Art Unit** 2883	**AIA (FITF) Status** No

All participants (applicant, applicants representative, PTO personnel):

(1) Omar R. Rojas. (3) _____.

(2) Michael L. Leetzow. (4) _____.

Date of Interview: 28 January 2020.

Type: ☑ Telephonic ☐ Video Conference
☐ Personal [copy given to: ☐ applicant ☐ applicant's representative]

Exhibit shown or demonstration conducted: ☐ Yes ☑ No.
If Yes, brief description: _____.

Issues Discussed ☐101 ☑112 ☐102 ☐103 ☑Others
(For each of the checked box(es) above, please describe below the issue and detailed description of the discussion)

Claim(s) discussed: 1.

Identification of prior art discussed: None.

Substance of Interview
(For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

Mr. Leetzow argued that support for the "different shape" limitation recited by claim 1 could be found in parent provisional application no. 61/789,499. In particular, one of the specification documents filed 03/15/2013 in the provisional application states "[t]he shape of keys are rectangular but could be other shapes such as semi-circular". The examiner agreed that adequate support for all of the claimed subject matter was provided by applicant and that the previous claim rejection(s) under 35 USC 112 were obviated in view of Mr. Leetzow's argument. The examiner also agreed to withdraw the objection to specification. Mr. Leetzow indicated that he would still file a formal response that includes the argument(s) set forth in this interview..

Applicant recordation instructions: The formal written reply to the last Office action must include the substance of the interview. (See MPEP section 713.04). If a reply to the last Office action has already been filed, applicant is given a non-extendable period of the longer of one month or thirty days from this interview date, or the mailing date of this interview summary form, whichever is later, to file a statement of the substance of the interview.

Examiner recordation instructions: Examiners must summarize the substance of any interview of record. A complete and proper recordation of the substance of an interview should include the items listed in MPEP 713.04 for complete and proper recordation including the identification of the general thrust of each argument or issue discussed, a general indication of any other pertinent matters discussed regarding patentability and the general results or outcome of the interview, to include an indication as to whether or not agreement was reached on the issues raised.

☐ Attachment

/Omar R Rojas/ Primary Examiner, Art Unit 2883	

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record
A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) 1.133 Interviews
Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.
All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiners responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicants correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:
- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:
1) A brief description of the nature of any exhibit shown or any demonstration conducted,-
2) an identification of the claims discussed,
3) an identification of the specific prior art discussed,
4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
6) a general indication of any other pertinent matters discussed, and
7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicants record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiners version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, Interview Record OK on the paper recording the substance of the interview along with the date and the examiners initials.

Office Action Summary	Application No. 15/855,788	Applicant(s) Nguyen et al.	
	Examiner Omar R Rojas	Art Unit 2883	AIA (FITF) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☑ Responsive to communication(s) filed on 09/24/2019.

☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2a)☐ This action is **FINAL.** 2b) ☑ This action is non-final.

3)☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

4)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims*

5) ☑ Claim(s) 12-13,22-25 and 27-37 is/are pending in the application.

5a) Of the above claim(s) _____ is/are withdrawn from consideration.

6) ☑ Claim(s) 32-35 is/are allowed.

7) ☑ Claim(s) 12-13,22-25,27-31 and 36-37 is/are rejected.

8) ☐ Claim(s) _____ is/are objected to.

9) ☐ Claim(s) _____ are subject to restriction and/or election requirement

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to **PPHfeedback@uspto.gov.**

Application Papers

10)☐ The specification is objected to by the Examiner.

11)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

a)☐ All b)☐ Some** c)☐ None of the:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

** See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☑ Notice of References Cited (PTO-892)

2) ☐ Information Disclosure Statement(s) (PTO/SB/08a and/or PTO/SB/08b) Paper No(s)/Mail Date _____.

3) ☑ Interview Summary (PTO-413) Paper No(s)/Mail Date _____.

4) ☐ Other: _____.

DETAILED ACTION

Notice of Pre-AIA or AIA Status

1. The present application is being examined under the pre-AIA first to invent provisions.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/24/2019 has been entered.

Response to Amendment

3. With regards to the amendment filed on 09/24/2019, all the requested changes to the claims and specification have been entered. Applicant's constructive efforts to advance prosecution are appreciated. Claim(s) 12, 13, 22-25, and 27-37 are pending.

Specification

4. The amendment filed 09/24/2019 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the projections 320 and 322 having different shapes. The added material is beyond the scope of the original disclosure. Different shapes could mean many different shapes such as v-shaped projections, circular projections, triangular-shaped projections, etc. For example, Patent No. 4,645,295 to Pronovost discloses v-shaped ridges (40) formed on the surfaces of an optical plug (16). The newly added material would now read on using both the originally disclosed projection shape and the v-shape of Pronovost's

ridges (40) because these could be considered different shapes.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112(a):

> (a) IN GENERAL.—The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor or joint inventor of carrying out the invention.

The following is a quotation of the first paragraph of pre-AIA 35 U.S.C. 112:

> The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. **Claims 12, 13, 22-25, 27-31, 36, and 37 are rejected under 35 U.S.C. 112(a) or 35 U.S.C. 112 (pre-AIA), first paragraph, as failing to comply with the written description requirement.** The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor or a joint inventor, or for pre-AIA the inventor(s), at the time the application was filed, had possession of the claimed invention. The original disclosure did not mention "the first projection having a different shape than the second projection" (see claims 12 and 36). Different shapes could mean many different shapes such as v-shaped projections, circular projections, triangular-shaped projections, etc. For example, Patent No. 4,645,295 to Pronovost discloses v-shaped ridges (40) formed on the surfaces of an optical plug (16). The newly added limitation would now read on using both the originally disclosed projection shape and the v-shape of Pronovost's ridges (40) because these could be considered different shapes. Thus, the original disclosure is not commensurate with the scope of protection sought by the claims.

Allowable Subject Matter

7. Claims 32-35 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar R. Rojas whose telephone number is (571)272-2357. The examiner can normally be reached on Monday-Friday, 10AM-6PM EST.

Examiner interviews are available via telephone, in-person, and video conferencing using a USPTO supplied web-based collaboration tool. To schedule an interview, applicant is encouraged to use the USPTO Automated Interview Request (AIR) at http://www.uspto.gov/interviewpractice.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Hollweg can be reached on 571-270-1739. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

November 12, 2019

Examiner-Initiated Interview Summary	**Application No.** 15/855,788	**Applicant(s)** Nguyen et al.	
	Examiner Omar R Rojas	**Art Unit** 2883	**AIA (FITF) Status** No

All participants (applicant, applicant's representative, PTO personnel):

(1) Omar R. Rojas. (3) _____.

(2) Michael L. Leetzow. (4) _____.

Date of Interview: 01 November 2019.

Type: ☑ Telephonic ☐ Video Conference
☐ Personal [copy given to: ☐ applicant ☐ applicant's representative]

Exhibit shown or demonstration conducted: ☐ Yes ☑ No.
If Yes, brief description: _____.

Issues Discussed ☐ 101 ☑ 112 ☐ 102 ☐ 103 ☐ Others
(For each of the checked box(es) above, please describe below the issue and detailed description of the discussion)

Claim(s) discussed: 12 and 36.

Identification of prior art discussed: None.

Substance of Interview
(For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

See Continuation Sheet.

Applicant recordation instructions: It is not necessary for applicant to provide a separate record of the substance of interview.

Examiner recordation instructions: Examiners must summarize the substance of any interview of record. A complete and proper recordation of the substance of an interview should include the items listed in MPEP 713.04 for complete and proper recordation including the identification of the general thrust of each argument or issue discussed, a general indication of any other pertinent matters discussed regarding patentability and the general results or outcome of the interview, to include an indication as to whether or not agreement was reached on the issues raised.

☐ Attachment

/Omar R Rojas/ Primary Examiner, Art Unit 2883	

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner Rojas contacted Mr. Leetzow to indicate that claims 12 and 36 presented a new matter issue due to the newly proposed "different shape" limitation. Examiner Rojas asked permission from Mr. Leetzow to change the "different shape" limitations in claims 12 and 36 to "different configuration" in order to obviate the new matter issue. Mr. Leetzow agreed to this change. However, the examiner was unable to get permission from Mr. Leetzow to also cancel the different shapes subject matter from the specification.

PTO/SB/06 (09-11)
Approved for use through 1/31/2014. OMB 0651-0032
U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE
Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

PATENT APPLICATION FEE DETERMINATION RECORD Substitute for Form PTO-875	Application or Docket Number 15/855,788	Filing Date 12/27/2017	☐ To be Mailed

ENTITY: ☑ LARGE ☐ SMALL ☐ MICRO

APPLICATION AS FILED - PART I

FOR	(Column 1) NUMBER FILED	(Column 2) NUMBER EXTRA		RATE ($)	FEE ($)
☐ BASIC FEE (37 CFR 1.16(a), (b), or (c))	N/A	N/A		N/A	
☐ SEARCH FEE (37 CFR 1.16(k), (i), or (m))	N/A	N/A		N/A	
☐ EXAMINATION FEE (37 CFR 1.16(o), (p), or (q))	N/A	N/A		N/A	
TOTAL CLAIMS (37 CFR 1.16(i))	minus 20 =	*		x $80 =	
INDEPENDENT CLAIMS (37 CFR 1.16(h))	minus 3 =	*		x $420 =	
☐ APPLICATION SIZE FEE (37 CFR 1.16(s))	If the specification and drawings exceed 100 sheets of paper, the application size fee due is $310 ($155 for small entity) for each additional 50 sheets or fraction thereof. See 35 U.S.C. 41(a)(1)(G) and 37 CFR 1.16(s).				
☐ MULTIPLE DEPENDENT CLAIM PRESENT (37 CFR 1.16(j))					
* If the difference in column 1 is less than zero, enter "0" in column 2.				TOTAL	

APPLICATION AS AMENDED - PART II

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.

2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.

3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.

4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).

5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.

6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).

7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.

8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.

9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

AMENDMENT WITH RCE

Dear Sir:

Further to the Request for Consideration under the After Final Consideration Pilot Program 2.0 filed on June 14, 2019, the Advisory Action of July 1, 2019, and with the Petition for an Extension of Time and fee and the Request for Continued Examination filed concurrently herewith, Applicant amends the application and responds as follows:

IN THE SPECIFICATION:

Please replace paragraph [0026] with the following revised paragraph:

As illustrated in Figs. 5A-C, the ferrule holder **300** has a main body **302** with a central opening **304** that extends from a first end **306** to a second end **308** to house the fiber optic ferrules **12**. The first end **306** has an opening **310** therein to allow access to the ferrule **12**. The ferrule **12** may or may not exit the main body **302**. That is, the ferrule **12** may extend beyond the main body **302** as shown in the figures or it may be flush with the first end **306**. second end 308 allows for the optical fibers **14** (shown in Fig. 5A and 5B to have a boot and a covering) to exit the ferrule holder **300**. The ferrule holder **300** has a top surface **312** and a bottom surface **314**, with a cantilevered latch **316** to engage the plug **200**. The top surface **312** has a projection **320** and the bottom surface **314** has a projection **322**. The projections **320,322** are preferably elongated and have a chamfered front end. The projections **320,322** are used to engage grooves in the plug **200** and the adapter **100** to position the ferrule holders **300** with precision in the adapter **100**. The projection **320** has a width that is different that the width of projection **322** so as to act as a key in inserting the ferrule holder **300** in the plug 200. While the projection **320** is wider than projection **322**, it could be opposite in that projection **320** is more narrow than projection **322**. Thus, the projections **320** and **322** have different shapes or configurations. The projections **320,322** are preferably on the top and the bottom surfaces **312,314** of the ferrule holder **300** to allow, as illustrated below, more ferrule holders to be inserted into the adapter **100** and the plug **200**. The projections **320,322** are used to position the ferrules **12** in the adapter in the x and y directions, eliminating the need for side walls to position the ferrule holders **300** and the ferrules **12**.

IN THE CLAIMS:

Claims 1-11. Canceled.

12. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body to engage corresponding grooves in an adapter, the first and second outside surfaces being on opposite sides of the main body, the first projection having a different ~~configuration~~ shape than the second projection, and wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces; and

a single cantilevered latch attached to one of the top surface and the bottom surface rearwardly of and unconnected to the first projection and the second projection.

13. (Previously Presented) The ferrule holder according to claim 12, where the projections engage a groove in a plug.

14 -21. Canceled.

22. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends from the first end rearwardly toward the second end.

23. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends along a length of the ferrule holder.

24. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections has a chamfered front end.

25. (Previously Presented) The ferrule holder according to claim 12, wherein one of the projections has at least one dimension that is different than the other projection.

26. Canceled.

27. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a width of the projection.

28. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a height of the projection.

29. (Previously Presented) The ferrule holder according to claim 12, wherein the projections slidingly engage a corresponding groove in a plug.

30. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a vertical side surface to align the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

31. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a horizontal top surface to align the ferrule holder with a horizontal wall of

a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

32. (Currently Amended) A ferrule holder comprising:

a main body;

a single central opening in the main body and extending from a first end to a second end to retain a single fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, ~~a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter,~~ the projections extending along a length of the main body at least partially in a front half of the main body, and wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces; and

a single cantilevered latch attached to one of the top surface and the bottom surface rearwardly of and unconnected to the first projection and the second projection.

33. (Previously Presented) The ferrule holder according to claim 32, wherein one of the projections is on a first outside surface of the main body of the ferrule holder and has at least one dimension that is different than the other projection on an opposite second outside surface.

34. (Previously Presented) The ferrule holder according to claim 33, wherein the first outside surface is a top surface of the main body and the opposite second outside surface is a bottom surface of the main body, or vice versa.

35. (Previously Presented) The ferrule holder according to claim 32, wherein the projections have surfaces to control movement of the main body relative to the adapter.

36. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, ~~the first and second outside surfaces being on opposite sides of the main body~~, wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces, the first projection having a different ~~configuration~~ shape than the second projection and the projections having surfaces to the control movement of the main body relative ~~to the~~ to an adapter; and

a single cantilevered latch attached to one of the top surface and the bottom surface rearwardly of and unconnected to the first projection and the second projection.

37. (New) The ferrule holder according to claim 12, wherein the first and second projections each have two side walls, at least one of the side walls from the first projection being offset in a lateral direction from each of the side walls of the second projection.

REMARKS

In the above-referenced Advisory Action, the Examiner indicated that the claim 12 amendment was new matter because the specification did not include the term "different shape;" that the combination of Cox and Katoh were relevant to at least claim 12; and that the combination of Jones and Katoh was relevant to at least claim 12.

In this amendment, Applicant has amended the specification to clarify the "different shape" language that is inserted in the claims; further defined the sides of the main body; and added that the cantilevered latch is attached to one of the top surface and bottom surface and unconnected to the projections.

Applicant has amended the specification to add "different shapes or configurations" in paragraph [0026]. This addition follows a description of the projections and providing a further description thereof. Applicant asserts that this additional language is not new matter since it flows from the prior sentences. As such, applicant asserts that the specification, and the figures, provide support for this claim term.

Applicant has also amended the claims to require that the cantilevered latch be attached to one of the top surface and bottom surface of the main body and rearwardly therefrom. The new amendments also require that the cantilevered latch be unconnected from the projections. This element is supported in FIGS. 2, 5A, and 5B. The Examiner has alleged that Jones teaches "a latch arm (85) with a projection (89) that could be formed on both short sides (86) and (88) of a main plug body (80). In the examiner's opinion, it would have been obvious to modify the projections (89) of Jones to have different shapes or widths in view of Katoh." July 1, 2019, Advisory Action. However, Jones indicates that element 89 (the projection) is a forward portion of the latch 85. Col. 4, lines 4-6. This fact would also be true even if there were multiple latches and multiple geometries as discussed in column 4. As such, the latch and the projections are one in the same. Since the claims require that the latch and the projection be unconnected or separate, the Jones reference, alone or in combination with Katoh, fails to disclose or suggest the claimed invention.

Applicant asserts that Katoh is not applicable to the present invention. The projections dislosed therein are on the long side and not the short side. It is not possible to move those to the short side given the environment they are used in, including the adapter in which the connectors are inserted. To move the projections, then the adapter would have to be altered and this would require the reconstruction of the adapter and/or a change in the principle of operation of the device and its associated pieces. Such a change is therefore not allowed.

Applicant asserts that since all of the independent claims have the elements discussed above, all of the pending claims are allowable and requests this application be passed to issue.

The Examiner is invited to telephone the undersigned in the event the Examiner would like to discuss the merits of the application or this response.

Respectfully submitted,

/Michael L. Leetzow/

NO NOTICE OF APPEAL FILED

1. ☑ The reply was filed after a final rejection. No Notice of Appeal has been filed. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114 if this is a utility or plant application. Note that RCEs are not permitted in design applications. The reply must be filed within one of the following time periods:
   a) ☑ The period for reply expires 3 months from the mailing date of the final rejection.
   b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action; or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.
   c) ☐ A prior Advisory Action was mailed more than 3 months after the mailing date of the final rejection in response to a first after-final reply filed within 2 months of the mailing date of the final rejection.The current period for reply expires ____ months from the mailing date of *the prior Advisory Action* or SIX MONTHS from the mailing date of the final rejection, whichever is earlier.
   Examiner Note: If box 1 is checked, check either box (a), (b) or (c). ONLY CHECK BOX (b) WHEN THIS ADVISORY ACTION IS THE FIRST RESPONSE TO APPLICANTS FIRST AFTER-FINAL REPLY WHICH WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. ONLY CHECK BOX (c) IN THE LIMITED SITUATION SET FORTH UNDER BOX (c). See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) or (c) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37CFR 41.37(a).

AMENDMENTS

3. ☑ The proposed amendments filed after a final rejection, but prior to the date of filing a brief, will not be entered because
   a) ☑ They raise new issues that would require further consideration and/or search (see NOTE below);
   b) ☑ They raise the issue of new matter (see NOTE below);
   c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
   d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.
   NOTE: See attached Interview Summary (See 37CFR 1.116 and 41.33(a)).
4. ☐ The amendments are not in compliance with 37CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).
5. ☐ Applicants reply has overcome the following rejection(s): _____
6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
7. ☑ For purposes of appeal, the proposed amendment(s):(a) ☑ will not be entered, or (b) ☐ will be entered, and an explanation of how the new or amended claims would be rejected is provided below or appended.

