--	--

Here's how to update carrier settings for your iPhone.

NOTE

Carrier settings updates are small files that are installed on iOS devices. The carrier settings include updates to Access Point Names (APNs), MMS settings, features like tethering and default apps. Having the most up to date carrier settings is recommended for the proper functionality of the device.

1. Open the **Settings app** on your Apple® iPhone®.
2. Tap **General**.
3. Tap **About**.
If an update is available, an option appears to update.
To view the current carrier info, refer to [View Carrier \(/support/knowledge-base-206960/\)](#).
