A new paradigm for RF Micro-needling. SYLFIRM X. Dual wave in one device.

MALE 1: Refresh and revitalize skin at any age. Dual wave RF micro-needling system, SYLFIRM X. With the combination of radio frequency and micro-needling is ideal to regenerate skin once again. A needle tip produced with robot manufacturing method, provides a more effective treatment of skin lesion. And by delivering the high frequency energy more precisely to the target through a variety of treatment tips. As the bipolar RF energy is delivered through the non-insulating needle in the shape of a water drop, creating precise injury to the selected area without damages in the surrounding tissue. The SYLFIRM X needle depth enables effective treatment not only for the face, but also for the body by directly targeting skin at various depths. The unique 300 micrometer 0.3 multiple myeloma needle depth helps to fortify the basement membrane and induces neocollagenesis. It delivers a constant amount of energy with stable RF waveform and enables effective procedure without side effects. SYLFIRM X is the only dual wave in one device. PW mode selectively delivers heat to blemishes like small blood vessel and the basement membrane, delivering the appropriate energy to the skin in a short interval of time. PW mode has shown in multiple studies to address diffused redness and small blood vessels as well as superficial pigmentation. CW mode delivers a curated continuous pulse of energy to address larger volume of tissue in the dermis. CW mode is ideal for collagen remodeling through thermal coagulation. SYLFIRM X effectively treats skin concerns for all ages and skin types by offering eight different preset modes and parameters that can be selected depending on lesion being treated.

Before and After. Melasma. Facial Redness. Acne Scars. Wrinkles on décolletage.

MALE 1: SYLFIRM X's FDA approval in the U.S. and CE approval in Europe is supported by over 20 publications, including a scientific report published in the Nature Publishing Group. Dual wave RF micro-needling system SYLFIRM X has become an effective treatment for all ages and skin types around the world. SYLFIRM X.