AFFIDAVIT OR OTHER EVIDENCE

8. ☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____
9. ☐ The affidavit or other evidence filed after final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).
10. ☐ The affidavit or other evidence filed after the date of filing the Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing of good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).
11. ☐ The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

12. ☐ The request for reconsideration has been considered but does NOT place the application in condition for allowance because: _____.
13. ☐ Note the attached Information *Disclosure Statement*(s). (PTO/SB/08) Paper No(s). _____
14. ☑ Other: PTO-2323, PTO-413B, PTO-892.

STATUS OF CLAIMS

15. The status of the claim(s) is (or will be) as follows:
    Claim(s) allowed:_____.
    Claim(s) objected to:_____.
    Claim(s) rejected:12-13,15-17 and 22-36.
    Claim(s) withdrawn from consideration:_____.

/Omar R Rojas/ Primary Examiner, Art Unit 2883	

Examiner-Initiated Interview Summary	**Application No.** 15/855,788	**Applicant(s)** Nguyen et al.	
	Examiner Omar R Rojas	**Art Unit** 2883	**AIA (FITF) Status** No

All participants (applicant, applicant's representative, PTO personnel):

(1) Omar R. Rojas. (3) _____.

(2) Michael L. Leetzow. (4) _____.

Date of Interview: 21 June 2019.

Type: ☑ Telephonic ☐ Video Conference
☐ Personal [copy given to: ☐ applicant ☐ applicant's representative]

Exhibit shown or demonstration conducted: ☐ Yes ☑ No.
If Yes, brief description: _____.

Issues Discussed ☐ 101 ☑ 112 ☐ 102 ☑ 103 ☐ Others
(For each of the checked box(es) above, please describe below the issue and detailed description of the discussion)

Claim(s) discussed: 12,32 and 36.

Identification of prior art discussed: Pub. No. US 2005/0281509 A1 ("Cox"); Pat. No. 9,086,546 ("Jones"); Pat. No. 6,406,192 ("Chen"); Pub. No. US 2012/0057824 A1 ("Katoh")..

Substance of Interview
(For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

See Continuation Sheet.

Applicant recordation instructions: It is not necessary for applicant to provide a separate record of the substance of interview.

Examiner recordation instructions: Examiners must summarize the substance of any interview of record. A complete and proper recordation of the substance of an interview should include the items listed in MPEP 713.04 for complete and proper recordation including the identification of the general thrust of each argument or issue discussed, a general indication of any other pertinent matters discussed regarding patentability and the general results or outcome of the interview, to include an indication as to whether or not agreement was reached on the issues raised.

☐ Attachment

/Omar R Rojas/ Primary Examiner, Art Unit 2883	

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner Rojas discussed the Cox reference with Mr. Leetzow. Mr. Leetzow pointed out that Cox only showed one projection in his FIG. 5. Examiner Rojas indicated that it would have been obvious to provide a second projection to Cox to obtain the invention of claim 32. Mr. Leetzow also discussed the Chen reference cited in the previous Office action. Examiner Rojas indicated that Chen was no longer considered applicable to the after final claims as a primary reference. Katoh was also discussed and the possibility of combining Katoh with Cox in order to obtain the invention of claim 12. Mr. Leetzow argued that this would have been hindsight. Mr. Leetzow indicated he was willing to cancel independent claim 32 in order to overcome Cox. During a follow up telephone interview on June 26, Examiner Rojas notified Mr. Leetzow that claim 12 presented new matter because the specification as originally filed did not adequately support the "different shape" claim limitation. Examiner Rojas also indicated that a new reference to Jones was considered applicable to at least claim 12. This is because the Jones reference taught a latch arm (85) with a projection (89) that could be formed on both short sides (86) and (88) of a plug main body (80). In the examiner's opinion, it would have been obvious to modify the projections (89) of Jones to have different shapes or widths in view Katoh.

AFCP 2.0 Decision

Application No.	Applicant(s)	
15/855,788	Nguyen et al.	
Examiner	**Art Unit**	**AIA (FITF) Status**
Omar R Rojas	2883	No

This is in response to the After Final Consideration Pilot request filed 14 June 2019.

1. **Improper Request** – The AFCP 2.0 request is improper for the following reason(s) and the after final amendment submitted with the request will be treated under pre-pilot procedure.

   ☐ An AFCP 2.0 request form PTO/SB/434 (or equivalent document) was not submitted.

   ☐ A non-broadening amendment to at least one independent claim was not submitted.

   ☐ A proper AFCP 2.0 request was submitted in response to the most recent final rejection.

   ☐ Other: _____

2. **Proper Request**

   A. After final amendment submitted with the request will not be treated under AFCP 2.0.
   The after final amendment cannot be reviewed and a search conducted within the guidelines of the pilot program.

   ☐ The after final amendment will be treated under pre-pilot procedure.

   B. Updated search and/or completed additional consideration.
   The examiner performed an updated search and/or completed additional consideration of the after final amendment within the time authorized for the pilot program. The result(s) of the updated search and/or completed additional consideration are:

   ☐ 1. All of the rejections in the most recent final Office action are overcome and a Notice of Allowance is issued herewith.

   ☐ 2. The after final amendment would not overcome all of the rejections in the most recent final Office action . See attached interview summary for further details.

   ☐ 3. The after final amendment was reviewed, and it raises a new issue(s). See attached interview summary for further details.

   ☑ 4. The after final amendment raises new issues, but would overcome all of the rejections in the most recent final Office action. A decision on determining allowability could not be made within the guidelines of the pilot. See attached interview summary for further details, including any newly discovered prior art.

   ☐ 5. Other: _____

   Examiner Note: Please attach an interview summary when necessary as described above.

AMENDMENT AFTER FINAL

Dear Sir:

In response to the final Office Action mailed on April 2, 2019, Applicant amends the application and responds as follows:

PTO/SB/06 (09-11)
Approved for use through 1/31/2014. OMB 0651-0032
U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE
Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Advisory Action Before the Filing of an Appeal Brief	Application No. 15/855,788	Applicant(s) Nguyen et al.	
	Examiner Omar R Rojas	Art Unit 2883	AIA (FITF) Status No

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 01 June 2019 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

NO NOTICE OF APPEAL FILED

1. ☑ The reply was filed after a final rejection. No Notice of Appeal has been filed. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114 if this is a utility or plant application. Note that RCEs are not permitted in design applications. The reply must be filed within one of the following time periods:
   a) ☐ The period for reply expires ____ months from the mailing date of the final rejection.
   b) ☑ The period for reply expires on: (1) the mailing date of this Advisory Action; or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.
   c) ☐ A prior Advisory Action was mailed more than 3 months after the mailing date of the final rejection in response to a first after-final reply filed within 2 months of the mailing date of the final rejection.The current period for reply expires ____ months from the mailing date of *the prior Advisory Action* or SIX MONTHS from the mailing date of the final rejection, whichever is earlier.
   Examiner Note: If box 1 is checked, check either box (a), (b) or (c). ONLY CHECK BOX (b) WHEN THIS ADVISORY ACTION IS THE FIRST RESPONSE TO APPLICANTS FIRST AFTER-FINAL REPLY WHICH WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. ONLY CHECK BOX (c) IN THE LIMITED SITUATION SET FORTH UNDER BOX (c). See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) or (c) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37CFR 41.37(a).

AMENDMENTS

3. ☑ The proposed amendments filed after a final rejection, but prior to the date of filing a brief, will not be entered because
   a) ☑ They raise new issues that would require further consideration and/or search (see NOTE below);
   b) ☐ They raise the issue of new matter (see NOTE below);
   c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
   d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.
   NOTE: See Continuation Sheet (See 37CFR 1.116 and 41.33(a)).
4. ☐ The amendments are not in compliance with 37CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).
5. ☐ Applicants reply has overcome the following rejection(s): _____
6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
7. ☑ For purposes of appeal, the proposed amendment(s):(a) ☑ will not be entered, or (b) ☐ will be entered, and an explanation of how the new or amended claims would be rejected is provided below or appended.

AFFIDAVIT OR OTHER EVIDENCE

8. ☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____
9. ☐ The affidavit or other evidence filed after final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).
10. ☐ The affidavit or other evidence filed after the date of filing the Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing of good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).
11. ☐ The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

12. ☐ The request for reconsideration has been considered but does NOT place the application in condition for allowance because: _____.
13. ☐ Note the attached Information *Disclosure Statement*(s). (PTO/SB/08) Paper No(s). _____
14. ☐ Other: _____.

STATUS OF CLAIMS

15. The status of the claim(s) is (or will be) as follows:
    Claim(s) allowed:_____.
    Claim(s) objected to:_____.
    Claim(s) rejected:12-13,15-17 and 22-36.
    Claim(s) withdrawn from consideration:_____.

/Omar R Rojas/ Primary Examiner, Art Unit 2883	

Continuation of 3. NOTE: The proposed claim limitations "the first projection having a different shape than the second projection" and "the width of the top and bottom surfaces being smaller than the width of the two side surfaces" were not previously claimed and present new issues requiring further search and/or consideration. Applicant(s) is advised that the proposed claim amendments filed 06/01/2019 may still be eligible for consideration under the After Final Consideration Program 2.0. See https://www.uspto.gov/patent/initiatives/after-final-consideration-pilot-20 for further details.

AMENDMENT AFTER FINAL

Dear Sir:

In response to the final Office Action mailed on April 2, 2019, Applicant amends the application and responds as follows:

Doc Code: A.NE.AFCP
Document Description: After Final Consideration Pilot Program Request

PTO/SB/434 (05-13)

CERTIFICATION AND REQUEST FOR CONSIDERATION UNDER THE AFTER FINAL CONSIDERATION PILOT PROGRAM 2.0

Practitioner Docket No.:	Application No.:	Filing Date:
USCO-053-02	15/855,788	2017-12-27
First Named Inventor:	**Title:**	
Hiep V. Nguyen	Alignment Adapter and Alignment Design for a Connector Therefor	

APPLICANT HEREBY CERTIFIES THE FOLLOWING AND REQUESTS CONSIDERATION UNDER THE AFTER FINAL CONSIDERATION PILOT PROGRAM 2.0 (AFCP 2.0) OF THE ACCOMPANYING RESPONSE UNDER 37 CFR 1.116.

1. The above-identified application is (i) an original utility, plant, or design nonprovisional application filed under 35 U.S.C. 111(a) [a continuing application (*e.g.*, a continuation or divisional application) is filed under 35 U.S.C. 111(a) and is eligible under (i)], or (ii) an international application that has entered the national stage in compliance with 35 U.S.C. 371(c).
2. The above-identified application contains an outstanding final rejection.
3. Submitted herewith is a response under 37 CFR 1.116 to the outstanding final rejection. The response includes an amendment to at least one independent claim, and the amendment does not broaden the scope of the independent claim in any aspect.
4. This certification and request for consideration under AFCP 2.0 is the only AFCP 2.0 certification and request filed in response to the outstanding final rejection.
5. Applicant is willing and available to participate in any interview requested by the examiner concerning the present response.
6. This certification and request is being filed electronically using the Office's electronic filing system (EFS-Web).
7. Any fees that would be necessary consistent with current practice concerning responses after final rejection under 37 CFR 1.116, *e.g.*, extension of time fees, are being concurrently filed herewith. [There is no additional fee required to request consideration under AFCP 2.0.]
8. By filing this certification and request, applicant acknowledges the following:
    - Reissue applications and reexamination proceedings are not eligible to participate in AFCP 2.0.
    - The examiner will verify that the AFCP 2.0 submission is compliant, *i.e.*, that the requirements of the program have been met (see items 1 to 7 above). For compliant submissions:
        - The examiner will review the response under 37 CFR 1.116 to determine if additional search and/or consideration (i) is necessitated by the amendment and (ii) could be completed within the time allotted under AFCP 2.0. If additional search and/or consideration is required but cannot be completed within the allotted time, the examiner will process the submission consistent with current practice concerning responses after final rejection under 37 CFR 1.116, *e.g.*, by mailing an advisory action.
        - If the examiner determines that the amendment does not necessitate additional search and/or consideration, or if the examiner determines that additional search and/or consideration is required and could be completed within the allotted time, then the examiner will consider whether the amendment places the application in condition for allowance (after completing the additional search and/or consideration, if required). If the examiner determines that the amendment does not place the application in condition for allowance, then the examiner will contact the applicant and request an interview.
            - The interview will be conducted by the examiner, and if the examiner does not have negotiation authority, a primary examiner and/or supervisory patent examiner will also participate.
            - If the applicant declines the interview, or if the interview cannot be scheduled within ten (10) calendar days from the date that the examiner first contacts the applicant, then the examiner will proceed consistent with current practice concerning responses after final rejection under 37 CFR 1.116.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

AMENDMENT AFTER FINAL

Dear Sir:

In response to the final Office Action mailed on April 2, 2019, and the Advisory Action of June 14, 2019, and along with a Certification and Request for Consideration under the After Final Consideration Pilot Program 2.0, Applicant amends the application and responds as follows:

IN THE CLAIMS:

Claims 1-11. Canceled.

12. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body to engage corresponding grooves in an adapter, the first and second outside surfaces being on opposite sides of the main body, the first projection having a different ~~configuration~~ shape than the second projection, and wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces.

13. (Previously Presented) The ferrule holder according to claim 12, where the projections engage a groove in a plug.

14. Canceled.

15. (Previously Presented) The ferrule holder according to claim 12, further comprising a cantilevered latch attached to one of the outside surfaces of the main body between the second end and one of the projections and extending from a center portion of the main body towards the second end.

16. Canceled.

17. (Previously Presented) The ferrule holder according to claim 16, further comprising a cantilevered latch attached to the main body and wherein the cantilevered latch and the projections are attached to one of the top surface and the bottom surface.

Claims 18-21. Canceled.

22. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends from the first end rearwardly toward the second end.

23. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends along a length of the ferrule holder.

24. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections has a chamfered front end.

25. (Previously Presented) The ferrule holder according to claim 12, wherein one of the projections has at least one dimension that is different than the other projection.

26. Canceled.

27. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a width of the projection.

28. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a height of the projection.

29. (Previously Presented) The ferrule holder according to claim 12, wherein the projections slidingly engage a corresponding groove in a plug.

30. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a vertical side surface to align the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

31. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a horizontal top surface to align the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

32. (Currently Amended) A ferrule holder comprising:

a main body;

a single central opening in the main body and extending from a first end to a second end to retain a single fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, ~~a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter,~~ the projections extending along a length of the main body at least partially in a front half of the main body, and wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces.

33. (Previously Presented) The ferrule holder according to claim 32, wherein one of the projections is on a first outside surface of the main body of the ferrule holder and has at least one dimension that is different than the other projection on an opposite second outside surface.

34. (Previously Presented) The ferrule holder according to claim 33, wherein the first outside surface is a top surface of the main body and the opposite second outside surface is a bottom surface of the main body, or vice versa.

35. (Previously Presented) The ferrule holder according to claim 32, wherein the projections have surfaces to control movement of the main body relative to the adapter.

36. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, ~~the first and second outside surfaces being on opposite sides of the main body~~, wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces, the first projection having a different ~~configuration~~ shape than the second projection and the projections having surfaces to the control movement of the main body relative ~~to the~~ to an adapter.

37. (New) The ferrule holder according to claim 12, wherein the first and second projections each have two side walls, at least one of the side walls from the first projection being offset in a lateral direction from each of the side walls of the second projection.

REMARKS

In the above-referenced Office Action, the Examiner rejected claim 36 under 35 U.S.C. § 112(b) or 35 U.S.C. 112 (pre-AIA), second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the inventor or a joint inventor or, for pre-AIA, the applicant regards as the invention; rejected claims 12, 13, 15-17, 22-31, and 36 under 35 U.S.C. § 102(a)(l) as being anticipated by Chen et al. (U.S. Patent No. 6,406,192); and rejected claims 12, 13, and 22-26 under 35 U.S.C. § 102(a)(l) as being anticipated by Katoh (U.S. Patent Publication No. 2012/0057824). In the June 14, 2019, Advisory Action, the Examiner indicated that the shape and width amendments raised new issues requiring additional search. Applicant asserts that the shape was present as configuration and the width of the projections were claimed at least in claim 27. However, to continue to push this application to final resolution, Applicant is submitting the present amendment under the pilot program. The remarks below are the same as those submitted with the June 1, 2019 response since that response was not entered into the file.

In this amendment, Applicant has amended independent claims 12, 32, and 36; and canceled claims 16 and 26.

Applicant notes that the Examiner has interpreted "configuration" as to mean "the arrangement of parts of something." Such an interpretation is not what was meant by in the amendment, but rather the shape of the projections. As discussed below, such an interpretation does not withstand scrutiny. However, Applicant has amended the claims to specify that the projections can have different shapes. As illustrated in FIGS. 5A and 5B, one of the projections is wider than the other. Thus, the shape of one is different from the shape of the other. In Chen et al., the projections seemingly are the same. Thus, the claims that include projections of a different shape (claims 12 and 36) are allowable over Chen et al.

The Examiner rejected claim 36 under 35 U.S.C. § 112(b) indicating that "adapter" didn't have an antecedent basis. Applicant has amended claim 36 so that there is no need for an antecedent basis.

The Examiner then rejected claims 12, 13, 15-17, 22-31, and 36 under 35 U.S.C. § 102(a)(l) as being anticipated by Chen et al. In rejecting the claims, the Examiner asserted that a definition of "configuration" covered the "arrangement of parts of something" and the claims covered an adapter under a broadest reasonable interpretation. Applicant disagrees on both counts, but has also amended the claims to further prosecution.

First, the Examiner has indicated that having one projection on a first side and a second projection on a second side means that the two projections have different configurations. Applicant asserts that this is incorrect for two reasons: 1) the definition used by the Examiner does not support the Examiner's assertion, and 2) application of that definition to the claimed elements does not make sense given that the two projections are recited as being on different sides.

