Add or remove AT&T Turbo

The AT&T Turbo add-on provides our best experience by improving network data performance.

What to know

AT&T Turbo¹ puts network resources directly into your hands. It gives you the choice to purchase an improved level of service to help benefit high-performance mobile apps like mobile gaming when on the AT&T network (excludes roaming and Wi-Fi®).

AT&T Turbo helps the performance of your data connection. It does not provide extra data and does not apply to messaging or voice. If you go over your existing data limits, your normal network management applies.

Eligibility info

You can get AT&T Turbo to boost your wireless plan's high-speed and hotspot data to performance data if you have a 5G smartphone and one of these plans:

- AT&T Premium® PL (Unlimited high-speed data + 60GB hotspot data)
- AT&T Extra® EL (75GB high-speed data + 30GB hotspot data): After 75GB, AT&T may temporarily slow speeds if the network is busy.
- Select AT&T Elite® (Unlimited high-speed data + 40GB hotspot data): Only the AT&T Unlimited Elite plan that was eligible to be included in an Unlimited Your Way group. Not sure if you have an eligible Elite plan? If your bill or online account indicates that you have one or more lines on the **Unlimited Elite – [#] lines plan**, then those lines are eligible to add AT&T Turbo.

Purchase it for one or multiple lines on your account as a per-line, per-month \$7 charge.