Turning to 1), the definition recited by the Examiner is that configuration is the arrangement of parts of something. Applicant asserts that the "parts of something" means the parts of the projections themselves and not the location. Thus, the configuration concerns the parts of the projection and the arrangement of parts of the projection relative to other parts of the configuration - not where the projections are located. Using the Examiner's interpretation, there could not be two objects with the same configuration because no two objects can occupy the same space simultaneously. This is clearly not correct - many objects have the same configuration even though they are located in different locations.

Addressing 2), the claim requires that the two projections be on opposite sides of the main body and then additionally requires that the projections have different configurations. The Examiner's interpretation of "configuration" renders at least a portion of the claim superfluous, which is not permitted. The dependent claims also further limit the configuration of the projections and those further limitations do not involve the location on the opposing sides. Thus, the Examiner's interpretation of "configuration" is unreasonable.

Second, the interpretation of the claims under a broadest reasonable interpretation scheme is the broadest interpretation *in light of* the specification. See In re Smith Int'l, Inc., 871 F.3d 1375 (Fed. Cir. 2017) where the Federal Circuit indicated that the Patent Office was

not to unreasonably construct the claims. The specification clearly indicates that the ferrule holder holds a fiber optic ferrule and not another object that also contains a ferrule. The Examiner admitted that the reference specifies that the ferrule holders are elements 38/70 as asserted by the Applicant in prior responses. The Examiner then broadened, unreasonably, the definition of ferrule holder to include an adapter. Applicant admitted in the prior response that multiple ferrules could be located within the opening - but the reference clearly shows that the ferrules would have to be within other structures to be held there. Applicant did not admit that only ferrules could be located within the opening. Using the Examiner's logic, the adapter 36 does not "hold" ferrules without the additional struture because they would fall out as there is no structure in the adapter "to retain the fiber optic ferrule therein" as required by the claim.

Applicant asserts that Chen et al. fails to disclose or suggest the claimed invention as noted above. However, Applicant has amended the claims the further distinguish the claims. First, Applicant has amended claims 12 and 36 to indicate that the shape of projections are different. Thus, these claims are allowable over Chen et al. since it seems from the reference that they are same.

Applicant has also amended claims 12, 32 and 36 to clarify the location of the projections. The projections are located on surfaces of the ferrule holder that are smaller in width. The ferrule holder in these claims has four surfaces: a top surface, a bottom surface and two side surfaces. The top and bottom surfaces have a smaller width than the side surfaces. See FIG. 5C. Applicant is aware that the labels of top and bottom may altered in any applied reference, but the projections are located on the narrower of the sides. For example, in Katoh the projections may be labeled as being on the top and bottom, but they are not the narrower surfaces but the wider surfaces. See FIG. 9.

Applicant has canceled claim 16 as those limitations have been added to claim 12 as noted above.

With regard to claim 15, the Examiner alleged that the cantilevered latch extends from the center portion toward the second end. Clearly latch 122 extends toward the first end 46a. For this additional reason, claim 15 is allowable.

The Examiner alleged that with respect to claims 25, 27, and 28 the projections 48 may have differences that correspond to the elements in these claims. Applicant submits that the Examiner does not have sufficient information from the reference to make such allegations. Only one of the projections 48 is illustrated in the figures and the specification does not discuss the structure of the projection 48. As such, the Examiner must withdraw this rejection.

Lastly for Chen et al. and with regard to claims 30 and 31, element 48 is identified as an alignment rib and the alignment ribs specifically allow for misalignment in two different directions. See col. 5, lines 42-67. Thus, they cannot align the ferrule to control the horizontal and vertical directions of the ferrule holder to the adapter. For this additional reason, these claims are allowable.

Finally, the Examiner rejected claims 12, 13, and 22-26 under 35 U.S.C. § 102(a)(l) as being anticipated by Katoh. As noted above, the independent claims all require that the projections are on the sides with the smaller width. That is the opposite from the projections in Katoh. The purpose behind the projections being on different sides is due to a number of factors. First, the claimed invention has a smaller footprint and allows for a higher density of fiber optic ferrules in a given space. This also means that there needs to be as little space between the fiber optic ferrules as possible, which is not provided for in Katoh.

Applicant also asserts that one of skill in the art would not move the projections to the other sides as that is where the latch is in the adapter in Katoh. Thus, one would have to re-engineer the connector and the adapter to move the projections. Such a reconstruction of the device is not allowed. Thus, the rejected claims are allowable over this reference as well.

Applicant has added new claim 37 to further define the relative locations of the projections relative to one another. The claim is allowable at least by way of its dependence on claim 12. Support for the claim can be found in FIG. 5C, among others.

The Examiner is invited to telephone the undersigned in the event the Examiner would like to discuss the merits of the application or this response.

Respectfully submitted,

/Michael L. Leetzow/

AMENDMENT AFTER FINAL

Dear Sir:

In response to the final Office Action mailed on April 2, 2019, Applicant amends the application and responds as follows:

IN THE CLAIMS:

Claims 1-11. Canceled.

12. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body to engage corresponding grooves in an adapter, the first and second outside surfaces being on opposite sides of the main body, the first projection having a different ~~configuration~~ shape than the second projection, and wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces.

13. (Previously Presented) The ferrule holder according to claim 12, where the projections engage a groove in a plug.

14. Canceled.

15. (Previously Presented) The ferrule holder according to claim 12, further comprising a cantilevered latch attached to one of the outside surfaces of the main body between the second end and one of the projections and extending from a center portion of the main body towards the second end.

16. Canceled.

17. (Previously Presented) The ferrule holder according to claim 16, further comprising a cantilevered latch attached to the main body and wherein the cantilevered latch and the projections are attached to one of the top surface and the bottom surface.

Claims 18-21. Canceled.

22. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends from the first end rearwardly toward the second end.

23. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends along a length of the ferrule holder.

24. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections has a chamfered front end.

25. (Previously Presented) The ferrule holder according to claim 12, wherein one of the projections has at least one dimension that is different than the other projection.

26. Canceled.

27. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a width of the projection.

28. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a height of the projection.

29. (Previously Presented) The ferrule holder according to claim 12, wherein the projections slidingly engage a corresponding groove in a plug.

30. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a vertical side surface to align the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

31. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a horizontal top surface to align the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

32. (Currently Amended) A ferrule holder comprising:

a main body;

a single central opening in the main body and extending from a first end to a second end to retain a single fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, ~~a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter,~~ the projections extending along a length of the main body at least partially in a front half of the main body, and wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces.

33. (Previously Presented) The ferrule holder according to claim 32, wherein one of the projections is on a first outside surface of the main body of the ferrule holder and has at least one dimension that is different than the other projection on an opposite second outside surface.

34. (Previously Presented) The ferrule holder according to claim 33, wherein the first outside surface is a top surface of the main body and the opposite second outside surface is a bottom surface of the main body, or vice versa.

35. (Previously Presented) The ferrule holder according to claim 32, wherein the projections have surfaces to control movement of the main body relative to the adapter.

36. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, ~~the first and second outside surfaces being on opposite sides of the main body~~, wherein the first outside surface is a top surface, the second outside surface is a bottom surface and the main body also has two side surfaces, each of the surfaces having a width, the width of the top and bottom surfaces being smaller than the width of the two side surfaces, the first projection having a different ~~configuration~~ shape than the second projection and the projections having surfaces to the control movement of the main body relative ~~to the~~ to an adapter.

37. (New) The ferrule holder according to claim 12, wherein the first and second projections each have two side walls, at least one of the side walls from the first projection being offset in a lateral direction from each of the side walls of the second projection.

REMARKS

In the above-referenced Office Action, the Examiner rejected claim 36 under 35 U.S.C. § 112(b) or 35 U.S.C. 112 (pre-AIA), second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the inventor or a joint inventor or, for pre-AIA, the applicant regards as the invention; rejected claims 12, 13, 15-17, 22-31, and 36 under 35 U.S.C. § 102(a)(l) as being anticipated by Chen et al. (U.S. Patent No. 6,406,192); and rejected claims 12, 13, and 22-26 under 35 U.S.C. § 102(a)(l) as being anticipated by Katoh (U.S. Patent Publication No. 2012/0057824).

In this amendment, Applicant has amended independent claims 12, 32, and 36; and canceled claims 16 and 26.

Applicant notes that the Examiner has interpreted "configuration" as to mean "the arrangement of parts of something." Such an interpretation is not what was meant by in the amendment, but rather the shape of the projections. As discussed below, such an interpretation does not withstand scrutiny. However, Applicant has amended the claims to specify that the projections can have different shapes. As illustrated in FIGS. 5A and 5B, one of the projections is wider than the other. Thus, the shape of one is different from the shape of the other. In Chen et al., the projections seemingly are the same. Thus, the claims that include projections of a different shape (claims 12 and 36) are allowable over Chen et al.

The Examiner rejected claim 36 under 35 U.S.C. § 112(b) indicating that "adapter" didn't have an antecedent basis. Applicant has amended claim 36 so that there is no need for an antecedent basis.

The Examiner then rejected claims 12, 13, 15-17, 22-31, and 36 under 35 U.S.C. § 102(a)(l) as being anticipated by Chen et al. In rejecting the claims, the Examiner asserted that a definition of "configuration" covered the "arrangement of parts of something" and the claims covered an adapter under a broadest reasonable interpretation. Applicant disagrees on both counts, but has also amended the claims to further prosecution.

First, the Examiner has indicated that having one projection on a first side and a second projection on a second side means that the two projections have different

configurations. Applicant asserts that this is incorrect for two reasons: 1) the definition used by the Examiner does not support the Examiner's assertion, and 2) application of that definition to the claimed elements does not make sense given that the two projections are recited as being on different sides.

Turning to 1), the definition recited by the Examiner is that configuration is the arrangement of parts of something. Applicant asserts that the "parts of something" means the parts of the projections themselves and not the location. Thus, the configuration concerns the parts of the projection and their arrangement relative to other parts of the configuration - not where the projections are located. Using the Examiner's interpretation, there could not be two objects with the same configuration because no two objects can occupy the same space simultaneously. This is clearly not correct - many objects have the same configuration even though they are located in different locations.

Addressing 2), the claim requires that the two projections be on opposite sides of the main body and then additionally requires that the projections have different configurations. The Examiner's interpretation of "configuration" renders at least a portion of the claim superfluous, which is not permitted. The dependent claims also further limit the configuration of the projections and those further limitations do not involve the location on the opposing sides. Thus, the Examiner's interpretation of "configuration" is unreasonable.

Second, the interpretation of the claims under a broadest reasonable interpretation scheme is the broadest interpretation *in light of* the specification. See In re Smith Int'l, Inc., 871 F.3d 1375 (Fed. Cir. 2017) where the Federal Circuit indicated that the Patent Office was not to unreasonably construct the claims. The specification clearly indicates that the ferrule holder holds a fiber optic ferrule and not another object that also contains a ferrule. The Examiner admitted that the reference specifies that the ferrule holders are elements 38/70 as asserted by the Applicant in prior responses. The Examiner then broadened, unreasonably, the definition of ferrule holder to include an adapter. Applicant admitted in the prior response that multiple ferrules could be located within the opening - but the reference clearly shows that the ferrules would have to be within other structures to be held there. Applicant

did not admit that only ferrules could be located within the opening. Using the Examiner's logic, the adapter 36 does not "hold" ferrules without the additional struture because they would fall out as there is no structure in the adapter "to retain the fiber optic ferrule therein" as required by the claim.

Applicant asserts that Chen et al. fails to disclose or suggest the claimed invention as noted above. However, Applicant has amended the claims the further distinguish the claims. First, Applicant has amended claims 12 and 36 to indicate that the shape of projections are different. Thus, these claims are allowable over Chen et al. since it seems from the reference that they are same.

Applicant has also amended claims 12, 32 and 36 to clarify the location of the projections. The projections are located on surfaces of the ferrule holder that are smaller in width. The ferrule holder in these claims has four surfaces: a top surface, a bottom surface and two side surfaces. The top and bottom surfaces have a smaller width than the side surfaces. See FIG. 5C. Applicant is aware that the labels of top and bottom may altered in any applied reference, but the projections are located on the narrower of the sides. For example, in Katoh the projections may be labeled as being on the top and bottom, but they are not the narrower surfaces but the wider surfaces. See FIG. 9.

Applicant has canceled claim 16 as those limitations have been added to claim 12 as noted above.

With regard to claim 15, the Examiner alleged that the cantilevered latch extends from the center portion toward the second end. Clearly latch 122 extends toward the first end 46a. For this additional reason, claim 15 is allowable.

The Examiner alleged that with respect to claims 25, 27, and 28 the projections 48 may have differences that correspond to the elements in these claims. Applicant submits that the Examiner does not have sufficient information from the reference to make such allegations. Only one of the projections 48 is illustrated in the figures and the specification does not discuss the structure of the projection 48. As such, the Examiner must withdraw this rejection.

Lastly for Chen et al. and with regard to claims 30 and 31, element 48 is identified as an alignment rib and the alignment ribs specifically allow for misalignment in two different directions. See col. 5, lines 42-67. Thus, they cannot align the ferrule to control the horizontal and vertical directions of the ferrule holder to the adapter. For this additional reason, these claims are allowable.

Finally, the Examiner rejected claims 12, 13, and 22-26 under 35 U.S.C. § 102(a)(l) as being anticipated by Katoh. As noted above, the independent claims all require that the projections are on the sides with the smaller width. That is the opposite from the projections in Katoh. The purpose behind the projections being on different sides is due to a number of factors. First, the claimed invention has a smaller footprint and allows for a higher density of fiber optic ferrules in a given space. This also means that there needs to be as little space between the fiber optic ferrules as possible, which is not provided for in Katoh.

Applicant also asserts that one of skill in the art would not move the projections to the other sides as that is where the latch is in the adapter in Katoh. Thus, one would have to re-engineer the connector and the adapter to move the projections. Such a reconstruction of the device is not allowed. Thus, the rejected claims are allowable over this reference as well.

Applicant has added new claim 37 to further define the relative locations of the projections relative to one another. The claim is allowable at least by way of its dependence on claim 12. Support for the claim can be found in FIG. 5C, among others.

The Examiner is invited to telephone the undersigned in the event the Examiner would like to discuss the merits of the application or this response.

Respectfully submitted,

/Michael L. Leetzow/

Office Action Summary	Application No. 15/855,788	Applicant(s) Nguyen et al.	
	Examiner Omar R Rojas	Art Unit 2883	AIA (FITF) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☑ Responsive to communication(s) filed on 02/15/2019.

☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2a)☑ This action is **FINAL.** 2b) ☐ This action is non-final.

3)☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

4)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims*

5) ☑ Claim(s) 12-13,15-17 and 22-36 is/are pending in the application.

5a) Of the above claim(s) _____ is/are withdrawn from consideration.

6) ☐ Claim(s) _____ is/are allowed.

7) ☑ Claim(s) 12-13,15-17 and 22-36 is/are rejected.

8) ☐ Claim(s) _____ is/are objected to.

9) ☐ Claim(s) _____ are subject to restriction and/or election requirement

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to **PPHfeedback@uspto.gov.**

Application Papers

10)☐ The specification is objected to by the Examiner.

11)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

a)☐ All b)☐ Some** c)☐ None of the:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

** See the attached detailed Office action for a list of the certified copies not received.

4) ☐ Other: _____.

DETAILED ACTION

1. The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

Response to Amendment

2. With regards to the amendment filed on 02/15/2019, all the requested changes to the claims have been entered. Applicant's constructive efforts to advance prosecution are appreciated. Claim(s) 12, 13, 15-17, and 22-36 are pending.

Response to Arguments

3. Applicant's arguments, see pages 8-9 filed 02/15/2019, with respect to the Chen patent have been fully considered but they are not fully persuasive. First, Applicant argues that "[t]he ferrule holders in Grois et al. are elements (38/70)". The Examiners agrees with this assertion but submits that the adapter (36) in Chen could also be considered a ferrule holder using a broadest reasonable interpretation. This is because the main body (46) of the adapter (36) receives ferrules as admitted by Applicant(s) on page 9 of the response filed 02/15/2019. Second, Applicant argues that the projections in Chen "do not have differing configurations". The word "configuration", however, simply means "the arrangement of the parts of something"[1]. The projections (48) of Chen are arranged on different sides of the main body (46) and, thus, have different configurations. Therefore, Applicant's arguments with respect to claims 12 and 36 are not persuasive.

4. Applicant's arguments with respect to claims 12, 13, and 22-36 have been considered but are moot because the arguments do not apply to any of the references being used in the current

[1] configuration. (n.d.) *Collins English Dictionary – Complete and Unabridged, 12th Edition 2014.* (1991, 1994, 1998, 2000, 2003, 2006, 2007, 2009, 2011, 2014). Retrieved March 28 2019 from https://www.thefreedictionary.com/configuration

rejection.

Claim Rejections - 35 USC § 112

5. The following is a quotation of 35 U.S.C. 112(b):

(b) CONCLUSION.—The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the inventor or a joint inventor regards as the invention.

The following is a quotation of 35 U.S.C. 112 (pre-AIA), second paragraph:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 36 is rejected under 35 U.S.C. 112(b) or 35 U.S.C. 112 (pre-AIA), second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the inventor or a joint inventor, or for pre-AIA the applicant regards as the invention.

7. Claim 36 recites the limitation "the adapter" in the last line of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a)(1) the claimed invention was patented, described in a printed publication, or in public use, on sale or otherwise available to the public before the effective filing date of the claimed invention.

9. Claim(s) 12, 13, 15-17, 22-31, and 36 is/are rejected under 35 U.S.C. 102(a)(1) as being anticipated by Patent No. 6,406,192 to Chen et al. (hereinafter "Chen"). The Chen patent was applied in a prior Office action.

In re claim 12, Chen discloses a ferrule holder/adapter (36), see Figures 1-4, comprising:

a main body (46);

a central opening in the main body (46) and extending from a first end (46a) to a second end (46b) to retain a fiber optic ferrule (Fig. 8, 68) therein, the first end (46a) having an opening therein in communication with the central opening, the second end (46b) disposed opposite the first end (46a) and configured to receive optical fibers (40) therethrough; and

a first projection (48) on a first outside surface of the main body (46) and a second projection (48) on a second outside surface of the main body (46), the first and second outside surfaces being on opposite sides of the main body (46), the first projection (48) arranged on a different side than the second projection (48) and, therefore, having a different configuration than the second projection (52). *See* columns 3-5 of Chen for further details.

In re claim 13, the projections (48) engage a groove (88b) located in a plug (72).

In re claim 15, Chen further discloses a cantilevered latch (122) attached to one of the outside surfaces of the main body (46) between the second end (46b) and one of the projections (48) and extending from a center portion of the main body (46) towards the second end (46b).

In re claim 16, as seen in Fig. 4, the first outside surface may be consider a top surface and the second outside surface may be considered a bottom surface and the main body (46) also has two side surfaces corresponding to the surfaces of main body (46) that are perpendicular to the surfaces on which the projections (48) are located, the top and bottom surfaces having at least one dimension that is smaller than the two side surfaces.

In re claim 17, Chen further discloses a cantilevered latch (122) attached to the main body (46)

and wherein the cantilevered latch (122) and the projections (48) are attached to one of the top surface and the bottom surface.

In re claim 22, at least one of the projections (48) extends from the first end (46a) rearwardly toward the second end (46b).

In re claim 23, at least one of the projections (48) extends along a partial length of the ferrule holder.

In re claim 24, as seen in Fig. 2, at least one of the projections (48) appears to have a chamfered front end.

In re claim 25, one of the projections (48) has at least one dimension, i.e., a thickness or width, that is different than another dimension, i.e., a height or length, of the other projection (48).

In re claim 26, the first outside surface is a top surface of the main body (46) and the opposite second outside surface is a bottom surface of the main body (46), or vice versa.

In re claim 27, the at least one dimension could be a width of the projection (48).

In re claim 28, the at least one dimension could be a height of the projection (48).

In re claim 29, the projections (48) slidingly engage a corresponding groove (88b) in a plug (72).

In re claim 30, the projections (48) have a vertical side surface capable of aligning the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

In re claim 31, the projections (48) have a horizontal top surface capable of aligning the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

In re claim 36, Chen discloses, see Figures 1-4, a ferrule holder comprising:

a main body (46);

a central opening in the main body (46) and extending from a first end (46a) to a second end (46b) to retain a fiber optic ferrule (96) therein, the first end (46a) having an opening therein in communication with the central opening, the second end (46b) disposed opposite the first end (46a) and configured to receive optical fibers (40) therethrough; and

a first projection (48) on a first outside surface of the main body (46) and a second projection (48) on a second outside surface of the main body (46), the first and second outside surfaces being on opposite sides of the main body (46), the first projection (48) arranged on a different side than the second projection (48) and, therefore, having a different configuration than the second projection (52), the projections (48) having surfaces capable of controlling movement of the main body (46) relative to an adapter.

10. Claim(s) 12, 13, and 22-36 is/are rejected under 35 U.S.C. 102(a)(1) as being anticipated by Patent Pub. No. US 2012/0057824 A1 to KATOH (hereinafter "Katoh").

In re claim 12, Katoh discloses, see Figures 1-3 and 9, a ferrule holder (1) comprising:

a main body/housing (2);

a central opening in the main body (2) and extending from a first/front end to a second/rear end to retain a fiber optic ferrule (12) therein, the front end having an opening therein in communication with the central opening, the rear end disposed opposite the front end and configured to receive optical fibers (11) therethrough; and

a first projection/key (51) on a first outside surface (21) of the main body (2) and a second projection/key (52) on a second outside surface of the main body (2), the first and second outside surfaces being on opposite sides of the main body (2), the first projection (51) having a different configuration than the second projection (52). *See* paragraphs [0040]-[0049] and [0077] of Katoh for further details.

In re claim 13, the projections (51/52) engage grooves in an adapter (7).

In re claim 22, as seen in FIG. 1, at least one of the projections (51) extends from the front end rearwardly towards the rear end.

In re claim 23, as seen in FIG. 1, at least one of the projections (51) extends along a partial length of the ferrule holder (1).

In re claim 24, as seen in FIG. 1, at least one of the projections (51) has a chamfered front end.

In re claims 25 and 27, as seen in FIG. 9, one of the projections (51) has a dimension, i.e., a width, that is different than of the other projection (52).

In re claim 26, the first outside surface (21) is a top surface of the main body (2) and the opposite second outside surface is a bottom surface of the main body (2), or vice versa.

In re claims 25 and 28, as seen in FIG. 9, one of the projections (51) has a height dimension that is different than a width dimension of the other projection (52).

In re claim 29, the projections (52/52) slidingly engage a corresponding groove in an adapter (7).

In re claim 30, the projections (51/52) have a vertical side surface capable of aligning the ferrule holder (1) with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder (1) relative to the adapter.

In re claim 31, the projections (51/52) have a horizontal top surface capable of aligning the ferrule holder (1) with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder (1) relative to the adapter.

In re claim 32, Katoh discloses, see Figures 1-3 and 9, a ferrule holder (1) comprising:

a main body (2);

a single central opening in the main body (2) and extending from a front end to a rear end to retain a single fiber optic ferrule (12) therein, the front end having an opening therein in communication with the central opening, the rear end disposed opposite the front end and configured to receive optical fibers (11) therethrough; and

a projection (51/52) on opposite outside surfaces of the main body (2) to engage a

corresponding groove in an adapter (7), the projections (51/52) extending along a partial length of the main body (2) at least partially in a front half of the main body (2). *See* paragraphs [0040]-[0049] and [0077] of Katoh for further details.

In re claim 33, one of the projections (51) is on a first outside surface (21) of the main body (2) of the ferrule holder (1) and has at least one dimension, i.e., a width, that is different than the other projection (52) on an opposite second outside surface.

In re claim 34, the first outside surface (21) is a top surface of the main body (2) and the opposite second outside surface is a bottom surface of the main body (2), or vice versa.

In re claim 35, the projections (51/52) have surfaces to control movement of the main body (2) relative to the adapter (7).

In re claim 36, Katoh discloses, see Figures 1-3 and 9 a ferrule holder (1) comprising:

a main body (2);

a central opening in the main body (2) and extending from a front end to a rear end to retain a fiber optic ferrule (12) therein, the front end having an opening therein in communication with the central opening, the rear end disposed opposite the front end and configured to receive optical fibers (11) therethrough; and

a first projection/key (51) on a first outside surface (21) of the main body (2) and a second projection/key (52) on a second outside surface of the main body (2), the first and second outside surfaces being on opposite sides of the main body (2), the first projection (51) having a

different configuration than the second projection (52) and the projections (51/52) having surfaces capable of controlling movement of the main body (2) relative to an adapter (7). *See* paragraphs [0040]-[0049] and [0077] of Katoh for further details

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar R Rojas whose telephone number is (571)272-2357. The examiner can normally be reached on Monday-Friday, 10AM-6PM EST.

Examiner interviews are available via telephone, in-person, and video conferencing using a USPTO supplied web-based collaboration tool. To schedule an interview, applicant is encouraged to use the USPTO Automated Interview Request (AIR) at http://www.uspto.gov/interviewpractice.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Hollweg can be reached on 571-270-1739. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

RESPONSE TO NON-COMPLIANT AMENDMENT AND AMENDMENT

Dear Sir:

In response to the Notice of Non-Compliant Amendment and the Office Action mailed on August 9, 2018, Applicant amends the application and responds as follows:

IN THE CLAIMS:

Claims 1-11. Canceled.

12. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

~~a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter~~ a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, the first and second outside surfaces being on opposite sides of the main body, the first projection having a different configuration than the second projection.

13. (Previously Presented) The ferrule holder according to claim 12, where the projections engage a groove in a plug.

14. Canceled.

15. (Currently Amended) The ferrule holder according to claim 12, further comprising a cantilevered latch attached to one of the outside surfaces ~~an outside surface~~ of the main body between the second end and one of the projections and extending from a center portion of the main body towards the second end.

16. (Currently Amended) The ferrule holder according to claim 12, wherein the first outside surface is ~~main body has~~ a top surface, the second outside surface is a bottom surface

and the main body also has two side surfaces, the top and bottom surfaces having at least one dimension that is smaller than the two side surfaces.

17. (Currently Amended) The ferrule holder according to claim 16, further comprising a cantilevered latch attached to ~~an outside surface of~~ the main body and wherein the cantilevered latch and the projections are attached to one of the top surface and the bottom surface.

Claims 18-21. Canceled.

22. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends from the first end rearwardly toward the second end.

23. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends along a length of the ferrule holder.

24. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections has a chamfered front end.

25. (Currently Amended) The ferrule holder according to claim 12, wherein one of the projections ~~is on a first surface of the main body of the ferrule holder and~~ has at least one dimension that is different than the other projection ~~on an opposite second surface~~.

26. (Currently Amended) The ferrule holder according to claim 25, wherein the first outside surface is a top surface of the main body and the opposite second outside surface is a bottom surface of the main body, or vice versa.

27. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a width of the projection.

28. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a height of the projection.

29. (Previously Presented) The ferrule holder according to claim 12, wherein the projections slidingly engage a corresponding groove in a plug.

30. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a vertical side surface to align the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

31. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a horizontal top surface to align the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

32. (Currently Amended) A ferrule holder comprising:

a main body;

a single central opening in the main body and extending from a first end to a second end to retain a single fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter, the projections extending along a length of the main body at least partially in a front half of the main body.

33. (Currently Amended) The ferrule holder according to claim 32, wherein one of the projections is on a first outside surface of the main body of the ferrule holder and has at least one dimension that is different than the other projection on an opposite second outside surface.

34. (Previously Presented) The ferrule holder according to claim 33, wherein the first outside surface is a top surface of the main body and the opposite second outside surface is a bottom surface of the main body, or vice versa.

35. (Previously Presented) The ferrule holder according to claim 32, wherein the projections have surfaces to control movement of the main body relative to the adapter.

36. (Previously Presented) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

~~a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter~~ a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, the first and second outside surfaces being on opposite sides of the main body, the first projection having a different configuration than the second projection and the projections having surfaces to the control movement of the main body relative to the adapter.

REMARKS

In a Notice of Non-Compliant Amendment dated February 15, 2019, it was noted that in the February 6, 2019 Amendment, the canceling of claims 14 and 18-21 were noted next to the canceling of claims 1-11. This grouping caused the claims to not be listed in ascending order. Applicant has fixed the first line of the claims by removing the listing of claims 14 and 18-21. All claims are now in ascending order. The remainder of this Amendment is the same as filed on February 6, 2019, to keep the claims and the arguments in the same filing.

In the above-referenced Office Action, the Examiner rejected claims 12, 16, 23-28, and 30-36 under 35 U.S.C. § 102(a)(l) as being anticipated by Grois et al. (U.S. Patent No. 6,331,079); rejected claims 12, 13, 15-17, and 23-36 under 35 U.S.C. § 102(a)(l) as being anticipated by Matasek et al. (U.S. Patent No. 6,361,218); and rejected claims 12, 13, 15-17, and 22-36 under 35 U.S.C. § 102(a)(l) as being anticipated by Chen et al. (U.S. Patent No. 6,406,192).

In this amendment, Applicant has amended independent claims 12, 32, and 36. Applicant has also amended claims 15-17, 25-26, and 33 to be consistent with the amendments made to the independent claims.

Applicant brings to the Examiner's attention that the disclosures of the three cited references are almost identical. The three patents claim different inventions that are present in the disclosures, but the figures and the vast majority of the specifications are identical - except for the summary, claims and introductory paragraphs. As such, Applicant is confused as to why the three different references were needed. Given this situation, Applicant will address all of the claims with respect to all three of the cited references (herein referred to as GMC - Grois; Matasek; Chen) given the same disclosures.

In rejecting claims 12, 16, 23-28, and 30-36 under 35 U.S.C. § 102(a)(l) as being anticipated by Grois et al., the Examiner used the embodiment illustrated in Figs. 8-10 of GMC and the latch block 70f.

Applicant has amended claim 12 to require, *inter alia*, a first projection having a different configuration than a second projection. GMC does not disclose or suggest two projections with a different configuration.

In fact, the figures in GMC do not show a latch block 70f on two sides (in fact none are shown in Fig. 10) of the main body. It appears from the specification that Fig. 10 must have inadvertently omitted that feature. However, the specification indicates that there are two latch blocks 70f, but there is no disclosure that they have a different configuration. Applicant asserts that they must have the same configuration because the same reference numeral is provided for both of the latch blocks. Additionally, if there were differences between the latch blocks, it would only stand to reason that those differences would be specified.

The Examiner must believe that they have different configurations based on the rejection of claim 25:

> *In re* claim 25, one of the projections (70f) is on a first surface of the main body (70) of the ferrule holder and has at least one dimension, i.e., a width or height, that is different than another dimension, i.e., a height or length, of the other projection (70f) on an opposite second surface.

Office Action at p. 3.

However, the Examiner has provided no evidence of that fact other than this bare assertion. This lack of evidence is highlighted in the rejection of claim 27 where the Examiner alleged "the at least one dimension **could be** a width of the projection (70f)." Id. (emphasis added). In fact, with one of the latch blocks missing from the figures (and the Brief Description of the Drawings does not inform the reader which side is visible in the figures), the Examiner has failed to make a case of anticipation because he cannot show the claimed features.

As such, Applicant submits that claims 12-13, 15-17, 22-25, 29-31 are allowable for at least this reason.

The Examiner also used the embodiment in Figs. 8-10 of GMC to reject claims 32-34. Applicant has amended claim 32 to require, *inter alia*, that there be a single central opening in the main body and extending from a first end to a second end to retain a single fiber optic ferrule therein. The claim also now requires that the projections extend along a length of the main body at least partially in a front half of the main body. The latch block 70f does not extend along a length of the main body at least partially in a front half of the main body - it is clearly in the rear portion of the main body.

Regarding claim 33, which requires that the two projections have at least one dimension that is different from the other, this feature is not shown in GMC as was discussed above. Thus, claim 32-35 are allowable for at least these reasons.

Claim 36, like claim 12, requires the first projection to have a different configuration than the second projection. This is not shown or described in the references and claim 36 is allowable for at least this reason.

Next the Examiner rejected claims 12, 13, 15-17, and 23-36 under 35 U.S.C. § 102(a)(l) as being anticipated by the device shown in the embodiment in Figs. 11-14 of GMC. The projection used by the Examiner in this embodiment is element 74b. However, as noted above, Applicant has amended claims 12, 32, and 36 and the amendments distinguish over the embodiment in Figs. 11-14. For claims 12 and 36, the first projection has a different configuration than the second projection. This is not the case in this embodiment of GMC either. For at least this reason, claims 12 and 36 and their dependent claims are allowable.

Claim 32 new requires that the main body have a single central opening to retain a single fiber optic ferrule therein. Clearly, the rear housing part 74 has multiple openings to retain multiple fiber optic ferrules therein. For at least these reasons, claims 32-35 are allowable.

Finally, the Examiner rejected claims 12, 13, 15-17, and 22-36 under 35 U.S.C. § 102(a)(l) as being anticipated by the embodiment in Figs. 1-4 of GMC. First, Applicant brings to the attention of the Examiner, as was done in the grandparent case, that the devices in Figs 1-4 are not the same type of device as that claimed. The ferrule holders in Grois et al.

are elements 38/70 as discussed above. Second, the projections in Grois et al. fail to meet the limitations of claims 12, 32, and 36. With regard to claims 12 and 36, the opposing projections do not have differing configurations. With regard to claim 32, main body 46 has multiple openings for multiple fiber optic ferrules. Thus, claims 12, 13, 15-17, and 22-36 are allowable for at least these reasons.

The Examiner is invited to telephone the undersigned in the event the Examiner would like to discuss the merits of the application or this response.

Respectfully submitted,

/Michael L. Leetzow/

Notice of Non-Compliant Amendment (37 CFR 1.121)	Application No. 15/855,788	Applicant(s) Nguyen et al.
	Art Unit OED2	AIA Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

The amendment document filed on 06 February 2019 is considered non-compliant because it has failed to meet the requirements of 37 CFR 1.121 or 1.4. In order for the amendment document to be compliant, correction of the following item(s) is required.

THE FOLLOWING MARKED (X) ITEM(S) CAUSE THE AMENDMENT DOCUMENT TO BE NON-COMPLIANT:

- ☐ 1. Amendments to the specification:
  - ☐ A. Amended paragraph(s) do not include markings.
  - ☐ B. New paragraph(s) should not be underlined.
  - ☐ C. Other _____ .
- ☐ 2. Abstract:
  - ☐ A.Not presented on a separate sheet. 37 CFR 1.72.
  - ☐ B.Other _____ .
- ☐ 3. Amendments to the drawings:
  - ☐ A. The drawings are not properly identified in the top margin as "Replacement Sheet", "New Sheet", or "Annotated Sheet" as required by 37 CFR 1.121(d).
  - ☐ B. The practice of submitting proposed drawing correction has been eliminated. Replacement drawings showing amended figures, without markings, in compliance with 37 CFR 1.84 are required.
  - ☐ C. Other _____ .
- ☑ 4. Amendments to the claims:
  - ☐ A. A complete listing of all of the claims is not present.
  - ☐ B. The listing of claims does not include the text of all pending claims (including withdrawn claims)
  - ☐ C. Each claim has not been provided with the proper status identifier, and as such, the individual status of each claim cannot be identified. Note: the status of every claim must be indicated after its claim number by using one of the following status identifiers: (Original), (Currently amended), (Canceled), (Previously presented), (New), (Not entered), (Withdrawn) and (Withdrawn-currently amended).
  - ☑ D. The claims of this amendment paper have not been presented in ascending numerical order.
  - ☑ E. Other: See Continuation Sheet .
- ☐ 5. Other (e.g., the amendment is unsigned or not signed in accordance with 37 CFR 1.4): For further explanation of the amendment format required by 37 CFR 1.121, see MPEP § 714.

TIME PERIODS FOR FILING A REPLY TO THIS NOTICE:

1. Applicant is given **no new time period** if the non-compliant amendment is an after-final amendment or an amendment filed after allowance, or a drawing submission (only) If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.

2. Applicant is given **two months** from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a Quayle action. If any of above boxes 1 to 4 are checked, the correction required is only the corrected section of the non-compliant amendment in compliance with 37 CFR 1.121.

Extensions of time are available under 37 CFR 1.136(a) only if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action.

Failure to timely respond to this notice will result in:

Abandonment of the application if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action; or

Non-entry of the amendment if the non-compliant amendment is a preliminary amendment or supplemental amendment.

Legal Instruments Examiner (LIE), if applicable /AMANDA N FORD/ Telephone No: (571)272-1573

Continuation of 4. Amendments to the claims- E. Other: Canceled claims 14 and 18-21 should not be listed next to the canceled claims 1-11. It should not be listed on that same line together, because it's not in ascending order when listed in that format.

AMENDMENT

Dear Sir:

In response to the Office Action mailed on August 9, 2018, the time in which to respond has been extended by three months with the Petition for and Extension of Time and fee filed concurrently herewith, Applicant amends the application and responds as follows:

IN THE CLAIMS:

Claims 1-11, 14, and 18-21. Canceled.

12. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

~~a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter~~ a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, the first and second outside surfaces being on opposite sides of the main body, the first projection having a different configuration than the second projection.

13. (Previously Presented) The ferrule holder according to claim 12, where the projections engage a groove in a plug.

14. Canceled.

15. (Currently Amended) The ferrule holder according to claim 12, further comprising a cantilevered latch attached to one of the outside surfaces ~~an outside surface~~ of the main body between the second end and one of the projections and extending from a center portion of the main body towards the second end.

16. (Currently Amended) The ferrule holder according to claim 12, wherein the first outside surface is ~~main body has~~ a top surface, the second outside surface is a bottom surface

and the main body also has two side surfaces, the top and bottom surfaces having at least one dimension that is smaller than the two side surfaces.

17. (Currently Amended) The ferrule holder according to claim 16, further comprising a cantilevered latch attached to ~~an outside surface of~~ the main body and wherein the cantilevered latch and the projections are attached to one of the top surface and the bottom surface.

Claims 18-21. Canceled.

22. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends from the first end rearwardly toward the second end.

23. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections extends along a length of the ferrule holder.

24. (Previously Presented) The ferrule holder according to claim 12, wherein at least one of the projections has a chamfered front end.

25. (Currently Amended) The ferrule holder according to claim 12, wherein one of the projections ~~is on a first surface of the main body of the ferrule holder and~~ has at least one dimension that is different than the other projection ~~on an opposite second surface~~.

26. (Currently Amended) The ferrule holder according to claim 25, wherein the first outside surface is a top surface of the main body and the opposite second outside surface is a bottom surface of the main body, or vice versa.

27. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a width of the projection.

28. (Previously Presented) The ferrule holder according to claim 25, wherein the at least one dimension is a height of the projection.

29. (Previously Presented) The ferrule holder according to claim 12, wherein the projections slidingly engage a corresponding groove in a plug.

30. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a vertical side surface to align the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

31. (Previously Presented) The ferrule holder according to claim 12, wherein the projections have a horizontal top surface to align the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

32. (Currently Amended) A ferrule holder comprising:

a main body;

a single central opening in the main body and extending from a first end to a second end to retain a single fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter, the projections extending along a length of the main body at least partially in a front half of the main body.

33. (Currently Amended) The ferrule holder according to claim 32, wherein one of the projections is on a first outside surface of the main body of the ferrule holder and has at least one dimension that is different than the other projection on an opposite second outside surface.

34. (Previously Presented) The ferrule holder according to claim 33, wherein the first outside surface is a top surface of the main body and the opposite second outside surface is a bottom surface of the main body, or vice versa.

35. (Previously Presented) The ferrule holder according to claim 32, wherein the projections have surfaces to control movement of the main body relative to the adapter.

36. (Previously Presented) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

~~a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter~~ a first projection on a first outside surface of the main body and a second projection on a second outside surface of the main body, the first and second outside surfaces being on opposite sides of the main body, the first projection having a different configuration than the second projection and the projections having surfaces to the control movement of the main body relative to the adapter.

REMARKS

In the above-referenced Office Action, the Examiner rejected claims 12, 16, 23-28, and 30-36 under 35 U.S.C. § 102(a)(l) as being anticipated by Grois et al. (U.S. Patent No. 6,331,079); rejected claims 12, 13, 15-17, and 23-36 under 35 U.S.C. § 102(a)(l) as being anticipated by Matasek et al. (U.S. Patent No. 6,361,218); and rejected claims 12, 13, 15-17, and 22-36 under 35 U.S.C. § 102(a)(l) as being anticipated by Chen et al. (U.S. Patent No. 6,406,192).

In this amendment, Applicant has amended independent claims 12, 32, and 36. Applicant has also amended claims 15-17, 25-26, and 33 to be consistent with the amendments made to the independent claims.

Applicant brings to the Examiner's attention that the disclosures of the three cited references are almost identical. The three patents claim different inventions that are present in the disclosures, but the figures and the vast majority of the specifications are identical - except for the summary, claims and introductory paragraphs. As such, Applicant is confused as to why the three different references were needed. Given this situation, Applicant will address all of the claims with respect to all three of the cited references (herein referred to as GMC - Grois; Matasek; Chen) given the same disclosures.

In rejecting claims 12, 16, 23-28, and 30-36 under 35 U.S.C. § 102(a)(l) as being anticipated by Grois et al., the Examiner used the embodiment illustrated in Figs. 8-10 of GMC and the latch block 70f.

Applicant has amended claim 12 to require, *inter alia*, a first projection having a different configuration than a second projection. GMC does not disclose or suggest two projections with a different configuration.

In fact, the figures in GMC do not show a latch block 70f on two sides (in fact none are shown in Fig. 10) of the main body. It appears from the specification that Fig. 10 must have inadvertently omitted that feature. However, the specification indicates that there are two latch blocks 70f, but there is no disclosure that they have a different configuration. Applicant asserts that they must have the same configuration because the same reference

numeral is provided for both of the latch blocks. Additionally, if there were differences between the latch blocks, it would only stand to reason that those differences would be specified.

The Examiner must believe that they have different configurations based on the rejection of claim 25:

> *In re* claim 25, one of the projections (70f) is on a first surface of the main body (70) of the ferrule holder and has at least one dimension, i.e., a width or height, that is different than another dimension, i.e., a height or length, of the other projection (70f) on an opposite second surface.

Office Action at p. 3.

However, the Examiner has provided no evidence of that fact other than this bare assertion. This lack of evidence is highlighted in the rejection of claim 27 where the Examiner alleged "the at least one dimension **could be** a width of the projection (70f)." Id. (emphasis added). In fact, with one of the latch blocks missing from the figures (and the Brief Description of the Drawings does not inform the reader which side is visible in the figures), the Examiner has failed to make a case of anticipation because he cannot show the claimed features.

As such, Applicant submits that claims 12-13, 15-17, 22-25, 29-31 are allowable for at least this reason.

The Examiner also used the embodiment in Figs. 8-10 of GMC to reject claims 32-34. Applicant has amended claim 32 to require, *inter alia*, that there be a single central opening in the main body and extending from a first end to a second end to retain a single fiber optic ferrule therein. The claim also now requires that the projections extend along a length of the main body at least partially in a front half of the main body. The latch block 70f does not extend along a length of the main body at least partially in a front half of the main body - it is clearly in the rear portion of the main body.

Regarding claim 33, which requires that the two projections have at least one dimension that is different from the other, this feature is not shown in GMC as was discussed above. Thus, claim 32-35 are allowable for at least these reasons.

Claim 36, like claim 12, requires the first projection to have a different configuration than the second projection. This is not shown or described in the references and claim 36 is allowable for at least this reason.

Next the Examiner rejected claims 12, 13, 15-17, and 23-36 under 35 U.S.C. § 102(a)(l) as being anticipated by the device shown in the embodiment in Figs. 11-14 of GMC. The projection used by the Examiner in this embodiment is element 74b. However, as noted above, Applicant has amended claims 12, 32, and 36 and the amendments distinguish over the embodiment in Figs. 11-14. For claims 12 and 36, the first projection has a different configuration than the second projection. This is not the case in this embodiment of GMC either. For at least this reason, claims 12 and 36 and their dependent claims are allowable.

Claim 32 new requires that the main body have a single central opening to retain a single fiber optic ferrule therein. Clearly, the rear housing part 74 has multiple openings to retain multiple fiber optic ferrules therein. For at least these reasons, claims 32-35 are allowable.

Finally, the Examiner rejected claims 12, 13, 15-17, and 22-36 under 35 U.S.C. § 102(a)(l) as being anticipated by the embodiment in Figs. 1-4 of GMC. First, Applicant brings to the attention of the Examiner, as was done in the grandparent case, that the devices in Figs 1-4 are not the same type of device as that claimed. The ferrule holders in Grois et al. are elements 38/70 as discussed above. Second, the projections in Grois et al. fail to meet the limitations of claims 12, 32, and 36. With regard to claims 12 and 36, the opposing projections do not have differing configurations. With regard to claim 32, main body 46 has multiple openings for multiple fiber optic ferrules. Thus, claims 12, 13, 15-17, and 22-36 are allowable for at least these reasons.

The Examiner is invited to telephone the undersigned in the event the Examiner would like to discuss the merits of the application or this response.

Respectfully submitted,

/Michael L. Leetzow/

7)☒ Claim(s) *12,13,15-17 and 22-36* is/are rejected.

8)☐ Claim(s) _____ is/are objected to.

9)☐ Claim(s) _____ are subject to restriction and/or election requirement.

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

Application Papers

10)☐ The specification is objected to by the Examiner.

11)☒ The drawing(s) filed on *12/27/2017 and 06/14/2018* is/are: a)☒ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

a)☐ All b)☐ Some** c)☐ None of the:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

** See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

Senko Ex. 1014, Page 1 of 2 IPR2024-00806
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

DETAILED ACTION

1. The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

Election/Restrictions

2. Applicant's election without traverse of Invention II (claims 12, 13, 15-17, and 22-36) in the reply filed on 06/14/2018 is acknowledged.

Information Disclosure Statement

3. The prior art documents submitted by applicant(s) in the Information Disclosure Statement(s) ("IDS") filed on 04/11/2018 have all been considered and made of record (note the attached copy of form(s) PTO/SB/08a).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (a)(1) the claimed invention was patented, described in a printed publication, or in public use, on sale or otherwise available to the public before the effective filing date of the claimed invention.

5. Claim(s) 12, 16, 23-28, and 30-36 is/are rejected under 35 U.S.C. 102(a)(1) as being anticipated by Patent No. 6,331,079 to Grois et al. (hereinafter "Grois"). The Grois patent was cited by Applicant in the IDS.

In re claim 12, Grois discloses, see Figures 8-10, a ferrule holder comprising:

a main body (70);

a central opening in the main body (70) and extending from a first end (70i) to a second end (70h) to retain a fiber optic ferrule (68) therein, the first end (70i) having an opening therein

in communication with the central opening, the second end (70h) disposed opposite the first end (70i) and configured to receive optical fibers (40) therethrough; and

a projection (70f) on opposite outside surfaces of the main body (70) to engage a corresponding groove in an adapter (36). *See* col. 4, lines 25-60 of Grois for further details.

In re claim 16, as seen in Figs. 8-9, the main body (70) has a top surface with one projection (70f), a bottom surface with another projection (70f) and two side surfaces, the top and bottom surfaces having at least one dimension that is smaller than the two side surfaces.

In re claim 23, at least one of the projections (70f) extends along a partial length of the ferrule holder.

In re claim 24, as seen in Fig. 8, at least one of the projections (70f) has a chamfered front end.

In re claim 25, one of the projections (70f) is on a first surface of the main body (70) of the ferrule holder and has at least one dimension, i.e., a width or height, that is different than another dimension, i.e., a height or length, of the other projection (70f) on an opposite second surface.

In re claim 26, the first surface is a top surface of the main body (70) and the opposite second surface is a bottom surface of the main body (70), or vice versa.

In re claim 27, the at least one dimension could be a width of the projection (70f).

In re claim 28, the at least one dimension could be a height of the projection (70f).

In re claim 30, the projections (70f) have a vertical side surface capable of aligning the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

In re claim 31, the projections (70f) have a horizontal top surface capable of aligning the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

In re claim 32, Grois discloses, see Figures 8-10, a ferrule holder comprising:

a main body (70);

a central opening in the main body (70) and extending from a first end (70i) to a second end (70h) to retain a fiber optic ferrule (68) therein, the first end (70i) having an opening therein in communication with the central opening, the second end (70h) disposed opposite the first end (70i) and configured to receive optical fibers (40) therethrough; and

a projection (70f) on opposite outside surfaces of the main body (70) to engage a corresponding groove in an adapter, the projections (70f) extending along a partial length of the main body (70).

In re claim 33, of the projections (70f) is on a first surface of the main body (70) of the ferrule holder and has at least one dimension, i.e., a width or height, that is different than another

dimension, i.e., a height or length, of the other projection (70f) on an opposite second surface.

In re claim 34, the first surface is a top surface of the main body (70) and the opposite second surface is a bottom surface of the main body (70), or vice versa.

In re claim 35, the projections (70f) have surfaces to control movement of the main body (70) relative to the adapter.

In re claim 36, Grois discloses, see Figures 8-10, a ferrule holder comprising:

a main body (70);

a central opening in the main body (70) and extending from a first end (70i) to a second end (70h) to retain a fiber optic ferrule (68) therein, the first end (70i) having an opening therein in communication with the central opening, the second end (70h) disposed opposite the first end (70i) and configured to receive optical fibers (40) therethrough; and

a projection (70f) on opposite outside surfaces of the main body (70) to engage a corresponding groove in an adapter, the projections (70f) having surfaces capable of controlling movement of the main body (70) relative to the adapter.

6. Claim(s) 12, 13, 15-17, and 23-36 is/are rejected under 35 U.S.C. 102(a)(1) as being anticipated by Patent No. 6,361,218 to Matasek al. (hereinafter "Matasek").

In re claim 12, Matasek discloses, see Figures 11-14, a ferrule holder comprising:

a main body (74);

a central opening in the main body (74) and extending from a first end to a second end to retain a fiber optic ferrule (96) therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers (44) therethrough; and

a projection (74b) on opposite outside surfaces of the main body (74) capable of engaging a corresponding groove in an adapter (36). *See* col. 4, line 61 to col. 6, line 30 of Matasek for further details.

In re claim 13, the projections (74b) engage a groove defined by a shoulder (Fig. 13, 72a) located in a plug (72).

In re claim 15, Matasek further discloses a cantilevered latch (74a) attached to an outside surface of the main body (74) between the second end and one of the projections (74b) and extending from a center portion of the main body (74) towards the second end.

In re claim 16, as seen in Figs. 11-12, the main body (74) has a top surface with one projection (74b), a bottom surface with another projection (74b) and two side surfaces, the top and bottom surfaces having at least one dimension that is smaller than the two side surfaces.

In re claim 17, Matasek further discloses a cantilevered latch (74a) attached to an outside surface of the main body (74) and wherein the cantilevered latch (74a) and the projections (74b) are attached to one of the top surface and the bottom surface.

In re claim 23, at least one of the projections (74b) extends along a partial length of the ferrule holder.

In re claim 24, as seen in Fig. 12, at least one of the projections (74b) has a chamfered front end.

In re claim 25, one of the projections (74b) is on a first surface of the main body (74) of the ferrule holder and has at least one dimension, i.e., a width or height, that is different than another dimension, i.e., a height or length, of the other projection (74b) on an opposite second surface.

In re claim 26, the first surface is a top surface of the main body (74) and the opposite second surface is a bottom surface of the main body (74), or vice versa.

In re claim 27, the at least one dimension could be a width of the projection (74b).

In re claim 28, the at least one dimension could be a height of the projection (74b).

In re claim 29, the projections (74b) slidingly engage a corresponding groove in a plug (72) defined by a shoulder (72a).

In re claim 30, the projections (74b) have a vertical side surface capable of aligning the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

In re claim 31, the projections (74b) have a horizontal top surface capable of aligning the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

In re claim 32, Matasek discloses, see Figures 11-14, a ferrule holder comprising:

a main body (74);

a central opening in the main body (74) and extending from a first end to a second end to retain a fiber optic ferrule (96) therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers (44) therethrough; and

a projection (74b) on opposite outside surfaces of the main body (74) to engage a corresponding groove in an adapter, the projections (74b) extending along a partial length of the main body (74).

In re claim 33, one of the projections (74b) is on a first surface of the main body (74) of the ferrule holder and has at least one dimension, i.e., a width or height, that is different than another dimension, i.e., a height or length, of the other projection (74b) on an opposite second surface.

In re claim 34, the first surface is a top surface of the main body (74) and the opposite second surface is a bottom surface of the main body (74), or vice versa.

In re claim 35, the projections (74b) have surfaces to control movement of the main body (74)

relative to the adapter.

In re claim 36, Matasek discloses, see Figures 11-14, a ferrule holder comprising:

a main body (74);

a central opening in the main body (74) and extending from a first end to a second end to retain a fiber optic ferrule (96) therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers (44) therethrough; and

a projection (74b) on opposite outside surfaces of the main body (74) to engage a corresponding groove in an adapter, the projections (74b) having surfaces capable of controlling movement of the main body (74) relative to the adapter.

7. Claim(s) 12, 13, 15-17, and 22-36 is/are rejected under 35 U.S.C. 102(a)(1) as being anticipated by Patent No. 6,406,192 to Chen et al. (hereinafter "Chen").

In re claim 12, Chen discloses, see Figures 1-4, a ferrule holder comprising:

a main body (46);

a central opening in the main body (46) and extending from a first end (46a) to a second end (46b) to retain a fiber optic ferrule (Fig. 8, 68) therein, the first end (46a) having an opening therein in communication with the central opening, the second end (46b) disposed opposite the first end (46a) and configured to receive optical fibers (40) therethrough; and

a projection (48) on opposite outside surfaces of the main body (46) to engage a corresponding groove (88b) in an adapter/plug (72). *See* columns 3-5 of Chen for further details.

In re claim 13, the projections (48) engage a groove (88b) located in a plug (72).

In re claim 15, Chen further discloses a cantilevered latch (122) attached to an outside surface of the main body (46) between the second end (46b) and one of the projections (48) and extending from a center portion of the main body (46) towards the second end (46b).

In re claim 16, as seen in Fig. 4, the main body (46) has a top surface with one projection (48), a bottom surface with another projection (48) and two side surfaces, the top and bottom surfaces having at least one dimension that is smaller than the two side surfaces.

In re claim 17, Chen further discloses a cantilevered latch (122) attached to an outside surface of the main body (46) and wherein the cantilevered latch (122) and the projections (48) are attached to one of the top surface and the bottom surface.

In re claim 22, at least one of the projections (48) extends from the first end (46a) rearwardly toward the second end (46b).

In re claim 23, at least one of the projections (48) extends along a partial length of the ferrule holder.

In re claim 24, as seen in Fig. 2, at least one of the projections (48) appears to have a chamfered front end.

In re claim 25, one of the projections (48) is on a first surface of the main body (46) of the ferrule holder and has at least one dimension, i.e., a thickness or width, that is different than another dimension, i.e., a height or length, of the other projection (48) on an opposite second surface.

In re claim 26, the first surface is a top surface of the main body (46) and the opposite second surface is a bottom surface of the main body (46), or vice versa.

In re claim 27, the at least one dimension could be a width of the projection (48).

In re claim 28, the at least one dimension could be a height of the projection (48).

In re claim 29, the projections (48) slidingly engage a corresponding groove (88b) in a plug (72).

In re claim 30, the projections (48) have a vertical side surface capable of aligning the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

In re claim 31, the projections (48) have a horizontal top surface capable of aligning the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

In re claim 32, Chen discloses, see Figures 1-4, a ferrule holder comprising:

a main body (46);

a central opening in the main body (46) and extending from a first end (46a) to a second end (46b) to retain a fiber optic ferrule (96) therein, the first end (46a) having an opening therein in communication with the central opening, the second end (46b) disposed opposite the first end (46a) and configured to receive optical fibers (40) therethrough; and

a projection (48) on opposite outside surfaces of the main body (46) to engage a corresponding groove in an adapter/plug (72), the projections (48) extending along a partial length of the main body (46).

In re claim 33, one of the projections (48) is on a first surface of the main body (46) of the ferrule holder and has at least one dimension, i.e., a width or height, that is different than another dimension, i.e., a height or length, of the other projection (48) on an opposite second surface.

In re claim 34, the first surface is a top surface of the main body (46) and the opposite second surface is a bottom surface of the main body (46), or vice versa.

In re claim 35, the projections (48) have surfaces to control movement of the main body (46) relative to the adapter.

In re claim 36, Chen discloses, see Figures 11-14, a ferrule holder comprising:

a main body (46);

a central opening in the main body (46) and extending from a first end (46a) to a second end (46b) to retain a fiber optic ferrule (96) therein, the first end (46a) having an opening therein in communication with the central opening, the second end (46b) disposed opposite the first end (46a) and configured to receive optical fibers (40) therethrough; and

a projection (48) on opposite outside surfaces of the main body (46) to engage a corresponding groove in an adapter, the projections (48) having surfaces capable of controlling movement of the main body (46) relative to the adapter.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar R. Rojas whose telephone number is (571)272-2357. The examiner can normally be reached on Monday-Thursday (10:00AM-08:00PM).

Examiner interviews are available via telephone, in-person, and video conferencing using a USPTO supplied web-based collaboration tool. To schedule an interview, applicant is encouraged to use the USPTO Automated Interview Request (AIR) at http://www.uspto.gov/interviewpractice.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Hollweg can be reached on (571) 218-1739. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Title:	Alignment Adapter and Alignment Design for a Connector Therefor		

Commissioner for Patents
PO Box 1450
Arlington VA 22313-1450

RESPONSE TO ELECTION/RESTRICTION and AMENDMENT

Dear Sir:

In response to the Election/Restriction Requirement mailed on May 9, 2018,

Applicant amends the application and responds as follows:

IN THE SPECIFICATION:

Please replace paragraph [0036] with the revised new paragraph:

The position of the ferrule holders **300** on the first side **106** of the adapter relative to the ferrule holders **300** on the second side **108** is what allows the optical ferrules to be aligned with one another. There is no need, as discussed above, to worry about the stacking of tolerances as in the prior art. The positioning of the projections **320,322** on the ferrule holders **300** relative to the plurality of grooves **140**, **142** is important. With reference to Figs. 7A and 7B, the projections **320,322** are used to control the x and y locations of the ferrule holders **300**. The ~~surfaces **350**~~ surfaces **340** of the projections **320,322** (Fig. 7A) align with the surfaces **150** in the adapter (Fig. 7B) to control the x direction of the ferrule holder **300** relative to the adapter **100**. The surfaces **352** of the ferrule holder **300** align with the surfaces ~~**352** of~~ **152** of the raised bottom portion **132** and the dropped top portion **134** of the center portion **110** to control the y direction of the ferrule holder **300** relative to the adapter **100**. The surfaces of the projections **320,322** could also align in the y direction, given that they are parallel to the surfaces **352**.

IN THE DRAWINGS:

Please replace FIG. 8 with the attached new FIG. 8. Applicant noticed that in FIG. 8, element 132 did not have a lead line. A lead line has been added in the replacement figure. No new matter has been added.

IN THE CLAIMS:

Claims 1-11, 14, and 18-21. Canceled.

12. (Currently Amended) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter~~, the projection on opposite outside surfaces extend from the first end rearwardly toward the second end~~.

13. (Previously Presented) The ferrule holder according to claim 12, where the projections engage a groove in a plug.

14. Canceled.

15. (Previously Presented) The ferrule holder according to claim 12, further comprising a cantilevered latch attached to an outside surface of the main body between the second end and one of the projections and extending from a center portion of the main body towards the second end.

16. (Previously Presented) The ferrule holder according to claim 12, wherein the main body has a top surface, a bottom surface and two side surfaces, the top and bottom surfaces having at least one dimension that is smaller than the two side surfaces.

17. (Previously Presented) The ferrule holder according to claim 16, further comprising a cantilevered latch attached to an outside surface of the main body and wherein the cantilevered latch and the projections are attached to one of the top surface and the bottom surface.

Claims 18-21. Canceled.

22. (New) The ferrule holder according to claim 12, wherein at least one of the projections extends from the first end rearwardly toward the second end.

23. (New) The ferrule holder according to claim 12, wherein at least one of the projections extends along a length of the ferrule holder.

24. (New) The ferrule holder according to claim 12, wherein at least one of the projections has a chamfered front end.

25. (New) The ferrule holder according to claim 12, wherein one of the projections is on a first surface of the main body of the ferrule holder and has at least one dimension that is different than the other projection on an opposite second surface.

26. (New) The ferrule holder according to claim 25, wherein the first surface is a top surface of the main body and the opposite second surface is a bottom surface of the main body, or vice versa.

27. (New) The ferrule holder according to claim 25, wherein the at least one dimension is a width of the projection.

28. (New) The ferrule holder according to claim 25, wherein the at least one dimension is a height of the projection.

29. (New) The ferrule holder according to claim 12, wherein the projections slidingly engage a corresponding groove in a plug.

30. (New) The ferrule holder according to claim 12, wherein the projections have a vertical side surface to align the ferrule holder with a vertical wall of a corresponding groove of a plug to control a horizontal direction of movement of the ferrule holder relative to the adapter.

31. (New) The ferrule holder according to claim 12, wherein the projections have a horizontal top surface to align the ferrule holder with a horizontal wall of a corresponding groove of a plug to control a vertical direction of movement of the ferrule holder relative to the adapter.

32. (New) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter, the projections extending along a length of the main body.

33. (New) The ferrule holder according to claim 32, wherein one of the projections is on a first surface of the main body of the ferrule holder and has at least one dimension that is different than the other projection on an opposite second surface.

34. (New) The ferrule holder according to claim 33, wherein the first surface is a top surface of the main body and the opposite second surface is a bottom surface of the main body, or vice versa.

35. (New) The ferrule holder according to claim 32, wherein the projections have surfaces to control movement of the main body relative to the adapter.

36. (New) A ferrule holder comprising:

a main body;

a central opening in the main body and extending from a first end to a second end to retain a fiber optic ferrule therein, the first end having an opening therein in communication with the central opening, the second end disposed opposite the first end and configured to receive optical fibers therethrough; and

a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter, the projections having surfaces to the control movement of the main body relative to the adapter.

REMARKS

In the above-referenced Office Action, the Examiner required the restriction to one of two inventions under 35 U.S.C. § 121: Invention I corresponding to claims 8-11, 14, and 18-21 and Invention II corresponding to claims 12, 13, and 15-17. Applicant chooses the apparatus claims of Invention II, corresponding to claims 12, 13, and 15-17 and added new claims 22-36. The new claims correspond to the elected Invention and further define the invention.

Applicant has also corrected some typographical errors in the specification in [0036] and in some of the claims. Applicant has also provided a revised FIG. 8 to add a lead line. No new matter has been added.

The Examiner is invited to telephone the undersigned in the event the Examiner would like to discuss the merits of the application or this response.

Respectfully submitted,

/Michael L. Leetzow/

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Office Action Summary	Application No. 15/855,788	Applicant(s) NGUYEN ET AL.	
	Examiner Omar R. Rojas	Art Unit 2883	AIA (First Inventor to File) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☐ Responsive to communication(s) filed on _____.

☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2a)☐ This action is **FINAL**. 2b)☐ This action is non-final.

3)☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

4)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims*

5)☒ Claim(s) *8-21* is/are pending in the application.

5a) Of the above claim(s) _____ is/are withdrawn from consideration.

6)☐ Claim(s) _____ is/are allowed.

7)☐ Claim(s) _____ is/are rejected.

8)☐ Claim(s) _____ is/are objected to.

9)☒ Claim(s) *8-21* are subject to restriction and/or election requirement.

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

Application Papers

10)☐ The specification is objected to by the Examiner.

11)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

a)☐ All b)☐ Some** c)☐ None of the:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

** See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☐ Notice of References Cited (PTO-892)

2) ☐ Information Disclosure Statement(s) (PTO/SB/08a and/or PTO/SB/08b) Paper No(s)/Mail Date _____.

3) ☐ Interview Summary (PTO-413) Paper No(s)/Mail Date. _____ .

4) ☐ Other: _____.

Senko Ex. 1014, Page 2 of 2 20240426
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

DETAILED ACTION

1. The present application is being examined under the pre-AIA first to invent provisions.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 8-11, 14, and 18-21 drawn to a plug to hold a plurality of ferrule holders, classified in G02B6/3879.

II. Claims 12, 13, and 15-17, drawn to a ferrule holder comprising a projection on opposite outside surfaces extend(ing) from the first end rearwardly toward the second end, classified in G02B6/3873.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require a projection on opposite outside surfaces extend(ing) from the first end rearwardly toward the second end. The subcombination has separate utility such as for connecting directly to a light source without using the plug and/or for holding different types of ferrules.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the

allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

4. Restriction for examination purposes as indicated is proper because all the inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and/or examination burden if restriction were not required because one or more of the following reasons apply:

--the inventions have acquired a separate status in the art in view of their different classification

--the inventions require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search strategies or search queries).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected invention**.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to

petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 or pre-AIA 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be corrected in compliance with 37 CFR 1.48(a) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. A request to correct inventorship under 37 CFR 1.48(a) must be accompanied by an application data sheet in accordance with 37 CFR 1.76 that identifies each inventor by his or her legal name and by the processing fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar R. Rojas whose telephone number is (571)272-2357. The examiner can normally be reached on Monday-Thursday (10:00AM-08:00PM).

Examiner interviews are available via telephone, in-person, and video conferencing using a USPTO supplied web-based collaboration tool. To schedule an interview, applicant is encouraged to use the USPTO Automated Interview Request (AIR) at http://www.uspto.gov/interviewpractice.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Thomas Hollweg can be reached on (571) 270-1739. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

NOTICE OF PUBLICATION OF APPLICATION

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publically available Searchable Databases via the Internet at www.uspto.gov. The direct link to access the publication is currently http://www.uspto.gov/patft/.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Public Records Division. The Public Records Division can be reached by telephone at (571) 272-3150 or (800) 972-6382, by facsimile at (571) 273-3250, by mail addressed to the United States Patent and Trademark Office, Public Records Division, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at www.uspto.gov using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently https://portal.uspto.gov/pair/PublicPair. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these record s.

2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.

3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.

4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).

5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.

6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).

7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.

8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.

9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications: No

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at http://www.uspto.gov/web/offices/pac/doc/general/index.html.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, http://www.stopfakes.gov. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific

Senko Ex. 1014, Page 263
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign AssetsControl, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop

technology, manufacture products, deliver services, and grow your business, visit http://www.SelectUSA.gov or call +1-202-482-6800.

STATEMENT UNDER 37 CFR 3.73(c)

Applicant/Patent Owner: US Conec, Ltd

Application No./Patent No.: 15/855,788 Filed/Issue Date: 12/27/2017

Titled: Alignment Adapter and Alignment Design for a Connector Therefor

US Conec, Ltd, a limited liability company

(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose **one** of options 1, 2, 3 or 4 below):

1. ☑ The assignee of the entire right, title, and interest.

2. ☐ An assignee of less than the entire right, title, and interest (check applicable box):

   ☐ The extent (by percentage) of its ownership interest is _____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.

   ☐ There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

3. ☐ The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

4. ☐ The recipient, via a court proceeding or the like (*e.g.*, bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.

The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose **one** of options A or B below):

A. ☑ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel 044494, Frame 0006, or for which a copy thereof is attached.

B. ☐ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

   1. From: _____ To: _____

      The document was recorded in the United States Patent and Trademark Office at

      Reel _____, Frame _____, or for which a copy thereof is attached.

   2. From: _____ To: _____

      The document was recorded in the United States Patent and Trademark Office at

      Reel _____, Frame _____, or for which a copy thereof is attached.

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

NOTICE REGARDING POWER OF ATTORNEY

This is in response to the power of attorney filed 01/14/2018. The power of attorney in this application is not accepted for the reason(s) listed below:

- The power of attorney has not been accepted because the party who is giving power has not been identified. Power of attorney may only be signed by the applicant for patent (37 CFR 1.42) or the patent owner. A party who is not the applicant must become the applicant in accordance with 37 CFR 1.46(c) and appoint any power of attorney in compliance with 37 CFR 3.71 and 3.73. For a reissue application, reexamination proceeding, or supplemental examination proceeding, a patent owner who was not the applicant under 37 CFR 1.46 must appoint any power of attorney in compliance with 37 CFR 3.71 and 3.73. See 37 CFR 1.32(b)(4).

RESPONSE TO REQUEST FOR CORRECTED FILING RECEIPT

Power of Attorney, Claims, Fees, System Limitations, and Miscellaneous

In response to your request for a corrected Filing Receipt, the Office is unable to comply with your request because:

- Any request to correct or update the name of the applicant must include an application data sheet (ADS) in compliance with 37 CFR 1.76 specifying the correct or updated name of the applicant in the applicant information section. Any request to change the applicant after an original applicant has been specified under 37 CFR 1.46(b) must include a new ADS in compliance with 37 CFR 1.76 specifying the applicant in the applicant information section and comply with 37 CFR 3.71 and 3.73. See 37 CFR 1.46(c).

Questions about the contents of this notice and the requirements it sets forth should be directed to the Office of Data Management, Application Assistance Unit, at **(571) 272-4000** or **(571) 272-4200** or **1-888-786-0101**.

Foreign Priority Information

Document Description: Application Data Sheet to update/correct info
Doc Code: ADS.CORR

****If no data is shown, no data has been corrected****

This section allows for the applicant to claim priority to a foreign application. Providing this information in the application data sheet constitutes the claim for priority as required by 35 U.S.C. 119(b) and 37 CFR 1.55. When priority is claimed to a foreign application that is eligible for retrieval under the priority document exchange program (PDX) the information will be used by the Office to automatically attempt retrieval pursuant to 37 CFR 1.55(i)(1) and (2). Under the PDX program, applicant bears the ultimate responsibility for ensuring that a copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign priority application is filed, within the time period specified in 37 CFR 1.55(g)(1).

STATEMENT UNDER 37 CFR 3.73(c)

Applicant/Patent Owner: US Conec, Ltd

Application No./Patent No.: 15/855,788 Filed/Issue Date: 12/27/2017

Titled: Alignment Adapter and Alignment Design for a Connector Therefor

US Conec, Ltd, a limited liability company

(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose **one** of options 1, 2, 3 or 4 below):

1. ☑ The assignee of the entire right, title, and interest.

2. ☐ An assignee of less than the entire right, title, and interest (check applicable box):

   ☐ The extent (by percentage) of its ownership interest is _____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.

   ☐ There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

3. ☐ The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

4. ☐ The recipient, via a court proceeding or the like (*e.g.*, bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.

The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose **one** of options A or B below):

A. ☑ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel 044494, Frame 0006, or for which a copy thereof is attached.

B. ☐ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

   1. From: _____ To: _____

      The document was recorded in the United States Patent and Trademark Office at

      Reel _____, Frame _____, or for which a copy thereof is attached.

   2. From: _____ To: _____

      The document was recorded in the United States Patent and Trademark Office at

      Reel _____, Frame _____, or for which a copy thereof is attached.

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Preliminary Class

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications: No

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at http://www.uspto.gov/web/offices/pac/doc/general/index.html.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, http://www.stopfakes.gov. Part of a Department of Commerce initiative,

this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign AssetsControl, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop

technology, manufacture products, deliver services, and grow your business, visit http://www.SelectUSA.gov or call +1-202-482-6800.

	Application Size Fee (37 CFR 1.16(s))									
	FIRST PRESENTATION OF MULTIPLE DEPENDENT CLAIM (37 CFR 1.16(j))							OR		
						TOTAL ADD'L FEE		OR	TOTAL ADD'L FEE	

* If the entry in column 1 is less than the entry in column 2, write "0" in column 3.

** If the "Highest Number Previously Paid For" IN THIS SPACE is less than 20, enter "20".

*** If the "Highest Number Previously Paid For" IN THIS SPACE is less than 3, enter "3".

The "Highest Number Previously Paid For" (Total or Independent) is the highest found in the appropriate box in column 1.

DocCode – SCORE

SCORE Placeholder Sheet for IFW Content

Application Number: 15855788 Document Date: 12/27/2017

The presence of this form in the IFW record indicates that the following document type was received in electronic format on the date identified above. This content is stored in the SCORE database.

Since this was an electronic submission, there is no physical artifact folder, no artifact folder is recorded in PALM, and no paper documents or physical media exist. The TIFF images in the IFW record were created from the original documents that are stored in SCORE.

- Drawing

At the time of document entry (noted above):

- USPTO employees may access SCORE content via eDAN using the Supplemental Content tab, or via the SCORE web page.
- External customers may access SCORE content via PAIR using the Supplemental Content tab.

UTILITY PATENT APPLICATION TRANSMITTAL

(Only for new nonprovisional applications under 37 CFR 1.53(b))

Attorney Docket No.	USCO-053-02
First Named Inventor	Hiep Nguyen
Title	Alignment Adapter and Alignment Design for a Connector Therefor
Express Mail Label No.	EFS Web

APPLICATION ELEMENTS

See MPEP chapter 600 concerning utility patent application contents.

1. [✔] **Fee Transmittal Form** (PTO/SB/17 or equivalent)
2. [ ] **Applicant asserts small entity status.** See 37 CFR 1.27
3. [ ] **Applicant certifies micro entity status.** See 37 CFR 1.29. Applicant must attach form PTO/SB/15A or B or equivalent.
4. [✔] **Specification** [*Total Pages* 13] Both the claims and abstract must start on a new page. *(See MPEP § 608.01(a) for information on the preferred arrangement)*
5. [✔] **Drawing(s)** (35 U.S.C. 113) [*Total Sheets* 10]
6. **Inventor's Oath or Declaration** [*Total Pages* 5] *(including substitute statements under 37 CFR 1.64 and assignments serving as an oath or declaration under 37 CFR 1.63(e))*
   a. [ ] Newly executed (original or copy)
   b. [✔] A copy from a prior application (37 CFR 1.63(d))
7. [✔] **Application Data Sheet** ** See note below.* See 37 CFR 1.76 (PTO/AIA/14 or equivalent)
8. **CD-ROM or CD-R** in duplicate, large table, or Computer Program (*Appendix*)
   [ ] Landscape Table on CD
9. **Nucleotide and/or Amino Acid Sequence Submission** (*if applicable, items a. – c. are required*)
   a. [ ] Computer Readable Form (CRF)
   b. [ ] Specification Sequence Listing on:
      i. [ ] CD-ROM or CD-R (2 copies); or
      ii. [ ] Paper
   c. [ ] Statements verifying identity of above copies

ADDRESS TO:

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

ACCOMPANYING APPLICATION PAPERS

10. [ ] **Assignment Papers** (cover sheet & document(s))
    Name of Assignee _____
11. [ ] **37 CFR 3.73(c) Statement** (*when there is an assignee*) [ ] **Power of Attorney**
12. [ ] **English Translation Document** (*if applicable*)
13. [ ] **Information Disclosure Statement** (PTO/SB/08 or PTO-1449)
    [ ] Copies of citations attached
14. [✔] **Preliminary Amendment**
15. [ ] **Return Receipt Postcard** (*MPEP § 503*) (*Should be specifically itemized*)
16. [ ] **Certified Copy of Priority Document(s)** (*if foreign priority is claimed*)
17. [ ] **Nonpublication Request** Under 35 U.S.C. 122(b)(2)(B)(i). Applicant must attach form PTO/SB/35 or equivalent.
18. [ ] **Other:** _____

*__Note__: (1) Benefit claims under 37 CFR 1.78 and foreign priority claims under 1.55 **must** be included in an Application Data Sheet (ADS).
(2) For applications filed under 35 U.S.C. 111, the application must contain an ADS specifying the applicant if the applicant is an assignee, person to whom the inventor is under an obligation to assign, or person who otherwise shows sufficient proprietary interest in the matter. See 37 CFR 1.46(b).

19. CORRESPONDENCE ADDRESS

[✔] The address associated with Customer Number: 152017 **OR** [ ] Correspondence address below

This collection of information is required by 37 CFR 1.53(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Additional Domestic Benefit/National Stage Data may be generated within this form by selecting the **Add** button. Add

Foreign Priority Information:

This section allows for the applicant to claim priority to a foreign application. Providing this information in the application data sheet constitutes the claim for priority as required by 35 U.S.C. 119(b) and 37 CFR 1.55. When priority is claimed to a foreign application that is eligible for retrieval under the priority document exchange program (PDX)[i] the information will be used by the Office to automatically attempt retrieval pursuant to 37 CFR 1.55(i)(1) and (2). Under the PDX program, applicant bears the ultimate responsibility for ensuring that a copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign priority application is filed, within the time period specified in 37 CFR 1.55(g)(1).

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications

☐ This application (1) claims priority to or the benefit of an application filed before March 16, 2013 and (2) also contains, or contained at any time, a claim to a claimed invention that has an effective filing date on or after March 16, 2013.
NOTE: By providing this statement under 37 CFR 1.55 or 1.78, this application, with a filing date on or after March 16, 2013, will be examined under the first inventor to file provisions of the AIA.

Application Data Sheet 37 CFR 1.76	Attorney Docket Number	USCO-053-02
	Application Number	
Title of Invention	Alignment Adapter and Alignment Design for a Connector Therefor	

Authorization or Opt-Out of Authorization to Permit Access:

When this Application Data Sheet is properly signed and filed with the application, applicant has provided written authority to permit a participating foreign intellectual property (IP) office access to the instant application-as-filed (see paragraph A in subsection 1 below) and the European Patent Office (EPO) access to any search results from the instant application (see paragraph B in subsection 1 below).

Should applicant choose not to provide an authorization identified in subsection 1 below, applicant **must opt-out** of the authorization by checking the corresponding box A or B or both in subsection 2 below.

NOTE: This section of the Application Data Sheet is **ONLY** reviewed and processed with the **INITIAL** filing of an application. After the initial filing of an application, an Application Data Sheet cannot be used to provide or rescind authorization for access by a foreign IP office(s). Instead, Form PTO/SB/39 or PTO/SB/69 must be used as appropriate.

1. Authorization to Permit Access by a Foreign Intellectual Property Office(s)

A. Priority Document Exchange (PDX) - Unless box A in subsection 2 (opt-out of authorization) is checked, the undersigned hereby **grants the USPTO authority** to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the State Intellectual Property Office of the People's Republic of China (SIPO), the World Intellectual Property Organization (WIPO), and any other foreign intellectual property office participating with the USPTO in a bilateral or multilateral priority document exchange agreement in which a foreign application claiming priority to the instant patent application is filed, access to: (1) the instant patent application-as-filed and its related bibliographic data, (2) any foreign or domestic application to which priority or benefit is claimed by the instant application and its related bibliographic data, and (3) the date of filing of this Authorization. See 37 CFR 1.14(h)(1).

B. Search Results from U.S. Application to EPO - Unless box B in subsection 2 (opt-out of authorization) is checked, the undersigned hereby **grants the USPTO authority** to provide the EPO access to the bibliographic data and search results from the instant patent application when a European patent application claiming priority to the instant patent application is filed. See 37 CFR 1.14(h)(2).

The applicant is reminded that the EPO's Rule 141(1) EPC (European Patent Convention) requires applicants to submit a copy of search results from the instant application without delay in a European patent application that claims priority to the instant application.

2. Opt-Out of Authorizations to Permit Access by a Foreign Intellectual Property Office(s)

☐ A. Applicant **DOES NOT** authorize the USPTO to permit a participating foreign IP office access to the instant application-as-filed. If this box is checked, the USPTO will not be providing a participating foreign IP office with any documents and information identified in subsection 1A above.

☐ B. Applicant **DOES NOT** authorize the USPTO to transmit to the EPO any search results from the instant patent application. If this box is checked, the USPTO will not be providing the EPO with search results from the instant application.

NOTE: Once the application has published or is otherwise publicly available, the USPTO may provide access to the application in accordance with 37 CFR 1.14.

Applicant Information:

Providing assignment information in this section does not substitute for compliance with any requirement of part 3 of Title 37 of CFR to have an assignment recorded by the Office.

Applicant 1 Remove

If the applicant is the inventor (or the remaining joint inventor or inventors under 37 CFR 1.45), this section should not be completed. The information to be provided in this section is the name and address of the legal representative who is the applicant under 37 CFR 1.43; or the name and address of the assignee, person to whom the inventor is under an obligation to assign the invention, or person who otherwise shows sufficient proprietary interest in the matter who is the applicant under 37 CFR 1.46. If the applicant is an applicant under 37 CFR 1.46 (assignee, person to whom the inventor is obligated to assign, or person who otherwise shows sufficient proprietary interest) together with one or more joint inventors, then the joint inventor or inventors who are also the applicant should be identified in this section.

This collection of information is required by 37 CFR 1.76. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 23 minutes to complete, including gathering, preparing, and submitting the completed application data sheet form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1 The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.

2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.

3 A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.

4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).

5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent CooperationTreaty.

6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).

7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.

8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.

9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

ALIGNMENT ADAPTER AND ALIGNMENT DESIGN FOR A CONNECTOR THEREFOR

BACKGROUND OF THE INVENTION

REFERENCE TO RELATED CASE

[0001] This application claims priority under 35 U.S.C. § 119 (e) to provisional application no. 61/789,499 filed on March 15, 2013, the contents of which is hereby incorporated by reference in its entirety.

FIELD OF THE INVENTION

1.There is a need for fiber optic connectors with fiber optic ferrules that are ganged together with a tight pitch between those fiber optic ferrules. Such a design allows for many fiber optic ferrules to be connected simultaneously while occupying less space. In addition, it allows the fiber optic ferrules to be organized in a prearranged routing of the optical fibers so that the complexity of fiber optic connector routing is reduced for the user. Typically, these ganged fiber optic ferrules are mounted into a single housing and the housings are then mated to one another. The alignment between a pair of ferrules to be mated is complex and requires tight tolerances because there is a tolerance stack-up that includes the true position of the fiber optic ferrule relative to the housing. By requiring a tight tolerance of the housing relative to the fiber optic ferrule, the designs are expensive to design, maintain, and to scale to various fiber optic ferrule counts. It is also difficult to scale to very large arrays of fiber optic ferrules within one housing due to the true position tolerance required for every fiber optic ferrule to the housings and also the larger distances from the fiber optic ferrules to the housings.

2.An alternative way to align the ferrules to each other is to align the ferrule holders to one another through features in the adapter. Rather than using the sides of the ferrule holder to align the ferrule holder to the adapter, top and bottom keys on the ferrule holder align the ferrule holder relative to the adapter in the x-direction. The orientation of the ferrule holder is controlled by the width difference between the top and the bottom key. The height of the ferrule holder aligns the ferrule holder in the y direction. A plug is used to assemble a

plurality of the ferrule holders together. The ferrule holders protrude through the plug so the ferrule holder features can be aligned in the adapter after the plug engages the adapter and aligns the ferrule holders with their own structures. The alignment in the X and Y directions between the ferrule holder and the adapter are maintained within 100 microns, preferably within 50 microns. The ferrule holders are relatively loosely held within the plug so as to not over constrain the ferrule holders in the adapter (greater than 100 microns). The grooves within the adapter that aligns the ferrule holders is one continuous feature for both sides of the adapter and the mating ferrule holders. By making the groove one continuous feature for both sides, the alignment the mating ferrule holders is guaranteed. The size of the groove is critical but the true position of the alignment feature relative to the adapter-to-plug alignment feature is not critical. By using this alignment mechanism, large arrays of ferrule holders can be manufactured. Only the size of the alignment mechanism in the ferrule holder and the size of the alignment mechanism in the adapter must be maintained. The true position tolerances are significantly reduced.

3.Thus, an adapter and adapter assembly with novel alignment features is provided to engage with alignment features on a plug, which is turn assists in aligning the ferrule holders with alignment grooves in the adapter.

SUMMARY OF THE INVENTION

4. The present invention is directed to an adapter for aligning fiber optic ferrules inserted from opposing sides that includes a main body having an opening extending between a first side and a second side, the first side and the second side separated by a central portion, at least one groove in a top surface and a bottom surface of the first side and the second side, and a plurality of grooves disposed in a top surface and the bottom surface of the central portion, each of the plurality of grooves extending through the central portion from the first side to the second side.

5. According to another aspect of the present invention, adapter assembly for aligning one plurality of optical ferrules to another plurality of optical ferrules includes an adapter having an opening extending between a first side and a second side, the adapter having a plurality of

Senko Ex. 1014, Page 310
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

grooves in the opening and extending in a direction from the first side to the second side, a plurality of ferrule holders, each of the plurality of ferrule holders having a central opening extending from a first end to a second end to resiliently retain a fiber optic ferrule therein, each of the plurality of ferrule holders having an opening in first end and in communication with the central opening, the second end opposite the first end and through which optical fibers extend, each of the plurality of ferrule holders having a projection on opposite outside surfaces to engage a corresponding groove in the adapter, and a plug having an outside surface and an inside surface, the inside surface defining an opening through the plug to hold a plurality of ferrule holders therein adjacent one another, the plug having grooves in the inside surface to engage the projections from the plurality of ferrule holders to align and orient the ferrule holders in the plug.

6.In yet another aspect, a ferrule holder includes a main body having a central opening to resiliently retain a fiber optic ferrule therein, a central opening in the main body and extending from a first end to a second end to resiliently retain a fiber optic ferrule therein, the first end having an opening therein and in communication with the central opening, the second end opposite the first end and through which optical fibers extend, and a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter.

7.The present invention is also directed to a fiber optic connector that includes a plurality of ferrule holders, each of the plurality of ferrule holders having a central opening extending from a first end to a second end to resiliently retain a fiber optic ferrule therein, the ferrule holder having an opening in first end in communication with the central opening, the second end opposite the first end and through which optical fibers extend, each of the plurality of ferrule holders having a projection on opposite outside surfaces to engage a corresponding groove in the adapter, and a plug having an outside surface and an inside surface, the inside surface defining an opening through the plug to hold a plurality of ferrule holders therein adjacent one another, the plug having grooves in the inside surface to engage the projections from the plurality of ferrule holders to align and orient the ferrule holders in the plug

8.Additional features and advantages of the invention will be set forth in the detailed description which follows, and in part will be readily apparent to those skilled in the art from that description or recognized by practicing the invention as described herein, including the detailed description which follows, the claims, as well as the appended drawings.

9. It is to be understood that both the foregoing general description and the following detailed description of the present embodiments of the invention, and are intended to provide an overview or framework for understanding the nature and character of the invention as it is claimed. The accompanying drawings are included to provide a further understanding of the invention, and are incorporated into and constitute a part of this specification. The drawings illustrate various embodiments of the invention and, together with the description, serve to explain the principles and operations of the invention.

BRIEF DESCRIPTION OF THE DRAWINGS

10. Fig. 1 is a perspective view of one embodiment of an adapter assembly according to the present invention;

11. Fig. 2 is an exploded view of the adapter assembly of Fig. 1;

23.Fig. 9 is a cross sectional view of the adapter assembly through a ferrule holder and ferrule.

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS

24. Reference will now be made in detail to the present preferred embodiment(s) of the invention, examples of which are illustrated in the accompanying drawings. Whenever possible, the same reference numerals will be used throughout the drawings to refer to the same or like parts.

25. Referring to Figs. 1 and 2, one embodiment of an adapter assembly **10** is illustrated. The adapter assembly **10** includes an adapter **100**, a plug **200** and a ferrule holder **300**. The adapter assembly **10** is used to align ferrules **12** to other ferrules in a tightly controlled manner and in a tighter space than has been possible before. The ferrules **12** are typically multi-fiber ferrules, particularly MT type ferrules, but the present invention may include other types of ferrules. The ferrules **12** are disposed within the ferrule holder **300** and have optical fibers **14** secured therein, which may be loose optical fibers, ribbonized optical fibers, or optical fibers in any other configuration. The ferrules **12** are resiliently held in the ferrule holders **300** using a spring push **16** that engages a spring **18**. The spring **18** then presses on a pin keeper **20**, as is known in the art, to bias the ferrules **12** forward in the ferrule holder **300**. As is described in more detail below, the ferrules **12** are held somewhat loosely within the ferrule holder **300** so that they can move relative to the ferrule holder **300** to align with other ferrules **12** that are inserted in the adapter **100** from the other side. Similarly, the ferrule holders **300** are inserted into the plug **200** and they are also loosely held in the plug **200**. That is, there is typically more than **100** microns of movement in the x and y directions (See Fig. 4.) available to the ferrule holder **300** in the plug **200**, as explained in more detail below.

26.As illustrated in Figs. 5A-C, the ferrule holder **300** has a main body **302** with a central opening **304** that extends from a first end **306** to a second end **308** to house the fiber optic ferrules **12**. The first end **306** has an opening **310** therein to allow access to the ferrule **12**. The ferrule **12** may or may not exit the main body **302**. That is, the ferrule **12** may extend beyond the main body **302** as shown in the figures or it may be flush with the first end **306**.

Senko Ex. 1014, Page 313
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

second end 308 allows for the optical fibers **14** (shown in Fig. 5A and 5B to have a boot and a covering) to exit the ferrule holder **300**. The ferrule holder **300** has a top surface **312** and a bottom surface **314**, with a cantilevered latch **316** to engage the plug **200**. The top surface **312** has a projection **320** and the bottom surface **314** has a projection **322**. The projections **320,322** are preferably elongated and have a chamfered front end. The projections **320,322** are used to engage grooves in the plug **200** and the adapter **100** to position the ferrule holders **300** with precision in the adapter **100**. The projection **320** has a width that is different that the width of projection **322** so as to act as a key in inserting the ferrule holder **300** in the plug 200. While the projection **320** is wider than projection **322**, it could be opposite in that projection **320** is more narrow than projection **322**. The projections **320,322** are preferably on the top and the bottom surfaces **312,314** of the ferrule holder **300** to allow, as illustrated below, more ferrule holders to be inserted into the adapter **100** and the plug **200**. The projections **320,322** are used to position the ferrules **12** in the adapter in the x and y directions, eliminating the need for side walls to position the ferrule holders **300** and the ferrules **12**.

27.The plug **200** will now be described relative to Figs. 6A-6C. The plug **200** has an outside surface **202** and an inside surface **204**. The inside surface **204** defines an opening **206** therethrough to allow the ferrule holders **300** to be inserted therein. The inside surface **204** has a plurality of grooves **208** on a top side **210** and a corresponding plurality of grooves **212** on the bottom side **214**. The grooves **208** and **212** are dimensioned to accept the projections **320,322** from the ferrule holders **300**. It should be noted that the ferrule holders **300** are adjacent to one another, that is side-by-side without any material from the plug **200** therebetween. Applicant means that by using the term adjacent herein, there is no structure that comes between the neighboring ferrule holders **300**.

28.The outside surface **202** also has a projection **220** on the top of the plug **200**, seen in Fig. 6A, and also a projection **222** on the bottom of the plug **200**, seen in Fig. 6B. Again, as with the projections **320,322**, projection **220** has a width that is different that the width of projection **222** so as to act as a key in inserting the plug **200** into the adapter **100**. While the

Senko Ex. 1014, Page 314
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

projection **220** is narrower than projection **222**, it could be opposite in that projection **220** is wider than projection **222**.

29.The plug **200** also has two cantilevered latches **230** on the sides to engage corresponding structure on the adapter **100**. There are also latch receptacles **232** on the top side of the plug **200** to engage the latches **316** of the ferrule holders **300**.

30.As noted above, the grooves **208** and **212** in plug **200** are dimensioned to accept the projections **320,322** from the ferrule holders **300**. There is sufficient movement in the ferrule holders **300** relative to the plug **200** that when the plug **200** and ferrule holders **300** as assembled is inserted into the adapter **100**, that the ferrule holders **300** can move to allow the projections **320,322** from the ferrule holders **300** to engage corresponding grooves in the adapter **100** as described below in more detail.

31.Returning to Figs. 3 and 4, the adapter **100** is illustrated in more detail. The adapter **100** has a main body **102** with an opening **104** extending between a first side **106** and a second side **108**. The first side **106** and a second side **108** are separated by a central portion **110**. The first side **106** has a top surface **112** and a bottom surface **114**. The top surface **112** has a groove **116** and the bottom surface **114** has a groove **118**. The grooves **116,118** correspond to the projections **220,222** from the plug **200**. The location of the wider groove in the adapter **100** will correspond with the wider projection on the plug **200**.

32.The adapter has the center portion **110**. Center portion **110** preferably has a wall **130** that extends across the opening **104** in the adapter **100** and divides the center portion **110** in half. The center portion **110** also has a raised bottom portion **132** and a dropped top portion **134** that narrows the opening **104** in the center portion **110**. The wall **130** preferably extends from the raised bottom portion **132** and a dropped top portion **134** or it may be excluded completely if there is no EMI concerns with the adapter **100**. The wall **130** has a plurality of openings **136** that are sized to allow the ferrules **12** to pass therethrough to engage a corresponding ferrule **12**. As noted above, if the ferrules **12** only extend to the end of the ferrule holder **330**, then the openings **136** should be sized to allow the ferrule holders to also extend therethrough. The adapter **100** may also have an elastomeric gasket **150** that encircles an external surface of the adapter **100** to provide EMI shielding.

Senko Ex. 1014, Page 315
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

33.The raised bottom portion **132** and a dropped top portion **134** also have a plurality of grooves **140**, **142**, respectively, that extend completely across the central portion **110**. The grooves **140**, **142** are like those in the plug **200**, in that they are to engage the projections **320,322** from the ferrule holders **300**. The grooves **140**,**142** preferably extend completely across the center portion **110** as they are formed with the same insert in the mold. Therefore, the grooves **140**,**142** are sure to align the ferrule holders **300** on each side of the adapter **100** as they are inserted into the adapter **100**.

34.As the plug **200** with the ferrule holders **300** positioned therein are inserted into the adapter **100**, the projections **220,222** from the plug **200** engage the grooves **116,118** on the top surface **112** and the bottom surface **114** to roughly align the ferrule holders **300** with the center portion **110** and the plurality of grooves **140** in particular. Then, as the plug **200** is inserted farther into the adapter **100**, the projections **320,322** from the ferrule holders **300** engage plurality of grooves **140**, **142** to align the ferrule holders **300** with the adapter and the openings **136** in the wall **130**. When a plug **200** is inserted on the second side, the ferrules in the ferrule holders on the other side will be in alignment with the first side.

35.The position of the ferrule holders **300** on the first side **106** of the adapter relative to the ferrule holders **300** on the second side **108** is what allows the optical ferrules to be aligned with one another. There is no need, as discussed above, to worry about the stacking of tolerances as in the prior art. The positioning of the projections **320,322** on the ferrule holders **300** relative to the plurality of grooves **140**, **142** is important. With reference to Figs. 7A and 7B, the projections **320,322** are used to control the x and y locations of the ferrule holders **300**. The surfaces **350** of the projections **320,322** (Fig. 7A) align with the surfaces **150** in the adapter (Fig. 7B) to control the x direction of the ferrule holder **300** relative to the adapter **100**. The surfaces **352** of the ferrule holder **300** align with the surfaces **352** of the raised bottom portion **132** and the dropped top portion **134** of the center portion **110** to control the y direction of the ferrule holder **300** relative to the adapter **100**. The surfaces of the projections **320,322** could also align in the y direction, given that they are parallel to the surfaces **352**.

Senko Ex. 1014, Page 316
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

36.A cross section of the adapter assembly **10** is illustrated in Fig. 8 through the center of the adapter assembly. This illustrates the projections **220,200** in the openings **116,118** of the adapter **100**. Fig. 9 is a cross sectional view of the adapter assembly 10 through a ferrule holder and ferrule illustrating the engagement of the projections **320,322** in the openings **140**, **142**.

37.It will be apparent to those skilled in the art that various modifications and variations can be made to the present invention without departing from the spirit and scope of the invention. Thus it is intended that the present invention cover the modifications and variations of this invention provided they come within the scope of the appended claims and their equivalents.

Senko Ex. 1014, Page 317
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

We claim:

1. An adapter for aligning fiber optic ferrules inserted from opposing sides comprising:

a main body having an opening extending between a first side and a second side, the first side and the second side separated by a central portion;

at least one groove in a top surface and a bottom surface of the first side and the second side; and

a plurality of grooves disposed in a top surface and the bottom surface of the central portion, each of the plurality of grooves extending through the central portion from the first side to the second side.

2. The adapter according to claim 1, further comprising a wall disposed within and across the central portion of the main body and between the first side and the second side, the wall having at least one passage therein to allow at least a portion of the fiber optic ferrules inserted from the first and second sides to pass therethrough.

3. The adapter according to claim 1, wherein the at least one passage comprises a plurality of passages, the plurality of passages corresponding to the number of fiber optic ferrules and providing EMI shielding.

4. The adapter according to claim 1, wherein the opening in the central portion of the main body is smaller than the opening in the first and second sides.

5. The adapter according to claim 1, further comprising an conductive elastomeric gasket encircling an external surface of the adapter to provide EMI shielding to the adapter.

6. The adapter according to claim 1, wherein the first and second sides are configured to receive a plurality of optical ferrules.

Senko Ex. 1014, Page 318
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

7. The adapter according to claim 1, wherein the plurality of grooves in the top surface of the central portion have a first width and the plurality of grooves in the bottom surface of the central portion have a second width, and the first and second widths are different.

8. An adapter assembly for aligning one plurality of optical ferrules to another plurality of optical ferrules comprising:

an adapter having an opening extending between a first side and a second side, the adapter having a plurality of grooves in the opening and extending in a direction from the first side to the second side;

a plurality of ferrule holders, each of the plurality of ferrule holders having a central opening extending from a first end to a second end to resiliently retain a fiber optic ferrule therein, each of the plurality of ferrule holders having an opening in first end and in communication with the central opening, the second end opposite the first end and through which optical fibers extend, each of the plurality of ferrule holders having a projection on opposite outside surfaces to engage a corresponding groove in the adapter; and

a plug having an outside surface and an inside surface, the inside surface defining an opening through the plug to hold a plurality of ferrule holders therein adjacent one another, the plug having grooves in the inside surface to engage the projections from the plurality of ferrule holders to align and orient the ferrule holders in the plug.

9. The adapter assembly according to claim 8, wherein the outside of the plug has at least one projection to engage a groove in the opening in the adapter to align the plug in the opening in the adapter.

10. The adapter assembly according to claim 9, wherein the projection on the outside of the plug engages the groove in the adapter before the projections on the plurality of ferrule holders engage the plurality of grooves in the adapter.

11. The adapter assembly according to claim 8, wherein the grooves act as a keyway.

Senko Ex. 1014, Page 319
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

12. A ferrule holder comprising:

a main body having a central opening to resiliently retain a fiber optic ferrule therein;

a central opening in the main body and extending from a first end to a second end to resiliently retain a fiber optic ferrule therein, the first end having an opening therein and in communication with the central opening, the second end opposite the first end and through which optical fibers extend; and

a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter.

13. The ferrule holder according to claim 12, where the projected also engage a groove in a plug.

14. A fiber optic connector comprising:

a plurality of ferrule holders, each of the plurality of ferrule holders having a central opening extending from a first end to a second end to resiliently retain a fiber optic ferrule therein, the ferrule holder having an opening in first end in communication with the central opening, the second end opposite the first end and through which optical fibers extend, each of the plurality of ferrule holders having a projection on opposite outside surfaces to engage a corresponding groove in the adapter; and

a plug having an outside surface and an inside surface, the inside surface defining an opening through the plug to hold a plurality of ferrule holders therein adjacent one another, the plug having grooves in the inside surface to engage the projections from the plurality of ferrule holders to align and orient the ferrule holders in the plug.

Senko Ex. 1014, Page 320
Senko Advanced Components v. US Conec Ltd.
IPR2024-00805

ALIGNMENT ADAPTER AND ALIGNMENT DESIGN FOR A CONNECTOR THEREFOR

ABSTRACT OF THE DISCLOSURE

An adapter with novel alignment features engages alignment features on a plug, providing general alignment of the ferrule holders and ferrules in the plug. After the plug engages the adapter, the ferrule holders engage a second set of alignment features in the adapter to provide fine alignment for the ferrules.

Title:	Alignment Adapter and Alignment Design for a Connector Therefor	)	

Commissioner for Patents
PO Box 1450
Arlington VA 22313-1450

PRELIMINARY AMENDMENT

Prior to the Examination of the present application and calculation of fees, Applicant amends the application as follows:

IN THE SPECIFICATION:

Please replace the first paragraph with the following revised paragraph:

This application claims priority under 35 U.S.C. § 119 (e) to provisional application no. 61/789,499 filed on March 15, 2013, and also claims priority to U.S. Patent Application No. 14/214,931 filed on March 15, 2014, under 35 U.S.C. § 120, the contents of ~~which is~~ which are hereby incorporated by reference ~~in its~~ in their entirety.

IN THE DRAWINGS:

Please replace all of the prior drawings with the replacement drawings attached hereto. Applicant has replaced the drawings with better wire-form drawings with the reference numerals correctly applied. No new matter has been added.

IN THE CLAIMS:

Claims 1-7. Canceled.

8. (Currently Amended) An adapter assembly for aligning one plurality of optical ferrules to another plurality of optical ferrules comprising:

an adapter having an opening extending between a first side and a second side, the adapter having a plurality of grooves in the opening ~~and extending in a direction from the first side to the second side~~;

a plurality of ferrule holders, each of the plurality of ferrule holders having a central opening extending from a first end to a second end to resiliently retain a fiber optic ferrule therein, each of the plurality of ferrule holders having an opening in first end and in communication with the central opening, the second end opposite the first end and through which optical fibers extend, each of the plurality of ferrule holders having ~~a projection~~ at least two surfaces on opposite ~~outside surfaces~~ sides to engage a corresponding groove in the adapter; and

a plug having an outside surface and an inside surface, the inside surface defining an opening through the plug to ~~hold a~~ hold the plurality of ferrule holders therein adjacent one another, the plug having grooves in the inside surface to engage the ~~projections~~ from the plurality of ferrule holders to align and orient the ferrule holders in the plug.

9. (Original) The adapter assembly according to claim 8, wherein the outside of the plug has at least one projection to engage a groove in the opening in the adapter to align the plug in the opening in the adapter.

10. (Original) The adapter assembly according to claim 9, wherein the projection on the outside of the plug engages the groove in the adapter before the projections on the plurality of ferrule holders engage the plurality of grooves in the adapter.

11. (Original) The adapter assembly according to claim 8, wherein the grooves act as a keyway.

12. (Currently Amended) A ferrule holder comprising:

a main body ~~having a central opening to resiliently retain a fiber optic ferrule therein~~;

a central opening in the main body and extending from a first end to a second end to ~~resiliently~~ retain a fiber optic ferrule therein, the first end having an opening therein ~~and~~ in communication with the central opening, the second end disposed opposite the first end and ~~through which~~ configured to receive optical fibers therethrough ~~extend~~; and

a projection on opposite outside surfaces of the main body to engage a corresponding groove in an adapter, the projection on opposite outside surfaces extend from the first end rearwardly toward the second end.

13. (Currently Amended) The ferrule holder according to claim 12, where the ~~projected~~ projections ~~also engage~~ engage a groove in a plug.

14. (Currently Amended) A fiber optic connector comprising:

a plurality of ferrule holders, each of the plurality of ferrule holders having a central opening extending from a first end to a second end to resiliently retain a fiber optic ferrule therein, the ferrule holder having an opening in first end in communication with the central opening, the second end opposite the first end and through which optical fibers extend, each of the plurality of ferrule holders having a projection on opposite outside surfaces to engage a corresponding groove in the adapter; and

a plug having an outside surface and an inside surface, the inside surface defining an opening through the plug to ~~hold a~~ hold the plurality of ferrule holders therein adjacent one another, the plug having grooves in the inside surface to engage the projections from the plurality of ferrule holders to align and orient the ferrule holders in the plug.

15. (New) The ferrule holder according to claim 12, further comprising a cantilevered latch attached to an outside surface of the main body between the second end and one of the projections and extending from a center portion of the main body towards the second end.

16. (New) The ferrule holder according to claim 12, wherein the main body has a top surface, a bottom surface and two side surfaces, the top and bottom surfaces having at least one dimension that is smaller than the two side surfaces.

17. (New) The ferrule holder according to claim 16, further comprising a cantilevered latch attached to an outside surface of the main body and wherein the cantilevered latch and the projections are attached to one of the top surface and the bottom surface.

18. (New) The adapter assembly according to claim 8, wherein the opening has a central portion between the first side and the second side, the opening in the central portion being smaller than the opening in the first side and the second side, the plurality of grooves including a first groove in a top surface and a second groove in a bottom surface of both the first and second sides and a first plurality of grooves in a top surface and a second plurality of grooves in a bottom surface of the central portion.

19. (New) The adapter assembly according to claim 18, wherein the first groove is configured to engage a first projection on the plug and the second groove is configured to engage a second projection on the plug.

20. (New) The adapter assembly according to claim 18, wherein the first and second plurality of grooves extend across the central portion.

21. (New) The adapter assembly according to claim 18, wherein the first groove in the top surface and the second groove in the bottom surface extend completely through the opening.

REMARKS

The present application has been filed to pursue additional subject in the parent application. Applicant has also submitted all new drawings as were filed in the parent case. No new matter was added to the replacement drawings.

The Examiner is invited to telephone the undersigned in the event the Examiner would like to discuss the merits of the application or this response.

Respectfully submitted,

/Michael L. Leetzow/

DECLARATION (37 CFR 1.63) FOR UTILITY OR DESIGN APPLICATION USING AN APPLICATION DATA SHEET (37 CFR 1.76)

Title of Invention	**ALIGNMENT ADAPTER AND ALIGNMENT DESIGN FOR A CONNECTOR THEREFOR**

As the below named inventor, I hereby declare that:

This declaration is directed to:

☐ The attached application, or

x United States application or PCT international application number 14/214,931

filed on March 15, 2014.

The above-identified application was made or authorized to be made by me.

I believe that I am the original inventor or an original joint inventor of a claimed invention in the application.

I have reviewed and understood the contents of the application, and

I am aware of the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR § 1.56.

I hereby acknowledge that any willful false statement made in this declaration is punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both.

WARNING: Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

LEGAL NAME OF INVENTOR

Inventor: Jitka Wakira Date (Optional): 7/28/2014

Signature: Jitka Z. Wakira

Note: An application data sheet (PTO/SB/14 or equivalent), including naming the entire inventive entity, must accompany this form. Use an additional PTO/AIA/01form for each additional inventor.

DECLARATION (37 CFR 1.63) FOR UTILITY OR DESIGN APPLICATION USING AN APPLICATION DATA SHEET (37 CFR 1.76)

Title of Invention	**ALIGNMENT ADAPTER AND ALIGNMENT DESIGN FOR A CONNECTOR THEREFOR**

As the below named inventor, I hereby declare that:

This declaration is directed to:

□ The attached application, or

x United States application or PCT international application number 14/214,931

filed on March 15, 2014.

The above-identified application was made or authorized to be made by me.

I believe that I am the original inventor or an original joint inventor of a claimed invention in the application.

I have reviewed and understood the contents of the application, and

I am aware of the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR § 1.56.

I hereby acknowledge that any willful false statement made in this declaration is punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both.

WARNING: Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

LEGAL NAME OF INVENTOR

Inventor: Darrell R. Childers Date (Optional): 7/28/2014

Signature: Darrell R. Childers

Note: An application data sheet (PTO/SB/14 or equivalent), including naming the entire inventive entity, must accompany this form. Use an additional PTO/AIA/01form for each additional inventor.
